40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the east side of N. Seventh Street in an urban residential neighborhood. The yard features mature trees in the front and rear yards. The rear yard is surrounded by a wood privacy fence. A gravel drive flanks the south end of the parcel. A public concrete walk flanks the west end of the parcel. A concrete walk leads from the porch steps to the public walk.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The altered dwelling has an asphalt-shingled roof, exterior synthetic (façade) and asbestos shingle (side elevations) siding, and a concrete raised foundation. The primary (west) elevation is fronted by a wide open frame stoop with a wood balustrade. The stoop wraps to the south elevation. The west elevation holds a c. 2019 paneled door offset by a replacement double-hung window. The upper façade elevation holds a one-over-one replacement window. The north elevation has a gabled wall dormer with a single double-hung window. The lower north elevation retains paired and single original four-over-four windows. The dwelling has a rear shed wing. The south elevation has an upper projecting window bay with replacement fixed sash windows. A staircase leading to the façade stoop spans much of the south elevation.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the west side of N. Seventh Street in an urban residential neighborhood. The rear yard supports mature trees. A gravel drive bounds the north end of the lot. A public concrete sidewalk bounds the west end of the lot. A private walk extends from the porch steps to the public sidewalk.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front plan dwelling has an asphalt-shingled roof, exterior synthetic siding and a covered foundation. The primary (west) elevation holds a gabled porch supported by wrought iron columns resting on a concrete stoop. A metal balustrade flanks the north end of the porch. Within the porch bay is a single-light storm door (which obscures the primary door) offset by a single-light sidelight (replacement) above an original wood panel. Original three-over-one windows flank the entry bay.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered parcel on the east side of N. Seventh Street in an urban residential neighborhood. The rear yard has mature trees and the front yard has mature shrubs. Gravel drives flank the north and south ends of the lot. A concrete public sidewalk flanks the west end of the parcel, intersecting with a private walk leading to the porch.

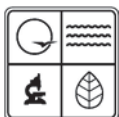

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling is a cross-gabled plan with an asphalt-shingled roof, exterior synthetic siding and a concrete foundation. The front facing gable is centered on a rear cross gabled wing. The west wall of the front wing holds a one-over-one wide window. The gable has a return on the south and flares to create an integral porch north of the front gabled wing. The porch is supported by wood columns. Within the porch by are a six-light paneled door (west elevation) and one-over-one window (north wall). The dwelling has a rear one-story wing. Gable fields have louvered vents.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered parcel on the east side of N. Seventh Street in an urban residential neighborhood. The front yard has no foliage. The rear yard has mature trees. Gravel drives flank the north and south ends of the parcel. A concrete public sidewalk flanks the west end of the lot. A private walk leads from the porch to the public sidewalk.

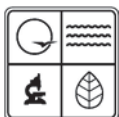

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt-shingled roof, exterior asbestos shingle siding and a limestone foundation covered with concrete. The primary (west) elevation has an off-center shed porch supported by square wood columns. A single metal pole handrail extends along the porch steps. Within the porch bay is a single-light paneled door (original) offset by a one-over-one window. The front gabled wing north of the porch has covered gabled returns and a one-over-one window. Remaining windows are of similar configuration. The south elevation has a four-over-four window. The dwelling has a rear shed wing.

The dwelling is on a grass covered lot on the east side of N. Seventh Street within an urban residential neighborhood. The lot is bounded by a concrete public sidewalk that intersects a private walk leading to the porch. The front yard is void of trees. The rear yard has mature trees. Gravel drives bound the north and south ends of the lot. Northeast of the dwelling, in the rear yard, is a prefabricated metal outbuilding with a gable-front roof. The outbuilding is not eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling, originally a single-family house, has been modified to support two-family housing. The dwelling has an asphalt-shingled roof, exterior vinyl siding and a concrete foundation. The primary (west) elevation has a central shed contemporary porch supported by three slender wood columns. Within the porch bay are two contemporary paneled doors. The porch is flanked by six-over-six replacement windows. The dwelling has a rear shed wing.

The dwelling is on a grass covered lot on the east side of N. Seventh Street in an urban residential neighborhood. The rear yard supports mature trees. The north end of the parcel is bounded by a wood privacy fence and a gravel drive. The west end of the lot is flanked by a concrete public sidewalk. A private walk leads from the public sidewalk to the porch steps. Situated east of the dwelling is a gable-front garage with an overhead track door, asbestos siding and a concrete foundation. The garage is not eligible for the National Register of Historic Places.

