		41. Distance from and Frontage on Road 50 feet on Oak		
42. Further Description of Important Features The building faces east onto Oak. The first story has been considerably altered by the application of corrugated metal to the facade. A series of multipaned rectangular casement windows form a band across the second story. The window surround is particularly elaborate and consists of brick laid to form the outline of a Gothic arch. The parapet wall is castellated and further embellished by horizontal and intersecting vertical stone banding.				
43. History and Significance This building was constructed as an annex to the Nash-Levy Motors used car department (which was located to the immediate west at 1513 McGee Street).				
44. Description of Environment and Outbuildings Surface parking lots are north and south of this building. To the east and west are commercial buildings.

		41. Distance from and Frontage on Road 95 feet on Oak	
42. Further Description of Important Features Rectangular store front and garage bays are placed at regular intervals on both the south and east facades. The second story is composed of tripartite multipaned windows enframed by the brick piers of the building. The cornice of the building is distinguished by a horizontal band of brick that runs along the perimeter of the building.			
43. History and Significance This building was constructed for the Peake Auto Supply Company at a cost of \$40,000. An addition to the building in 1927 was for the same company. The contractor for the 1921 original structure was Pratt-Thompson. The Fogel Construction Company built the 1927 addition.			
44. Description of Environment and Outbuildings Surface parking lots are north, east and west of this building. A commercial building is also to the east as well as to the south.

		41. Distance from and Frontage on Road 58 feet on Oak	
42. Further Description of Important Features The main entrance is at the south end of the west facade. A small window is north of the entrance door and another is around the corner, on the south facade. A 3rd window is at the north end of the west facade. All other windows on the 1st floor and all the 2nd floor windows are obscured by corrugated metal panels. Rectangular panels in brick run in horizontal bands above the 1st and 2nd floors. A terra cotta band course enlivens the parapet wall. Terra cotta coping terminated the building. Terra cotta cartouches are set into the roof line and round balls placed on the roof at the north and south ends of the west facade add further decoration.			
43. History and Significance The 1st tenant of this building was the Republic Retail Sales and Service Company. Later, for many years it was the home of the American and Venetian Tile Company. The building contains 13,000 square feet.			
44. Description of Environment and Outbuildings A surface parking lot is north of this building. To the east is a storage lot. A commercial building is to the south. To the west is another storage lot.

14. District Potent'l? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>				
15. Name of Established District				
42. Further Description of Important Features The building is sited at the southwest corner of East 17th and Oak Streets. The primary facade faces north. The building is divided into bays by brick piers that rise from the first story and terminate in linear brick bandwork above the 4th story windows. The first floor contains a series of rectangular glass panels. The second story repeats the configuration with a series of multipaned windows which feature stone sills and a stone stringcourse above them. The 3rd and 4th stories are fenestrated with two double windows in each of the 4 bays. Brick corbelling embellishes the parapet wall.				
43. History and Significance This building was erected for the Hesse Carriage Company. It was erected in three stages. A four story section was constructed in 1909. A two story addition was undertaken in 1915 and the addition was enlarged to four stories in 1929. Raney & Dumas were the architects for the 1915 addition.				
44. Description of Environment and Outbuildings Commercial buildings are north, south, east and west of this structure.

42. Further Description of Important Features The main facade of this building faces south, to mirror across a 41 foot space, a twin structure. Garage openings across the south facade have been filled in with concrete block and fenestrated with multipaned windows. Two groups of four windows fenestrate the east facade. The garage openings were altered in 1961.

43. History and Significance One of a pair of structures, separated by a 41 foot space, erected for the Downtown Buick Company, probably as part of their used car operation. This building was designed as grease and service stalls.

44. Description of Environment and Outbuildings A similar structure is to the south. Commercial buildings are to the north, east, and west. A surface parking area is also to the east.

			40. Visible from Public Road? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
			41. Distance from and Frontage on Road 50 feet on Oak

42. Further Description of Important Features The first story features rectangular store fronts. The bays of the second story are articulated by means of brick piers that separate square windows, possessing stone sills. Bands of brick laid in soldier course appear over the windows on both the first and second story, and on the parapet wall. The parapet wall is stepped and terminates in stone coping. This was constructed as a single story building. In 1926, to accommodate the widening of Oak, the front was cut back and a 2nd story only 18 feet deep, was added to the west end of the building.

43. History and Significance The earliest known tenant of this building (1917) was the W. H. Henderson Auto Company.

44. Description of Environment and Outbuildings A storage lot is south of this building. To the east is a surface parking lot. Another commercial building is to the west. To the north is a surface parking lot.

14. District Potent'l? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>				
15. Name of Established District				
42. Further Description of Important Features The ground story of the east facade is composed of a series of store front bays separated by brick piers, and a gable bay on the south end. The 2nd story consists of a group of 6 rectangular windows in each of 3 bays. This fenestration is repeated on the 3rd story. The parapet wall is shaped and peaks above each of the three bays. Stone rectangular and roundel decorative accents are interspersed over the building. The building was originally 50 feet in width. In 1926 a three story, 25 foot wide addition was made, creating the building as it is today. The building contains 24,000 square feet.				
43. History and Significance The Hesse Carriage Company developed from a blacksmith shop founded in Leavenworth, Kansas in 1847. The firm moved to Kansas City in 1903 and shifted its activities from horse drawn vehicles to motor cars. They manufactured car bodies and repaired car tops, curtains, and upholstery.				
44. Description of Environment and Outbuildings Surface parking lots are north and south of this building. Other commercial buildings are to the east and west.

		40. Visible from Public Road? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	
		41. Distance from and Frontage on Road approx. 75 ft on Oak	

42. Further Description of Important Features The main facade faces west. The two story center section was constructed in 1924. The concrete block addition on the north was undertaken in 1952. At that time the facade of the original section was altered to tie it in with the new section. A single story addition, date unknown, extends the building to the south.

43. History and Significance Surface Paints Inc. dates from the founding of a drugstore by Dr. John M. Surface c. 1874. Later the stock was narrowed to paint, wallpaper, and glass. The firm has been at this location since 1923.

44. Description of Environment and Outbuildings A surface parking area is east of this building. A small surface parking area is also to the north. Commercial buildings are to the south and west.

		40. Visible from Public Road? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	
		41. Distance from and Frontage on Road 25 feet on Oak	
42. Further Description of Important Features The main facade of this building faces west. Comparison with a c. 1940 photograph reveals that the display windows of the first floor have been replaced by an overhead garage door. Two rectangular windows with stone sills fenestrate the second floor. An addition in 1926 extended the building to the rear. The R. L. Falkenberg & Co. erected the addition.			
43. History and Significance The history of this building is unknown. It appears to have originally been a commercial structure. A building permit issued in 1926 for an addition indicates it consisted of a store and 5 apartment units.			
44. Description of Environment and Outbuildings A surface parking area is south of this building. To the north, east and west are other commercial buildings.

A black and white photograph of a single-story brick industrial building. The building has a flat roof and a prominent corner. On the side of the building, the text "K&A LITHO PROCESS, INC." is displayed in large, white, sans-serif capital letters. To the left of the main entrance, there is a fenced-in area with a chain-link fence and a wooden post-and-rail fence. A small, dark, rectangular object, possibly a vent or light fixture, is visible on the brick wall above the fence. To the right of the main entrance, there is a large window with multiple panes and a smaller window above it. The building is situated on a street corner, with a paved road in the foreground. In the background, a tall, thin antenna or tower is visible on the roof, and a tall, ornate building with a pointed top is visible in the distance. A car is partially visible on the right side of the image.

K&A LITHO PROCESS, INC.

15. Name of Established District			41. Distance from and Frontage on Road 60 feet on Oak

42. Further Description of Important Features The building is sited on a grade, and faces east on Oak Street. The building's parts are defined by the juxtaposition of red and buff colored brick. The south end of the building veneered in contrasting red brick is slightly taller than the remainder of the building. The building extends northward on the lot and features red brick banding on the parapet wall. The entrance is placed slightly off center.

