| estimated date 1940 the exterior Building has condition building results building results.                     | This one-story building does not appear on any Sanborn maps with the latest map dated 1950. Consultant estimated the construction period by the development of the block. Tax assessment records list construction date 1940, but it is not shown on the 1950 Sanborn map. Building does not have a street address visible on the exterior as required by city ordinance 6044.  Building has a false front (façade) with a boarded up window and no egress; marked "other" in the building condition box. The south elevation exhibits signs of deterioration of the exposed wood rafters and wall surface. Roof appears weathered from the south elevation. Vegetation is found in the open space between this building and the one directly to the south (106-C). Due to no entrance on the façade for egress, the building received a low score for door and entrance.  Consultant was not able to gain access into the interior. |            |            |                    |                                              |                    |          |           |          |           |          |        |          |                                    |                  |

| This one-story brick façade building fronts S. Second St. to the west and has a low-pitched gable roof with a boomtown façade. The roof is in poor condition with a hole on the south section of the roof and other sections with some buckling. Façade has missing mortar and cracks in the bricks. Area around the entrance door exhibits signs of deterioration and entrance step is missing.  Vegetation is growing up next to the building on the north and east side of the property.  Building does not have a street address on the exterior as required by the city ordinance 6044.  Since the in-field survey was conducted, Butler County has razed this building. A wood fence has been constructed across the width of the property lot fronting S. Second Street. The City of Poplar Bluff submitted photos of the site after the property was demolished. Those photos have been inserted as part of this form. |                  |  |  |  |  |  |  |  |  |  |  |

| ADDITIONAL COMMENTS  This one-story building fronts S. 2 <sup>nd</sup> Street to the west. There is a crack in the brickwork at the southwest corner of the building. The east elevation has some vegetation growth on the wall surface.  Interior of the building was maintained. The ceiling does has some water damaged from a previous leak which has been corrected. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |           |            |                          |                                                       |           |          |             |          |            |        |       |          |                                       |                  |

| This building is located on the southwest corner of Vine and S. 2 <sup>nd</sup> and the northwest corner of Po 2 <sup>nd</sup> Streets; building fronts S. 2 <sup>nd</sup> to the east.  The building is three buildings adjoined together with one building being two-stories in height.  Overall the building appears to be maintained, and the consultant only found some general maintaissues. The south elevation has a cracked window, some peeling paint, weathered trim, and miss flooring in the entrance.  On the east elevation, the landscaping has brick coping and piers. One of the brick piers has been marked under "vegetation/overgrown or on building" in building condition box. |                                                         |           |            |                            |                            | t.<br>naintenance<br>I missing tile |          |            |                         |             |          |        |          |                                        |

| This one-story brick and metal clad building fronts N. Broadway to the west.  The awning supports shows signs of weathering. Overall, the building appeared maintained, but the interior ceiling did have signs of water damage.  The condition of the roof is unknown and was given a score of 2. If the roof is in good to excellent condition, the overall building rating could be higher. |                                                         |              |       |                   |                                             |                  |          |           |                        |           |          |        |          |                                         |                  |

| This one-story brick building is located on the southeast corner of N. Broadway and Pine Streets; building fronts N. Broadway to the west. The building is comprised of five separate commercial spaces.  Overall the building appeared maintained. There are some hanging wires above the storefront of 112. The wood trim around some of the entrances are weathered.  The roof condition of the building is unknown and was given a score of 2. If the roof is in good to excellent condition the overall rating of the building could be higher.  The consultant did not tour any of the commercial spaces, but was given a general layout by personnel in the commercial spaces. |                                                 |           |          |                 |                                              |                  |          |          |                           | the       |          |       |          |                                         |                  |

Br   | oadwa    | ay; as v |          | building fronts<br>400 Vine Str |                  |

It is listed in the National Register nomination under the address of 400 Vine Street.

