

Big Oak Tree State Park

BOARDWALK TRAIL

Boardwalk Trail showcases many of Big Oak Tree State Park's natural communities and a champion pumpkin ash tree. The boardwalk is an elevated walkway constructed in 2006. The trail begins near the day-use area within a fire-maintained, wet mesic woodland community of oak, hickory and sugarberry trees, and giant cane, then passes through a bottomland forest of bald cypress and pumpkin ash trees. The trail ends at an observation deck overlooking a marsh/shrub swamp community with swamp privet, buttonbush, swamp locust and large black willows. The observation deck and elevated boardwalk afford the opportunity to be in the middle of a swamp without getting your feet wet.

Benches are located approximately half-way along the boardwalk and at the observation deck. These areas provide visitors the opportunity to rest and observe the wildlife found in Big Oak Tree State Park.

Rules of Boardwalk Trail

Boardwalk Trail is for hiking only. Bicycles and all-terrain vehicle equipment are prohibited on all trails at Big Oak Tree State Park. Because the boardwalk is elevated and has an abrasive metal surface, running is also prohibited.

Keep properly hydrated during warmer weather and carry enough water for a one-to two- hour hike. Water fountains are located at the beginning of the boardwalk and in the picnic area.

Mosquitoes are common and can be very abundant during the late spring, summer, and early fall. Insect repellent, long-sleeved shirts and pants will help make their disturbance minimal during your hike.

Please help keep state parks natural by discarding waste items in trash receptacles located at the beginning of the boardwalk. Cans and plastic bottles should be placed in recycle bins to help minimize the impact on landfills and preserve natural resources.

Distance: 0.7 Mile

Uses:

Hiking

Accessible

Blazes:

Blue

Class: Linear

Surface Type: Boardwalk

Trail Rating: Easy

Estimated Hiking Time: 20 Minutes

Trailhead & GPS Location:

36.64392, -89.28780

TRAIL BLAZE COLORS & SURFACE TYPES

The maps on this website indicate the blaze colors for each trail. If more than one trail shares tread, that portion of the trail is identified by more than one color. The surface type of a trail is indicated on the maps generated by this website by a pattern overlapping the blaze color of the trail.

TRAIL TYPE – Loop, Multi-loop, One Way, System or Multi-section

A **loop** trail is one that will return you to the trailhead. **Multi-loop** trails offer two or more separate loops, ex. a trail having a north and south loop. A **one-way** trail takes you from the trailhead to the farthest point on the trail and you will have to retrace your steps to return to the trailhead. If you plan to return to your starting point on a one-way trail, you will have to double the distance to calculate your estimated mileage and/or hiking time.

A **trail system** is a series of interconnected trails that allow you to choose your own route.

A **Multi-section** trail offers two or more separate sections, ex. Katy Trail State Park, and distances are shown both for the entire trail and the sections.

- 1 Slippery conditions and/or downed vegetation
- 2 Natural surface: dirt, mud, gravel, shifting rocks, slippery surface, etc.
- 3 Rocks, roots and/or downed vegetation on trail
- 4 Low-hanging vegetation
- 5 Physically challenging obstacles
- 6 Wood or stone steps
- 7 Steep grades and inclines over 10%
- 8 Bluffs or drop-offs next to trail
- 9 Bridges and/or structural crossings
- 10 Water/stream crossings without bridges
- 11 Occasional water over trail
- 12 Road/Highway crossing
- 13 Emergency response signs
- 14 Narrow passages
- 15 Raised or protruding obstacles
- 16 Electric fence crossings
- 17 Bison/elk
- 18 Rapidly changing weather conditions
- 19 Motorized boat traffic
- 20 Unexpected waves
- 21 Changing water levels
- 22 Surface or submerged objects

YOU MAY EXPERIENCE

These conditions are all things you may encounter while on a Missouri state parks trail. Trailhead signs at the start of each trail also indicate which conditions exist on that trail.

ESTIMATED HIKING TIME

The estimated hiking time was determined by considering the average user's speed and the conditions that might be experienced on a specific trail. Your speed may be slower or faster than the time listed.

GPS COORDINATES

There are several methods of communicating GPS coordinates. Most GPS units will convert from one coordinate system to another. If you require a different coordinate system for your unit, visit dnr.mo.gov/gisutils/ to convert the coordinates shown on this map to another version.

NATURAL AREAS / WILD AREAS

Natural areas are identified in pink. Natural areas are recognized as the best remaining examples known of Missouri's original natural environments. These natural areas are managed and protected for their scientific, educational and historical values. Missouri state parks have 38 designated natural areas, encompassing almost 22,000 acres.

Wild areas are identified in brown. The Missouri Wild Area System is made up of large tracts of land set aside as wilderness, which make the perfect setting for hiking and backpacking. A wild area must be 1,000 or more acres in size, show little impact from humans, and possess outstanding opportunities for solitude. They are strictly protected for their wilderness benefits as well as for their use for environmental education and scientific study.