43. History and Significance The building was erected at a cost of \$32,000. It was originally leased to an auto parts firm (General Controls Co.) and a firm which dealt in fire fighting equipment (American-LaFrance Corporation).

44. Description of Environment and Outbuildings A surface parking lot is north of this building. To the west is Union Cemetery. The grade drops sharply to the east, where a service station is located. Another commercial building is to the south.

14. District Potent'l? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>				41. Distance from and Frontage on Road 98 feet on West Pennway
15. Name of Established District				

42. Further Description of Important Features The main facade of this corner building faces west, with an entrance door near the north end of this facade. The window areas on the 2nd floor have been filled in. Most of the 1st floor window area has been filled in, leaving only bands of small horizontal windows. The building terminates in a corbelled brick cornice. The 2nd floor is a 1925 addition. In 1965 the building was expanded to the east. The total square footage of the building is 33,000. Contractor for the 1917 building was W. H. Tomlinson.

43. History and Significance This was originally the office for the Tschudy Hardwood Lumber Company, a firm founded in 1887 by John Henry Tschudy. The first location of the firm was at Broadway and 23rd Street. The property has been occupied by the Yellow Cab Company since 1965.

44. Description of Environment and Outbuildings Surface parking areas are south and east of this building. Commercial buildings are to the north and west.

			41. Distance from and Frontage on Road 345 feet on W. Pennway	
42. Further Description of Important Features The north facade was originally the primary facade and contained a retail outlet fronting onto Southwest Boulevard. The window and door openings on the north facade have been filled in. The primary facade is now the west facade, which is not visible from the public right-of-way. Several loading dock entrances are centrally located on this facade. Brick is laid in a pattern on the east wall surface to create diamond shaped patterns.				
43. History and Significance The building was constructed as a warehouse for the Jones Store Company and is still occupied by them.				
44. Description of Environment and Outbuildings Southwest Trafficway is elevated to the west. To the north is a traffic island. A commercial building and surface parking lot are to the east. To the south is a commercial building and a storage lot.

14. District Potent'l? Yes X No I					
15. Name of Established District				35. Plan Shape irregular RC	
42. Further Description of Important Features The building follows a steep grade along West Pennway. Garage bays, which have been filled in with brick and cinder blocks as a result of a later alteration, articulate the ground story. Patterned brickwork comprises the surrounds of the garage bays. The second story is fenestrated with narrow rectangular windows which feature vertically laid brick for the lintels. The building terminates in a parapet that consists of bricks laid in soldier course. In 1956 a single story reinforced concrete structure was extended approximately 360 feet south from the building. The lower level is used for storage, while the roof is used for parking. The building contains 24,000 square feet.					
43. History and Significance The building was constructed for, and is still occupied by the Carter-Waters Corporation, a firm involved with building materials. The building was constructed to support an additional six stories. Architects of the 1956 addition were Bales & Schechter. A concrete block addition of unknown date is at the north end of the building.					
44. Description of Environment and Outbuildings A commercial building and surface parking lot are east of this building. To the south is another commercial building. Commercial buildings and storage lots are to the west.

		41. Distance from and Frontage on Road 150 feet on West Pennway	
42. Further Description of Important Features The building is sited on West 25th Street and West Pennway. The main entrance is placed at the junction of the two streets and is comprised of a convex extension that is fenestrated on the second story with rectangular panes. The sides of the building are composed of broad rectangular areas of diagonally placed wooden strips on the first story. The second story is fenestrated with rectangular window areas and wood panels. The building received an extensive remodelling in 1975.			
43. History and Significance The building was constructed for the American News Company, a magazine printer and distributor who had previously been located in a 6 story building at the southwest corner of 16th and Oak Streets. The building which was constructed at a cost of \$275,000 was originally called the South-West News Company.			
44. Description of Environment and Outbuildings A surface parking lot is south of this building. To the north, east, and west are other commercial buildings.

42. Further Description of Important Features This building has evolved from a series of additions to the original building. The main facade faces east. The two story section at the south end is divided into bays by brick piers. The piers terminate in decorative stone caps. Stone roundels are placed between the piers and are carved with the image of a coca-cola bottle set in front of a stylized leaf. The primary entrance is located in this section of the building, protected by a flat projecting roof. Garage entrances punctuate the northern single story section. The building contains 90,000 square feet of warehouse space; 25,000 square feet of showrooms; and 10,000 square feet of office space.

43. History and Significance The Kansas City Coca-Cola Bottling Company was located at 2540-42 West Pennway by 1921. Whether any traces of the original building remain are unknown. Building permits date from 1928 for the construction of a 2-story bottling plant, the structure now at the south end of the building. Other major additions were undertaken in 1938, 1946, and 1948 which included the garage on the north and expansions of the building west to Jefferson.

44. Description of Environment and Outbuildings Commercial buildings are north and east of this structure. To the west, above grade, is Southwest Trafficway. A commercial building and surface parking lot are to the south.

15. Name of Established District			

42. Further Description of Important Features The main facade of this building faces west. The entrance is centrally located and slightly recessed. All of the window areas are filled with glass block. The front portion of the building is two stories in height, but drops to one story as it extends eastward. A loading dock, protected by a flat roof, extends to the north. This was probably an addition of 1933.

43. History and Significance The original tenant of this building was a chemical firm, Sodiphene Company. By 1930 the building was occupied by the Castle Ice Cream Company.

44. Description of Environment and Outbuildings Surface parking lots are south and east of this building. To the north and west are other commercial buildings.

			41. Distance from and Frontage on Road approx. 100 ft. on Washington

42. Further Description of Important Features This building consists of three sections. The oldest section, on the north, is set back from the other sections. The exterior walls are of brick. The central entrance is flanked by two small window openings, boarded over. The center section is merely a screen in front of a residence. An entrance is at the north end of this section. The south section has concrete block walls and is fenestrated with a row of rectangular windows.

43. History and Significance The building at the north end of this complex was constructed in 1912 as a warehouse for the Kansas City Brewing Company. A house to the south was incorporated into the complex at an unknown date. By the 1930's both structures were being utilized by a milling company. The General Mills Equipment Company expanded the complex further south in 1954 and 1959.

44. Description of Environment and Outbuildings Vacant land is north of this complex. Elevated to the west is a freeway. A residence is to the south. To the east is a commercial building and a surface parking lot.

		41. Distance from and Frontage on Road	

42. Further Description of Important Features The building faces north on Pershing Road and consists of two sections. A multilevel lobby area extends along the Pershing Road frontage. The guest rooms are located in a L-shaped section, with arms extending to the south and west. Three exterior, glass enclosed elevators mark the juncture of the guest room wings. Each of the 730 guest rooms has sliding glass doors opening onto the balcony. The lobby interior features a hillside garden created from the natural rock and limestone of the hill which the hotel cuts into.

43. History and Significance The owner/developer of this hotel was Hallmark Cards, who leased it to Western International Hotels. A 400 car garage is below the hotel and a 750 car garage is behind the retail shops that also adjoin the hotel. It also connects to a 2,300-car garage to the east, underneath Crown Center Square and the office complex.

44. Description of Environment and Outbuildings Penn Valley Park and the Liberty Memorial are west of this building. To the south, and attached to this building, are the Crown Center Shops. To the north is a small park, Washington Square. To the east is Crown Center Square and an office complex.

42. Further Description of Important Features This office complex, built as a unit, consists of five buildings linked on alternate floors. Each building has its own entrance. The exterior walls are of precast concrete panels. On the east facades, the upper floors are cantilevered to project beyond the lower floors. The buildings step down to follow the grade of Pershing Road on the east. The buildings contain a total of 626,300 square feet.

43. History and Significance This office complex was the first portion of the Crown Center Redevelopment Project to be completed.

