Describe the present and original (if known) physical appearance

The Stark-Carlson residence faces east (towards the Mississippi River) from its location within walking distance of Louisiana's downtown business district. A two-story, three bay brick structure, it is designed in a midwestern version of the Italianate style. Decorative features in the Italianate mode include a bracketted cornice, gabled roofline, and five pairs of semi-circular topped windows with oculae. The central entry and second floor of the front facade balcony, once very much in keeping with the Italianate style, have been modified to include a pediment-style projection (portico) supported by wide columns. An original, two-story side porch was enclosed to create an additional parlour/library on the first floor and a double-sized master bedroom on the second.

The room additions occurred very shortly after the house was constructed, as evidenced by the matching interior woodwork. In spite of these changes, the house retains the overall integrity of its original construction ca. 1856-60.

EXTERIOR

Shaped originally in the plan of an ell, the house measures approximately 45' in width by 50' in depth. It consists of two stories, a full unfinished attic, and a cellar with stone and brick foundation that is full height in some areas, and crawl space in others. The western elevation of the ell was enclosed shortly after the house was built, as described above. Sunporches of frame construction were added to the addition some time later.

The exterior walls of the building are constructed of red brick laid three thick in common bond. The entire exterior has been painted more than once. Both wood trim and brick are now painted white. Five brick chimneys with decorative capping are contained within the fabric, projecting through slopes of the roof.

Windows on the primary facade consist of 5 pairs of 2 over 2 narrow, semi-circular double hung sash with decorative oculae complimenting each pair. Side and back windows of each floor line up with each other and are of a much simpler 2 over 2 design. A segmental-arched doorway with red etched glass occurs around a panelled door at the main entrance centered on the primary facade.

The roofline is accented with a bracketted projecting cornice that continues around both sides and the front of the building. The original Italianate balcony columns on the primary facade were replaced during the 1930's with four tuscan columns supporting a projected pediment. The original second story balcony was replaced with one of a smaller scale that is not supported by columns.

Statement of Significance (in one paragraph)

The Stark-Carlson house is architecturally significant as one of the elegant mansions of Louisiana, Missouri, and as the home of several prominent Louisiana citizens. The present neo-classical portico imparts a Romano-Tuscan look to the house not unlike that of the famous Tennessee house, "Rattle-and-Snap," so that it comes as a small surprise that it was added in the 1930's as a manifestation of the early Twentieth Century Colonial Revival. The portico addition was accomplished with enough skill and taste to stand as an interesting example of how older picturesque houses were "classicized" to suit the tastes of the time, and other examples of similar remodelings can be seen throughout Missouri. Historic views of the house show it to be much more picturesque in its original form and a good example of the Italianate Style which by the late 1850's was supplanting the more conservative Federal and Greek Revival styles as the model of taste and achievement for pretentious houses in Missouri. The Tuscan Villas designed by George I. Barnett, the well-known English-born St. Louis architect, in the late 1840's and early 1850's, are among the earliest Italianate residences to make their appearance in Missouri, but by the middle of the decade the style was well in evidence in the prosperous communities of outstate Missouri. In particular, it established itself in the river towns above St. Louis: Louisiana, Hannibal, and Palmyra. The interior of the Stark-Carlson house, even without its original staircase, reveals the tentative way in which the style was adopted by outstate builders accustomed to the Greek Revival. One fireplace mantel is an Italianate marble one, the other a traditional wood Greek Revival pilaster mantel, and the interior first floor doorways have Italianate architrave moldings topped with Greek Revival pediments. For these reasons, the house is an important document of the process by which a cosmopolitan and national standard of architectural taste was, by the time of the Civil War, beginning to supplant the conservative and regional standards brought by the antebellum migrants to Missouri who came primarily from the states of the upper South.

The Stark-Carlson House was built by William Luce, a wealthy tobacco merchant, for his son, Homer, after the family's purchase of the site on February 14, 1856. In 1872 heirs of Homer Luce sold the property to the Hon. David P. Dyer, who was described at length in the 1875 Pike County Atlas for his distinguished career in the Missouri State Legislature. His house was described as "an elegant residence, one of the most attractive in the city." Colonel Dyer sold the house in 1875 to John B. Henderson, thus beginning a series of ownership transfers that continued until the building was purchased by Judge Eugene W. Stark in 1902. The Stark family's heritage goes back to 1816 when Judge James Stark arrived in Missouri from Kentucky and founded the now internationally known Stark Brothers Nurseries. (Prior to 1902 city directories and old photo-

INTERIOR

The interior of the Stark-Carlson residence retains a substantial degree of original integrity. Dominating the central hallway is an elaborately carved staircase that replaced the original staircase sometime around the turn-of-the-century. Original woodwork and doors have been retained throughout, although most have been painted.

Inside the wood moulding around door and window openings shows a consistency of theme throughout the house. Circular-shaped carvings may be found beneath nearly all windows, and most doors and windows feature a stylized pediment treatment at the top.

This house is located on a spacious landscaped lot close to Louisiana's downtown business district. Several other large old houses are located in the immediate area. Two outbuildings are now associated with the house. One is a garage located on the extreme southeast corner of the property (once the site of a small barn) and a cottage-like structure toward the middle of the lot, close to the western property line. The lot has been professionally landscaped.

graphs indicate that the residence was used as a boarding home.) The property remained in the Stark family until it was purchased from Lawrence Stark's widow by the present owners.

A history of Pike County that is currently in the process of being published states that the house was designed and constructed by architect and builder, Levi Ruggles, who, with his stepson, P.H. Baird, constructed five of Louisiana's largest residences.
