42 Further Description of Important Features Two garage bays are placed at the south end of the east iacade. Three, multipaned square wincows are placed at the north end. A band of soldier course bricks extends across the facade above the windows and garage bays. Stone coping terminates the building. An addition extends the building to the north, from the northwest corner of the building.

une indine(5,

43 History and Significance The 1st tenant of this building was the plumbing division of the National Trade School. In 1953 the building housed the Wilson-Jones Company, manufacturers of loose-leaf devices. By 1956 it was the site of the Federal Stationery Company. More recently it housed the Police Garage.

44. Description of Environment and Outbuildings Surface parking lots are east and south of this building. To the north is a commercial building. Another commercial building is to the west.

42. Further Description of Important Features The building sited on the corner of East 16th Street and Cherr has its main entrance door canted at the junction of these two streets. The east facade has been substantially altered with a one-story brick office extension which is surmounted by a metal grill. The north facade remains unaltered with the exception of brick filling the apertures on the first story. The parapet wall features a molding which extends around the perimeter and projections on the east facade. An addition was made to the rear of the buildin in 1949, while the front was added to and remodeled in 1959.

43. History and Significance The building was constructed for real estate developer John F. Burkhardt. The building was occupied by commercial enterprises on the first story, while the second story served a residential purpose.

44. Description of Environment and Outbuildings Surface parking areas are south and west of this building. To the north is a commercial building. A surface parking lot is to the east, also.

42 Further Description of Important Features The building is sited at the southeast corner of East 17th Street and Cherry. The first story of the west facade contains a centrally placed entrance flanked by storefront panels. At the south corner is another entrance which features a radiating brick voussoir surround. The fenestration of both the west and north facades is with segmental arch windows with stone lugsills. The parapet wall is decorated with ornamental brick banding.

43. History and Significance

The early history of this building is unknown, but it probably housed a small commercial business (such as a grocery or meat market) with residential space on the second floor. In 1926 it housed the R.E. Storms grocery

44. Description of Environment and Outbuildings Structure. Surface parking areas are to the south and east.

43 History and Significance Holmes Square Park, consisting of the block bounded by Cherry, Holmes, 18th and 19th Streets, was the first of the city's public parks acquired under the Park system. The park was eventually purchased by the K.C. Power & Light Company. In 1968-69 a substation was built on the block to serve the increasing needs of the surrounding area. The design of the substation consciously aimed for aesthetic appeal.

44. Description of Environment and Outbuildings Commercial buildings are to the north, south, east and west of this block.

42 Further Description of Important Features The building faces east onto Cherry. Coursed stone provides the foundation for the building. The entrance to the building is centrally placed and pedimented. Double brackets support the pediment. Rectangular windows flank the doorway and feature stone lugsills and keystone. Brick quoining occurs on the corners of the building. A projecting cornice extends across the east facade.

42 Further Description of Important Features The main facade faces west on Cherry and is characterized by a garage bay placed at the north end and the remainder of the wall surface fenestrated with rectangular multipaned windows. An entry door is placed at the south end. The parapet wall is embellished by decorative brick work laid in a diamond pattern. The roof line is visible from the street and is of a "bow-string" type.

43. History and Significance This was built as a garage for Dick's Transfer Service.

44. Description of Environment and Outbuildings Other commercial buildings are north, south, east, and west of this structure.

42 Further Description of Important Features The main facade faces west, where a loading dock extends along the length of the 1st floor. Brick piers divide the upper floors into bays which are fenestrated with multipaned, hinged windows. The building was designed by the engineering department of the Atlantic & Pacific Tea Company, located in Jersey City, New Jersey. The consulting engineer was Hans Von Unwerth.

Atlantic

8

Pacific Tea Company

43. History and Significance This was built as a warehouse for the Atlantic and Pacific Tea Company. By 1941 it was the Company's general office and bakery. The building contains 100,000 square feet of space.

44. Description of Environment and Outbuildings A commercial building is north of this structure. A commercial building is also to the east. To the south are the Terminal Railroad tracks. A surface parking area is to the west.

42 Further Description of Important Features This residence was dramatically altered by a 1981 remodeling which involved the addition of extensive ornamentation to the house. A porch, with a pent roof, extends across the facade. Turned wood columns support the porch roof. The entrance is recessed at the north end of the west facade. Above the entrance, on the second floor, is a door leading to the flat porch roof, which is balustraded. Decorative shingles are used in the gable wall surface.

43. History and Significance This house was moved to its present location in 1908 from the area of 24th and Wyandotte, which was being cleared for the construction of Union Station.

44 Description of Environment and Outbuildings A commercial building is east of this residence. To the north and south are other residences. To the west is a surface parking lot.

42 Further Description of Important Features The entrance is centrally located on the west facade. A light colored brick is used as quoining and to provide string courses across the building. Balconies with metal rails project from the end bays of the 2nd and 3rd floors, supported by brick piers on the 1st floor. The present facade treatment is the result of a 1980 alteration.

43. History and Significance One of a pair of apartments, side-by-side, constructed by W. W. Arnold.

44. Description of Environment and Outbuildings An identical apartment is to the north. Vacant land is to the west. To the south is another apartment building. A residence is to the east.

42. Further Description of Important Features The building faces east onto Cherry and is divided into three sections by a projecting central bay flanked by two receding wings. The center bay contains an entrance that is terminated in a lintel of radiating brick voussoirs. The windows flanking the entrance bay possess brick sills. There are entrances into each of the two side bays. The hipped roof is pierced in the center by a louvered cupola. Part of the structure was built to contain storage space for playground equipment.

43. History and Significance

The land where Hawthorne Park sits was purchased by the City in 1899 as part of the Gillham Road right-of-way. When the traffic flow was restructured in the 1930's, it left this empty block. The City decided to develop it as a park in 1945, and a neighborhood council picked the name in recognition of the state flower of Missouri. The park was dedicated in June of 1949.

44. Description of Environment and Outbuildings The Juvenile Justice Center is to the east. The park itself extends to the north, south, and west.

42 Further Description of Important Features In a recent remodeling, the concrete block facade was veneered with a pebble aggregate. The central entrance door features a narrow, vertical glass pane. Two windows of similar design are on each side of the entrance. A metal garage addition was placed at the rear of the building, extending to the south, in 1968.

