| This one-story building is located on the southeast corner of S. Main and Vine Streets; building fronts S. Main St. to the west.  The north elevation has a missing or damaged storefront window and is boarded up. There is some damage to the metal clad wall surface and a loose downspout. The damage appears to be recent and from an automobile.  Overall the metal clad siding shows some signs of weathering.  The condition of the roof is unknown and was given a score of 2. If the roof is in good to excellent condition, the overall building rating could be higher. The building could also receive a higher score if damage to the north elevation has been repaired since the survey was done.  The consultant tried to get a photo of the north elevation, but each time automobiles were blocking the damage. |                                                                                                               |           |          |                          |                                 |                      |          |                   |                         |           |          |       |             |                     |

This one-story brick building fronts S. Main Street to the east. The façade has a metal slip cover on the upper portion and wood siding on the lower section.

The wood siding shows signs of weathering. Located along the roofline of the façade the metal coping is bent in one area; marked as "other" under "trim" in building condition box. A string of lights has come loose from the roofline and is hanging down to the roof of the awning.

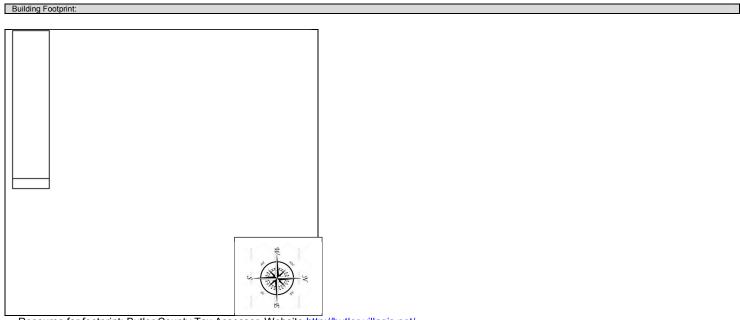

The two entrance doors located on the façade are more residential style than commercial style. One of the doors is solid paneled and the other is glass and wood panel, as is, both are more residential in style; marked as "other" under building condition box.

The condition of the roof is unknown and was given a score of 2. If roof condition is in good to excellent condition, the overall building rating could be higher.

The parking garage adjacent to the building could be used for additional parking.

| OTHER:                                                                                                                                      |                                                                         |                                    |                                                |

| This one-story building is located on the northeast corner of S. Main and Poplar Streets; building fronts S. Main St. to the west. |                                                                                                                 |           |        |       |                |                  |          |           |          |           |          |       |          |     |    |                  |

The wood siding on the building is weathered, and some places appear to be rotted.

The façade storefront has a cracked window and a missing window that is covered with plywood. A piece of wood trim from the top of storefront windows had fallen and was lying on the sidewalk at the time survey was conducted; marked as "other" under "entrance/porch" in building condition box.

The east elevation (rear) has cracks in the brick wall surface with missing mortar. The brick parapet located at the southeast corner has partial missing brick, missing mortar, and bent coping. The gutter on the east elevation is bent. The wood trim is cracked, and weathered on the east elevation. A few windows on the east elevation has security bars which could create an issue with egress, and gives the impression the area is not safe; marked as "other" in building condition box.

The south elevation has peeling paint on the upper section.

The parking garage nearby could provide additional parking for the building.

| This one-story brick building with porcelain enamel paneled façade fronts S. Main St. to the east.  A few of the porcelain enamel panels are loose; marked as "other" in building condition box.  The condition of the roof is unknown and was given a score of 2. If roof condition is in good to excellen condition, the overall building rating could be higher.  The adjacent parking garage could provide additional parking for the building. |                                                                          |              |           |                 |                                             |                  |          |            |                        |           |          |        |               |                                      |                  |

This two-story building is located on the southeast corner of S. Main and Poplar Streets; building fronts S. Main St. to the west.

Overall the building appears to be well maintained. One window on the north elevation had a small hole.

The condition of the roof is unknown and was given a score of 2. If the roof is in good to excellent condition the overall building rating could be higher.

This two-story brick building is located on the southwest corner of S. Main and Poplar Streets; building fronts S. Main St. to the east.

Several windows on the façade, south and north elevation are boarded up, and have window air conditioning units; marked as "other" in building condition box. A few windows on the façade and north elevation appear to have missing glass panes; as well as a storefront window on the façade. A window on the north elevation is cracked.

The awning over the storefront entrance is weathered and is bent; marked as "other" in building condition box.

The west elevation (rear) has a missing downspout, some missing bricks in the area of a window sill.

