ARCHITECTURAL/HISTORIC INVENTORY SURVEY FORM

SLCASH3-001

1. No. 011	3. Location of Negatives: Landmarks Association of St. Louis, Inc., 917 Locust, St. Louis, MO 63101	
2. City/County: City of St. Louis, MO	4. Prepared by: Cynthia Longwisch & Mary M. Stiritz, Landmarks Association of St. Louis, Inc.	
5. Date: 11/90	6. Sources of information: St. Louis Public Records, City Hall; St. Louis Public Library; MO Historical Soc.	
7. Building? Yes	8. On National Register or part of estab. district? No	
9. Ownership: Private	10. Visible from public road? Yes	11. Endangered? No
12. Street address: 2217 N. First		13. Style: commercial/industrial
14. Date(s): 10/18/1888; 1908; 1916		
15. Architect:		16. Builder:
17. Original Use: foundry		18. Present Use: warehouse
19. Owner's name/address if known: Krane-Garrick Manufacturing Co., 2224 2nd		
20. No. of stories: 2	21. Basement? unk.	22. Wall construction: masonry
23. Foundation material: limestone		24. Roof type/material: flat & gabled
25. No. Bays: Front 17 Side 25		25. Wall treatment: red brick
26. Plan shape: L		27. Changes: Addition? yes Altered? yes
28. Exterior condition: fair		29. Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Double-rowlock segmentally arched windows with stone sills are infilled; recessed panels topped with dentilling divide them into pairs on the east elevation. A concrete loading dock with a frame and iron overhang extends both lengths of the building. The western part of the L is flat-roofed.		
32. History and Significance: The Ranken & Fritsch Foundry Company took out a building permit in 1888 for \$3,000 for a one-story foundry building. The building was later bought by the Foundry Inv. Co. who took out permits to alter the building in 1908 (for \$350 and \$1800) and in 1916 (for \$2600). The original building probably was gabled, with the flat-roofed portion coming at one of the later dates, along with the upper story.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Openings have double-rowlock segmental arches, many of which are infilled with brick. North roofline is slightly stepped.		
32. History and Significance: The Herman Oak Leather Co. took out the permit for \$3,500 to build this building in 1918 as part of his tannery complex. The company had been operating in this city block since 1888; a frame tannery building was in use across the street by Herman 1886. The complex is still in use as a tannery today.

28. Exterior condition: good		29: Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: A series of small vents with tiny stone hoods runs across the building at the attic; a corbelled cornice extends below. Original arches of second-story windows appear to have been altered; they now have flat arches and brick sills, with the same one-over-two-over-one horizontally hinged panes as are found in the building (cont'd. below)		
32. History and Significance: to the north. First-story openings have been infilled with brick; double-rowlock segmental arches are still visible. A loading dock bay is located in the south end. The building is attached to a one-story building on the north and a newer brick building on the south. The permit for this building was taken out by Herman Koenitzer in 1901 for \$4,000 for a warehouse for his Herman Oak Leather tannery, a concern still operating on this site.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: A deeply corbelled cornice is interrupted by pilasters dividing the facade. Triple-rowlock segmental arches top brick-silled windows. One-over-two-over-one windows are horizontally hinged (see photo). Openings at the first story have been infilled with brick to fit smaller panes. Two-story brick addition attached to south side.		
32. History and Significance: Herman Koenitzer took out the permit in 1888 to build a \$5,000 tannery. The company became known as the Herman Oak Leather Co. and operates in this building today. No other information could be found on Koenitzer.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Parapeted gable end is stepped with a slant on the north side and straight on the south; center and south sections have corbelled brick cornices. Double rowlock segmentally arched windows with stone sills are mostly infilled with brick or concrete block. Round arches top the two outside bays in the primary elevation. Loading dock on north side.		
32. History and Significance: Smith, Beggs & Ranken were given a building permit for a \$4,000 storehouse in 1881. No firm by this name could be located, although the foundry of Ranken & Fritsch was located adjoining this building after 1888. C. H. Beggs and David Ranken were two St. Louisans of money and position about this time and possibly funded the undertaking for speculation.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: A cast-iron column and framing remain at the southeast corner; concrete block infill has obliterated the original windows of the entrance. A cast-iron sill and first-story lintel course (s. & e. elevations) also remain. The other entrances and windows have flat arches and are infilled with wood or CMU. A garage bay is (cont'd. below)		
32. History and Significance: located at the north end of the front elevation. A corbelled cornice beneath the wide overhanging eaves is the main ornament left on the building. The permit for this "store & dwelling" was taken out by William A. Meinhart in 1910. It appears that the original plan housed two residential units, judging from the two rear doors and the reference to the building being a "double" in the building permit.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Terra cotta coping rims the flat roofline of this functional building. Windows have flat arches, the larger of which at the first story have been enframed with concrete and sized down with brick infill. Some bricked-in segmentally-arched openings are visible; it is probable that the other windows were originally segmentally (cont'd. below)		
32. History and Significance: arched as well. Several sliding loading dock doors. The permit for this building was taken out in 1907 by the Union Cooper-age Co. for \$5,000. The company was established in 1862 and incorporated in 1886. Their frame factory stood on this site at least as early as 1883 (see Hopkins map). They built kegs, half barrels and barrels, well buckets, harvest kegs, and "patented all wood and porcelain enameled water coolers," according to their city directory listing. Here in 1930, they were gone by 1940.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: North and south walls have parapeted chimneys. Windows have segmental soldier arches and stone sills. Two-over-two window panes. Two dormers. Two centered, transomed entrance doors, one of which is missing stone steps. Denticulated brick cornice. Rear wood porch.		
32. History and Significance: The permits for this city block go back as early as 1876, and no permit was recorded for this house. It is fairly clearly not on the 1875 Compton & Dry map, however; hence the c. date of 1875. (It does appear on the 1883 Hopkins map.) The building seems to have always been a residence.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Openings all at least partially infilled. Raised cornice band. Double rowlock segmental arches, brick sills. Terra cotta coping. May have originally been a two-story building (see below).		
32. History and Significance: An 1889 building permit for a \$2,500, 2-story warehouse was taken out by Charles Wunderlich for a location on the east side of Ninth. A permit dated 5/16/1903 was taken out by the St. Louis Enamel Works for \$3,240 to "alter enameling works," no story height specified. No other permit appears on file that could be for this building. Wunderlich operated a cooperage works at the south end of the block that possibly extended as far as 2214-24.

2. City/County: City of St. Louis, MO	4. Prepared by: Cynthia Longwisch & Mary M. Stiritz, Landmarks Association of St. Louis, Inc.	
5. Date: 11/90	6. Sources of information: St. Louis Public Records, City Hall; St. Louis Public Library; MO Historical Soc.	
7. Building? Yes	8. On National Register or part of estab. district? No	
9. Ownership: Private	10. Visible from public road? Yes	11. Endangered? No
12. Street address: 2307-11 N. Ninth		13. Style: commercial
14. Date(s): 11/5/1877		
15. Architect: unknown		16. Builder: unknown
17. Original Use: stable		18. Present Use: storage
19. Owner's name/address if known: Modern Screw Products, Inc., 2307-11 9th		
20. No. of stories: 2	21. Basement? yes	22. Wall construction: masonry
23. Foundation material: limestone		24. Roof type/material: flat
25. No. Bays: Front 12 Side		25. Wall treatment: red brick
26. Plan shape: rectangular		27. Changes: Addition? yes Altered? yes
28. Exterior condition: fair		29: Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		

31. Further description of important features: This building appears to have been built in two or three sections, although only one permit was found. The north section features arched stone lintels and stone sills above; brick segmental arches and stone sills can be found below and in the remaining part of the building. Extensive brick infill has changed former stable door openings.

32. History and Significance: A \$600 building permit was taken out in 1877 by William Paschedag to build a two-story stable. The building was owned during the 1920s - early 1940s by W. Doane of the Doane Carton Co. Doane used the building as a factory for his carton-manufacturing business. Later alteration permits indicate that the upper floor was also used as a residence during the early 20th century.

Corinthian columns remain, although the original window configuration has been altered. Windows have segmental soldier arches and stone lugsills; those on the primary elevation have stone keystones. Corbelled brick cornice. All (cont'd. below)		
32. History and Significance: openings infilled. Parapeted brick chimneys on north and south walls. Two dormers. Rear, one-story brick addition is much newer and connected by a transitional passageway. Henry Bauer took out the permit for this building in 1883 for \$4,700.