44. Description of Environment and Outbuildings Below grade, to the west, is Crown Center Square. Across traffic islands and above grade to the east is the UMKC Dental School and Children's Mercy Hospital. To the south is a commercial building. To the north is the Hyatt Regency Hotel.

Survey, 1971, Missouri State Park Board

No. 42 (cont.)

ing the multi-planar wall surface varying from thick, stone masonry to a broad expanse of painted glass in the round arched window. The entablature design is based on the Roman Doric Order with Beaux-Arts mannerisms.

The main block is flanked by side wings, three stories high, with pavilions at each end. The rear "T" extends north and bridges the through track system. This portion of the building joins the front block at the central third of the rear wall.

The station's unique solution to handling vast numbers of people was to place the waiting room concourse over and perpendicular to eight train tracks which passed beneath.

15. Name of Established District				
42. Further Description of Important Features The building has an elevated center section dominated by three arches, nearly 90 feet in height. Each arch is flanked by columns. The walls are granite at the base and limestone above. The side wings are three stories high. The rear "T" extends the building 450 feet north and bridges the through track systems. The central section of the building originally housed a 240 x 100 foot lobby/ticket office.				
43. History and Significance This monumental railroad station, modeled after ancient Roman baths, opened in 1914. During the height of the rail passenger industry, this station housed the city's transportation needs, accomodating some 300 passenger trains daily. This structure also served as the most prominent architectural contribution to the City Beautiful movement in Kansas City. The building was listed in the National Register on February 1, 1972.				
44. Description of Environment and Outbuildings A parking area is south of this building. To the north are the Terminal Railroad tracks. Railroad express buildings are to the west. To the east is a commercial building.

		41. Distance from and Frontage on Road 200 feet on W. Pershing		4. Present Name(s) 215 W. Pershing
42. Further Description of Important Features The building's 10-story mass, accommodating some 2,186,000 square feet of space, is articulated by the juxtaposition of terra cotta with red brick. At the corners of the building are four towers created by the vertical extensions of the wall surface beyond the building's mass. The first, second and tenth stories are constructed of terra cotta, as are the corner bays of the building. Classical detailing embellish the window areas. The building terminates in a pent roof with a denticulated molding. The building contains 2,186,000 square feet.				
43. History and Significance For more than a decade this building housed the Sweeney Automotive and Electrical School. Head of the school, Emory J. Sweeney, had 4 architectural drawings published in the <u>Kansas City Star</u> in 1916 and asked the public to select the building to be constructed. Over 3,000 people responded. This was the 1st building to be erected fronting Union Station. The building was designed for ultimate conversion to a hotel.				
44. Description of Environment and Outbuildings Vacant and park land is south of this building. To the west is the Main Post Office. Penn Valley Park is to the east. To the north is the Union Station Express Annex.

		41. Distance from and Approx Frontage on Road 800 ft. on Pershing Road	
42. Further Description of Important Features This building extends west from the Union Station and approximately 2/3's along its length, it angles slightly to accommodate the curve of Pershing Road. While the building is 53 feet in height, it is partially submerged in the ground, with only 30 feet projecting above. The building sits below grade. Loading docks line the north and south facades. Above, the concrete walls are punctuated with a series of multipaned windows.			
43. History and Significance This express building extends west from Union Station. When the Broadway Viaduct was constructed in 1913, it passed directly through the express offices, leaving a one-story passageway underneath that connected this building with the smaller portion of the express building (2414-18 Broadway). A tunnel running from this building carried express mail and baggage to the track level.			
44. Description of Environment and Outbuildings Union Station is to the immediate east. At the west end of this building is the Broadway Viaduct. The Terminal railroad tracks are to the north. To the south is a commercial building and the Main Post Office.

		41. Distance from and Frontage on Road 280 feet on Broadway	
42. Further Description of Important Features The building measures 265x280 feet in size and is sited on a grade. Limestone is used as a facing material and its monumental appearance is derived not only from its enormous size, but in the juxtaposition of the severity of its non-ornamentation with classically inspired motifs. The fourth and fifth stories boast a two story colonnade on the primary facades, consisting of fluted Doric columns. Metal spandrels are placed between the columns and are ornamented with swags. The entablature above the colonnade consists of a series of rondels, and a denticulated molding. The main entrance, placed centrally on the north facade consists of three pedimented doorways. Placed above them (cont'd)			
43. History and Significance Constructed at a cost of over \$3 million dollars, the Main Post Office encompasses a total of 5 acres of land surface. Built to replace the post office station at 9th and Grand which had become obsolete, the site was selected primarily because of its close proximity to Union Station and its rail facilities for dispatch of the mail. A tunnel and conveyor belt is located in the sub-basement and runs underground into the train (cont'd)			
44. Description of Environment and Outbuildings Vacant land is east of this building. To the north is a surface parking area. Commercial buildings and surface parking lots are to both the west and south.

42. are carved relief panels in stone. The parapet wall is raised above the main wall surface on the center bays. It is ornamented with a bas-relief consisting of swags interspersed between roundels. Ornamentation at the corners of the building, and on the majority of the building's mass is highly restrained. Piers at the corners of the building terminate in carved, stylized eagles. Loading docks on the west facade are sheltered by a flat roofed canopy.
43. station. When the post office opened in 1933 it employed 1,000 workers. In 1936 the Kansas City Main Post Office was the third busiest in the nation exceeded in volume only by Chicago and New York. The interior of the building boasts ornamental plaster ceilings and a profusion of marble veneer. Facilities in the building include a cafeteria, print shop, general offices, and lockers and shower rooms. The main post office is still the headquarters of the postmaster and executive officers of the postal service in Kansas City.

42. Further Description of Important Features The building is sited at the northwest corner of Southwest Boulevard and Central. As the Boulevard runs diagonally and Central vertically, the angle created by their junction is acute. The street facades mirror each other and are characterized by a coursed stone first story pierced by tripartite segmental arch windows. The entrance is placed on the south facade, near the junction of the two facades. Brick piers project on the second and third stories framing paired segmental arch window.		43. History and Significance This building was erected as a warehouse and factory for the Hall-Truman Furniture Company. It replaced their previous building in the West Bottoms that was damaged by a flood.			300 Southwest Boulevard
44. Description of Environment and Outbuildings A storage lot is north of this building. To the south and east are surface parking lots. A commercial building is to the east.		45. Sources of Information WP #24511 Kansas City Times, May 13, 1904, p. 1.

		41. Distance from and Frontage on Road 25 feet on Southwest Blvd.	
42. Further Description of Important Features The primary (south) facade is composed of a garage bay at the west end of the building and glass storefront panes on the east end. The second floor is fenestrated with rectangular windows that feature stone lintels and brick sills accented at the lower corners with square stone ornament. The parapet wall is shaped and terminates in stone coping.			
43. History and Significance While the original plans submitted called for only one story, the building plans were altered and the building was constructed as two stories, at a cost of \$8,000. The original tenant was the Malben Enameling Works.			
44. Description of Environment and Outbuildings Other commercial buildings are to the east and south. To the north is a surface parking lot. Another commercial building is to the south.

42. Further Description of Important Features A double entrance door is centrally located on the north facade. The facade is further divided into multipaned window fronts, a garage entrance, and another double door by cast iron piers. The second floor is fenestrated with 7 tall rectangular windows with shaped lintels. At the rear of the building is an addition, date unknown.				
43. History and Significance This was originally the "Lloyd Foundry and Machine Works. Under the direction of George Weber, the firm engaged in all types of metal work and manufactured the Corliss Engine. By 1898 the firm name had become the Weber Gas and Gasoline Engine Company. This was one of 4 adjacent buildings used by the firm. In 1898 the company was building the largest gasoline hoisting engine in the world, for use in a Mexican mine. The firm supplied engines to many foreign countries; "the sun never sets on Weber engines."				
44. Description of Environment and Outbuildings Another commercial building is to the west of this building. Vacant land is to the east and south. A commercial building is also to the north.