The condition of the roof is unknown and was given a score of 2. If roof condition is in good to excellent condition, the overall building rating could be higher.

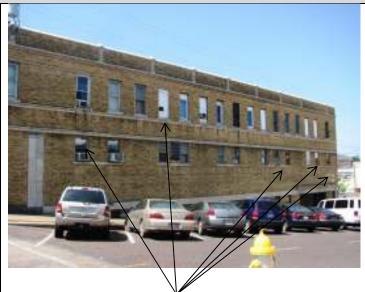

Additional parking for the building could be utilized with the parking deck nearby.

| This one-story brick building fronts S. Main Street to the east.  The brick work on the façade has peeling paint. The green awning over the entrance is torn; marked as "other" under "entrance/porch" in building condition box.  The west elevation shows previous signs of brick work repair.  The roof condition is unknown and was given a score of 2. If roof is in good to excellent condition the overall building rating could be higher.  The consultant interviewed the office manager but was not allowed to tour the building to sketch layout of floorplan or to view condition of the interior.  Addition parking could be utilized by using the nearby parking garage. |                                                      |              |            |                                       |                                               |           |          |                                         |                         |           |          |           |                   |                                      |    |  |  |

| This two-story brick building fronts S. Main Street to the east. The façade has a metal slip cover on the upper level of the building. While it is unknown if the metal slip cover is covering up windows, it is more than likely covering window openings.  The south elevation has cracked stucco. The west elevation brick work exhibits weathering and is in need of some mortar repair. On the west elevation are doors that have been boarded up; marked as "other" in building condition box. Windows on the south and west elevation are boarded up; marked as "other" in building condition box. A storefront window on the façade has a large crack.  The roof condition is unknown and was given a score of 2. If roof condition is in good to excellent condition the overall building rating could be higher.  Additional parking could be utilized in the nearby parking garage. |                                       |           |          |             |                                                       |                  |          |                                |                         |           |          |          |          |                                        |                  |

| This one-story brick building fronts S. Main Street to the east.  The ceiling in the entrance has peeling paint; marked as "other" in building condition box.  The parapet at the rear of the building appears to be leaning and brick work needs repair; marked as "other" in building condition box. It looks like there has been some repair work done in the past. West elevation has graffiti; marked as "other" in building condition box.  The condition of the roof is unknown and was given a score of 2. If roof is in good to excellent condition, the overall rating of the building could be higher.  Additional parking for the building could be utilized on the upper level parking deck nearby. |                                       |         |          |               |                                                            |                 |         |            |          |           |          |       |          |                                      |                  |

| This one-story brick building is located on the northwest corner of S. Main and Cedar Streets; building fronts S. Main to the east. The building also carries the address of 311 Cedar St.  Overall the building appears well maintained. A window located on the façade as a crack in the lower right corner. Storefront windows have vertical blinds which give the feeling the general public is not welcomed when closed and is marked as "other" in building condition box; points were not taken away for the blinds only the cracked window. Located on the west elevation are boarded up windows; marked as "other" in building condition box. Flanking the entrance, the storefront has been altered  There are gutters located on the west elevation, but no downspouts.  The roof condition is unknown and was given a score of 2. If roof is in good to excellent condition, the overall building rating could be higher. |                                                   |            |        |                 |                                    |          |        |                                |            |           |          |       |          |                     |  |

| This two-story brick building is located on the southwest corner of S. Main and Cedar Streets; building fronts S. Main to the east.  The building has some minor mortar issues on the façade and north elevation. Windows located on the façade and north elevation have all been partially boarded up.  The condition of the roof in unknown and was given a score of 2. If roof condition is in good to excellent condition the overall rating of the building could be higher.  The building is for sale and information on the real estate website list two apartments on the second level; one apartment in great condition and the other needing work. The website also states the rest of the building needs work. |                                        |            |          |              |                                       |                  |          |                   |           |           |          |       |             |                   |                  |