2

General Carburetor Service

43. History and Significance This building was constructed to house the General Carburetor Service.

44. Description of Environment and Outbuildings Vacant land is west of this building. To the north is a surface parking lot. An apartment building is to the east. To the south is another commercial building.

42 Further Description of Important Features The building is sited on a sloping grade. The main facade faces west. The first story contains a series of storefronts that have been filled in with corrugated metal. A canted entrance is at the southwest corner of the building and another entrance is on the west facade. The second story is separated from the first by a string cours of brick laid in soldier course. The multipaned windows on the second story are enframed by brick laid in soldier course. The center bay which contains a single rectangular window is flanked by brick pilasters that are capped with stone. The parapet wall raises in a bow over the center bay.

43. History and Significance In 1920 John Boehm purchased the vacant St. John's Evangelical Lutheran Church at this site and converted it into a dye works. He replaced the church with this structure in 1927 at a cost of \$20,000. Two store fronts originally occupied the 1st floor, with the dye works on the 2nd floor. Boehm was a wholesaler, doing work for retail cleaning and dyeing shops.

44. Description of Environment and Outbuildings Residences are north and east of this building. To the west is a commercial building. Longfellow School is to the south.

42. Further Description of Important Features Metal siding has been used to join and visually unite two buildings. Several entrance doors and windows are located on the 1st floor. Five rectangular windows fenestrate the south end of the main (east) facade. A metal shed roof completes the building. A two-story addition was placed on the rear of the building in 1926.

Chine

14dille12

43 History and Significance a four-unit apartment, was constructed in 1911. The date of the other building is unknown, but may have been a residence constructed in 1908.

44. Description of Environment and Outbuildings A residence is south of this structure. Vacant land is to the east. To the west is a surface parking area. Another commercial building is to the north.

42 Further Description of Important Features The main facade faces south, and the recessed entrance is located at the southeast corner. In an unusual arrangement, the 2nd story overhang serves as the porch roof. Turned wooden balusters extend along the perimeter of the corner porch which is supported by a coursed stone base. Fenestration of the brick first story is by rectangular windows. The cornice is decorated by a denticulated molding.

43. History and Significance This is one of a group of houses on this block built for William Rockhill Nelson, founder of the <u>Star</u> newspaper. The 1st resident of this house was George H. Loomis, an insurance agent.

44. Description of Environment and Outbuildings This row of houses develped by Nelson is on a north-south street, with their front facades facing south. They are built on alternate lots, providing large front yards. Other residences are to the north, south, east and west of this house.

42. Further Description of Important Features The residence is unusually sited on the lot it occupies in that it possesses two main facades. The central entrance to the residence is placed at the corner, at the junction of the south and west facades. A one story entrance porch is contained by the extension of the second story above it. The first story is brick, and the second story is of frame construction.

43. **History and Significance** This is one of a group of houses on this block built for William Rockhill Nelson, founder of the <u>Star</u> newspaper. This was originally the home of architect John Van Brunt.

44. Description of Environment and OutbuildingsOn a north-south street, this row of houses features south facing facades. They are built on alternate lots, providing large front yards. Other residences are east, west, and south of this house. To the north is a surface parking lot.

¹³ History and Significance This building was constructed as the result of a land-sharing agreement between Our Lady of Sorrows Catholic Church and Hallmark Cards, Inc. In return for allowing Hallmark to develop church owned land north of the church building, Hallmark agreed to build this replacement rectory to house the church's three priests. It replaced a rectory that had been constructed in 1907.

4. Description of Environment and Outbuildings The Rectory is connected to the Church to the south by an open walkway. Surface parking areas are to the west and east. A drive leading to the Hallmark Corporate Entrance is to the north.

42 Further Description of Important Features The church exhibits a late use of the Romanesque Revival style of architecture characterized by the use of round arches and flanking square towers of differing heights. The church faces east onto Gillham Road and its entrance is composed of an arcaded porch with balustered flat roof. The spring of the arches is faced with terra cotta and embellished with decorative moldings. A rose window pierces the central section which peaks in the center and is embellished with a corbelled arcade. Flanking towers are placed at the north and south ends. The 146 foot south tower features decorative diagonal brickwork and round arch arcade. The tower terminates in a square projection that (cont'd)
43 History and Significance This church was founded in 1890 by German Catholics. Their previous church was located where Union Station now stands. The Union Station project claimed the old church site, so property was purchased at 25th and Gillham Road to relocate the parish. In 1907 a school was located on the new property, west of the church location, which has since been destroyed. A monastery was also erected in 1907, north of the church site (2552 Gillham Road). Ground was not broken for the church building until March, 1922. The (cont'd)

44 Description of Environment and Outbuildings A commercial building is south of this church. To the east is a group home for juveniles. A rectory, connected to the church by an open walkway, is to the north. To the west is a surface parking lot.

On each side of the entrance bay, 3 story open porches project. A flat root covers the porches and is carried across the central bay. Stone is used for decorative trim, for the entrance surround, and for sills and transoms. The basement windows of the main facade approvet in rounded arches. An addition to the rear, 1st floor is noted.

43. History and Significance The first owner of this apartment building was E. J. Washer.

44. Description of Environment and Outbuildings Vacant lots are to the south and west. To the north and east are commercial buildings.

42. Further Description of Important Features

The building is irregular in shape with a central, projecting bay. A band of storefront panes extends across the building. The base of the building is veneered with brick, with a soldier course below the windows.