14. District Potent'l? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>				
15. Name of Established District				
42. Further Description of Important Features The building is sited at the junction of Southwest Boulevard and Washington Street. The angle at the junction is particularly acute and is responsible for the "flat iron" shape of the building. The main entrance is placed at the corner which has been squared off to accommodate the doorway. Above it is placed a metal oriel window with a projecting conical metal roof. Fenestration of the north and east facades consists of rectangular windows with stone keystones. A metal oriel window is centrally placed on the 2nd story of the east facade. A bracketed metal cornice extends along the perimeter of the building. An addition in 1980-81 extended the building to the west.				
43. History and Significance The earliest known use of this building was as a saloon, operated by John Ternquist.				
44. Description of Environment and Outbuildings Commercial buildings are north, south, east and west of this structure.

15. Name of Established District				
42. Further Description of Important Features The east facade features two tiers of segmental arched openings extending across the facade. A doorway, and window areas have been bricked in. Some of the windows still possess stone sills. A decorative cornice projects and features "Gothic-inspired" bracketes at the corners. The cornice extends in a semicircular sunburst motif and is inscribed "1886."				
43. History and Significance The building, originally a residence, was constructed for August Koehler at a cost of \$7,000. Although the building permit was issued for a "residence", the size and configuration of the building indicates that perhaps it was a multifamily residence.				
44. Description of Environment and Outbuildings A storage lot is south and west of this building. A commercial building is to the north. To the east is another storage lot.

42. Further Description of Important Features The building's main facade faces south on East 27th Street. The bays of the building are defined by vertical banding that distinguishes the entrance and corner bays. Horizontal banding divides the first from second stories. The parapet wall also carries horizontal banding and the parapet terminates in a decorative molding. The parapet wall steps up to further define the central bay of the south and east facades.			
43. History and Significance This building was constructed for the Morris Building and Investment Company, headed by A. I. Morris. A portion of the first floor was originally leased to the Walgreen Drug Company.			
44. Description of Environment and Outbuildings Vacant land is north of this building. To the south is a commercial building. Other commercial buildings are to the east and west.

42. Further Description of Important Features The main facades of this corner building face north and east. The first floor store fronts have been altered. A wood shingle pent roof is placed above the 1st floor windows on the east facade. The end and corner bays terminate in gabled projections with terra cotta coping. An arched terra cotta surround enframes the paired windows of these bays. Similar, paired gabled projections are evenly spaced on the east facade. A tile, gable roof is placed over the store fronts of each facade. Presumably, a flat, tar and gravel roof extends behind this.			
43. History and Significance This building was constructed to accomodate commercial outlets on the first floor and 53 kitchenette apartments on the second floor.			
44. Description of Environment and Outbuildings A hotel building is north of this structure. To the south is a commercial building. A residence and garage are to the west. To the east is another commercial building.

42. Further Description of Important Features The building which fronts on both Troost Avenue and East 28th Street, has its main entrance placed at the corner. The facade has been altered with the addition of wood paneling over the store fronts. The building's east facade contains another entrance. The parapet wall is decorated with inset diamond shaped stone and the building terminates in stone coping.			
43. History and Significance Built at a cost of \$10,000, the building was one of the extensive holdings of Porter T. Hall. Hall, in his career was director of the Emery, Bird, Thayer Company, and president of the Real Estate Board from 1927-1928. The building originally housed a cleaning establishment, a grocery and a drugstore.			
44. Description of Environment and Outbuildings The building is located at the northwest corner of East 28th Street and Troost. To the north is an apartment building. To the east and south are commercial buildings. A surface parking area is to the west.

A black and white photograph of a commercial building. The building has a two-story structure. The ground floor is clad in dark, square tiles, while the upper floor is made of light-colored brick. The name "STEEL SALES & EQUIPMENT CO" is mounted on the tiled section above a central glass entrance. To the left of the building is a tall utility pole with several cross-arms and wires. A concrete wall is visible behind the tiled section. The foreground shows a paved street and a sidewalk.

42. Further Description of Important Features The main facade of this building faces east. The facade has been altered with the addition, probably in 1956, of an overhead garage door. Entrance doors are at the north and south ends of the east facade. Large display windows on the first floor have multipaned transoms. Rectangular sash windows, grouped in threes, provide the 2nd floor fenestration. A running brick soldier course is placed above these windows.

43. History and Significance The early use of this building is unknown. It appears to have remained vacant several years after its construction.

44. Description of Environment and Outbuildings Surface parking areas are north and east of this building. Commercial buildings are also to the east, south and west.

ES &  
T FOR  
ANTS  
S  
ONS

SMITH ST. JOHN MFG. CO.

The photograph shows a three-story brick building with a prominent ground-floor storefront. The storefront is made of light-colored stone or concrete blocks and features a large sign that reads "SMITH ST. JOHN MFG. CO." in bold, black, sans-serif capital letters. Below the sign is a wide glass display window showing the interior of the factory, which is filled with various pieces of machinery and equipment. Above the storefront, the building is constructed of dark brick and has several rows of windows. The second and third floors each have two pairs of windows. Decorative elements include crest-like ornaments and circular medallions placed between the window groups on each floor. On the left side of the building, a large sign is partially visible, showing the words "ES & T FOR ANTS S ONS". In the foreground, the top of a car is visible, and a parking meter stands near the entrance.

		41. Distance from and Frontage on Road 150 feet on Walnut		Campbell Paint and Glass Company
42. Further Description of Important Features The main facade faces west. The first and second floors have been substantially altered. Brick piers divide the west facade into four bays. Each bay of the top five floors is fenestrated with a row of four one-over-one, double-hung sash windows. A one-story addition extended the building to the north in 1939. The first floor window areas were covered with a new stone front in 1974.				
43. History and Significance The Campbell Paint and Glass Company, original occupant of this building, was established in 1879. By the time this building was constructed, the Kansas City firm had branches in 5 other cities.				
44. Description of Environment and Outbuildings An elevated walk-way, at about the third floor level, connects this building with the commercial building to the south. Another commercial building is to the north. To the west is a commercial building and a surface parking lot. Commercial buildings and a surface parking lot are also to the east.

14. District Potent'l? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>					
15. Name of Established District					
42. Further Description of Important Features The primary facade of the building faces west onto Walnut. The 10 bay elevation is created by the regular spacing of segmental arch windows across the facade. The first story features horizontal brick banding which distinguishes it from the upper stories. Brick quoining marks the corners of the building and is between the fourth and fifth bays. A decorative stringcourse divides the fifth and sixth stories, and another is placed below the parapet wall.					
43. History and Significance The architects for this warehouse for the Emery, Bird, and Thayer Department Store also designed the store at 11th and Grand (demolished in 1972). The first two floors of this building were originally used for stables. The upper floors were used for storage. The building was constructed at a cost of \$40,000 and was sold in 1970 to Parmalee Industries for \$145,000.					
44. Description of Environment and Outbuildings A surface parking lot is west of this building. To the north is a commercial building. A commercial building and a surface parking lot are to the east.

42. Further Description of Important Features While the building's primary facade faces west on Walnut, its articulation continues around to the south facade. Bays are defined by projecting two-story pilasters that terminate in stone. Fenestration of the building on the first and second stories is with multipaned rectangular windows. The building terminates in tile coping.			
43. History and Significance This building was erected at a cost of \$20,000. The first tenant was the Exide Battery Depot.			
44. Description of Environment and Outbuildings A surface parking lot is west of this building. To the north, south, and east are other commercial buildings.