26. Plan shape: rectangular	27. Changes: Addition?	Altered? yes
28. Exterior condition: good	29: Open to public? no	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: The original mansard roof no doubt featured slate tiles; it now has asphalt shingles. A corbelled cornice with ornamental pressed brick highlights the building. Segmentally-arched openings feature fanciful pressed brick made in a recessed pattern. Stone lugsills have brackets. Entrance is recessed. A passageway opening to (cont'd. below)		
32. History and Significance: the rear of the building has had its arch altered; it probably was originally similar to the arches of the other openings. House is built directly on the sidewalk with stone steps (wood inside entrance) and stone water table. Rear elevation can be seen at middle left in photo for #101. It features a wood and metal two-story porch. Only one permit for a mansard exists for this city block, and it is Joe Mettig's for \$3,400 (dated 7/3/1888), the usual cost of a double. It apparently included 3318 N. 9th (#98).

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: The original mansard was probably slate-covered. Elaborately corbelled cornice. Segmental soldier arches have shaped stone keys; bracketed stone lugsills. Two-over-two double-hung wood sash. Recessed, wood-paneled entrance. Narrow passageway through to rear is transomed. Slight setback from sidewalk.		
32. History and Significance: The only permit for a mansarded dwelling in this city block was taken out by Joe Mettig on 7/3/1888 for \$3,400. That sum is about double the standard single dwelling cost, and about equal to the usual cost of a double; based on this information, it appears that #97 and #98 were built from the same permit.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This is two separate buildings with a commonwall; the round-arched center doorway opens into a passageway to the rear. Windows have flat stone lintels and stone sills (both painted green). Denticulated brick cornice. Single dormer. Parapeted chimney in commonwall. Stone water table. Built on sidewalk line with stone steps. (cont'd. below)		
32. History and Significance: Repair work to the primary facade, mostly at the second-story level, was done with an inappropriate variegated brick (the facade of the house adjoining to the north was completely redone with this brick, in the process rendering it totally without integrity - see photo, right). W. Wilhelmy took out the single permit for this double dwelling in 1876 for \$7,000.

31. Further description of important features: Although the building has been entirely encased in permastone (c. 1946), attempts were made to retain the major architectural elements; windows still have segmental arches and stone sills; paired, scrolled brackets remain at the simple wood cornice. The side parapet retains its chimneys. Large front openings may have been part (cont'd. below)		
32. History and Significance: of a storefront. Rear two-story and one-story additions. This building appears on the 1875 Compton & Dry map. It was used as a saloon at least c. 1904 when M. Mummer took out a permit for a minor alteration.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			
31. Further description of important features: A gabled parapet flanked by colonettes bears a corbelled cornice. Centered at the second story are two windows with round-arched pressed-brick hoods. Remaining windows feature triple rowlock segmental arches (mostly double rowlock on side elevations). Remnants of a corbeled cornice can be seen between the two stories on (cont'd. below)			
32. History and Significance: the front elevation. Most openings have been infilled; original windows appear to have had multipane industrial sash. The Theiling Moulding Co. (later, Theiling-Lothmann) (see brief history attached) took out three major building permits relating to this building. The first was in 1894 for a one-story factory at \$3,600; the second was in 1898 for a \$2,500 moulding mill of unspecified height. The third was in 1907 for a "2-story addition to warehouse" for \$5,924, facing Bremen, clearly the n-s ell portion.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			

31. Further description of important features: A stepped parapet features a raised brick design in its pediment. A copper cornice across the building's front elevation surmounts brick corbelling that "drips" down at intervals into a brick soldier lintel course. First-story front windows have flat soldier arches; side windows have double-rowlock segmental arches. (cont'd. below)

32. History and Significance: Stone sills on the front elevation; wood on the side. Windows are replacements or boarded. Square brick pillars support a hipped porch roof with profiled brackets. Double entrances. Rear wood porch. P. J. Mays took out the permit for this \$5,500 tenement in 1912 and built it himself. No information could be found on Mays. The building appears to have always been used as a residence.

1. No. 132	3. Location of Negatives: Landmarks Association of St. Louis, Inc., 917 Locust, St. Louis, MO 63101	
2. City/County: City of St. Louis, MO	4. Prepared by: Cynthia Longwisch & Mary M. Stiritz, Landmarks Association of St. Louis, Inc.	
5. Date: 11/90	6. Sources of information: St. Louis Public Records, City Hall; St. Louis Public Library; MO Historical Soc.	
7. Building? Yes	8. On National Register or part of estab. district? No	
9. Ownership: Private	10. Visible from public road? Yes	11. Endangered? No
12. Street address: 4040 N. Ninth		13. Style: vernacular
14. Date(s): c. 1900		
15. Architect:		16. Builder:
17. Original Use: comm./resid.		18. Present Use: residential
19. Owner's name/address if known:		
20. No. of stories: 2	21. Basement? yes	22. Wall construction: masonry
23. Foundation material: limestone		24. Roof type/material: flat
25. No. Bays: Front 3 Side 5		25. Wall treatment: brick/permastone
26. Plan shape: rectangular		27. Changes: Addition? yes Altered? yes
28. Exterior condition: fair		29. Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Parapeted front elevation has had ye olde permastone treatment. A painted, corbelled brick cornice has the look of having been applied to the permastone. A sheet of corrugated metal has been attached to the front between stories. Segmentally arched windows on front and sides have been reduced with infill for replacement windows (cont'd. below)		
32. History and Significance: Modern openings at first story front. Rear two-story wood porch. Although no permit was recorded for this building, John Laskowitz took out a \$1,300 permit for an addition to a store and flat on 8/17/1908. He hired C. Gescheit for the construction. F. Laskowitz built the one-story workshop (visible at the rear of the property in the photo) with a permit dated 7/31/1905 for \$800. The Laskowitz family occupied the house at least through 1940, apparently using part of it as a store.

2. City/County: City of St. Louis, MO	4. Prepared by: Cynthia Longwisch & Mary M. Stiritz, Landmarks Association of St. Louis, Inc.	
5. Date: 11/90	6. Sources of information: St. Louis Public Records, City Hall; St. Louis Public Library; MO Historical Soc.	
7. Building? Yes	8. On National Register or part of estab. district? No	
9. Ownership: Private	10. Visible from public road? Yes	11. Endangered? No
12. Street address: 4042 rear N. Ninth		13. Style: vernacular
14. Date(s): c. 1876		
15. Architect:		16. Builder:
17. Original Use: residential		18. Present Use: residential
19. Owner's name/address if known:		
20. No. of stories: 2-1/2	21. Basement? yes	22. Wall construction: masonry
23. Foundation material: limestone		24. Roof type/material: gable/flounder
25. No. Bays: Front 2 Side 1		25. Wall treatment: brown brick
26. Plan shape: rectangular	27. Changes: Addition? yes Altered? yes	
28. Exterior condition: good		29. Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This alley house has two totally different elevations (see photo #133-34): the alley (east) elevation has side gables and parapeted chimneys while the west elevation is a flounder. Windows are segmentally soldier arched with stone sills. Dormer on e. elevation. A wood overhang on the south side shelters the modern wood deck. (cont'd. below)		
32. History and Significance: A one-story frame addition with brick-look asphalt siding is attached to the west elevation. Permits for this block were issued as early as 1877, and no permit was found for this house. Close scrutiny fails to confirm its presence on the 1875 Compton & Dry map; hence, the c. 1876 date. The building is on the 1883 Hopkins map.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This alley house has two completely different elevations (see photo #133-34): the east elevation that faces the alley is side-gabled with parapeted chimneys, while the west elevation is a flounder with a flounder addition. All but the north elevation have been covered with permastone; the north side has been stuccoed. Windows (cont'd. below)		
32. History and Significance: in the east elevation are segmentally arched while those in the western addition have rectangular openings. A wood and metal overhang creates a porch/patio on the south side of the rear addition. This building is on the 1875 Compton & Dry pictorial map as well as the 1883 Hopkins map. It predates building permits for this block (1877). It has apparently always been used as a residence.