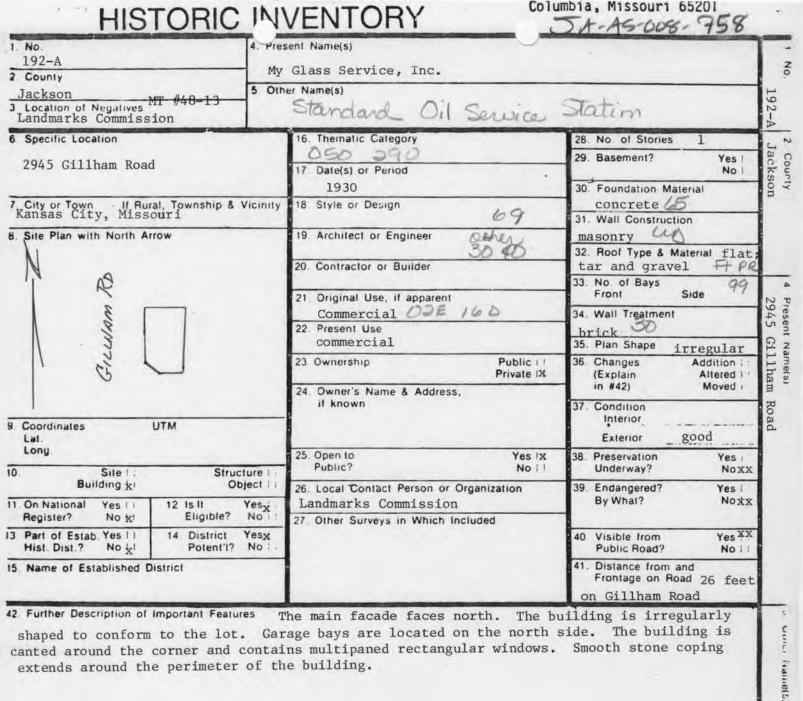

43. History and Significance This building was constructed for the used car department of the Greenlease Motor Car Company, whose primary building was to the immediate west.

44. Description of Environment and Outbuildings A large surfaced lot extends in front (west) south, and north of this building. To the east is a commercial building.

42 Further Description of Important Features A coursed stone veneer is applied to the east facade which enframes the central doorway and storefront panes. The parapet, which consists of a wooden panel, displays signage. The parapet wall steps down as the building extends westward on the lot. An addition was placed at the rear of the building in 1955.

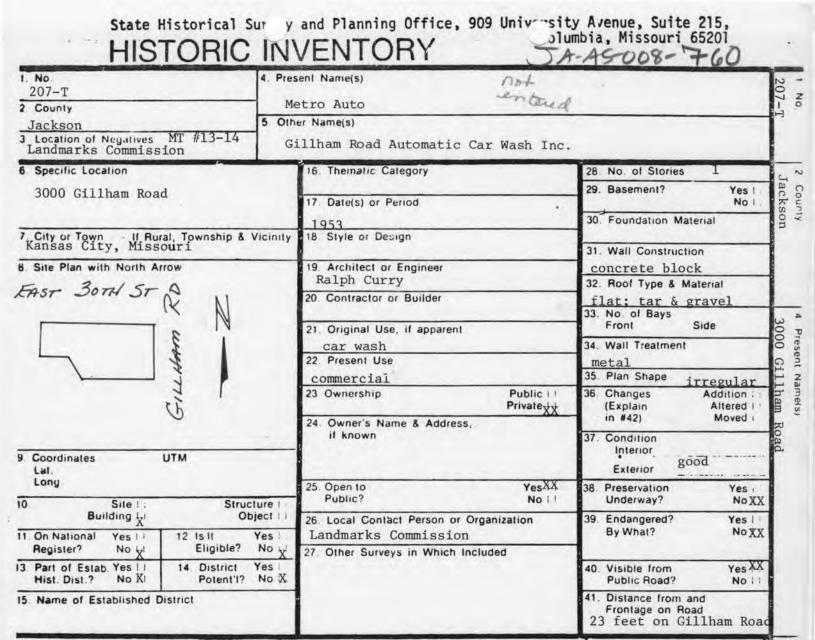

43. History and Significance The 1946 building permit was issued to Louis Rockford for a fruit stand. However, the 1st appearance of the building in the city directories is in 1950 as the Hyde Park Fruit Market.

44. Description of Environment and Outbuildings A surface parking lot is north of this building. Commercial buildings are to the east and south. At a step grade rising on the west is vacant land.

42 feet on Gillham Rd.

42 Further Description of Important Features The building faces west onto Gillham Road. The west block of the building is approximately one-half story less in height than the major block of the building which extends east on the lot. The window area of a display room on the west facade has been covered with corrugated metal. A one story storage facility projects on the north.

43. History and Significance This building was constructed for the Covert Engineering Company, a firm dealing in heating and air conditioning equipment.

44 Description of Environment and Outbuildings A surface parking lot is north of this building. To the east are other commercial buildings. An apartment building is to the west. Another surface parking area is to the south.

42 Further Description of Important Features The entrance is canted at the northwest corner of the building. Entrance doors are also located on the west facade. Plate glass windows line this facade and continue on the north facade for a short distance. A metal panel runs across the parapet wall above these windows & also covers a square tower above the corner entrance.

- voice Hame(5,

43. History and Significance This building was first occupied by a branch of Western Auto Supply.

44. Description of Environment and Outbuildings Surface parking lots are south and east of this building. To the north is an interstate connector. A commercial building is to the west.

42. Further Description of Important Features Glass panes and an entrance at the south end of the building characterize the first floor. A decorative molding placed at the sides of the building runs vertically from the 1st through 2nd stories. Terra cotta banding occurs across the 2nd floor wall surface and is punctuated by rectangular windows. The cornice area features deforative band courses, and the parapet wall is distinguished by rectangular panels with bakusters carved in high relief.

42. Further Description of Important Features

A modern facade, of unknown date, constitutes a major alteration to this building. A double, glass entrance door is at the north end of the facade. At the south end is another glass entry. Plate glass windows are placed between the doors. Two, double windows fenestrate the 2nd floor.

43 History and Significance This building originally consisted of commercial space on the first floor, with living quarters on the second floor. The earliest known tenant (1885) was the William Muehlebach Saloon.

44. Description of Environment and Outbuildings Surface parking lots are east and west of this building. Other commercial buildings are to the north and south.

42 Further Description of Important Features The building is located at the northeast corner of form and Grand. Store fronts of fixed panes fenestrate the building. Placed between the panes and at the corners of the building are decorative pilasters. A shaped parapet wall with stone coping terminates the building. Decorative rectilinear and geometric motifs ornament the cornice.

43. History and Significance Numerous commercial concerns have occupied the storefronts of this building since the time of its construction.

