

Possible African-Americans at the Battle of Pilot Knob

This list of 26 African-American citizens are recorded on one list in the Peterson Collection as being in the fort during the battle. Most sources identify 50 African-Americans, and our consolidated list records 65 African Americans. The list most of these were found on records 84 being present. One earlier researcher listed Tim Valle as being the same person as Henry Valle. This list records them separately. So these people may well have been an additional 26 African Americans at the Battle of Pilot Knob. These names do not appear to be duplicates with spelling variations from the other list.