25. No. Bays: Front 3 Side 4		25. Wall treatment: red & brown brick
26. Plan shape: rectangular		27. Changes: Addition? yes Altered? yes
28. Exterior condition: fair		29. Open to public? yes
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Stepped, terra cotta-coped parapets top the front of this building. The original storefront has been infilled with brick. A terra cotta course echoes the parapet lines above the openings. Windows have brick sills. A small rear addition (1974) is attached to the east end of the building.		
32. History and Significance: Gloria Lee Realty Company took out the \$2,500 building permit to build a store here in 1928. The building was used as a grocery store or vacant until 1952-3, when an occupancy permit was granted to the Church of God. The Old Time General Baptist Church took the building over in 1960, and the present occupants have been using the building as their church since the early 1970s.

12. Street address: 2600-06 N. Tenth		13. Style: commercial
14. Date(s): 4/6/1901		
15. Architect:		16. Builder: Christopher Frieling
17. Original Use: flats		18. Present Use: flats
19. Owner's name/address if known:		
20. No. of stories: 2	21. Basement? yes	22. Wall construction: masonry
23. Foundation material: stone		24. Roof type/material: flat
25. No. Bays: Front 11 Side 5		25. Wall treatment: red brick
26. Plan shape: modif. rectang.	27. Changes: Addition?	Altered? yes
28. Exterior condition: fair		29. Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Brick egg & dart and dentilled cornice above raised string course. Above cornice, concrete veneer replaces the former profiled cornice (see #26). One-over-one windows have no arches, stone sills; most first-story and several second-story are infilled. Corner cast-iron front is all enclosed except for the Globe Foundry column. Small rear shed.		
32. History and Significance: H. Clark took out a permit in 1901 to build flats for \$7,000. He hired Christopher Frieling for the job. No information could be found on either. The building obviously housed a store at some early point, although the permit did not specify commercial use. The Gloria Lee Realty Co. obtained a \$2,500 permit in 1961 to make repairs to a "store and dwelling" and an occupancy permit was granted in 1963 to make the building a laundry. It appears to have been in use strictly as apartments for some time.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This building was recently gutted by fire. Second-story front elevation windows have gauged brick arches; first-story windows have flat arches with splayed sandstone. All front elevation openings have pressed-brick jambs. Side windows have double-rowlock segmental arches; all windows have stone sills. Centered peaked (con't. below)		
32. History and Significance: parapet emphasizes the slightly projecting center bay; carved sandstone colonnettes further highlight this feature. Sandstone banding highlights the entrance pilasters. Limestone water table. The building permit for this residence was taken out in 1897 by H. Wedig for \$4,250.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This building is two separately built, mirror-image halves. Both have flat roofs with front elevation mansards covered with hexagonal slate tiles; paired window dormers are gabled. 1st and 2nd story openings are segmentally soldier-arched. Bracketed stone lugsills have incised Eastlake designs. Recessed double entries have (cont'd. below)		
32. History and Significance: stairs to upper units. Four-bay rear ell has a two-story wood porch. The two parts of the building were designed and built by owner John Baumer. Mr. Baumer took out a \$3,200 permit in 1892 and one for \$2,000 in 1898. He also built a stable on this block in 1892 (an outbuilding was recently demolished; it was probably the stable).

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			
31. Further description of important features: The primary opening in the front elevation of this building is an overhead garage door bay; a regular door is the only other opening. Neither have arches. Terra cotta coping. This building was originally an addition to a warehouse now demolished; this is reflected by the non-stricken mortar joints on the south wall.			
32. History and Significance: W. Schoenbeck took out a permit for this addition to a warehouse in 1940 for \$1,000. It was evidently part of the "A. Schoenbeck W. & S. Co.," who took out other permits in this city block. The company does not appear in City directories.

31. Further description of important features: Primary elevation features shaped stone lintels and stone lugsills, elaborately corbelled cornice and a cast-iron storefront headed with a wood cornice. The display windows of the storefront appear to be in their original configuration, although they have been boarded up. Side openings are segmentally arched with the (cont'd. below)		
32. History and Significance: exception of a round-arched recessed entryway near the rear of the building, which probably provided access to upper units for residential use. Windows are two-over-two, double-hung wood sash. Parapeted chimneys. Building appears to have had fire damage. The permit for this building was taken out by C. Schawback/Schoenbach/Schoenbeck (there is great inconsistency in the recorded permits) for \$2,400 in 1879 to build a "store & dwelling." Its use was apparently consistent with this until its vacancy.

26. Plan shape: irregular	27. Changes: Addition? yes Altered? yes	
28. Exterior condition: fair	29. Open to public? limited	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This building is located on a peninsula, necessitating its odd shape. Windows are segmentally arched on the 11th St. elevation; gauged brick arches are on the corner & 9th St. elevations. First-story openings have been infilled, including the corner cast-iron store-front by St. Louis Architectural Iron. Stone sills have egg & (cont'd below)		
32. History and Significance: dart ornamental brick directly beneath. One-story rear addition attaches the building to 1111-13 Branch. H. Bressler took out the permit for this building in 1907 for \$7,000. He hired General Contractor Bernhardt Wussler to do the construction. The pair teamed up on two other tenement buildings in this city block at the same time (#59 & 60). No information could be found on Bressler; he evidently built the buildings as speculation or investment. Wussler was active in many parts of the city c. 1900.

14. Date(s): c. 1880; 11/23/1886		
15. Architect:		16. Builder:
17. Original Use: residential		18. Present Use: residential
19. Owner's name/address if known:		
20. No. of stories: 1	21. Basement? yes	22. Wall construction: frame
23. Foundation material: stone		24. Roof type/material: front gable
25. No. Bays: Front 2 Side		25. Wall treatment: permastoned
26. Plan shape: L		27. Changes: Addition? yes Altered? yes
28. Exterior condition: good		29: Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: An open porch is located across the gable end of this house. A rear ell is attached to the rear. The exterior is covered with permastone.		

32. History and Significance: This house is shown on the 1883 Hopkins map; it is not possible to say with certainty whether it is on the 1875 Compton & Dry. A permit was taken out in 1886 for a "brick front" on a house owned by A. Hanschild in this approximate location, indicating a frame house. Catherine Woodlock took out a \$200 permit in 1906 to alter this building. The permastone treatment is mid-20th century, usually reserved for frame houses, so it is assumed that this house is frame, possibly making it even earlier than 1880.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This building has a monitor roof with corrugated fiberglass clerestory. High concrete foundation gives way to complete sheathing with corrugated iron. Loading bay in gable end and west end of south elevation.		
32. History and Significance: Conflicting information is given in the building permits for this building. A 1903 permit for a \$10,000 architect-designed planing mill was taken out for this address by the Lothman Cypress Company; it seems that it was for a brick building. A 1926 permit for 21 Angelica was granted to the General Metal Refg. Co. for a \$15,000 alteration to a factory. Since no factory per se had been built on this site to our knowledge, it would seem that the permit was for sheathing the older building.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			
31. Further description of important features: Roofline has two end gables, each surmounted by a gable of the same pitch to provide a clerestory (sheathed with corrugated fiberglass - see photo #150 for better view). Gable ends covered with corrugated iron. All original openings have been bricked in with the exception of two large garage bays.			
32. History and Significance: The Lothman Cypress Co. hired architect G. Becker to design and J. P. Reichers to construct this warehouse for \$7,000 in 1904. The Lothman company operated a planing mill in this city block, specializing in "air-dried Louisiana red cypress." This building has been owned by the Lange Stegmann Fertilizer Company since 1927.

25. No. Bays: Front 5 Side 7		25. Wall treatment: painted brick
26. Plan shape: rectangular	27. Changes: Addition? yes Altered?	
28. Exterior condition: good		29. Open to public? limited
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: The south (front) elevation has a slight parapet and corbelled brick cornice. Windows have flat arches and stone lugsills. Part of each window is infilled. Wood door in center of front elevation apparently no longer in use; entrance is now through a side door (under a new wood porch). Terra cotta coping. Storage (cont'd. below)		
32. History and Significance: building is attached to east side. The Lothman Cypress Company hired Barnard Stock to build this office for \$4,000 in 1903. The company operated a planing mill at this location, specializing in "air-dried Louisiana red cypress." The Lange Stegmann Fertilizer Co. has been in operation here since 1927.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			
31. Further description of important features: This metal-covered shavings bin or vault is basically a metal-covered frame hopper to collect sawdust and wood shavings from the planing mill behind it. A newer cyclone collector is mounted on the top. Two loading bays covered in corrugated iron are located on the north elevation to provide access for unloading the bin.			
32. History and Significance: The active building permits for this city block, which begin about 1918, are missing, so this building cannot be precisely dated; however, it has an old foundation and is found on older Sanborn maps.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This one-story building appears to have begun as a small shop or stable (see 1883 Hopkins) with segmentally soldier arched windows that were originally much longer. A c. 1910 addition to the east elevation is slightly shorter and contains a flat-arched garage bay. The west elevation has been rebuilt using concrete block. (cont'd. below)		
32. History and Significance: The building is connected to 4051-57 N. Broadway (#136) by means of a small passageway. No permit could be found for this building, which has apparently always been used commercially.