44. Description of Environment and Outbuildings Surface parking lots are south and east of this structure. To the north and west are other commercial buildings.

42. Further Description of Important Features The east facade is fenestrated with glass store front panes. Entrances are placed at the north and south ends of the building. Terra cotta is placed at the corners of the ground story and terminates in ornate scroll-like capitals. The second story is fenestrated with 6 rectangular windows and transoms. Ornate terra cotta moldings surround them. The parapet wall is shaped and terminates in terra cotta coping. The foundation was constructed to support a seven-story building.

inci indinels,

43. History and Significance The earliest known tenant of this building (1912) was the Mitchell Motor Company. The building was constructed for the Belfast Investment Company.

44. Description of Environment and Outbuildings Other commercial buildings are to the north and west of this structure. A surface parking lot is to the east. To the south, below grade, is an area used for parking and storage.

42. Further Description of Important Features

a proscenium arch motif forms a frame around the window area. Docorative blocks are interspersed around the frame. Most of the window area was filled in with metal paneling in 1982. A double glass entry door is at the north end of the west facade. The parapet wall is decorated.

43. History and Significance This building originally housed the Bond Motor Company.

44. Description of Environment and Outbuildings A surface parking lot is north of this building. Other commercial buildings are to the south, east, and west.

42 Further Description of Important Features The main facade faces east. The facade treatment is the result of a 1958 remodeling. The glass entrance door is centrally located. White stone is used as a veneer on the piers flanking the doorway, the end piers of the building and across the parapet. Dark structural glass is used as a contrast, veneering the remainder of the wall area. Display windows flank the entrance bay. The building contains 11,000 square feet. Architect for the 1958 remodeling was Olaf Harringer of Chicago.

43. History and Significance The building originally housed the Maxwell-Briscoe Auto Company. In February 1958 the building was remodeled for occupancy by Electronic Business Equipment. The building was originally constructed by George Passfield, a Springfield, Illinois investor.

44. Description of Environment and Outbuildings Other commercial buildings are north, south, and west of this structure. To the east is a commercial building and a surface parking lot.

42. Further Description of Important Features

The building faces west on Grand. It has been considerably altered, and window areas have been filled in with metal panels. The spandrels dividing the first from the second, and second Motor and Machinists Supply Company from third stories feature brick laid in a decorative "herringbone" pattern. A projecting, bracketed cornice extends across the parapet wall, and the parapet peaks over the center bay in an arch motif.

43. History and Significance This building was originally leased to the Motor and Machinists Supply Company. The building was erected at a cost of \$40,000.

14. Description of Environment and Outbuildings A surface parking lot is south of this building. To the north, east, and west are other commercial buildings.

42 Further Description of Important Features The east facade has been altered on the first story by the filling in of three garage bays with glass in 1957. The second story is fenestrated with rectangular panes in each of the three bays with multipaned transoms. An elaborately molded stringcourse supported by brackets extends across the facade. A shaped parapet with stone coping terminates the building.

43. History and Significance Originally a branch of the Studebaker motor car operation in Kansas City. The building continued to house a number of automobile related firms, in an area of midtown that had innumerable automobile services and dealerships. It is currently occupied by a whole ale florist firm.

44. Description of Environment and Outbuildings Commercial buildings are to the north, south, and west. A surface parking lot is to the east.

Walnut, with frontage on both streets. In 1957 an addition extended the building south on Grand Avenue. The main entrance is at the north end of the Grand Avenue facade, distinguished by a series of multi-paned windows and doors in concrete frames. The Universal Construction Co. erected the 1957 addition.

indine(5.

43. History and Significance This building was erected as the newsprint storage facility for the Kansas City Star. A tunnel under Grand Avenue connects this building with the Kansas City Star Building to the east.

44. Description of Environment and Outbuildings A surface parking lot and a commercial building are north of this structure. To the south is a commercial building and a gas station. A surface parking lot and a commerical building are to the To the east The Kansas City Star Building. west. 45 Sources of Information 46. Prepared by WP #10827 Piland BP #17181 47. 42 Further Description of Important Features The building's primary facade faces north on East 18th Street. The first two stories are veneered in white stone, and the central bay consists of series of 2 story multipaned arched windows which enhance the monumentality of the structure. Behind the main entrance, the central bay is recessed, essentially forming a light court. The east and west bays project forward and terminate on the seventh story in an arcade, as does the center bay. Decorative diamond shaped brickwork is featured on the parapet wall.

43 History and Significance This building, constructed for the City Bank, was designed to carry 13 floors. President of the bank during time of construction was Rufus Crosby Kemper. The bank occupied the basement, 1st floor, and mezzanine, while the upper floors were leased as offices. The 1st floor interior featured 5 varieties of marble. The building was designed to harmonize with the Kansas City Star Building to the north.

44. Description of Environment and Outbuildings A surface parking lot is to the east. To the north is the Kansas City Star Building. A drive-in bank is to the west. To the south is a commercial building.

42 Further Description of Important Features A decorative grill, an alteration accomplished in 1966, covers the facade. The brick pilasters defining the corners of the building are desorated with rectilinear stone capitals. The cornice area features patterned brick and decorative stone work. A shaped parapet is terminated with stone coping. An addition was erected at the rear of the building in 1966.

5

VIIICI Hamelo,

43. History and Significance The original occupant of the building was a tire manufacturer.

44. Description of Environment and Outbuildings Commercial buildings are to the north and east. To the south is a surface parking lot. To the west is a drive-in bank and surface parking lot.

43. History and Significance The original occupant of the building was a confectioner. In 1900 the building housed a kosher meat market, and an inscription bearing the legend "Kosher Market and Sausage Factory," was placed above the first story windows. The legend has since been covered in facade renovations.

44. Description of Environment and Outbuildings Surface parking lots are placed to the north, west and east of the building. A commercial building is to the south.

have been united behind a recent facade alteration. The buildings have been veneered with stucco. Two entrance doors are located on the west facade. The lower wall surface of this facade is veneered with brick.

43. History and Significance The earliest tenants of this building were the J. C. Wirthman & Brothers Drug Store, a barber, and a butcher shop.

44. Description of Environment and Outbuildings Surface parking areas are north, south, and east of this building. To the west is another commercial building.

