42 Further Description of Important Features Originally had 2 towers of unequal size but eastern tower was raised during 1920's so both are equal today. Building has such features as a boxed pedimented cornice in front and arcading in the two towers. A belt course runs between first and second floor. A front porch with 3 Roman arches was added during the 1920's and an exterior porch was also added. The windows are almost all in the same location although				
<div> </div>				
43 History and Significance This was the first building constructed for Central Methodist, although some of Howard-Payne is older and was for a then-separate institution. Brannock was begun in 1856 as "THE COLLEGE" building intended to serve all the needs of the college. Subscriptions for the building fell short by \$6,000. It took almost 20 years to clear this debt. The college opened its doors on September 18, 1857 with a				
44 Description of Environment and Outbuildings Brannock sits in the center of a grassy mall. The front (South) facade faces Spring Street and overlooks the City of Fayette. 'Originally Main Street ran from the front of Brannock to the edge of town. Holt Hall is northeast of the building and the church complex is to the northwest across a grassy mall.

faculty of 3 persons. Enrollment was 144 the first year; tuition was \$12.50 per session. The Civil War disrupted life on the campus and although the school was ordered closed, Carr W. Pritchett (later of Pritchett Institute #15) and several others conducted classes in Brannock in an attempt to keep the college going. The Board of Curators agreed so long as the College wasn't financially or academically responsible for the students. From 1864 to 1865 Union garrison troops occupied the building. Legend says the first floor was a stable, the second floor a barracks and the third floor a hospital. After the war the building was repaired and the college officially re-opened in 1870. By 1878 the campus had grown and new buildings erected plus the campus contained over 10 acres. A new church named Centenary Chapel was constructed and Brannock Hall no longer served as a church as well as a college building. In 1911 Brannock became a dormitory for men and the building was named Brannock Hall in honor of T. Y. Brannock of Nevada, Missouri, who donated the money (\$10,000) for the renovation. At this time the first porches were built between the towers. In the late 1920's new facilities were built for the men and Brannock Hall became a building for the administration on the first two floors while the Art Department and classrooms occupied the third. By 1964 the college realized the necessity for an administration building. As the oldest building on the original Central campus Brannock Hall was remodeled and strengthened with interior supports and today is still the center of the campus. Certainly this building must be one of the oldest college buildings still being used for its original purpose in Missouri.

student meditations. Fortunately, this addition is barely visible from the mall due to the slope of the land.

43. Continued

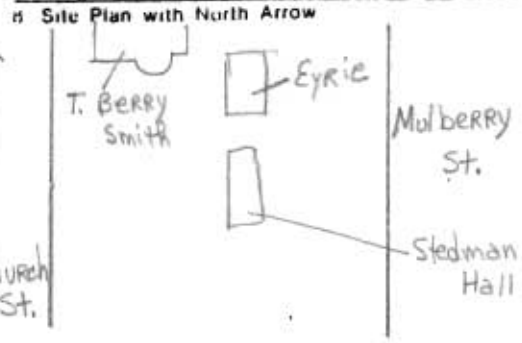

Eventually a telephone was installed on the second floor but the other floors had open doors. Supposedly, a young man would be talking to his girl on the phone and his "friends" would go up to the floor above and quietly opening the doors pour a bucket of water on the hapless victim. This trick was known around campus as "receiving a gift from heaven." In 1926, a new men's dormitory was constructed and Cupples Hall was remodeled for the library. Steel girders were installed to hold shelving and stacks. The library was named in memory of George M. Smiley, class of 1881. In 1968 a new addition was constructed on the rear of the building.

44. Continued

the west. The addition to the east of the library abuts Spring Street.