17. Original Use: church		18. Present Use: junkyard storage
19. Owner's name/address if known:		
20. No. of stories: 1	21. Basement? unk.	22. Wall construction: masonry
23. Foundation material: unknown		24. Roof type/material: flat
25. No. Bays: Front 3 Side 4		25. Wall treatment: painted brick
26. Plan shape: rectangular	27. Changes: Addition?	Altered? yes
28. Exterior condition: poor		29. Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Although built and used as a church, this building bears no trace of ecclesiastical design. Double-rowlock segmental arches top windows and doors, of which all visible from the street have been infilled. Metal used for coping on stepped parapet and profiled cornice. Brick corbelling below cornice. Building now sits (cont'd. below)		
32. History and Significance: behind a chainlink fence in the midst of a junkyard, sadly obscured. The Apostolic Christian Congregation of St. Louis took out a permit to build the church for \$1,900. The congregation remained in this building at least through 1940. Sometime later, the building was known as the Jesus' Name Mission. It has evidently been in its current plight for quite some time.

28. Exterior condition: good	29. Open to public? limited	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: White terra cotta coping and center entrance surround featuring raised ornamental patterning. Brick quoining at the corners. Singled wood awning has Craftsmanlike heavy wood brackets. Front windows have flat arches, stone sills, six-over-one paning. Side windows are segmentally arched. One-story rear addition; one-story (cont'd. below)		
32. History and Significance: rear "log cabin" addition attached to the east elevation. The Thomas & Proetz Lumber Company took out the \$500 building permit in 1903 for their office; the permit allowed them to build either a brick veneer structure or one clad in metal; it is surmised that the final building probably exceeded the \$500 estimate. The Pelligreen Construction Co. built the \$7,000 rear addition, according to a permit Thomas & Proetz took out on 6/10/19.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			
31. Further description of important features: Simple frame cottage has been altered by the use of permastone. A one-story, aluminum-sided frame addition extends to the west. Openings have been modernized.			
32. History and Significance: Owner maintains that this house was here "before the sewers came in the 1840s." This has not been verified; however, it does appear on the 1875 Compton & Dry map, and frame has not been allowed in building construction almost since the institution of building permits. Owner maintains that this is the oldest house in the entire area, which is why it was included in this survey despite its alterations.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			
31. Further description of important features: Windows have multipane industrial metal sash with no arches and brick sills. Most first-floor openings are infilled. A tiny parapet coped with light terra cotta extends across the primary elevation. A one-story rear addition was build in 1918.			
32. History and Significance: W. C. Wahlers filed for a \$6,500 building permit for a factory in 1916; he installed a heating boiler in November of the same year. In May of 1918, Wahlers & Traher took out a permit for \$3,000 for the rear storeroom addition to the building. Neither Wahlers nor Wahlers & Traher are listed in city directories in pertinent years. The building was used primarily for auto repair during the 1950s.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			
31. Further description of important features: The gable end of this building features double sliding loading bay doors. The first-story sides are not fenestrated. The clerestory is covered with corrugated fiberglass to light the interior. Exposed wood rafter ends beneath wide overhanging eaves. Unusually high concrete foundation.			
32. History and Significance: The Skaboura Dip Co. paid \$7,000 to build this building in 1897. The corrugated iron covering is in such good general condition that it seems likely that it is replacement material, as of course is the fiberglass covering the clerestory openings.

26. Plan shape: rectangular	27. Changes: Addition?	Altered? yes
28. Exterior condition: good	29. Open to public? limited	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Although no building permit could be found that describes the building as it appears today, the foundation is clearly old. The roof and cornices are new. Sliding loading dock doors in the gable ends. The configuration of two gables conjoined lengthwise may belie a roofline that was originally different, perhaps taller. (cont'd. below)		
32. History and Significance: If this were the case, it might be possible to locate a building permit. All the buildings in the Gaines Hardwood complex have been extremely well maintained - so well, in fact, that the ages of these frame buildings tend to be obscured as new roofs, siding and opening shapes are modernized. This is probably the greatest hazard of frame buildings; after a length of time, the sum of the new parts no longer equals the original total.

31. Further description of important features: Front elevation has a stepped parapet. Cornice is supported by profiled wood brackets and bears the name of the business. Rectangular openings are wood-framed, have 6-over-6 double-hung wood sash. Frame rear additions of several heights and sizes apparently built over a period of time.		
32. History and Significance: H. G. Arndt took out the permit to build this frame office in 1897 for the handsome sum of \$150.00. Arndt had died by 1917 and T. E. Powe opened the Powehar Mill & Lumber Co. here. Harry D. Gaines was a clerk in the business at this time; it is apparently his name that the business carries today. The office is surrounded by a lumberyard and storage buildings.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This is actually two separate, identical buildings being counted as one unit. Gauged brick arches and stone sills with egg & dart molding beneath highlight the 6-over-6 double-hung wood sash windows. Inset wood panels with diamonds throughout are new additions. Elaborately corbeled cornice. Stone water table; quarry-faced (cont'd below)		
32. History and Significance: foundation. Entries are recessed at the top of steps. New metal balconies were installed across the fronts c. late 1980s. Like #58 and #60, this pair of buildings was built by H. Bressler in 1907; his cost was \$8,000. Bressler hired General Contractor Bernhardt Wussler for the job; Wussler was quite active in St. Louis around the turn of the century. No information was available on Bressler, who evidently built the buildings as an investment. The buildings have always been used as residences.

31. Further description of important features: The long, north part of this bldg. is severely functional, with only brick corbelling between piers to provide architectural interest. West end is 2 large bays with RR tracks to allow diesel engines to enter for repair. This end was damaged and poorly repaired with CMU. Windows are infilled with glass brick, probably orig- (cont'd. below)			
32. History and Significance: inal. Extending from the south wall is a side-gabled ell done in multi-colored brick. The roofline and two dormers give it a residential look. It, too, has two garage bays with railroad tracks. The Sanborn map distinguishes the two parts by function: the first is a diesel engine house; the second, a shop. Both parts were built from one \$10,000 permit by the St. Louis M.B.T. Railway in 1941. Behind this structure (unfortunately inaccessible) is a 1918 one-story brick Terminal RR Association "service" building.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Flat stone lintels and stone sills highlight original openings. A profiled wood cornice features carved brackets and dentils; it returns at the sides. Parapeted chimneys on west elevation. Very fine, original iron balcony with iron brackets. Southwest corner has been altered; it apparently was used as a commercial (cont'd. below)		
32. History and Significance: entrance for a business in the building. A brick corner pillar, punched-in window, and Queen Anne style wooden doors belie a later alteration. Residence shares commonwall with 827-29 Bremen (#122); the chimneys on that wall feature corbelling. No permit was evidently issued on this building due to its early date. It does not appear on the Compton & Dry 1875 map, although it is on the 1883 Hopkins. A rear frame addition of indeterminate age extends from the rear, obscured by foliage.

15. Architect: C.H. Pope, Moline	16. Builder: James Stewart & Co.	
17. Original Use: plow factory	18. Present Use: wholesale furniture	
19. Owner's name/address if known: Wholesale Furniture, 2204-10 N. Broadway		
20. No. of stories: 4	21. Basement? yes	22. Wall construction: masonry
23. Foundation material: brick	24. Roof type/material: flat	
25. No. Bays: Front 11 Side 22	25. Wall treatment: brown & ptd. brick	
26. Plan shape: L	27. Changes: Addition?	Altered? yes
28. Exterior condition: good	29. Open to public? yes	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: First-story facade extensively altered. "1847-1903" inscribed across centered stepped parapet. Triple-row-lock segmentally-arched windows have stone sills, are divided into pairs or triples by pilasters & brick corbelling. All openings on front elevation infilled to some degree. Rear & side windows have original multipanining.		
32. History and Significance: The John Deere Plow Co. of Moline, Ill. took out the \$60,000 permit for this building in 1903. Deer operated a factory here through the 1930s. The Harris Wool company used the building as a warehouse for about a dozen years; International Shoe used it as a warehouse for a short time, and the Wholesale Furniture Co. located in the building in 1953.