| The brick building fronts S. Main to the east.  The brick piers at the roofline of the façade have loose and missing brick; lower pier (north) has missing mortar. The wood trim of the shed entrance porch is loose and the shed roof has loose shingles in variou locations. The window frames show signs of weathering; as well as two of the doors on the façade. Two the doors located on the façade do not match and the solid doors, as is, look; more residential; marked a "other" in building condition box. Located over one door is a boarded up transom. The south elevation h loose bricks at the pier located at the roofline.  The condition of the roof is unknown and was given a score of 2. If roof condition is in good to excellent condition the overall rating could be higher. |                                     |           |            |                |                                       |                  | gles in various<br>açade. | This one-story brick building fronts S. Main St. to the west and is located at the end of S. 2 <sup>nd</sup> St. to the south. Several windows are broken throughout the building. Other windows are boarded up and the conditions of the windows are unknown. A glass and wood panel door on the west elevation has a broken glass pane; as well as a door on the east elevation. The east elevation has a rusted door. The brick wood work has missing mortar in various areas and signs of weathering.  Concrete steps leading to S. Main St. are not in good condition. The concrete in areas is crumbling.  The Poplar Bluff Historic Restoration Society is working to seek funds to rehabilitate the building and the concrete stairway leading to S. Main Street. |                                      |           |          |                   |                                               |                  |          |                                                                    |                         |           |          |       |          |                                        |                  |

The building is located on the southeast corner of W. Pine and Moran Streets; building fronts W. Pine Street and has an "L-shaped" footprint. The east section of the building has a flat roof and the west section has a low-pitched hipped roof clad in asphalt shingles. The façade features a shed-like roof over the upper portion of the exterior wall surface. The shed roof is worn with loose and missing shingles; a small hole is visible (see photo below). Roof condition on the west is also worn and weathered with some buckling. Located at the northeast corner near the roofline is metal trim which is damaged. The exterior wall surface on the west elevations exhibits loose and buckled vinyl siding with some strips of siding having holes. South elevation

The main entrance to the building has missing wood trim in door surround creating a hole on either side of the door frame. A brick coping for landscaping (façade or north elevation), is located between the building and the parking lot. Coping has loose and fallen bricks (noted under landscaping element in table). Located on the northeast corner of the building is a damaged downspout.

has infill in original openings.

The consultant was not able to access interior of the building. A HVAC unit is located on the west elevation roof and consultant surmised building has central heat and air from unit.

| These two buildings front Poplar Street to the north. Both buildings have been recently rehabilitated and are in excellent condition.  On the west elevation some of the windows have been covered over. The roof on Building B does exhibit some weathering but looks to be in good shape.  Interior of the building is in excellent condition. |                                         |          |        |                               |                |                  |          |             |                        |          |          |       |                   |                                       |                  |

| Overall the of the brick excellent of Consultan                                                                                                       | ADDITIONAL COMMENTS  This one-story brick building is located on the southeast corner of Poplar and S. Fifth Streets; building fronts Poplar Street to the north.  Overall the building appears to be in good to excellent condition. Building has had some previous re-pointing of the brick on the east elevation. Roof condition is unknown and was given a score of 2. If roof is in good to excellent condition, the overall rating for the building could be higher.  Consultant did enter building but did not tour the building. Sketch of floor plan is not exact and was done by what consultant could see from the lobby area of the building. |           |             |                  |           |        |  |           |            |          |        |       |       |                   |    |

| This one –story concrete block building is vacant. Windows on the façade have been covered with plywood and it is unknown if the windows are intact; marked as "other" under building condition box. Two doors are located on the façade, both have missing glass panels. Doors are weathered with peeling paint. The door to the east is missing an upper step. Small awning over east door is worn. The upper portion of façade is clad in metal and is weathered and worn; seams appear to be loose. There is a crack in the foundation located between the two doors. On the east end of the façade is a small area of graffiti.  Consultant was unable to gain access to the vacant building to obtain interior data and floorplan.  Consultant did not see any signs of a street address on the exterior of the building as required by city ordinance 6044.  The condition of the roof is unknown and was given a score of 2. If roof is in good to excellent condition the overall score could be higher. |                                           |           |        |                    |                                             |                   |          |                          |          |           |          |       |          |                                      |                  |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |          |         |                  |                                            |                |         |           |                          |         |     |       |   |                                       |  |
| parcel). The cladding of bottom so Mortar is a elevation if the north esigns of when the Nation maps a part of the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of which when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the signs of when the sign of when the sign of when the sign of when the sign of when the sign of when the sign of which when the sign of when the sign of when the sign of which when the sign of which when the sign of w | This one-story stucco clad brick building fronts Vine Street to the south with a parking lot to the east (same parcel). The brick parapet is leaning to the north and the roof on the east elevation is sagging. Stucco wall cladding on the façade and east elevation has cracking and east elevation has missing stucco; as well as the bottom southeast corner of the façade. The exposed bricks on the southeast corner reveal missing mortar. Mortar is also missing on the east facing roof ridge line. The façade has a cracked window. The north elevation is covered in trees and vines and part of the east elevation is covered in vines. A window located on the north elevation is covered over and it is unknown if window is intact. The entrances on the façade show signs of weathering.  The National Register nomination list building as being constructed ca. 1905, however, according to Sanborn maps a partial frame and brick building was located at this address. Estimated date on building was obtained from tax assessment records.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |          |         |                  |                                            |                |         |           |                          |         |     |       |   |                                       |  |