42 Further Description of Important Features Givens Hall is a typical Federal home originally of red brick with a 2 story porch. Other features include a nice Federalist entryway and decorated lintels above the front windows on both stories. Much of the detail has been covered with white paint. Originally a home, the building has been converted into offices on the lower floor and guest rooms on the second. The 2 story porch on the rear of the house was enclosed		27 Other Surveys in Which Included Missouri Historic Sites Catalogue by Dorothy Caldwell, 1963	39 Endangered? By What? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	
43 History and Significance Adam Hendrix was first treasurer of the Central Methodist College Board of Curators. The Hendrix family came to Fayette early and were devout Methodist. They acquired land and rose in prominence in community affairs, eventually selling off part of their land to the college. After the Civil War, Adam Hendrix served on a special committee to re-open the college and raise the necessary funds to repair the buildings.		40 Visible from Public Road? at an unknown time. Some of the original woodwork including the interior window shutters are still in place. The central floating staircase winds three stories to the attic and features carving. Work is currently on progress on some of the interior rooms to restore them.

43. Continued

In 1878, Eugene Russell Hendrix, son of Adam and Isabella Hendrix became President of Central Methodist; in 1886 he became Bishop of the Methodist Episcopal Church, South. The house became the home of the President of Howard-Payne College, although the exact date is unknown. After Howard-Payne merged with Central Methodist the building was remodeled and named Mary Kring Givens Hall after the first graduate of Howard-Payne College. It was used as a residence for female professors until World War II, when it was the infirmary of the V-12 unit of the U.S. Navy. In 1953, it was once again remodeled as a guest house and offices for the faculty were placed on the first floor. This must be the oldest building on campus.

found that the north wing built in 1856 had been constructed of soft brick which had weakened with age. Thus, this wing was razed and all the porches were removed until the building looks like a skeleton of its former self. The interior has been modernized also. Many alumnae were outraged at the remodeling.

During the 1920's an addition known as the south wing was constructed. **This evidently was done after Howard-Payne merged with Central Methodist College.**

43. Continued

Trustees of the High School agreed to give the site of the high school which burned in 1854 to the Curators of Central Methodist if the Curators would give the High School \$5,000.00 for the erection of a new school building. This was done and the building was joined to the dormitory, being the first addition to Howard-Payne Hall (1856). The burning of the Howard High School caused the separation of classes. The school had been co-educational, a rarity for that time. After the building burned the women held class in the boarding house which eventually evolved into Howard-Payne and the men, led by Carr W. Pritchett, held class wherever they could find a room in town and finally became the nucleus of Central Methodist College.* The school closed in 1864 due to the Civil War. In 1865, Pritchett reopened Howard High School in the Howard Female College Building as the boarding house was then termed (now Howard-Payne Hall). It was 1870 before Howard Female College (as opposed to the high school) re-opened, but there was a heavy debt due to repairs and refurnishings. Rev. Moses U. Payne paid off the debt and restored the property to the Methodist Church on the condition that the school be conducted on the manual labor plan. This proved impractical so Payne modified his conditions to say that the school would admit only women and that it would be conducted as the Methodist church saw best. Sometime between 1888 and 1892 Howard-Payne Hall received a four story structure of brick at the east end. The new rooms were for dormitory purposes. In June 1892 the college was re-named Howard-Payne College in honor of Rev. Moses U. Payne who had done so much for the school. Since Howard-Payne and Central Colleges were separated by only a fence the schools were close physically and emotionally as many brother-sister combinations attended the schools and many marriages were of couples from the 2 schools. A merger of the schools seemed desirable and in September 1922 Howard-Payne became part of Central. The building became a dormitory but by 1957 it was sadly in need of repair and was a fire hazard. The building was ordered remodeled and the Epple Construction Company was once again called upon. Men moved into the south wing, but two years later a new men's dormitory was constructed and the building once again houses only women. Certainly, this building is important as one of the oldest college buildings still in use. Thousands of women received a college education in Howard-Payne Hall in a time when higher education for women was still frowned upon by large segments of the population.

*Howard Female College was incorporated and approved by the Legislature on March 12, 1859.

42 (Continued)

Chronograph is on loan to the Smithsonian Institute in Washington, D.C.

Dome is from original observatory in Glasgow in 1875 and operates on revolving track. The rim is cast iron covered with sheet metal.