A large section of the building has been covered with stucco while the 105 S. Broadway section retains the brick wall surface. According to Sanborn maps the building was constructed prior to 1924 but after 1917. While the different wall surfaces may present the feeling as two different buildings, it is one building and will be considered as one for the purpose of this survey.

The stucco wall surface exhibits signs of weathering on the façade and north elevation. Cracks are located in various locations of the stucco. One area on the upper corner of the north elevation has a small hole in the stucco. Located on the lower stucco wall surface of the 105 section is some damaged stucco. Recently it looks as if some repair work has been done with the stucco surface. The window frames on the second level of section 105 show signs of weathering.

Additional parking is located across the street in the public parking garage. Employees of Banner Finance utilize the parking garage.

| surface ar cracks.  A window  The south has been concrete s  The condithe overal                                                                                                                                            | This two-story brick building fronts S. Broadway to the east. The lower level has stucco clad over brick wall surface and the upper level wall surface is brick. The stucco exhibits signs of weathering and has some cracks.  A window on the first level has been downsized.  The south elevation has several areas of missing mortar. The upper level wall surface of the south elevation has been covered in a layer of concrete; concrete is cracked in places and missing. Brick work under the concrete surface has missing mortar.  The condition of the roof is unknown and was given a score of 2. If the roof is in good to excellent condition, the overall building rating could be higher.  A parking garage across the street could serve as additional parking for the building. |       |       |                   |                                              |                  |          |       |                         |        |          |       |          |                                       |                  |

| Broadway t<br>located in s<br>A storefron<br>façade and<br>wear. Seve<br>The west e<br>The roof co<br>rating could                                                                                                                                                                                                                    | This three-story brick building is located on the northwest corner of S. Broadway and Poplar Streets; the building fronts S. Broadway to the east. The first level has three separate business spaces, each with different address. The business located in space 125 fronts Poplar St. to the south.  A storefront window of commercial space 125 is cracked on the façade (east) elevation. All upper level windows on the façade and south elevation have been partially boarded up in the upper section of the window frame. Metal frames exhibit wear. Several storefront windows (transoms) on the first level have been boarded up.  The west elevation has loose, cracked and missing bricks. Various areas of the wall surface has missing mortar.  The roof condition is unknown and was given a score of 2. If roof condition is in good to excellent condition the overall rating could be higher. While the west elevation wall surface is in poor condition the south and east appear in decent condition rating a score of 2 instead of 1. Previously, a building was adjoined to the south elevation; the razing of the |           |         |            |                |                  |          |          |           |        |          |        |             |                  |  |

This two-story stucco clad over brick building is located on the southwest corner of S. Broadway and Poplar Streets; building fronts S. Broadway to the east. Attached at the rear (west) elevation is a one-story stucco clad over brick building that carries the address of 408 Poplar Street.

Building shows signs of weathering, the stucco is cracked in places and the building appears to have some smoke damage from the fire that occurred at 205 S. Broadway.

Some of the storefront windows are missing and boarded over. Upper level windows have been infilled with stucco and downsized; marked as "other" in building condition box. Windows are weathered and one upper level window has a crack.

The west elevation has a covered porch/entrance to the upper level and exhibits signs of weathering.

The roof condition is unknown and was given a score of 2. If roof condition is in good to excellent condition the overall score could be higher.

Consultant did not gain access to the interior of building. Consultant was told by neighboring resident the upper level of the building is residential apartments.

A parking garage is located across the street and could be utilized for additional parking.

This two-story brick building fronts S. Broadway to the east.

Façade has some smoke damage (marked as "other" in building condition box) from the fire that occurred in the building to the south (205 S. Broadway) and has some missing mortar in some areas. Upper level windows have been removed and downsize to smaller windows; marked as "other" in building condition box. Areas around smaller windows are infilled with plywood. The brick work on the south elevation has missing mortar in various areas. North elevation has missing mortar, loose and bent metal trim coping along roofline, and a missing window (2<sup>nd</sup> level) that has been covered over with plywood. West elevation has missing brick and infill of window openings.

The condition of the roof is unknown and was given a score of 2. If roof is in good to excellent condition the overall score could be higher.