42. Further Description of Important Features The building relies heavily on Classically inspired motifs for its surface ornamentation. Three compound brick arches rise two stories and contain rectangular windows, with multipaned flanking sidelights and transoms. A projecting stone band course separates the second from third stories. Tiered rectangular windows on the third and fourth stories are framed by decorative brick bands. The fourth story features three Palladian windows which feature intricate moldings. The base of the windows rest on a projecting dentiled sill supported by acanthus brackets. A stone string course defines the parapet wall and is supported by consoles that are deeply undercut with involved (cont'd)

43. History and Significance The building was erected as a warehouse facility for the John Taylor Dry Goods Company. The John Taylor Dry Goods firm was one of the earliest and largest retailing companies to locate in Kansas City. Root & Siemens are attributed as architects for this building because at the same time as the construction of this building they were involved in designing a new store front for the Taylor Dry Goods Store at 11th and Main.

44. Description of Environment and Outbuildings Surface parking lots are east and west of this building. Other commercial buildings are to the north and south.

45. Sources of Information WP #20853 Kansas City Architect & Builder, June 1902, p. 27. Kansas City Star, February 8, 1970, p. 3E.		46. Prepared by Uguccioni

14. District Yes <input checked="" type="checkbox"/> Potent? No <input type="checkbox"/>				
15. Name of Established District				
42. Further Description of Important Features In 1960 the facade of this building was altered. The large windows of the 1st & 2nd floors were removed. The 1st floor now has a central wooden doorway, a secondary door at the south end of the facade, and two small rectangular windows at the north end of the facade. The 2nd floor is fenestrated with three windows. A brick soldier course serves as the sill for the 1st & 2nd floor windows. Cast iron beams are visible at the top of both floors. The only original decorative feature remaining is the corbelled brick cornice.				
43. History and Significance The early use of this commercial building has not been documented. In 1917 it was used as a welding shop.				
44. Description of Environment and Outbuildings To the north and south of this building are surface parking lots. Other commercial buildings are to the east and west.

			41. Distance from and Frontage on Road 115 feet on Walnut	
42. Further Description of Important Features The building is sited at the northwest corner of 19th and Walnut Streets, and boasts twin facades. The building's mass is articulated by means of brick piers enriched with vertical terra cotta bands. The east facade is three bays wide and each bay contains three multipaned square windows. A terra cotta band course separates the third from fourth stories. The parapet wall at the tenth story displays vertical terra cotta banding. A tower projection above the tenth story of the northern bay is decorated with terra cotta panels.				
43. History and Significance The first major tenant of this office building was the Post Office. The Gateway Substation, one of the largest in the midwest, occupied the first 4 floors and basemen when the building opened. From 1947-1958 the Veterans Administration occupied the building.				
44. Description of Environment and Outbuildings Surface parking lots are east and west of this building. To the north and south are other commercial buildings.

42. Further Description of Important Features The first story of this warehouse building contains three broad round arched portals that allow access to vehicular traffic and penetrate through to the opposite side. A 3rd arch contains a triple window. Bays between these apertures contain narrow segmental arch windows and a doorway with segmental transom. Segmental arch windows fenestrate the second and third story. A decorative brick string course extends across the parapet wall. A single story metal garage building has been placed on the south facade of this building.

## 43. History and Significance

This building was first occupied by the Western Storage and Warehouse Company

## 44. Description of Environment and Outbuildings

Other commercial buildings are to the north and west. The terminal railroad tracks are to the south. A surface parking area is to the east.

28. Further Description of Important Features The ground story of the east facade features a garage bay sheltered by a flat roof supported by tie rods. The main entrance is placed at the north end of the facade. The entrance door is flanked by multipaned sidelights and capped by a splayed lintel. The second through fifth stories are articulated into three bays by means of brick pilasters, and a tripartite window grouping. The parapet wall is shaped and is terminated with cut stone coping. A concrete block loading dock was added to the north facade in 1943. The dock contains 5 garage doors protected by a shed roof.		34. Wall Treatment brick 30	
29. History and Significance This building was constructed for the Kellogg-Mackay Company, a firm handling heating, ventilating, and plumbing supplies. Plans for the building were made in 1923, but the actual construction was delayed three years. The building was constructed at a cost of \$150,000.		35. Plan Shape irregular	
30. Description of Environment and Outbuildings Other commercial buildings are to the south and west. To the east is a surface parking lot.		36. Changes (Explain in #42) Addition <input checked="" type="checkbox"/> Altered <input type="checkbox"/> Moved <input type="checkbox"/>

42. Further Description of Important Features The building occupies a corner siting and its shape adapts it to the irregularities of the plot plan. The building consists of three sections composed of two identical sections radiating from a center section that is canted at the corner. The first story is composed of garage and store front bays. Above it is a decorative string course composed of stone banding and interspersed stone blocks. The second through fifth stories are divided by brick piers into bays containing three rectangular windows each. The building terminates in terra cotta coping. The central section between the third and fourth stories contains a relief panel inscribed with the words "HALL BROTHERS."			
43. History and Significance This building was designed and erected by the Dayton, Ohio firm of Frank Hill Smith, Inc. The site was chosen after 120 employees balloted on several proposed sites. This site was selected because of its proximity to Penn Valley Park. Hall Brothers eventually became one of Kansas City's largest businesses, Hallmark Cards, Incorporated.			
44. Description of Environment and Outbuildings Penn Valley Park is to the west. To the east is a surface parking lot. Vacant land is to the south. To the north is a surface parking lot and vacant land.

42. Further Description of Important Features The main facade of this house faces west. A hip roofed porch extends across the front, with the porch roof supported by modern wrought iron posts. Two double windows fenestrate the 2nd floor. All the windows feature stone sills. A hip roofed dormer with slate walls is placed on the west roof slope. It is fenestrated with two large double hung sash windows. Two identical dormers are on the north roof slope and an additional one is on the south roof slope. In 1965 a 21x32 foot addition was placed on the south facade, at the east end. Asbestos siding veneers the addition.			
43. History and Significance This was originally the home of William F. Mayer, a member of the confectionary firm of Brown and Mayer.			
44. Description of Environment and Outbuildings A church (used as a VFW Hall) is south of this house. To the north, east, and west are other residences.

15. Name of Established District				

42. Further Description of Important Features The back portion of the building, with a north-south axis was probably the original structure. The front portion, with an east-west axis, is probably an addition of 1898. The main, west facade, has been considerably altered. A concrete block addition on the rear of the north facade was undertaken in 1929. Charles C. Vanderberg was the architect for the 1929 addition.

43. History and Significance This structure was built to house the Third Presbyterian Church. The City Directory first lists the church at this address in 1889. Previously it had been in a West Bottoms location. The building continued to house the church until the 1950's, when it became a VFW Post.

44. Description of Environment and Outbuildings A surface parking lot is south of this building. To the east are residences. Vacant land used for parking is to the west.

		41. Distance from and Frontage on Road			
42. Further Description of Important Features In 1963 the two story porch on the west facade was enclosed, severely altering the architectural features of the building. The attic story of the west facade terminates in a fenestrated gable. A brick tower pierced with segmental arch windows appears at the north end of the west facade. A gable roof dormer pierces the north roof slope.					
43. History and Significance The earliest resident of the house was Carrie P. Whitney (1888). The house appears to have been built for Peter Rosenlof, a tailor who lived at 1840 Washington in 1888. Mrs. Whitney was a widow.					
44. Description of Environment and Outbuildings Surface parking lots are north and south of this building. To the west is vacant land. A commercial building is to the east.

42. Further Description of Important Features A garage entrance is centrally located on the east facade, flanked by pairs of windows. A brick soldier course runs in a band above the door and windows South of the garage door is a single entry door. An addition projects from the rear north facade. This 1956 addition was accomplished by the Universal Construction Company.			
43. History and Significance This building originally housed the Missouri Pacific Transportation Company. The structure was used as a division operating point and for the maintenance and storage of buses operated by the company.			
44. Description of Environment and Outbuildings Southwest Trafficway is west of this building. To the north is a surface parking lot and a commercial building. A vacant lot is above grade, to the south. To the east is a commercial building and a surface parking lot.