Mrs. Susan K. Green donated telescopes belonging to Robert Green to Central Missouri Astronomer's Association which was incorporated in 1964.

Balconies dot the second floor at regular intervals complete with black iron grillwork. Quoins are on the ends of the house and the observatory. The house is the south part of the complex with the equipment on the north and a one story lecture room between them.

43 (Continued)

Miss Morrison. Pritchett had taught at Howard High School before it became Howard-Payne and after Civil War, largely because of Swinney, founded a school in Glasgow, 14 miles north and west of Fayette on Missouri River--Pritchett School Institute. Because of the articles Pritchett and son Henry wrote, Morrison Observatory became known all over the world. Jupiter was an area of especial interest and the belts and spots of Jupiter were extensively studied. In fact, Carr Waller Pritchett was among the first to study the red spot on Jupiter. The elder Pritchett retired in 1905 and there wasn't enough income from the Endowment to hire a successor so the observatory fell into disuse and Pritchett Institute eventually closed in 1922. The \$50,000 endowment to the Institute then went to the Observatory but trustees were the same and they decided money should be to aid public schools of Glasgow. In 1926 Central went to court to secure ownership on claim that money was to be used for higher education and circuit court agreed on the condition that Central repair the building and restore it to use. Dr. Arthur S. Fairley, graduate of Princeton, became Director and in 1928 Dr. Robert R. Fleet succeeded him. Fleet determined to make the observatory viable and since it was 14 miles from campus this presented problems. After looking into all the legal aspects it was determined that the Observatory could legally be moved to Fayette and so with the aid of Berniece Morrison Fuller court proceedings were begun and in 1936 the court authorized the removal of the Observatory to Fayette and the endowment to Central Methodist. In 1934 the Carnegie Foundation for the Advancement of Teaching donated \$17,000 and Dr. and Mrs. Sanford Cresap gave generously so that 7 acres of ground was purchased at the edge of Fayette, and a new observatory was constructed using the old dome. A residence for the director was included in this complex with the observatory being dedicated June 1, 1936. The building is open to the public and is still in use for astronomy classes.

glass and at the end of the front facade is a modified buttress. The sides of the church are identical with modified buttresses forming 6 bays with another large stained glass window rising the entire height of the church in the first bay, then 4 bays with smaller stained glass windows with a clerestory above and the final bay being covered by an open arcade which connects the church to the 2 flanking buildings. Cross Memorial Tower (sheet #12) is at the rear of the church. The interior of the church is unchanged since it was constructed and features a balcony and enough oaken pews to hold approximately 1,000 people. The apse has an elevated choir loft with Wick organ under a 2 centre arche filled with organ grill-work. The ceiling imitates the traditional Medieval beamed roof from England. Carvings and images of "disguised symbolism" abound within the sanctuary. The stain glass windows were restored and re-leaded in 1978.

43 (Continued)

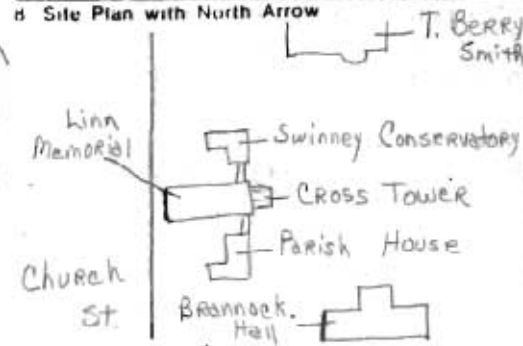

obvious that the local congregation couldn't hope to build a church without the college so in 1926 the Central College Development Program began with a new church complex as part of the over-all design. The college agreed to build the church if the local congregation would pay for the Sunday School addition called the Parish House. The local congregation would use the church as they had used Centenary Chapel. At first the building committee thought the old church could be re-conditioned and flanked by the Parish~~House~~ and a conservatory, money having recently been donated for one. However, Centenary Chapel was found to be structurally unsound and so it was decided to raze it and build a new church, but keep the same idea of a church-conservatory-Parish House context. The old church was pulled down in 1928 and the remains were dumped in a ravine where Stedman Hall of Science now stands. The basement and foundation for the new church were excavated before the 1929 stock market crash. Construction then halted due to lack of funds. Everyone worked to clear the debt and finish the church. The church was completed by 1931 and the debt was finally cleared in 1946. Today, the church is used by the community and college and provides a blend for area residents to meet townspeople and vice versa. It is also an excellent example of how a college and community can work together.