31. Further description of important features: Stone-capped pilasters divide the triple-rowlock segmentally-arched windows into pairs. Stone lintels above 1st & 2nd story windows; stone sills. Stone cornice across front above 2nd story. Paneled pilasters support stone entablature over entrance. Original windows in floors 3-7 have multiple industrial panes.			
32. History and Significance: The John Deer Plow Co. of Moline, Ill. took out a \$2,500 permit to excavate this site in March, 1905 and a building permit for \$140,000 in April, 1905. They hired architect Oscar Eckerman of Moline for the job. The company altered the warehouse for \$10,000 in 1936, and then variously in 1940, 1941, 1942, 1958, 1959, 1960 and 1969. The Killark Electric Co. took a permit to occupy the building in 1973.

31. Further description of important features: Although the upper windows of the facade have been infilled with glass brick and the windows of the storefront have been modified, much remains of an elaborate cast-iron front by Christopher Iron. Iron pillars feature fluted bases and ball banding. A dentilled cornice below the second-story sill line is flanked by ornate brackets (cont'd. below)		
32. History and Significance: with Eastlake ornamentation that includes rosettes. Nine ornamental pressed bricks decorate the wall surface above the second-story windows; windows are set into recessed panels. Lewis Rosenbaum obtained a permit for a \$2,000 "store and photograph gallery" in 1885. Rosenbaum was a real estate and financial agent who operated his business at this location, specializing in north St. Louis property. Edward Hauschulte operated a real estate business here from at least the late teens through 1940.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This building was originally only two stories; a third was added above the stone sillcourse with guttae, probably in 1920. Tooled stone extends midway up the first floor, returning at the sides. Stone forms the pilaster capitals and sills as well. Original windows are multipane industrial metal sash; some one-over-one (cont'd. below)		
32. History and Significance: replacements have been made. The interior has millwork construction with iron/steel columns; interior walls are of vitreous brick. A one-story garage (1941) is attached to the south side of the building. The original permit for a cold storage building was taken out for \$27,000 in 1903 by J. Ogden Armour. Condie Bray Glass Co. apparently added the third floor for \$12,000 in 1920. The Pernoud Carpet Co. owned the building in the 1930s, followed by rug companies in the 1950s, a box company, and Schaffer Moving Co.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			
31. Further description of important features: Chicago-style tripartite windows have continuous lintel and sill soldier courses for horizontal emphasis. Prominent, overhanging, bracketed copper cornice. Stylized classical piers at entry. Metal grillwork at base of first story windows. Pink granite entry steps and foundation facing.			
32. History and Significance: H. G. Condie took out a permit for this warehouse building in 1907 for \$96,000. Herbert Condie was president of the Condie-Neale Glass & Paint Co., which later became Condie-Bray and then dissolved in the 1930s; they specialized in building glass. The Renard Co. owned the bldg. in the 1940s, and paper box/bag manufacturers have occupied it since the mid-1950s. The noted architectural firm of Mauran, Russell & Garden, who designed the building, were quite active in St. Louis.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: The three recessed bays of the primary elevation are topped by a (concrete?) parapet of probably 1940s vintage. Utilitarian windows are horizontally hinged and have concrete sills. Center bay is a loading dock/garage door bay. The rear elevation is three stories, with all openings infilled save a garage bay. Rear windows have soldier arches.		
32. History and Significance: H. C. Beckmann took out a \$15,000 permit for a factory in 1902. Beckmann ran the Henry C. Beckmann Realty & Investment Co. and was secretary of the Progress Press Brick & Machinery Co. It appears that he built the building for Charles F. Kraushaar, president of the Kraushaar Brass Manufacturing Co. Kraushaar (and, after 1936, the Kraushaar Estate) owned the building until 1946, when the Samour Realty Co. bought it. A series of companies owned the building until St. Louis Dyeing bought it in 1963.

28. Exterior condition: good		29. Open to public? limited
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: A single, stone-linteled window punctuates the flounder section's primary elevation; warehouse doors open in the flat-roofed section. The 1875 Compton & Dry map shows a diverse group of buildings in the immediate area, including the mixed gabled-front-with-flounder-rear style found throughout the north side. Although no permit could (con't. below)		
32. History and Significance: be found earlier than 1886, it is likely that this building is a remnant of the earlier era. A permit taken out by Louise Becker on 6/23/1886 for two adjoining tenements probably incorporated this building. No other permits could be found from 1886 to 1970, when a demolition permit was issued to wreck a "2 story factory & warehouse." The tenements had probably been turned into industrial buildings before their demise left the smaller building standing alone.

31. Further description of important features: 1st & 2nd story windows have been infilled; south bay is a modernized entrance. Windows above are tripartite Chicago-style with white terra cotta. The shaped parapet is trimmed with terra cotta; a centered insignia bears the initials "P O." Below, a sloped lintel of terra cotta extends across the four bays. Between these bays are (con't. below)		
32. History and Significance: Craftsman panels of patterned brickwork. Profiled terra cotta sill courses at the second and sixth stories have dentilling (6th) and bead & reel molding (2nd) below, supported by brackets. The Parlin & Orendorff Plow Co. took out the \$90,000 permit for this "fireproof machinery house" in 1910. President William Parlin lived in Canton, Ill., as did his partner Ulysses Orendorff. The company was no longer in St. Louis by the early 1920s. The building has been a bag warehouse since the mid-1950s.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Extensive use of cream-colored terra cotta trim highlights the building's pier & spandrel system. Triple windows of the primary elevation appear to have been modified in all but the 2nd story. A green terra cotta panel over the entry reads "OLIVER" and the shaped parapet features a center terra cotta insignia of a capital O (cont'd. below)		
32. History and Significance: with a plow and shield motif. Mortar is rose-colored. First-story display windows have glass brick, wood or plate glass in-fill. The \$75,000 building permit for this warehouse was taken out by the Oliver Chilled Plow Co. in 1911, specifying that the building be "fireproof." The company became the Oliver Farm Equipment Co., makers of tractors and other farming implements sold nationwide. They used the building until its sale to United Bags in 1960. The architects were from Pittsburgh, builder from Indiana.

17. Original Use: warehouse	18. Present Use: warehouse	
19. Owner's name/address if known: Ultra-Comp SAS Manufacturers & Importers		
20. No. of stories: 6	21. Basement? yes	22. Wall construction: masonry
23. Foundation material: stone	24. Roof type/material: flat	
25. No. Bays: Front 5 Side 10	25. Wall treatment: red brick	
26. Plan shape: rectangular	27. Changes: Addition?	Altered? yes
28. Exterior condition: good	29. Open to public? limited	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Pier & spandrel system is used on the primary elevation, with almost all the original paired windows infilled with wood. The vertical emphasis of the facade is heightened by huge, nearly vertical terra cotta paneled brackets. Piers terminate below the cornice with Craftsman raised brickwork panels. A stylized classical front (cont'd. below)		
32. History and Significance: entry features paneled pilasters supporting an elliptical arch. Raised letters of grey terra cotta above the entrance read, "KINGMAN." Four loading docks are located on the south elevation. Kingman took out an \$85,000 permit in 1906 for this warehouse; the permit mentions the St. Louis Implement Co. Leonard Hillis took out a \$10,000 permit to "repair fire damage to warehouse." Artophone occupied the building in 1947.