42. Further Description of Important Features The residence reflects the characteristic asymmetry found in the Queen Ann style. A railed porch consists of turned wooden columns that support a shed roof. The porch wraps around the west and south facades. A turret with conical roof projects at the southwest corner. Rusticated stone is used for the quoined window surrounds, the quoining at the corners of the building, and a band course which extends across the second story. A geometric molding appears just below the cornice line. A small hipped roof gable pierces the roof line at the west end of the residence.					
43. History and Significance This was originally the home of realtor, Ellwood S. Hutchin.					
44. Description of Environment and Outbuildings A surface parking lot is north of this house. To the east is a commercial building. A vacant lot is to the west. Another residence is to the south.

15. Name of Established District			41. Distance from and Frontage on Road 35 feet on Washington

42. Further Description of Important Features Brick piers extending from the first through third stories carry porches which are featured in the first and third bays. The recessed central bay contains the pedimented entrance. Fenestration of this central bay is of rectangular multipaned windows with stone lugsills. Stone rectilinear ornament also embellishes the capitals of the piers. The parapet wall is shaped and terminates in stone coping.

43. History and Significance The six apartment flat was constructed at a cost of \$9,000 for the Shryrock Realty Company. In 1909 RE Shryrock retired and his brother Frank became president of the company. The Shryrock Realty Company handled both business and residential property. Frank Shryrock held the post of president of the real estate board for two terms from 1925-28 and 1931-34. The apartment was equipped with speaking tubes.

44. Description of Environment and Outbuildings Vacant lots are north and east of this building. To the south is a residence. A residence is to the west also.

15. Name of Established District			

42. Further Description of Important Features The main facade faces east with the north bay projecting forward. The bay contains the entrance. A gablet is placed at the summit of the 2nd story. A highly ornate bracketed cornice extends across the parapet of the east facade. The roof is hipped and two chimneys extend beyond the roof line on the south facade. Narrow rectangular one-over-one double-hung sash windows fenestrate the residence. Siding has been applied over the east and south facades, while the brick of the north facade is uncovered.

43. History and Significance This was originally the home of Daniel G. Saunders, a clerk for the E. P. Cowan Lumber Company.

44. Description of Environment and Outbuildings An interstate connector is west of this building. To the north is a residence. To the south is an apartment. A duplex is to the east.

				40. Visible from Public Road? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
				41. Distance from and Frontage on Road 118 ft. on Washington
42. Further Description of Important Features The building faces west onto Washington. A raised stone foundation follows the grade of Washington Street, becoming higher at the south end. A stone bandcourse separates the basement from first story. The entrance features a round arched surround. Rectangular single pane replacement windows possess stone lugsills and lintels. A decorative brickwork course embellishes the parapet wall which rises in the center to provide a signage area.				
43. History and Significance This was originally the Rochester Brewery, which moved to this building from across the street c. 1896. J.D. Iler was proprietor of the brewery and it was sometimes known as the J.D. Iler Brewing Company. By 1924 the building was occupied by the Bruce McDonald Company, oven manufacturers.				
44. Description of Environment and Outbuildings A surface parking/storage area is north of this building. To the south, east and west are other commercial buildings.

			40. Visible from Public Road? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
			41. Distance from and Frontage on Road approx. 120 feet on Southwest Blvd.
42. Further Description of Important Features This building has evolved from a series of additions to two original structures. The south facade has an entrance at the east end and is veneered with buff brick. A band of multipaned, hinged windows extends across this facade. The east and west walls of this section of the building are covered with metal. Near the north end of the structure, fronting onto Washington, is another entrance. The concrete block loading dock, further north, was added in 1959. The Flett Construction Company was the contractor.			
43. History and Significance In 1920 the Inter-City Garage and Repair Works was constructed, fronting along Southwest Boulevard. That structure was enlarged to the north in 1954 and probably the present facade was added at that time. The 1954 addition joined a 1925 brick structure that had been erected to house the Thomas Dawson construction firm. This structure, fronting on Washington, was enlarged to the north with a loading dock in 1959.			
44. Description of Environment and Outbuildings Surface parking lots are north and west of this structure. To the south is a small traffic island. A commercial building and a surface parking lot are to the east.

42. Further Description of Important Features The main facade of this building originally faced south. Remodeling efforts have relocated the entrance to the north facade. The window areas along the south facade have been filled in with concrete pebble aggregate. The remaining south wall surface is veneered with concrete panels. A concrete block addition extended the building to the north in 1957. Contractor for the addition was the Bennett Construction Company.			
43. History and Significance This building was constructed for the Mode O'Day Corporation, a dress manufacturing firm, as their midwestern headquarters. In 1956 the corporation had 250 franchised outlets in a 15-state area, that necessitated a 15,000 square foot addition in 1957. The firm continued to occupy the building until 1968, at which time the building was remodeled for its current tenant.			
44. Description of Environment and Outbuildings Penn Valley Park is south of this building. To the north is a surface parking lot. Commercial buildings are to the east. To the west is a surface parking lot and a commercial building.

42. Further Description of Important Features The building consist of two sections, connected by a narrow passageway. The main facade faces east and is marked by a portico supported by sandstone piers. The transoms of the rectangular 1st floor windows have been filled in. The rectangular 2nd floor windows are surmounted by relieving arches. String courses are placed above the basement level and below the 2nd floor windows. The brick cornice is corbelled.				
43. History and Significance This elementary school was constructed with 4 classrooms on each floor. In 1887 it was enlarged with a 4 room addition placed on the west, connected by a hallway. William F. Hackney was the architect of the addition. The school occupied the building until 1932. After sitting vacant for 6 years it was utilized by various concerns, including the Helping Hand Institute, and the Midland Radio School. The building was listed in the National Register of Historic Places on 9/2/82 and in the Kansas City Register on 2/26/82.				
44. Description of Environment and Outbuildings A surface parking lot is north of this building. To the east, west, and south are commercial buildings.

15. Name of Established District			

42. Further Description of Important Features The building mass is articulated by means of slightly projecting brick piers that frame a tripartite window arrangement. Stone piers extend from the second through fourth stories and terminate in Art Deco inspired capitals. A stone band course is placed at the summit of the fourth story. Another band course is placed above the storefront panels of the first story. An entrance door is located at the south end of the west facade. Elaborate fire proofing measures were undertaken including storage areas for film in steel vaults set in concrete. The building also included a projection room.

43. History and Significance This building originally housed firms involved in the motion picture industry, such as: Vitagraph, Inc., Warner Brothers Pictures, and First National Pictures. It is still used by firms connected with the film industry.

44. Description of Environment and Outbuildings Other commercial buildings are to the north, east, and west. To the south is a surface parking lot.

42. Further Description of Important Features The 2nd floor of the north end of this building was an addition of 1937. Two entrances are recessed at the center of the east facade. The windows of the 2nd floor have been boarded over. Brick relief panels decorate the parapet wall above the 2nd floor. In 1982 a 1,000 square foot residence was erected on the roof of the south portion of the building (architect: James Stevens; builder: Dick Mathews, Gladstone).

43. History and Significance This building was first leased to the Metro Picture Corporation. In 1937 the building was remodeled and the 2nd floor was added to adapt the building for use by the National Screen Service, a branch distributing agency and manufacturer of film previews.

44. Description of Environment and Outbuildings A surface parking lot is south of this building. A commercial building is to the north. To the east is a surface parking lot.

			41. Distance from and Frontage on Road 48 feet on Wyandotte
42. Further Description of Important Features The building faces west onto Wyandotte. The first story contains a number of windows which are embellished with brick soldier course lintels. At the corners, and surmounting the brick piers separating the windows, stone rectilinear banding is applied. The second story windows possess stone lugsills and soldier course lintels. Vertical stone banding is applied to the brick of the parapet. An elaborate stone door surround appears at the south end of the west facade.			
43. History and Significance This building was originally occupied by the Film Booking Office of America, Inc., and the United States Army Motion Picture Service. The building was constructed for Dr. Nathan Zoglin, a principal developer in the "film district."			
44. Description of Environment and Outbuildings Other commercial buildings are south, east, and west of this structure. A surface parking lot is to the north.