Consultant was not able to access the interior. According to one the residents of the upper level apartments, the building has approximately five apartments.

There is a nearby parking garage that could be utilized for additional parking.

| Brick wall The metal façade. T crack. The bulkh Consultan through th                                         | This one-story brick building fronts S. Broadway to the east. The building has experienced fire damage and is condemned. The roof has been repaired and is in fair condition.  Brick wall surface has missing mortar and is smoke damaged; marked as "other" in building condition box. The metal awning exhibit signs of smoke damage as well. There are several loose wires hanging from the façade. The storefront has one missing window that has been boarded up and another window with a large crack.  The bulkhead and entrance shows some wear.  Consultant did not access the interior of the building since it has been condemned but could glance in through the windows; interior is in poor condition due to the fire damage.  There is a nearby parking garage that could be utilized for additional parking. |           |            |                |                |                  |          |            |                        |           |          |       |          |                                     |                  |

This one-story brick building with a basement fronts S. Broadway to the east.

The storefront windows and doors are in good condition. There is some uneven concrete at one of the entrances. While the building is not a true ADA accessible, the entrances does not have any steps leading into the building and it is somewhat accessible for ADA.

A window opening on the north elevation has been boarded over and has a window air condition unit installed. Some of the lower level windows on the north elevation have been infilled or have security bars installed. These items are marked as "other" in building condition box.

The brick work on the façade exhibits some mortar issues. The brick work on the north elevation has cracks, missing mortar and some loose bricks.

Brick wall surface on the northwest corner of the north elevation has vegetation growth.

The condition of the roof is unknown and was given a score of 2. If the roof is in good to excellent condition the the overall score could be higher.

Consultant was not able to access the interior of the building.

Adjacent parking is provided in a nearby parking garage.

| This brick                                                                   | This brick building (fronting S. Broadway to the east) is divided into three separate commercial spaces |         |         |       |                |                  |          |            |          |           |          |       |           |          |                  |

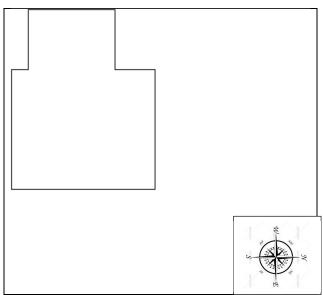

The upper brick façade has various spots of mortar issues and a couple of cracks in the mortar. The wood siding on the 409 storefront appears to have some loose panels. The vinyl siding on the 407 storefront appears in decent condition but is showing some weathering. The coping along the roofline at the south end is loose. Awnings located over the entrances of 407 and 409 appear to be in good condition. The window and door of the 409 storefront has installed security bars which may present the characterization of the area as unsafe; marked as "other" in the building condition box.

Consultant did enter the commercial space of 409 and interviewed the owner. While consultant was not able to tour the building, the owner did provide a general layout of the 409 space and provide general information to help with the survey. The condition of the roof in unknown and was given a score of 2. Overall rating of the building could be higher if the roof is in good to excellent condition. Building appears to have general maintenance issues.

| OTHER:                                                                                                                                      |                                                                                                         |                                    |                                               |

| This brick building fronts S. Broadway to the east. Façade exhibit signs of previous re-pointing of the brickwork to repair cracks and missing mortar. The brick corbelling near the roofline shows signs of weathering. There is a hanging wire near the storefront entrance. The entrance door has been covered and has a peep hole which presents the feeling the area is unsafe and building is unwelcoming; marked as "other" in the building condition box.  Building is vacant and consultant did not gain access to interior.  The condition of the roof is unknown and was given a score of 2. If roof is in good to excellent condition the overall rating could be higher. |                                       |            |       |                  |                                              |                  |          |            |                         |        |          |       |          |                                       |

Building is located on the northwest intersection of S. Broadway and Cherry Street; building fronts S. Broadway to the east.