31. Further description of important features: All openings in the front portion of the building have been infilled with wood or masonry. Rusticated brickwork defines the first-story storefront. 1st & 2nd story windows have segmental arches, stone sills. 3rd story windows have no arches. Modern CMU 1-story addition to the north; one-story brick addition connects the rear (cont'd. below)		
32. History and Significance: 1941 addition to the front part. Rear addition has windows with no arches and brick sills, flat roof, terra cotta coping. The Schwarzschild & Switzberger Co., apparently a short-lived meat market, took out the \$25,000 building permit for this building in 1903; they were gone by 1917. The M. Holtzman Metal Co. occupied the building by 1924, owning it through the early 1950s. It has since been a textile waste warehouse, package liquor store confectionery and now is a warehouse for paper products.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: A stepped parapet is high-lighted with rows of recessed square panels; below, a string course of quarry-faced stone tops brick corbelling divided by pilasters. Windows have quarry-faced flat stone lintels in the front part of the building. The original storefront has been infilled with masonry; an oval Moderne-style (cont'd below)		
32. History and Significance: window has been punched into the west elevation. Quarry-faced stone banding remains on pilasters. First-story side windows have round, pressed-brick arches. A rear 1917 cooler addition has only a row of tiny segmentally arched windows near the roofline. A brick addition is located on the north side. The active and inactive building permits for this city block have been mixed together with the loss of some. An 1892 demo permit for this site is never followed by a building permit. Meat companies here since 1917.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			
31. Further description of important features: Windows have segmental soldier arches with stone sills; they have all been infilled with corrugated material or glass brick. Angled cast-iron storefront has a single column. Corbelled brick cornice. Stepped parapet at front is coped with white terra cotta. One-story 1904 warehouse addition to south; concrete block rear addition to west.			
32. History and Significance: William Saeger took out the 1880 building permit for this \$1,150 feed store. He later took out a permit for \$4,000 in 1904 to alter and add to the feed store, which addition was made to the south side of the building. Saeger was out of the business in St. Louis by the teens. Arthur Morgan's hauling and express company bought the building before 1924. The company evolved into a trucking firm and remained in the building at least through the 1940s.

12. Street address: 3237 N. Broadway	13. Style: commercial	
14. Date(s): c. 1900		
15. Architect:	16. Builder:	
17. Original Use: commercial	18. Present Use: commercial	
19. Owner's name/address if known: Norm's Precision Maintenance		
20. No. of stories: 1	21. Basement? no	22. Wall construction: masonry
23. Foundation material: concrete	24. Roof type/material: flat	
25. No. Bays: Front 3 Side 3	25. Wall treatment: red brick	
26. Plan shape: rectangular	27. Changes: Addition?	Altered? yes
28. Exterior condition: good	29. Open to public? limited	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Soldier course banding (one of which is buff-color) relieves the facade. A large garage bay dominates the front elevation. A tiny, pointed parapet of glazed white brick is centered, flanked by white terra cotta coping. The primary facade shows evidence of being a replacement of the original.		
32. History and Significance: No permit shows up for this building, although an 8/22/1903 permit was taken out by William Wilhelam for \$200 worth of alterations of a saloon at this address, to be done by Wohlbrink & Shade. In 1919, A. Mehilmy hired E. Oventrop to do \$100 worth of alterations to a "shop."

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Front elevation has a new brick veneer applied with new fenestration. Side openings have double-rowlock segmental arches, most infilled. Terra cotta coping.		
32. History and Significance: Paul Kempf took out the \$500 permit for a one-story dwelling on Buchanan in 1892; this is probably the west part of the building. A building of about the right size appears on the 1883 Hopkins map. The building was being used at least partially as a dwelling in 1918, when J. Schneider had a minor alteration done. The Schorr-Kolkschneider Co. took out a very minor alteration permit to a store at this address in 1912. The building has been used primarily as a commercial concern through most of this century.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			
31. Further description of important features: All openings on the west and south elevations have been infilled with wood. Brick sills, flat arches. White terra cotta coping along roofline that has parapeting at corners and center front. One-story, six-bay rear addition predates main building.			
32. History and Significance: The Missouri Engine Company took out a permit to build a \$50,000 factory in 1926. Charles Olcutt had operated a box factory on the site and had built a \$1,200 addition to the building in 1912; this rear addition was evidently allowed to remain when Missouri Engine replaced the old factory with their 1926 building.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: The facade of this building has been covered with a variegated brick veneer. Front elevation windows have no arches, brick sills and have a three-over-one Craftsman double-hung wood sash pane configuration. Double wood doors are transomed. Side window is segmentally arched; smaller, square window is punched in. Short stepped parapet.		
32. History and Significance: This building appears in the 1875 Compton & Dry pictorial map, with what appear to be round- or segmentally-arched window heads. A \$100 permit was taken out for an open porch on a "store & dwelling" at this address by C. Jaeger.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: A white terra cotta cornice is surmounted by a scroll & ball pediment. A second t.c. cornice features dentil-ling at the sides and modillions in the center; t.c. shield ornaments mark the pilasters just below. The facade is laid in a checkerboard pattern using dark cull headers. First-story openings have large round arches; (cont'd. below)		
32. History and Significance: those above have flat arches; side windows are segmentally arched. All front elev. windows have brick sills. Above the first-story center openings is a large t.c. panel: "ST. LOUIS SASH and DOOR WORKS." Below, amid t.c. swags and ornamentally-bricked round arches, is the date 1906. See attached for information on the company, who occupied the building at least through 1940.

26. Plan shape: rectangular	27. Changes: Addition? yes Altered? yes	
28. Exterior condition: fair/good	29: Open to public? yes	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: The front of this building has been altered, perhaps more than once; a building permit to "change front of store" was issued in 1906 to Mr. Kupperschmidt. The front as it is today was probably redone later in this century. Openings have flat arches and brick sills. Side openings infilled with brick. CMU rear addition.		
32. History and Significance: No building permit could be found for this building; it seems to be on the 1883 Hopkins map. It is probably on the Compton & Dry 1875 map, but it is not possible to discern that positively. The building style is definitely earlier than late 19th century. The building was a men's clothing store and tenement during the 1920s.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This building is a two-bay brick flounder with a brick-look asphalt-shingled two story addition. Original windows had brick jack arches; two have been altered to flat arches. Functional wood shutters at the first floor. A transomed wood doorway is located in the frame portion. A dormer faces south in the frame section. (cont'd. below)		
32. History and Significance: A two-story wood porch is located across the brick half of the east elevation. It is not possible to be certain whether this building appears on the 1875 Compton & Dry pictorial map; it is on the 1883 Hopkins map. No building permit could be found for it. Since this photo was taken, Mallinckrodt has cordoned it off and has removed some of the roofing around the dormer. It appears that they have plans to demolish the building.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: A curvilinear parapet with terra cotta coping tops the building; on each elevation, a terra cotta "log" ornament is embedded in the parapet (part of one missing). Profiled terra cotta cornice has egg & dart molding just beneath. Windows have header lintel courses with terra cotta keystones. At the second story on each (cont'd. below)		
32. History and Significance: elevation is a rectangular inset with a terra cotta shield with the letter N. Entrance has ornate, bracketed terra cotta surround. The metal-sided building behind this office has shaped parapets that echo those of this building. Because the siding is new, it is impossible to tell whether the parapets are old or new. Charles Naber's Sons operated a lumber/building materials business at this location into the 1940s. No permit could be found for this building, which Naber was using in the teens, at least.

31. Further description of important features: Most of the openings in this building have been infilled with brick. Flat stone lintels are visible. Corner storefront is bricked in; the stone or concrete corner pillar is still in place. Rear of building has a flat roof; 1959 south side addition is CMU.			
32. History and Significance: J. Hoffman took out a permit for this store & dwelling in 1879 for \$3,000. The building is on the 1883 Hopkins map as a "livery," a business which may have involved the use of the rear of the building. During the 1930s and 1940s, the building was used as a tavern and dwelling.

2. City/County: City of St. Louis, MO	4. Prepared by: Cynthia Longwisch & Mary M. Stiritz, Landmarks Association of St. Louis, Inc.	
5. Date: 11/90	6. Sources of information: St. Louis Public Records, City Hall; St. Louis Public Library; MO Historical Soc.	
7. Building? Yes	8. On National Register or part of estab. district? No	
9. Ownership: Private	10. Visible from public road? Yes	11. Endangered? No
12. Street address: 3908-14 N. Broadway		13. Style: commercial
14. Date(s): 8/12/1908; 3/2/1904; 1/8/1927; 10/14/1927		
15. Architect:		16. Builder: F. Hasselman
17. Original Use: tannery		18. Present Use: commercial
19. Owner's name/address if known: Star Bedding Co.		
20. No. of stories: 2	21. Basement? yes	22. Wall construction: masonry
23. Foundation material: concrete		24. Roof type/material: flat
25. No. Bays: Front 5 Side 6		25. Wall treatment: red brick
26. Plan shape: rectangular		27. Changes: Addition? yes Altered? yes
28. Exterior condition: good		29. Open to public? limited
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: A stepped parapet has white terra cotta coping and white diamond insets. Side and upper-story windows have double-rowlock segmental arches and brick sills. The first-story storefront has been infilled with glass brick; two panelled cast-iron pillars remain. A 1904 one-story addition to the north mimicks the roofline of the (cont'd. below)		
32. History and Significance: larger portion. A plain, painted brick addition of one story is attached to the building at the north side. Frederick L. Kayser took out the permit for this building as part of his tannery in 1908 for \$2,650. He owned the Kayser Raw Hide Co., formerly the Kayser & Nils Raw Hide Co. and, later, the Kayser Tanning Co. The one-story storeroom and office was built in 1904, and the large rear addition was built in two parts in 1927 by Wahlert & Guntzler ("est. 1848; buyers of all kinds of feathers and raw wool").