42. Further Description of Important Features The building faces east onto Wyandotte, and follows a rather steep grade of the street. Smooth stone facing is applied to the first story, and a doorway with a stone Tudor arched surround is at the south end of the building. The central bay features vertical stone banding that extends through to the parapet wall. Rectangular panels featuring elaborate relief carving articulate the parapet. A band course divides the second story from the parapet wall which terminates in stone banding. At an unknown date, an addition was placed on the rear of the building.			
43. History and Significance The original tenant of this building was the Paramount Publix Corporation, theater operators.			
44. Description of Environment and Outbuildings Other commercial buildings are north, south and east of this structure. An elevated, enclosed walkway bridges the alley behind this building to connect it with the building to the west (213-15 West 18th Street).

42. Further Description of Important Features The first story of the west facade contains entrances at the north and south ends. Above the doors and storefronts are placed bands of brick laid in soldier course. A stone string course separates the first from second story and also defines the parapet wall. Stone quoining occurs at the corners of the building. The parapet wall is stepped and is embellished with decorative brick rectangular panels. An addition extended the building 50 feet to the south in 1945. Brick piers divide this addition into bays. The addition has a truss roof. The building contains 23,000 square feet of space.					
43. History and Significance This building was constructed as a warehouse for A.B. Stephens and Company, fur merchants. The company was headed by Albert Stephens. The addition to the building was to accommodate the expansion of the Fox Product Company, syrup manufacturers.					
44. Description of Environment and Outbuildings Other commercial buildings are north, south, east, and west of this structure.

The second story is fenestrated with 3 paired rectangular windows, flanked by single rectangular windows, that possess stone lugsills and lintels. The parapet wall is distinguished by a string course of corbelled brick. The building terminates in tile coping. The building contains 10,000 square feet.				
43. History and Significance The water permits indicate this building was to be used for "manufacturing ladies and gents suits." This has not been confirmed by City Directories and the early use of the building is unknown. The Decorator's Wallpaper Company began occupying the building in 1939 and in 1953 purchased the building.				
44. Description of Environment and Outbuildings Commercial buildings are north, south, east, and west of this structure.

42. Further Description of Important Features The entrance placed centrally on the east facade, features an elaborate round arch surround set into brick pilasters carrying the entablature. The voussoirs of the arch are embellished by decorative brickwork, and a stone keystone. The fenestration of the first story consists of tripled multipaned windows which possess stone sills. A stone band course separates the basement from first story. The second story also contains rectangular windows with stone lintels and sills. The parapet wall is distinguished by a corbeled brick arcade. Dentiled moldings run above this and at the termination of the parapet wall.

43. History and Significance The Berkowitz Envelope Company was begun in 1886 and soon became the first exclusive envelope plant west of the Mississippi. As the company expanded they erected this building at 1920 Wyandotte, and still later, around 1911, moved again to much larger quarters as their business prospered. The company, now known as Tension Envelope, still manufactures paper products in Kansas City. The Otis Elevator Company moved into the building after the Berkowitz Company vacated, and was a long term tenant.

44. Description of Environment and Outbuildings Other commercial buildings are west and south of this structure. A small surfaced parking area is to the north. To the east is another commercial building.

5A-AS-008-1572

The Kansas City Architect and Builder indicates that in 1900 a building permit was issued to the Berkowitz Envelope Company for an \$8000.00 business building on Wyandotte between 19th and 20th Streets. The city directory of 1901 locates their building at 1918-20 Wyandotte. The water permit however was not issued until 1906.

42. Further Description of Important Features The main facade faces north. The building is characterized by regularly spaced rectangular windows that are separated by brick piers. The west facade features stone facing on the first two stories. A terra cotta band course separates the eighth from ninth stories. A tower is placed at the south end of the building. Garage bays pierce the first story of the south facade. A one-story addition extends on the south facade. Terra cotta banding decorates the tower and terminates the parapet wall.

43. History and Significance The H. D. Lee Mercantile Company was established in Saline, Kansas in 1889. The company opened a clothing manufacturing plant in Kansas City in 1915. This building housed factories and the wholesale grocery business of the Lee firm. The building contains 230,000 square feet.

44. Description of Environment and Outbuildings A surface parking lot and loading dock area are south of this building. To the east and west are other commercial buildings. To the north is a commercial building and a surface parking lot.

42. Further Description of Important Features The end bays of the west facade contain arched openings on the first story. The end bays are defined by stone piers that extend from the second story beyond the shaped parapet. The central three bays are distinguished on the parapet level by a stone panel inscribed in raised relief with the legend: "SAFEWAY STORES INCORPORATED." Stone string courses divide the building horizontally into individual segments. A major remodeling was accomplished in 1934; and a loading dock added in 1949. Architect for these projects was Charles E. Keyser. In 1976 an addition was placed on the north facade of the building. The building contains 84,000 square feet.			
43. History and Significance The building was constructed for the Safeway chain of grocery stores, as their regional office, main warehouse and bakery. The company was founded and originally named after M. B. Skaggs. In 1929 the Safeway chain had 640 retail stores, 44 warehouses and 15 bakeries. During the late thirties, the Safeway Company engaged in an extensive building program and constructed this warehouse building to serve its rapidly expanding facilities.			
44. Description of Environment and Outbuildings Other commercial buildings are east and west of this structure. A surface parking lot is to the north. To the south is another commercial building.

42. Further Description of Important Features The building is sited at the northwest corner of East 22nd Street and Wyandotte. A one story addition on the north side of the original structure has become the primary facade. The addition is windowless and contains an entrance and one garage bay. The older three story section of the building is irregular in plan as it is canted to conform to its site. Windows are multipaned. A stone stringcourse defines the parapet, and shield medallions are placed centrally on the parapet surface. Many of the entrances and windows on the first story have been filled in.

43. History and Significance This building was constructed as a warehouse for Westinghouse Electrical and Manufacturing Company. The date of the addition is undocumented.

44. Description of Environment and Outbuildings The terminal railroad tracks are south of this building. To the north is a surface parking area. Commercial buildings are to the east and west.

42. Further Description of Important Features The main entrance to this building faces south. The wing projecting to the south features brick walls, with metal canopies projecting over the windows. The wing that projects to the west features a metal grid with metal spandrels running below the rows of windows.

43. History and Significance Work was started on this 100 capacity nurses dormitory in September 1959 but was delayed by bad weather and construction strikes, finally being completed in 1961. The building is currently used by Trinity Lutheran Hospital for clinics, laboratories, and administrative offices.

44. Description of Environment and Outbuildings Trinity Lutheran Hospital is to the south. To the west is Penn Valley Park. A vacant lot is to the north. To the east is the Trinity Lutheran Residence Hall.

42. Further Description of Important Features This hospital structure has undergone a series of additions and alterations. The original 1910 structure has been demolished. Part of a 1925 addition, fronting on Wyandotte is still visible. A new entrance, lobby, and administrative offices were added to the south end of this section in 1954. This has been hidden by a later addition. In 1966-68 a six story wing was added to the building, fronting on Baltimore. A 3 story wing at the north end of the complex was added in 1969-73. The completion of this section of the building was delayed by construction strikes. In 1981 construction was started on the addition of a 3-story southwest wing and a new primary entrance. (continued)				
43. History and Significance Penn Valley Hospital was built on this site in 1910 (architect: John McKecknie). In 1911 the hospital was sold to the Swedish Hospital Association, an organization formed in 1906. The name of the hospital was changed to Trinity Lutheran in 1921. Henry C. Eckland (Moline, Ill.) was the architect for the 1925 addition; Meyer J. Sturm (Chicago) was the associate architect. The Swenson Construction Company was the contractor. Architect for the 1954 addition was Emil Bayerl; the Swenson Construction Company was the contractor. (cont.)				
44. Description of Environment and Outbuildings Penn Valley Park is west of this structure. A hospital-related residence hall and parking structure are to the east. A vacant lot is to the north and a commercial building is to the south.