42. Further Description of Important Features Precast concrete panels veneer the east facade of this building. A two-story section rises at the north end. A recessed entrance is near the south end.

43. History and Significance Two commercial structures, erected in 1916 and 1917, make up the present building, and are concealed behind a new veneer. Madorie & Field were architects for the one-story section of the building (1917). Various tenants have occupied the building over the years.

44. Description of Environment and Outbuildings A surface parking lot is north of this building. To the south is a commercial building. Another surface parking lot is to the east.

43 History and Significance Numerous commercial firms have occupied this building over the years. Documentation on this building is confusing. The 1915 building permit is for a one-story building; however, a 1946 building permit indicates that a second-floor is to be removed.

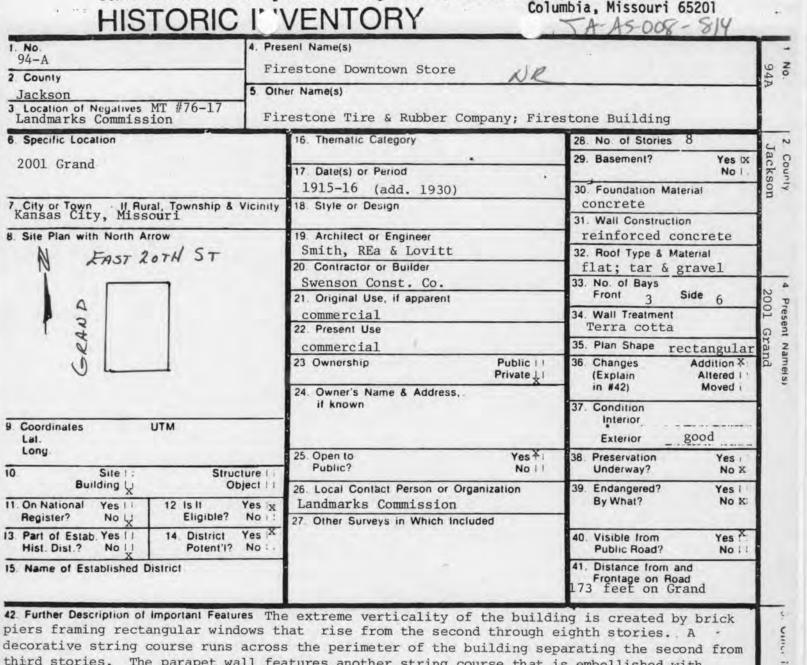

44. Description of Environment and Outbuildings Surface parking lots are south and east of this building. Other commercial structures are to the north and west.

third stories. The parapet wall features another string course that is embellished with tracery-like ornament. The parapet wall of the west facade peaks in the center and contains a linear triptych of terra cotta banding. A tower rises from the north facade and mirrors the treatment of the main building. A single story service station/garage was added to the south side of the building in 1930.

43. History and Significance When constructed this was the largest branch of the Firestone Tire and Rubber Company, an Akron, Ohio comapny. In 1915 the Kansas City branch distributed 18,000 tires a year.

44. Description of Environment and Outbuildings Other commercial buildings are to the east, west, and south of this structure. To the north is a surface parking lot.

of storefront panels with an entrance centrally located. A stone band course divides the first from second story. The division of bays of the second through sixth story is accomplished by triple rectangular windows placed in each of three bays. A stone sill is placed below the windows, and decorative brick work embellishes the spandrels between stories An arcade formed by corbelled brickwork extends across the parapet wall. The parapet peaks in the center and terminates in stone coping.

42. Further Description of Important Features This building was substantially altered in 1961, under the direction of the Geis-Hunter-Ramos architectural firm. At that time the 1st floor was remodel ed with glass panes set in aluminum frames. A new lobby entrance was added at the south end of the east facade and a garage entrance was placed at the north end. The garage ramp leads to parking for 50 cars in the basement. Solar screen panels were attached to the 2nd and 3rd floors by vertical steel "tees" mounted on the exterior. This mounting made the screens movable for window washing purposes. The building contains 51,000 square feet.

43. History and Significance

This building was constructed for Irwin Kirkwood. The building was leased to the Brunswick-Balke-Collender Company. The 1961 remodeling was undertaken for a major new tenant, the Sunbeam Appliance Service Company.

44. Description of Environment and Outbuildings Other commercial buildings are to the north and east. Surface parking lots are to the south and west.

below the viaduct. It appears, but is not documented, that this building has undergone a facade alteration, probably in the 1920's. The east facade is divided into three bays, with the entrance recessed in the center bay. Terra cotta is used for window surrounds on both floors and for the cornice.

43. History and Significance The original use of this building is unknown.

44. Description of Environment and Outbuildings Other commercial buildings are south and east of this structure. To the north and west are surface parking lots.

42 Further Description of Important Features The building is divided into three bays by projecting brick pilasters that frame the window areas. The main facade faces east onto Grand Avenue. The first floor contains storefront areas and has been remodeled. The parapet wall is curved and faced with terra cotta. The Grand Avenue Viaduct rises in front of this building, so 4 floors are visible at street level and 2 are beneath the viaduct. A one story, L-shape concret block addition was placed on the south facade in 1948. Neville, Sharp & Simon were the architects for the addition.