5. Date: 11/90	6. Sources of information: St. Louis Public Records, City Hall; St. Louis Public Library; MO Historical Soc.	
7. Building? Yes	8. On National Register or part of estab. district? No	
9. Ownership: Private	10. Visible from public road? Yes	11. Endangered? No
12. Street address: 4001-05 N. Broadway		13. Style: commercial
14. Date(s): 4/4/1888		
15. Architect:		16. Builder:
17. Original Use: comm./resid.		18. Present Use: commercial
19. Owner's name/address if known: Vito's Auto Parts, Inc.		
20. No. of stories: 1	21. Basement? yes	22. Wall construction: masonry
23. Foundation material: limestone		24. Roof type/material: flat
25. No. Bays: Front 3	Side 8	25. Wall treatment: painted
26. Plan shape: L		27. Changes: Addition? Altered? YES
28. Exterior condition: poor		29. Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This building was originally two stories in height (note stone sills) and the two adjoining buildings on the north that were included in the building permit have been demolished. However, the remaining cast-iron storefront is such a wonderful specimen of the art that it is included in this survey. Paneled columns feature fields (cont'd. below)		
32. History and Significance: of tiny pyramids, fluting, and bands of hemispheres. Corner column is gridded like a hand grenade. Capitals have floral motifs and rosette medallions. Quatrefoil grillwork below several display windows. Original transomed, wood-panelled double doors, some with Eastlake carving above. Southernmost display bay features Queen Anne windows. No casting imprint. Sidewalk is gone and building has been allowed to deteriorate. Permit was taken out in 1888 for \$12,000 for 3 adj. bldgs. by Louis Kohrmel = no info.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: The mansard on this building has asphalt shingles and boarded dormer windows (traffic prohibited a better photo). Corbelled cornice. Double rowlock segmental arches and stone sills on the windows, which are all infilled. Original corner storefront has been altered and infilled with aluminum & wood. Terra cotta coping. (cont'd. below)		
32. History and Significance: Portions of building on the south and rear have flat roofs. Building is attached to 812 Angelica (#135) by means of a small passageway. The permit for this "wareroom and wagon house" was taken out in 1880 by A. Ralive. No name for the business was given and Ralive could not be traced. During the 1930s and 1940s, at least, the building was used as a meat store and grocery store.

31. Further description of important features: Front of building has a denticulated brick cornice. Parapeted chimneys in side walls. Front elevation has apparently been altered, probably in 1926 when neighboring store (#158) was built. Windows have flat arches and brick sills and soldier course extends above storefront, none of which are characteristic of a (cont'd. below)		
32. History and Significance: building of this age. Storefront was probably all cast-iron; only iron pillars remain; the front has been infilled with wood. The 1876 permit for this building was taken out by D. P. Zeipe for a store and dwelling. The building was used as a furniture store during the 1930s.

26. Plan shape: rectangular	27. Changes: Addition? Altered? yes	
28. Exterior condition: good/fair		29. Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: A parapeted front roofline is highlighted with white vitreous brick. A soldier course extends across the building above the storefront. Storefront has been infilled with wood. Terra cotta coping. See photo #157 for closer view.		
32. History and Significance: The permit for this building was taken out by L. Rubin in 1926 for a \$3,000 store. City directories offer no clue as to which of several L. Rubins this might have been. The 1930 city directory lists the occupant of the building as the Western Union Telegraph Co. The 1940 city directory says the building was the "Branch Dispensary No. 1 Hospital Division." It has been used for storage in recent years.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This building was built as two separate entities; the older part is one-story and the newer, three. A loading dock now obscures about half of the west elevation of the older part. A low stepped parapet distinguishes the primary (north) elevation of the newer part. Multipane industrial metal sash windows are separated (cont'd. below)		
32. History and Significance: horizontally by recessed panels. Some window infill. Foster Brothers Manufacturing Co. took out a permit for a one-story fireproof foundry for \$11,000 in 1906. This was followed by the three-story fireproof manufacturing building behind it, built by the same company in 1909 for \$35,000.

31. Further description of important features: Shaped stone arches head window openings, which also have bracketed stone lugsills. Replacement panes. Single dormer. Parapeted chimneys in east and west walls. Plain wood cornice probably replaces more ornate original. Stone water table. Building fronts directly on sidewalk. Adjoining residence on west side (cont'd. below)		
32. History and Significance: recently demolished; building "shadow" is markedly present on the west wall. The permit for this duplex was taken out in 1877 by T. Sparks. The building has always been used as a residence.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Five garage bays with no arches are located across the ground level. Five 6-over-3 horizontally-hinged windows with brick sills and no arches are located near the roofline. Terra cotta coping.		
32. History and Significance: The site of this building was included in the late 1900 demolition permit taken out by Thomas & Kelly. No building permit was entered for this building, although a permit dated 2/17/1908 was taken out by Foundry Inv. Co. to alter a factory/warehouse for \$4,000. They additionally took out a permit in 1936 to alter a garage at this address. The original building was evidently one story, because a 1954 permit by Wetterow Grocery Co. was for \$18,000 to add a "one story second floor addition to garage."

20. No. of stories: 1 & 2	21. Basement? no	22. Wall construction: masonry	
23. Foundation material: concrete		24. Roof type/material: flat	
25. No. Bays: Front 13 Side		25. Wall treatment: painted brick	
26. Plan shape: trapezoid		27. Changes: Addition? Altered?	
28. Exterior condition: good		29. Open to public? limited	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)			
31. Further description of important features: This building is built at an angle across the northeast corner of Clinton and N. Second. Roll-up garage doors predominate across the primary elevation. A shaped brick chimney rises above the building, topped with brick corbelling. Windows are of the multipane industrial type.			
32. History and Significance: An \$18,000 permit for this building was taken out in 1922 by the Reardon Company. Reardon was a manufacturer of glue. It appears that their interest in this building disappeared c. early 1930s.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Inner bays are recessed, set off by piers; they are headed by segmental arches. Remaining bays have individual double-rowlock segmentally-arched windows with stone sills. Between the first and second stories is a stringcourse of projecting corbelled brickwork. Corbelled cornice. Terra cotta coping. One-story rear (north) (cont'd. below)		
32. History and Significance: addition is now mostly demolished; a concrete hopper stands north of the addition. The building permit was taken out in 1898 by F. Christen & Son for \$6,000. The firm made leather bellows; a painted sign, "Christen & Sons, Mfrs. of Blacksmith Bellows" is still faintly visible on the east elevation. Beginning around 1930, the Sterling [wood] Box company occupied the building concurrently with the Christen company. The building has been the victim of vandals and neglect and is in danger of total destruction.

28. Exterior condition: good		29. Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: The multi-stepped parapet is coped with white terra cotta. Four round-arched windows across the front elevation are obscured by square screens mounted over them. Flanking the doorway are two white terra cotta medallions with round centers infilled with red brick. Side windows have flat soldier arches and brick sills. (cont'd. below)		
32. History and Significance: Attached to the rear of the building is a one-story brick-walled addition with a quonset hut roofline. Puritan Oil took out the permit to build the \$15,000 office in 1927. By 1948, the building belonged to the Walsh Refractories Corporation, who built the rear addition for \$30,000.