Historic Inventory  
3009-11 Wyandotte

#42 continued.

The \$18 million addition of 90,000 square feet was completed in 1983. The 1954 entrance was demolished to accommodate this latest expansion. The exterior walls of this latest addition consist of precast, textured concrete panels. Red tile forms a string course beneath the horizontal windows bands.

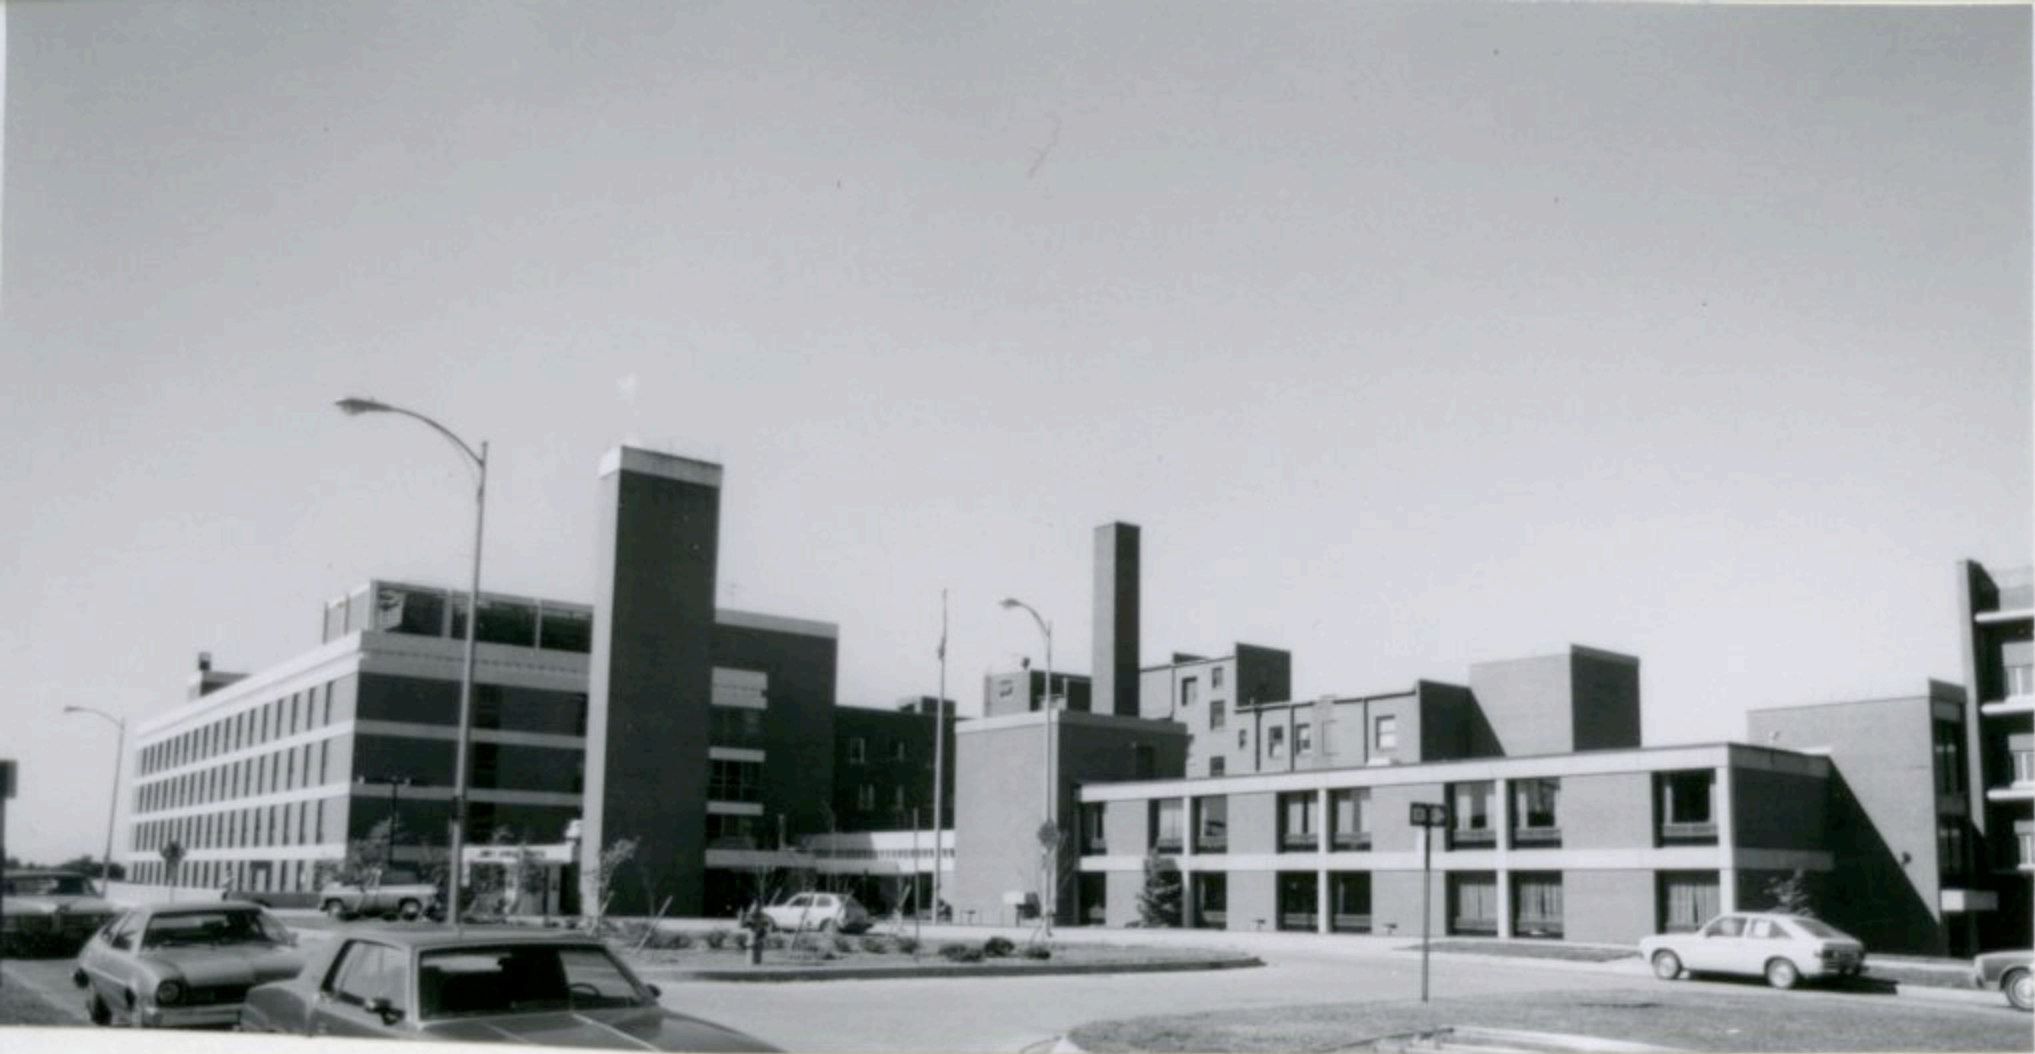

#43 continued.

Radotinsky, Deardorff & Associates were architects for the 1966-68 east wing; the Swenson Construction Company was the contractor. Howard-Needles-Tammen & Bergendoff were architects for the 1969-73 north wing; contractor was the Bennett Construction Company. The same architecture and construction firms were responsible for the 1981-83 addition.