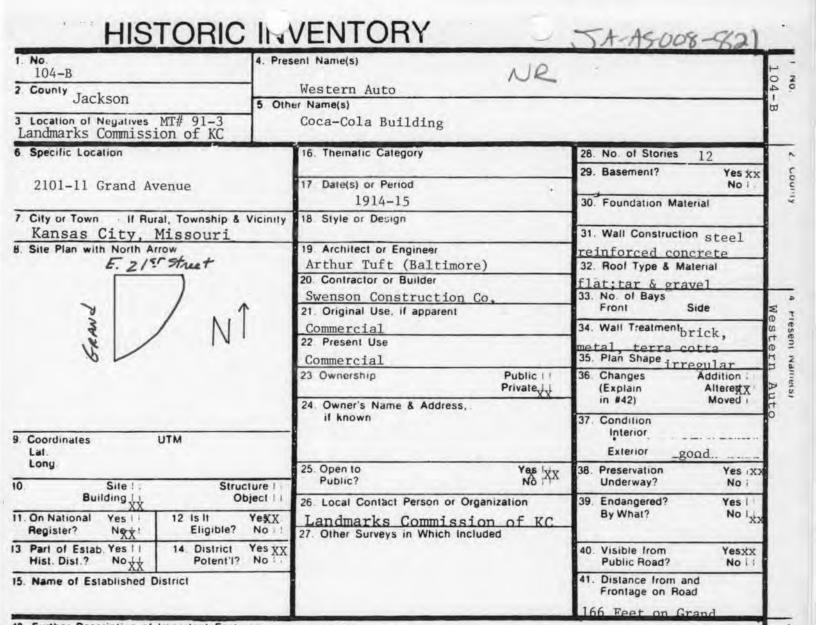

43. History and Significance The building was constructed at a cost of \$50,000 for the Parke-Davis Chemical Company.

44. Description of Environment and Outbuildings Other commercial buildings are to the north and east. A commercial building is also to the south. To the west is a storage lot.

uner indine(5,

42 Further Description of Important Features The building faces west onto Grand. The building is characterized by its dramatic curved facades on the south and east. The Grand Avenue frontage features a row of storefront panes on the ground story, which reflects a modern alteration. The north and south facades have their ground story bays divided by pilasters. Projecting courses are placed above the second and third stories. A denticulated molding is placed below the bracketed cornice, and palmette antemion rise above the parapet. The building contains 150,000 square feet. One story is concealed by the rise of the Grand Ave. Viaduct in front of the building.

43 History and Significance This 150,000 square foot building was completed in September, 1915, providing factory, warehouse, and office space for the Coca-Cola Company of Atlanta, Georgia. The Candler family (head of the Coca-Cola Company) sold the building in 1922, then later regained it by foreclosure. The building retained the Coca-Cola name until 1928. Since c. 1930 it has been occupied by Western Auto.

44. Description of Environment and Outbuildings The Terminal Railroad tracks run south of this building. To the north and west are other commercial buildings. A surface parking lot is to the east.

42. Further Description of Important Features The main facade faces east. The Grand Avenue viaduct rises in front of this building, obscuring the lower floors from view. The central entrance has been filled with glass blocks and is flanked by entrance doors. The central bay is demarcated by slender terra cotta columns. Decorative terra cotta marks the end bays and runs as a strine course above the 2nd story windows. Above this is a projecting terra cotta cornice. A concrete block loading dock was placed on the west facade in 1944 and the dock was enlarged the following year.

43. History and Significance This building was constructed for the Overland Automobile Company. The President of the firm was Harvey A. Dougherty.

44. Description of Environment and Outbuildings The Kansas City Terminal railroad trucks are south of this building. To the east is a commercial building. A commercial building is also to the north.

42 Further Description of Important Features The first floor is set back behind metal clad piers. The main entrance is on the west facade. The upper floors consist of a modular pattern of doubleglazed solar glass windows set in an aluminum grill. The lobby area is glass walled. The building contains 600,000 square feet. It is connected to underground parking for 650 cars.

43 History and Significance This building was designed by the Chicago firm of Fujikawa, Conterato, Lohan and Associates, formerly the office of Mies van der Nohe. The building was constructed to house a western home office for Mutual Benefit Life Insurance Company and to consolidate the Kansas City offices of International Business Machines Corporation. The building was constructed at a cost of \$35 million.

44. Description of Environment and Outbuildings A small park, Washington Square, is west of this building. To the north is a surface parking lot. A hotel is to the east. Restaurant, was constructed with an open steel frame system utilizing rolled sections and pipe colums. The exterior walls are of aluminum and glass and a skylight system is incorporated into the roof. Multipaned French windows with fanlight transoms pierce the wall surface. The restaurant has an entrance from Grand Avenue and an entrance from the interior of the 43 History and Significance This grouping of speciality shops opened in 1973 as part of the Crown Center Redevelopment Project. The structure contains 400,000 square feet. A bridge over Grand Avenue connects this structure with Halls, another commercial structure. Several levels of parking make up the west portion of this structure. Marshall & Brown were local architects for the project.

44. Description of Environment and Outbuildings Crown Center Square is east of this structure. Adjoining the building to the north and west is a hotel. A condominium is to the south.

Crown Center Shopping complex.

43 cont.

In 1982, the Crystal Pavillion restaurant was appended to this structure. The initial concept and the interior design were by Phil George, a New York architect who once worked for the Crown Center master planner, Edward L. Barnes. George was assisted by another New York architect, Jack L. Gordon. The addition was sited to connect to a kitchen within the Crown Center shopping complex.

42. Further Description of Important Features The building's primary facade faces south onto a surface parking lot. The building extends west on the lot and contains a garage bay flanked by a door and window. The east end, containing office space projects forward and is fenestrated with rectangular windows filled with glass blocks.

43. History and Significance The 8,400 square foot office and warehouse was erected by E. G. Clear an investor-builder and first leased to Marion Laboratories, a research oriented pharmaceutica comapny. Ewing Kauffman founded the company in 1950, and under his leadership it became one of Kansas City's largest firms. In 1955 the company's leading product was calcium tablets produced from oyster shells. This building is north of another structure (2920 Grand) built in 1955 by Clear. The two buildings share a common parking lot.

44. Description of Environment and Outbuildings A surface parking lot is south of this building. To the north is a residence. Another commercial building is to the east and vacant land is to the west.

Distance from and 15. Name of Established District Frontage on Road 76 feet on Grand 42. Further Description of Important Features The building's primary facade faces north onto a surface

parking lot. The regularity of its mass is interrupted by two garage bays placed centrally, and a garage bay at the west end. Fenestration of the building is with rectangular windows. The east facade which fronts on Grand is fenestrated with a row of evenly spaced windows.

vinci itame(5

43 History and Significance The building was constructed by investorybuilder E. G. Clear. The original tenant was the Stewart-Warner Company, a wholesale auto accessories firm. Shortly after Clear built this structure, another was built immediately north and facing the building. The two buildings shared a common parking area.

44. Description of Environment and Outbuildings A surface parking lot is north of this building. To the east is a residence. Vacant land is to the north. An apartment building is to the west.