28. Exterior condition: good	29. Open to public? no	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: A front short parapet has terra cotta coping. Soldier lintel and sill courses at second story. Rear loading door has double-rowlock segmental arch; from inset of door it can be seen that the walls are unusually thick, probably relating to its original function as part of a chemical works. Rear part of the building is one story.		
32. History and Significance: The Grasselli Chemical Company took out the permit to build a one-story, \$8,000 chemical works in 1906, hiring the Kellerman Construction Co. to do the job. Grasselli sold the building to Du Pont between the beginning of 1935 and the end of 1936, when Du Pont took out a \$4,750 permit to alter and add to the building. The second-story sill course probably hides the break between stories.

30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		

31. Further description of important features: This frame house has rolled roofing and brick-look asphalt siding. Wood-framed rectilinear windows are six-over-six. Building is very narrow. One-story concrete block and frame gabled, enclosed front porch. One-story frame rear porch. West side entrance appears to be original.

32. History and Significance: Although Ferry at Second is not clearly delineated, it appears that this building and the two that formerly adjoined it to the east are shown on the 1875 Compton & Dry map. The three frame buildings are definitely on the 1883 Hopkins map; only this building remains of the three. No permits could be found for frame buildings for Ferry in this city block; permits in general for the north side of Ferry only go back to c. 1879.

28. Exterior condition: fair	29. Open to public? no	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: This frame house has a hipped roof with asphalt shingles and brick-look asphalt siding. A screened porch extends the width of the front elevation with two entrance doors corresponding to the real entrances. Wide overhanging west eave; east elevation has a normal width eave. Rear frame addition.		
32. History and Significance: This frame house is clearly shown on the Hopkins map of 1883; it doesn't seem to be on the 1875 Compton & Dry map, although the buildings in the vicinity are rather jumbled together, and the original roof may have been different - possibly end-gabled - before the porch was put on. The foundation of the porch is rather rickety and suggests that it is a later addition. This house is something of an anomaly in St. Louis city proper; it is not unlike owner-built housing along both sides of the Mississippi above Alton, Ill.

31. Further description of important features: 1st & 2nd story triple rowlock elliptically-arched windows have stone sills and are infilled. Remaining non-filled windows have divided transoms and 2-over-2 panes. A concrete loading dock extends the length of the front. Terra cotta cornice. Building is flanked by new additions on its east and west elevations.		
32. History and Significance: L. Maull took out a permit to build a two-story factory for \$31,000 in 1918. The loading platform was built in 1923 for \$2,000. In 1924, Maull got a permit to built a \$6,000 addition to the factory; since no building height is listed as is customary, it is probable that this permit was for the third story. The interior of the building was damaged by fire in 1959 and 1974, causing extensive repairs to be made. The Maull Company, makers of barbecue sauce and other products, is nationally-known.

7. Building? Yes	8. On National Register or part of estab. district? No	
9. Ownership: Private	10. Visible from public road? Yes	11. Endangered? No
12. Street address: 111-19 Monroe		13. Style: commercial
14. Date(s): 11/26/1910; alterations 1918, 1920, 1948		
15. Architect: Edward F. Nolte	16. Builder: J. Charles Mueller	
17. Original Use: warehouse	18. Present Use: warehouse/office	
19. Owner's name/address if known: Manitoba Corp./Grocer's Terminal Warehouse		
20. No. of stories: 1	21. Basement? yes	22. Wall construction: masonry
23. Foundation material: limestone	24. Roof type/material: flat	
25. No. Bays: Front 6 Side 12	25. Wall treatment: red brick	
26. Plan shape: rectangular	27. Changes: Addition?	Altered? yes
28. Exterior condition: fair	29. Open to public? limited	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		

31. Further description of important features: Double-rowlock segmentally arched windows are infilled with brick and concrete block. A concrete loading dock with a frame and iron roof is located along the east elevation.

32. History and Significance: A.F.W. Luehrmann built this warehouse in 1910 for \$8,000. He took out permits for very minor alterations to it in 1918 and 1920. It seems likely that the building suffered damage along the roofline at some point, because Mary H. Luehrmann took out a \$3,000 permit to repair the warehouse in 1948 and newer brick can be seen along the cornice line. August F.W. Luehrmann was the president of the Luehrmann Hay and Grain Company, which he located in this building through at least c. 1950.

31. Further description of important features: South elevation features cast-iron lintels, brick sills, and a corbelled brick cornice. Second-story and third-story front elevation windows appear to have replacement sash; remaining side windows are infilled with masonry or wood. First-story windows are multi-pane metal sash. Side windows have triple-rowlock segmental (cont'd. below)		
32. History and Significance: arches. Simple cast-iron framing by Christopher & Simpson iron works. Terra cotta coping. A one-story ell of more recent vintage extends from the northwest corner. The Williams Patent Crusher & Pulverizer Co. took out a building permit for the warehouse in 1908. M. F. Williams operated his business in this city block at least as early as 1898, and probably before. The company has expanded to include the bulk of the block.

31. Further description of important features: Openings have soldier arches and stone sills. Entrance is angled. Stone water table above contrasting brick below first-story window. Shaped parapet has green vitreous brick diamond-shaped inset. Simple cornice above dentilled band of ornamental pressed brick. Outstanding short wrought-iron fence.		
32. History and Significance: Louis Zwick took out the permit for this residence in 1910 for \$4,000. Zwick was a St. Louis City Inspector working out of City Hall; his place of residence was on the other side of the city. His position may have led to his filling out the building permit form for a friend; it is also possible that he built the house on speculation.

28. Exterior condition: good	29. Open to public? limited	
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: Note: this site has 2 photos. This factory building has a corbelled cornice. Windows in the western section (photo #51a) have double rowlock segmental arches; some have been infilled with wood or corrugated fiberglass. This portion is set at an angle to the eastern segment (photo #51b); a rock-faced covered entrance is located (cont'd. below)		
32. History and Significance: in the odd angle formed by the unusual orientation of the two parts of the factory to each other. The cornice on this part matches that of the western part, but the windows have flat arches. A small, one-story addition is attached to the east part of this building. The factory was built in 1910 for \$10,742 by F. W. Hanpeter of the Hanpeter Furniture company. Only one permit exists, and it is not known why the two segments were built at such odd angles. American Foundry moved into the building after 1940.

2. City/County: City of St. Louis, MO	4. Prepared by: Cynthia Longwisch & Mary M. Stiritz, Landmarks Association of St. Louis, Inc.	
5. Date: 11/90	6. Sources of information: St. Louis Public Records, City Hall; St. Louis Public Library; MO Historical Soc.	
7. Building? Yes	8. On National Register or part of estab. district? No	
9. Ownership: Private	10. Visible from public road? Yes	11. Endangered? No
12. Street address: 42 Penrose		13. Style: industrial
14. Date(s): 5/29/1919		
15. Architect:		16. Builder: Fruin Colnon Co.
17. Original Use: factory		18. Present Use: vacant?
19. Owner's name/address if known:		
20. No. of stories: 1	21. Basement? yes	22. Wall construction: masonry
23. Foundation material: concrete		24. Roof type/material: flat
25. No. Bays: Front unk. Side 31		25. Wall treatment: brown brick
26. Plan shape: L		27. Changes: Addition? Altered? yes
28. Exterior condition: fair		29. Open to public? no
30. Other Surveys in which included: St. Louis Harbor Historic Properties Reconnaissance, 1987, U.S. Army Corps of Engineers survey (partially incl.)		
31. Further description of important features: The photo shows the west and south elevations of the western portion of this factory; the remainder is inaccessible. The entire factory is one story with terra cotta coping. Windows have brick soldier arches and brick sills and originally had multipane industrial metal sash. CMU or wood has been used to infill many (cont'd. below)		

32. History and Significance: of the openings.
The St. Louis Basket & Box Company took out a permit in 1919 for two, one-story factories to be built for \$1,000 (apparently apiece). This section of the complex is one of those specified. St. Louis Basket & Box operated in this location until the 1930s. The building appears to be vacant; because Penrose is privately cordoned off, this cannot be confirmed and the north elevation could not be photographed.

31. Further description of important features: This building features the same egg & dart and dentilled cornice as 2600 N. Tenth (#25); the wood supports for the (metal?) profiled cornice now missing are still in place, however. Openings have no arches. Stone sills. Most windows have been boarded. Two pairs of recessed doorways provide access to the four-family building.		
32. History and Significance: No building permit was found for this building; however, next to it (#25) is a building of very similar cornice and opening design, material use and general appearance. It is probable that this building was included in the 1901 permit H. Clark took out for \$7,000 flats built by Christopher Frieling.