The upper section of the brick wall surface has some cracks in the brick and discolored bricks. It appears some of the upper façade has been previously re-pointed. A wood shingle roof runs across the front of the building above the entrance. There are several loose shingles and some missing shingles. Above the entrance roof is a bundle of wires/cables. The metal bulkhead, near the entrance, has a dented panel. Overall, the entrance area show signs of wear. The windows located on the façade have security bars which could present possible egress issues and presents the area as being unsafe; marked as "other" in building condition box.

The condition of the roof in unknown and was given a score of 2. If the roof is in good to excellent condition the overall rating could be higher.

The tax assessment record indicates an apartment within the building. The location of the apartment and if it is occupied is unknown.

Consultant did not gain access into the interior.

| This three-story building is located in the town square and fronts N. Main St. to the west; other building elevations are located on Pine, Vine, and S. 2 <sup>nd</sup> Streets.  Overall the building is in good condition. There are minor cracks on every elevation wall surface; some repairs have been done in the past. On the west elevation, the entrance parapet has a cracked and loose wall surface.  The interior of the building throughout has minor cracks in the floor.  The roof condition is unknown and was given a 2. If the roof is in good to excellent condition, the overall building rating could be higher.  Digital copies of the original blueprints are provided under the "floorplan" section. |                                                      |           |             |                    |                                               |                  |            |                                         |                         |           |          |         |          |                                      |                  |

| The awnir                      | The awning is missing from 109; marked as "other" under "entrance/porch" in building condition box. |           |           |           |                |                  |          |           |           |           |          |       |          |                 |                  |

The loose trim and missing awning are minor maintenance issues.

Condition of the roof is unknown and was given a score of 2. If roof is in good to excellent condition the overall building rating could be higher.

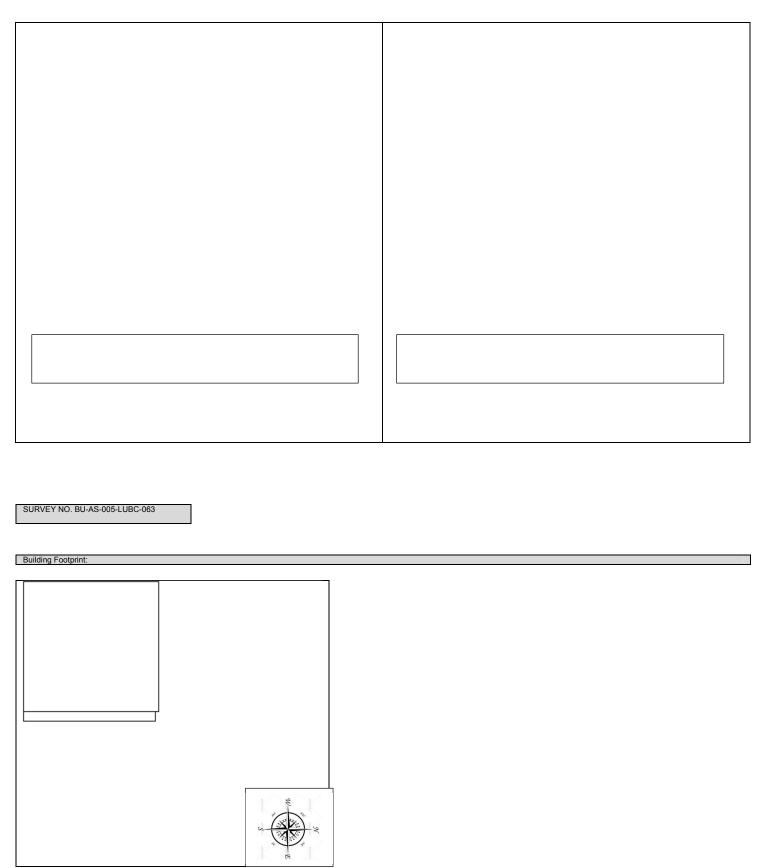

The consultant spoke with an employee to gather information on the building but was not allowed to tour the building to get a sketch of the layout.