43. History and Significance The Wyandotte Furniture Company originally used this building as a warehouse.

44. Description of Environment and Outbuildings A storage lot is north of this building. To the east and west are commercial buildings. A surface parking lot is to the south.

42 Further Description of Important Features The building's irregular shape is created by its siting, as the main facade fronts on Harrison and the south and east facades curve to accommodate the Kansas City Terminal Railway tracks. The building is divided into bays by brick pilasters that terminate in terra cotta capitals at the parapet. Fenestration consists of multi-paned rectangular windows with terra cotta sills and lintels. The building was enlarged in 1922 and in 1950 a major addition expanded the building to the north. Architects for the 1950 addition were Kivett & Meyers.

43. History and Significance This building was constructed as part of a \$100,000 project to improve the Sinchair Refining Company's oil yard. This building served as both an office and barrell house Other buildings constructed concurrently as part of the project included a garage and repair shop, an oil filling station, and a pump house boiler room and locker room.

44. Description of Environment and Outbuildings A commercial building is west of this structure. To the north is a storage lot. The Terminal Railroad tracks are to the south. To the east is a commercial building and storage lot.

42. Further Description of Important Features This corner building has a canted entrance, facing to the northeast. Above the entrance is a rounded oriel window. A pressed metal cornice extends around the corner of the structure. While the first floor has been altered, remnants of the cast iron store fronts remain on the east and north facades. Rectangular windows fenestrate the 2nd floor.

43. History and Significance The water permit indicates this building's original use as a meat market; however, this has not been confirmed by city directories. In 1918 Jacob Rotman operated a grocery in this building. Sometime between 1891 and 1907 the building was extended to the east. A concrete block addition extended the building to the south in 1961.

44. Description of Environment and Outbuildings A surface parking lot is north of this building. To the south is a storage lot. Vacant land is to the east. A commercial building is to the west.

42 Further Description of Important Features The original portion of the building is at the north end, a 50 x 100 foot concrete block structure veneered with brick. The contractor for this portion was the Industrial Construction Company. The building was expanded 100 feet to the south in 1953(architects: Peterson & Scharhag, Builder: Dasta Const. Co.). In 1958 a 6,000 square foot addition was placed at the northeast corner, fronting onto East 22nd Street (architect: Everett Peterson, Builder: James Scearce, Inc.). Another addition at the south end of the building in 1959 brought the square footage to 45,000. This 150 x 97 foot addition included a rooftop parking area (Arch: Fullerton and McCamis, Builder: Morris Hoffman Const. Co.).
43 History and Significance This original building and subsequent additions were erected for Guy's Nut and Potato Chip Company. The addition provided space for chip manufacturing, office areas, potato storage, loading areas, and roof top parking. In 1961 the company was incorporated as Guy's Foods, Inc. In 1967 the firm moved from this building and relocated in Liberty, Missouri.

44 Description of Environment and Outbuildings This building extends the entire length of the block. Commercial buildings are north and south of this structure. To the west is vacant land and a commercial building. To the east is a residence, vacant land, and a commercial building.

42 Further Description of Important Features A raised basement level of coursed stone provides the building foundation. The east facade is fenestrated with rectangular windows, on both first and second stories, that feature stone lugsills and lintels. The north facade is fenestrated with segmental arch windows with radiating brick voussoirs. Stone sills are placed beneath them. The parapet wall terminates in tile coping. All the openings on the east and north facades have been bricked in.

unc. itamets,

43 History and Significance This four apartment flat was owned and built by Christian Schaper, who is listed in the city directories as a carpenter. The building was constructed at a cost of \$6,000.

44. Description of Environment and Outbuildings A surface parking lot is to the west. To the east is a commercial building. A vacant lot to the south is used as a parking area. To the north is a vacant lot.

42 Further Description of Important Features A colossal temple front characterizes the east facade. Composed of four rectangular stone piers with Doric capitals, they support an entablature which is unadorned escept for a denticulated molding below the projecting cornice. A 2nd story railed porch interrupts the vertical movement and creates a loggia-like space on the 1st and 2nd stories. The rusticated cut stone of the building is pierced by rectangular windows with smooth stone sills and lintels. The parapet wall steps down as it projects to the east.

vince indine(5,

43. History and Significance The earliest known resident of this duplex (1906) was the Frank Richards family. Richards was a machinist. The following year the building also housed the Charles Lyon family. Lyon was a member of Lyons Brothers Millinery.

44 Description of Environment and Outbuildings To the south is a vacant lot. A resident is to the west. To the east is a surface parking lot. To the north is a vacant lot used for storage and parking.

42 Further Description of Important Features A double gable treatment dominates the facade, with the porch gable slightly lower than the house roof gable. The gable roof of the porch is supported by brick piers and the gable wall is veneered with wood shingles.

43. History and Significance One of a series of 5-room bungalows built by the Collins Investment Compary on the east side of the 2400 block of Harrison in 1915. These homes were promoted with a "pay-like-rent" sales plan.

42 Further Description of Important Features The stone 1st floor extends to form a porch across the facade, with stone piers supporting a gabled porch roof. The gabled area of the porch has been altered. The entrance is at the north end of the west facade. On the 2nd floor, above the entrance is a bayed projection of 3 windows. A Palladian window is in the reference gable area. A squared oriel is on the north facade.

43 History and Significance The city directory of 1910 lists the resident of this house, Alma Fowler, as the widow of Mortimer Fowler. This house is one of a group erected concurrently by builder N. W. Dible on both sides of the street in the 2700 block of Harrison.

44. Description of Environment and Outbuildings Other residences are to the north, south, and west. To the east is a commercial building.

42 Further Description of Important Features The first floor is of stone. The second floor is of narrow CINC clapboard with pilaster corner boards. Wood shingles fill the gable area, which is fenestrated with a pair of windows. A gable roofed porch extends across the facade, supported by stone piers. A denticulated modling runs between the returns of the porch gable and is prepeated beneath the roof gable and in the gable eaves. A 3-window bay projects on the 2nd floor and an oriel window is on the south facade.