43 History and Significance The college and the local Methodist congregation shared facilities as early as 1870. When the old Centenary Chapel was slated for demolition it was obvious that the local congregation couldn't finance a new church without assistance from the college. It was agreed by a joint committee of Curators and local churchmen that the conference and college should build the church while the local congregation		46 Prepared by M. 42. (Cont.) Three dormers with no overhand gables space the front of the building.

43. (Cont.) would pay for the religious education building or parish house. The congregation and college entered into an agreement allowing the congregation use of the church for worship, etc. and the congregation would maintain the Parish House. Ground was broken for the building on October 25, 1926 and the cornerstone was laid in January, 1927. In September 1927 the local minister wrote that the congregation was "rejoicing to be able to hold Sunday School in the new building." The interesting fact about this building is that it was important in the development of cooperation between the local community and the college.

42 Further Description of Important Features Outstanding example of Victorian educational building complete with tower with parapet having brass spindles and a hexagon roof over the tower with slate ribs. Center of building features a half-rotunda and a squat tower to the right with a plain entablature between the second and third stories. The entrance is through a porch flanked by 4 Corinthian pilasters on each side of the steps and 3 Corinthian pilasters on				
43 History and Significance This building was designed in 1890 and the estimate of cost was \$80,000. It took several years to raise the money. Land was purchased (over 6 acres) on the north side of the campus and the private residences on the land was moved. By 1891 money was flowing into the coffers. At the 4th Educational Convention, Bishop Eugene Russell Hendrix (son of the builders of Givens Hall [#3] told of plans for the (over)

a pier adjacent to the door. The plain entablature on the front is embellished with egg and dart molding and 2 marble torches plus the phrase "Apply thine heart unto instruction and thine ears to the words of knowledge." Above the porch the tower rises with 2 bays of windows in an arcade. To the left is a small pier capped by a bronze semi-circular cone and contains a miniature parapet to the larger tower. Belt courses separate the first (basement) and second stories and the third and fourth floors. The windows on the fourth floor feature semi-circular arches and placement of the windows does not coincide with the bays of the lower stories except in the rotunda. Terra cotta medallions with the head of a famous person in art, music, literature or science in bas relief formed a band around the building. These have since been removed. In 1965 the building was modernized.

43 (continued)

new edifice. "Our plans are large and wise. . . let there arise. . . on the beautiful site reserved for that purpose, the noble College Hall, which shall have the necessary modern appliances and facilities such as a great Church can provide. . . "

The laying of the cornerstone on June 17, 1893 was the occasion of a large parade from Main Street to the building site. Bands, lodges, clubs, etc. marched to the building site where masonic rituals laid the cornerstone. The keynote speaker was W. G. Wilson, Postmaster General of the United States and a mason. The crowd was estimated at 5,000 persons. When Science Hall (now T. Berry Smith Hall) opened in 1896, all the college classes were held in the building and the preparatory classes were moved to Brannock. The library, chapel, Stephens Museum, laboratories and literary societies also moved into the building. This reflected a change in educational philosophy with less emphasis placed on the classics and more emphasis on science and contemporary events.

By 1901 the building was paid for. The building remained at the hub of campus life as over the years other class buildings drained away different departments. By 1964 Science Hall was in need of remodeling and the Eppler Construction Company completely remodeled the building. The building was re-named T. Berry Smith Hall. T. Berry Smith was a science professor and humanitarian at Central Methodist for many years. The Social Sciences, business and the museum are now housed in the building.