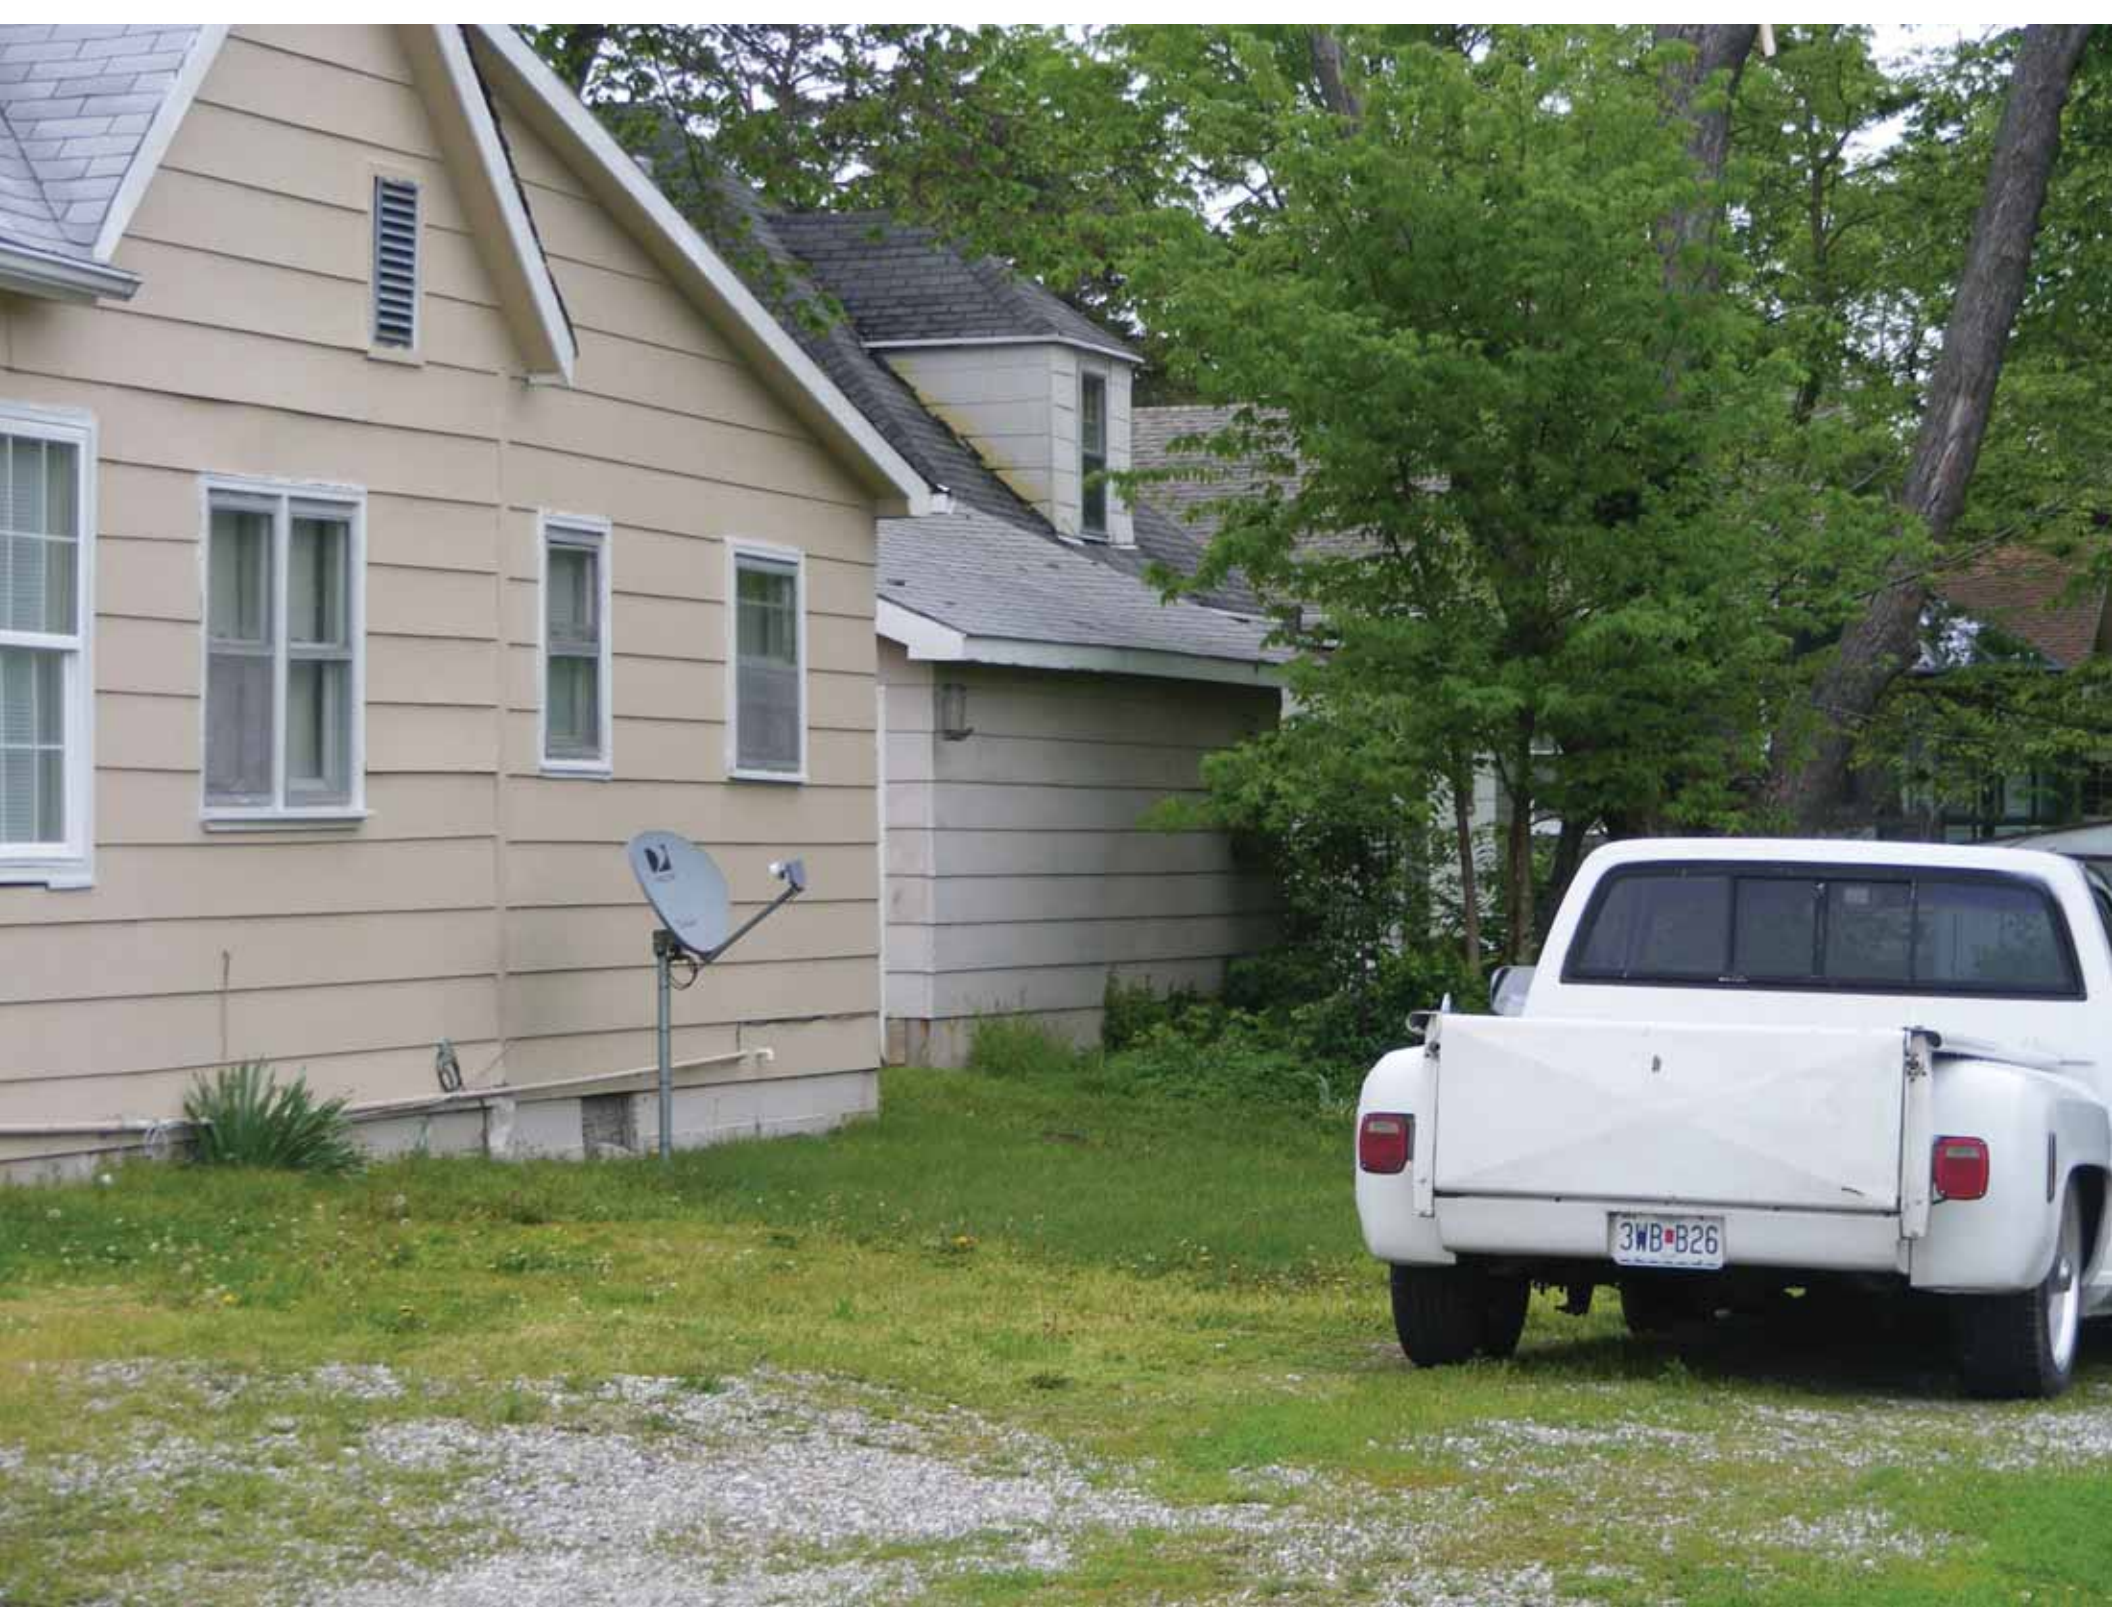

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

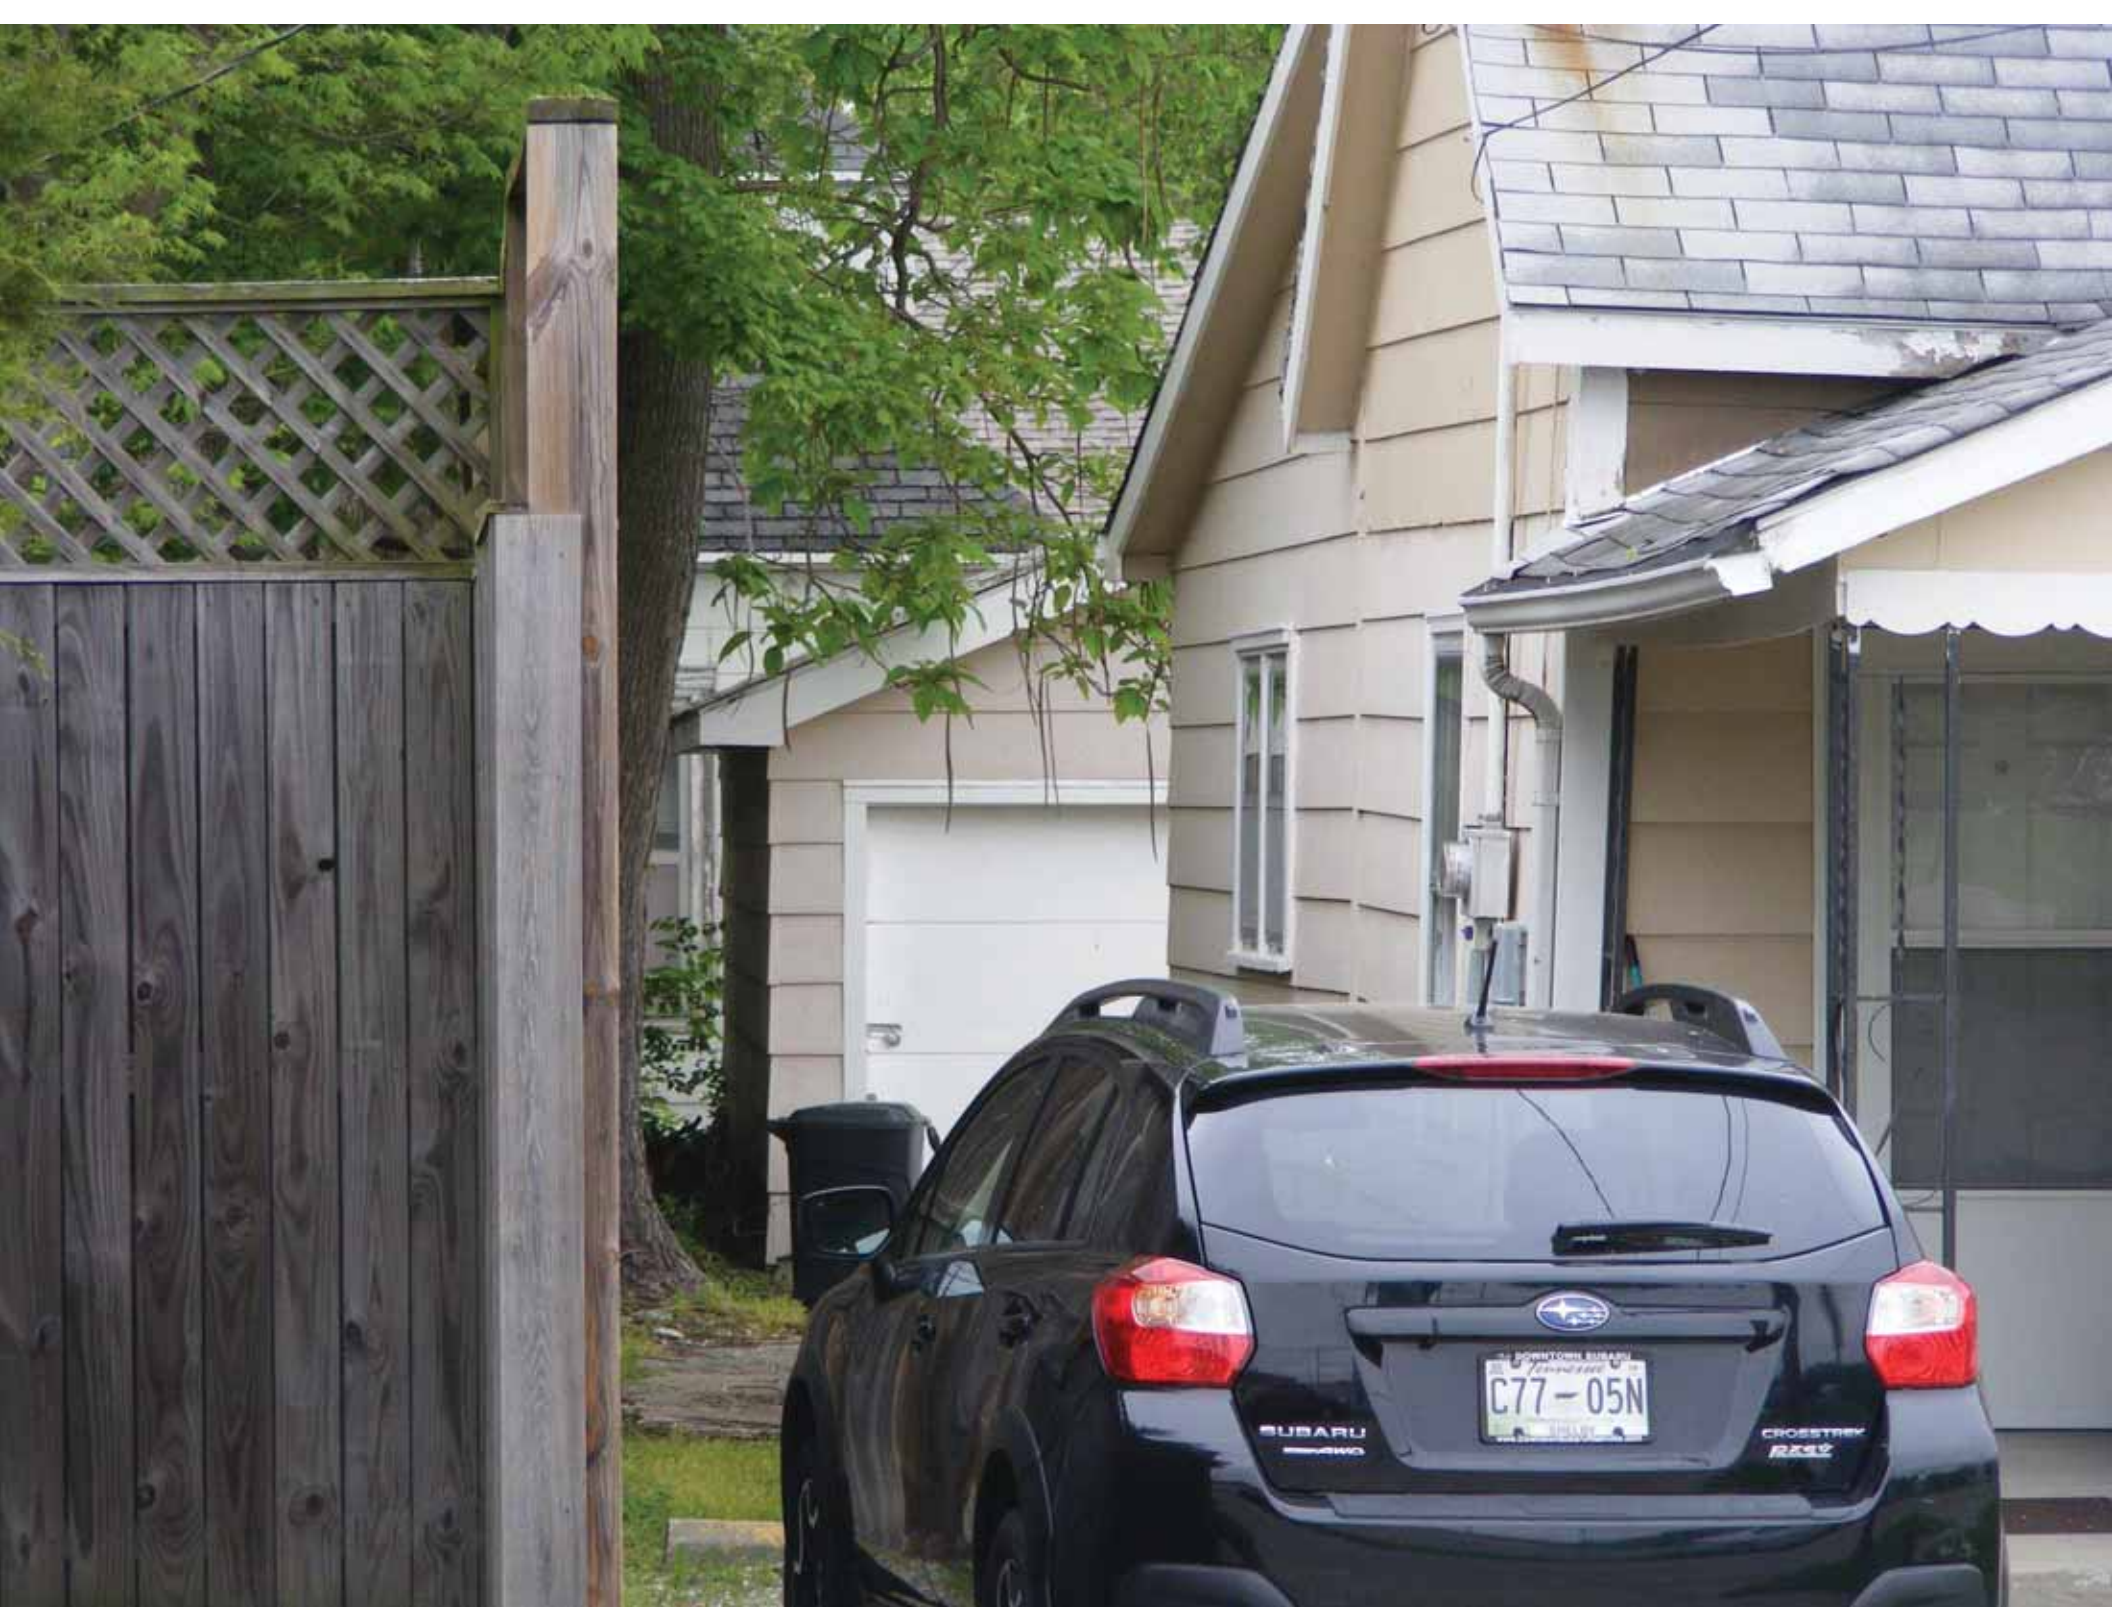

The cross-gable plan dwelling has an asphalt-shingled roof, exterior asbestos siding and a concrete foundation. The front facing gabled wing holds paired replacement six-over-six windows. Remaining windows are one-over-one. The gable field has a louvered vent. Offsetting the gabled wing on the north is a shed porch supported by wrought iron columns. The porch roof is trimmed with a scalloped edge. Within the porch bay is a paneled door (west wall). A one-over-one small window is situated on the north wall within the porch bay. The dwelling has a rear shed wing.

