REFERENCE NUMBER	A. HISTORIC NAME	B. COUNTY	C. ADDRESS
	Hickory Hills Farm Complex Farm House	Jackson	47th Street Kansas City
<p>The frame farm house was constructed at the top of the hill south of the log house and was used as the caretakers residence during the years the farm was owned by Mr. Gossett. The original section of the house (which is one and one half stories with a one story section to the north) contain the sleeping and living areas. The apparent additions to the house include the kitchen and bathroom to the north, and the porch to the east. Both the original house and the additions were built on rubble limestone foundations with a basement under the kitchen and one story section of the original house only. A cistern was also added in the ground under the porch floor. Stone steps lead down from the porch to stone lined paths that connect to the front gate and drive and down the hill to the log house. This house sustained fire damage on the northwest corner of the kitchen probably from a wood burning stove that once stood there.</p> <p>The squared and coursed rubble limestone foundation walls support the balloon framed structure of the house. The exterior of the walls is covered with beveled siding with 4" of the board exposed. This siding was trimmed around the doors and windows and at all corners with 4" trim pieces. The exterior was painted. The types of windows and doors on this structure are difficult to determine because of the deteriorated state of the structure. The roof is currently composed of asphalt shingles with one gutter on the north side which deposits water into the cistern.</p> <p>Plumbing in the house was limited to the kitchen/bathroom addition and a hot water heater was added at some time. The house was wired for electricity but no evidence of a heating system other than stoves was found. Interior finishes include lath and plaster in the original part of the house with gypsum board walls in the addition. Wallpaper was used as a wall covering and the floors are hardwood.</p>

MISSOURI HISTORIC BUILDING INVENTORY FORM - CONTINUATION SHEET

PAGE NO.

REFERENCE NUMBER	A. HISTORIC NAME Hickory Hills Farm Complex Large Barn	B. COUNTY Jackson	C. ADDRESS 47th Street Kansas City
------------------	--	----------------------	---------------------------------------

This barn was used for hay storage and winter livestock protection. A frame addition to the southeast is a Grade A milk barn. This barn has rubble limestone walls with wood center support posts and a wood end gable and trusses. The main floor and loft spaces were used for hay storage. A drive through runs the length of the barn from the northwest to the south east. Access is through sliding double doors at each end. Due to a rapid drop in grade the barn has a partial lower story which runs the full length of the northeast elevation. Another lower room, approximately 16' x 20' is under the southeast corner. The lower level can be accessed by large Roman-arched openings in the northwest and southeast elevations. There is no evidence of windows on the northeast elevation. The southwest elevation has square windows evenly spaced. Square windows flank each side of the double doors on the facade (northwest) elevation; there is no evidence of windows on the southeast elevation. An earthen ramp with a concrete walkway beneath, leads up to the double doors on the southeast elevation. The configuration of the milk barn addition and the livestock pens on the southwest elevation are unclear due to their state of deterioration. This barn was deemed a hazard by the school district and the roof was pulled down.

MISSOURI HISTORIC BUILDING INVENTORY FORM - CONTINUATION SHEET

PAGE NO.

REFERENCE NUMBER	A. HISTORIC NAME Hickory Hills Farm Complex Log House	B. COUNTY Jackson	C. ADDRESS 47th Street Kansas City
------------------	---	----------------------	---------------------------------------

The log structure on the Hickory Hills Farm property has apparently seen many changes over time. As it stands today, it is a dog trot plan with frame additions on the north and east sides. The logs on the exterior were at some point covered with wood clapboards. The fireplace in the house is on the west side of the original log structure. Another stove chimney was added with the kitchen addition. The northeast addition has collapsed except for the lime stone basement and the south wall of the original log structure. The west half has rough- hewn log rafters, while the east side has milled lumber. Old records indicate the east and west halves of the structure may have been brought here from other sections of the property and joined together. A full length porch once existed on the south side of the house and brick pavers (in a herringbone pattern) form the floor surface between the two log rooms.

Plumbing in the house was apparently limited to the bathroom in an addition. The house was wired for electricity, but no evidence of a heating system other than a stove and fireplace was found.

MISSOURI HISTORIC BUILDING INVENTORY FORM - CONTINUATION SHEET

PAGE NO.

REFERENCE NUMBER	A. HISTORIC NAME	B. COUNTY	C. ADDRESS
	Hickory Hills Farm Complex Shed	Jackson	47th Street Kansas City
<p>The shed has five foot high rubble lime stone walls that are embedded into the hillside. A wood frame structure was constructed on top of these walls with a gable roof. The two gable end walls each contain three four light awning windows and the whole structure is sheathed in beveled siding. A small loft area is found under the roof with a steep wooden stair leading to it. The entrance is on the north side spanning the width of the structure.</p>

MISSOURI HISTORIC BUILDING INVENTORY FORM - CONTINUATION SHEET

PAGE NO.

REFERENCE NUMBER	A. HISTORIC NAME	B. COUNTY	C. ADDRESS
	Hickory Hills Farm Complex Small Barn	Jackson	47th Street Kansas City
<p>This structure which is just east of the farm house was recently rebuilt by the school district. The building was not restored according to HABS standards. Structural steel, masonite, and plywood siding were used in the reconstruction, and glass windows with shutters were installed. A concrete floor slab was also added, though it appears the original studs and rafters still remain. It appears the original use for this barn was as a garage though now it is used as a temporary classroom and storage.</p> <p>This building is rectangular with a gabled roof. The small barn is entered through either one of two large sliding doors, one on the south facade and one on the north facade. There is also a small square window on each of these facades as well as three square windows each on the east and west facades.</p>

MISSOURI HISTORIC BUILDING INVENTORY FORM - CONTINUATION SHEET

PAGE NO.

REFERENCE NUMBER	A. HISTORIC NAME	B. COUNTY	C. ADDRESS
	Hickory Hills Farm Complex Spring House	Jackson	47th Street Kansas City
<p>The spring house is constructed of rusticated random ashlar limestone on the south and east sides while the north and west sides are of squared and coursed rubble limestone. The difference in the stone type may be attributed to the possible reuse of stone from the grist mill that may have once stood here. Different types of arches were utilized for each of the windows and doors. These include a solid lintel, a jack arch, and a standard arch. Although different type of arches were used, it is interesting to note that not all of the arches have keystones.</p> <p>The simple gable roof of the spring house was constructed of wood with asphalt shingles and a red clay tile ridge cap. The spring house is a two level structure with a ground level entrance on each level. An exterior stone stair leads from the upper level door on the east side of the south facade to the lower level door on the corner of the east facade. The spring itself ran through this lower level into a floor-level pool which was used to cool the spring house and flowed out through a pipe in the wall to the collecting pool below.</p>

MISSOURI HISTORIC BUILDING INVENTORY FORM - CONTINUATION SHEET

PAGE NO.

REFERENCE NUMBER	A. HISTORIC NAME Hickory Hills Farm Complex Stone Shelter	B. COUNTY Jackson	C. ADDRESS 47th Street Kansas City
------------------	---	----------------------	---------------------------------------

The stone shelter built across the meadow to the northeast of the farmhouse was constructed of rubble limestone. Only two of the interior stone columns remain standing. It appears that animals were kept in the north side of the building because metal gate pins are still visible in the two remaining columns. Also, the surrounding terrain and the openings in the east and west walls make it look as if either carriages or farm equipment were pulled in under the roof for protection. The portions that remain of the south wall show that the building was made up of seven bays, the end two of which are smaller than the other five.