24 feet on Harrison

42 Further Description of Important Features The first story of the residence is constructed of coursed stone, and includes a porch that extends across the west facade. The flat roof of the . porch extends beyond the piers supporting it, and features a dentiled molding. The main roof gable is steep and the eaves are supported by wooden brackets. A gable roof dormer decorated with half timbering pierces the west roof slope. An oriel window projects on the north facade.

43. History and Significance This house is one of a group erected concurrently by builder N. W. Dible on both sides of the street in the 2700 block of Harrison. The 1st resident of this house was a proofreader, James DeWolf.

44. Description of Environment and Outbuildings An apartment building is east of this residence. To the west is a vacant lot. Another residence is to the north. A vacant lot is to the south.

42 Further Description of Important FeaturesA porch on the west facade is composed of a cut stone, broken course base that supports stone pillars and a hip roofed porch with bracketed eaves, and a dentiled molding. Above the stone first story, is a bay window on the north end. An elaborat, classically inspired, gable roof dormer pierces the west roof slope. A Palladian window in the dormer is embellished at either side of the flanking windows by wooden columns. A bay window is placed on the forth facade.

43. History and Significance One of a row of houses on the east side of 2800 Harrison built by N.W. Dible in 1909. The earlist known residents of this house (1912) were the Louis Degginger family. The city directory does not list an occupation for Mr. Degginger.

42. Further Description of Important Features The first story of the residence is composed of coursed rubble A gable roof supported by carved wooden brackets shelters a porch. A decorative molding -

wooden lattice work is placed at the base of two rectangular windows. All the upper sashes

separates the second from attic story. A bracketed projecting balcony decorated with

feature gothic-motif lights. An oriel window projects from the north facade.

44. Description of Environment and Outbuildings Other residences are located to the north, south, and west. To the east is a commercial building.

42. Further Description of Important Features An elevated basement level of coursed stone provides the foundation for the residence. Brick piers that feature raised decorative brick bands support a flat roof porch which extends across the east facade. Brick quoining marks the corners of the facade. Hipped roof dormers pierce the north, south and east roof slopes.

43. History and Significance The earliest known resident of this house (1910) was Charles W. Reed. Reed was manager of the Hydraulic-Press Brick Co.

44. Description of Environment and Outbuildings A vacant lot is south of this building. An apartment building is to the north. Residences are to the east and west.

42. Further Description of Important Features Coursed rubble forms the porch base and side walls. A hipped roof shelters the porch which extends across the west facade. The attic story features a gablet within the main roof gable which reflects the gablet of the north end of the porch. A modified Palladian window fenestrates the attic story of the west facade. An oriel window is on the north facade.

43. History and Significance One of a row of houses on the east side of 2800 Harrison built by N. W. Dible in 1909. The first resident of this house was Leslie O. Williamson, a salesman for the W. L. Grush Produce and Commission Company.

44. Description of Environment and Outbuildings Vacant land is south and east of this residence. To the north is a residence. An apartment building is to the west.

42. Further Description of Important Features A hipped roof porch extends across the west facade. The porch roof is supported by brick piers resting on a coursed stone foundation. The southern bay of the second story bows out and is fenestrated with rectangular windows. Hipped roof dormers pierce the north, south, and west roof slopes.

43. History and Significance One of a pair of houses, side-by-side, constructed by Edward Stine, probably as income property. Stine was a member of Stine & Son Undertaking.

44. Description of Environment and Outbuildings Other residences are to the south and west. To the north is a vacant lot. To the east is a commercial building.

42 Further Description of Important Features A porch extends across the east facade, supported by stone piers. A small flight of steps leads up to the porch and a gabled area is over this. The gable area contains decorative shingles and is supported by curvilinear brackets. Dormers are on the east, north, and south facades. Small columns divide the dormer windows into bays. Stone chimneys extend on the north and south facades. A port cochere extends on the south. The roof was originally of tile.

unici indine(5.

43. History and Significance This residence was constructed for Walter Halliwell, President of the Thorn-Halliwell Cement Company, from white limestone taken from Mr. Halliwell's quarry at Osceola, Missouri. The house contained 12 rooms, 3 baths, with the entire 3rd floor used as a ballroom. A cyclone cellar was also constructed under the rear porch.

44. Description of Environment and Outbuildings A vacant lot is to the east. To the north and south are apartment buildings. A commercial building is to the west.

42. Further Description of Important Features The narrow facade of this building faces the street; however the formal entrance is on the north facade. The building derives its Tudor architecture from the peaked gables at the east and west bays of this facade. Three flat-roofed dormers pierce the west roof slope. A secondary entrance is on the west facade. The raised basement level is constructed of stone.

43 History and Significance This was constructed as a dormitory and studio building for the Horner Institute of Fine Arts. The Institute was founded in 1914 by Charles F. Horner. In 1926, it merged with the Conservatory of Music, and became the Kansas City-Horner Conservatory of Music. The primary structure was also on this block at 3000 Troost.

44. Description of Environment and Outbuildings A vacant lot is north of this building. To the south is a surface parking lot. An apartment building is to the west. Vacant land is to the east.

42. Further Description of Important Features The central bay of the apartments is constructed using smooth stone that sharply contrasts with the variegated bricks of the main wall sorface. A paired arched window on the second story is separated by a turned Moorish column. The parapet terminates over the center bay in an elaborately carved porjection that is repeated on the end bays. An elevated porch is placed in the center and is approached by two starceses on either side. Roundels with a pellet molding decorate the porch wall. A decorative relief string course runs below the tiled shed roof that terminates the building.

43. History and Significance This was constructed as a 55-unit apartment.

44. Description of Environment and Outbuildings A vacant lot is to the south of this building. To the north is another apartment. Residences are to the west. To the east is a surface parking lot.

the east facade. The first story porch features a wooden Tuscan column, and brick piers frame the porch on both stories. Windows feature cut stone lintels and lugsills. The building terminates in tile coping and "steps down," as it extends westward on the lot.

unici itamets,

43. History and Significance The duplex was constructed to visually match the apartment building to the south (3028-30 Harrison), built eleven years earlier.

44. Description of Environment and Outbuildings Vacant land is north of this structure. Apartment buildings are to the south and east. To the west is a residence.