| Vine to the apartment However, were repartment Interior of Consultant Vine St. Taccessed.  The condition overall score                      | This two-story brick building is located on the northeast corner of Vine and Broadway Streets; building fronts Vine to the north. Located on the west elevation at the north corner is the external assess to the upstairs apartments. Building has been painted and it is difficult to determine if there are mortar issues on the façade. However, it appears there are some mortar issues near the roofline or once was some mortar problems that were repaired. The west elevation brick wall surface exhibits some spalling of the brick.  Interior of the first floor shows water damage to the ceiling from the apartments above.  Consultant was not able to assess apartments on second level but did enter the commercial space at 329 Vine St. Tenants located at 319 Vine St. were on vacation at time of survey and commercial space was not accessed. Business owner at 329 provided details of the layout for 319 Vine St.  The condition of the roof is unknown and given a score of 2. If the roof is in good to excellent condition, the overall score could be higher. |          |        |                                   |                                                        |                     |          |            |          |        |          |       |          |    |                        |                  |

| Some of the plywood, it are deterior doors has Rear (north Windows) Consultant                                | This two-story brick building fronts Vine Street to the South.  Some of the upper level windows on the façade have been boarded over. Those windows are covered with plywood, it is unknown if the windows are intact; marked as "other" in building condition box. Other windows are deteriorated. Double wood doors on second level exhibit signs of deterioration. Brick under wood double doors has damage.  Rear (north) elevation is covered with vegetation. Brick wall surface has mortar issues. Windows have been covered over with plywood, it is unknown the condition of the windows or if intact.  Consultant was not able to gain access to the interior of the building. |          |       |                 |                                           |                  |          |       |                          |        |          |       |          |                                        | 3                |  |

This two-story brick building fronts Vine Street to the south. First floor houses retail space and it is unknown the use of the second floor. At the time of the survey, building lacked street address posted on the exterior of building as required by city ordinance 6044. A satellite disk is located on the façade, it is unknown if it is for the business or if the upstairs has apartments and are occupied.

Façade of the building has cracked brick and missing mortar on the upper level. Brick wall surface in some sections has been painted and paint is peeling. The iron header above storefront has peeling paint. The upper level windows on the façade have been bricked infilled; marked as "other" in building condition box.

The west elevation faces Moran Street. Wall surface is stucco clad over brick. Stucco exhibits deterioration. Upper level windows are brick infilled. Lower section of wall surface has evidence of water damage; marked as "other" in building condition box.

Rear (north) elevation has missing mortar, and loose brick issues.

The condition of the roof is unknown and was given a score of 2. If the condition of the roof is in good to excellent condition, the overall score could be higher.

| This two-story brick building is located on the southeast corner of Vine and Moran Streets.  The bulkhead (façade) has a crack. Some of the upper level appears to have weathered a bit. The east elevation on the lower level has been covered with concrete and is showing signs of wear; concrete is coming off maybe be due to spalling. The west elevation has a broken window.  Interior overall appears to be maintained, but there is some water damage to the ceiling of the first floor and crack on the tile floor.  External access to upstairs located on the façade (west corner).  Consultant did not have access to the second level.  The condition of the roof is unknown and was given a score of 2. If the roof is in good to excellent condition the overall score could be higher. |                                       |           |           |                   |                                               |                  |          |                                |                       |           |          |       |          |                                    |                  |  |

| 430 Vine Street is comprised of three existing buildings listed as contributing resources in the Poplar Bluff Commercial Historic District and one modern building to join together to house the Vine Street Apartments (senior housing). These two-story buildings front Vine Street to the north.  Exterior of buildings appear to be in good to excellent condition.  Consultant did not access interior of the apartment complex, but interviewed property owner by telephone for information.  There is a private gated parking to the rear (south) of the building and additional parking for the complex is across Vine Street in a parking lot owned by the City of Poplar Bluff.  Site is well maintained. |                                               |          |       |                   |                                           |                  |          |                                                      |                                         |        |          |       |          |                                      |                  |  |  |