The dwelling is situated at the southeast intersection of N. Seventh Street (west) and Fairview Avenue (north). The parcel is a grass covered lot that supports mature trees in the front and rear yards. A concrete public sidewalk spans the west and north ends of the parcel. A private walk extends from the sidewalk to the front porch (west side of the dwelling). A wood privacy fence surrounds the rear yard and flanks the south end of the lot. The rear lot supports a vertical board, gabled outbuilding with exposed rafter tails and fixed single-light windows. The outbuilding is not eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The cross gable plan dwelling has an asphalt shingled roof with gable returns, exterior asbestos shingle siding and a limestone and concrete foundation. The primary (west) elevation has a half-width shed porch supported by square columns. Within the porch bay are single doors on the south and west walls. The west door is offset by a one-over-one window. The dwelling has an interior central brick chimney and a rear shed wing.

The apartment building is on a concrete and grass covered parcel situated at the northeast intersection of N. Seventh Street (west) and Fairview Avenue (south). The grassy areas surrounding the concrete parking lot on the west side of the building support mature trees. A concrete public sidewalk flanks the west and south ends of the parcel. A wood privacy fence surrounds the rear lot.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The two-story apartment building is a Mansard style building with an asphalt-shingled flared mansard roof, exterior brick and vertical board siding and a concrete slab foundation. The lower façade (west elevation) holds eight solid paneled doors, each of which is offset by paired six-over-six windows with brick sills. The doors are set in pairs, providing entries for eight housing units. The upper story (within the mansard) features four symmetrically placed six-over-six windows with gabled hoods and wood framing.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the east side of N. Seventh Street in an urban residential neighborhood. The rear yard supports mature trees. The west elevation is bounded by a concrete public sidewalk. A wide concrete drive leads to an attached garage at the south end of the dwelling.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt-shingled roof, exterior wide board (possibly pressed wood) siding and a concrete foundation. The dwelling has two pyramidal front wings at either end (north and south) of the façade (west elevation). The south wing holds an overhead track door leading to an attached garage. The north wing has a six-over-six window with faux shutters on the west elevation. The wings project, creating a recessed primary cross-hipped wing that supports a paneled door with a fanlight offset by paired six-over-six windows. Within the setback created by the projecting pyramidal wings is a concrete patio. There is no fenestration on the north elevation. The south elevation has two double-hung windows

The dwelling is on a grass covered lot with a mature tree in the front yard. The parcel is bounded by a concrete public sidewalk on the west and a gravel drive on the north. East of the gravel drive is a prefabricated metal outbuilding with a gambrel roof. The outbuilding is not eligible for the National Register. A concrete walk leads from the porch to the public sidewalk.

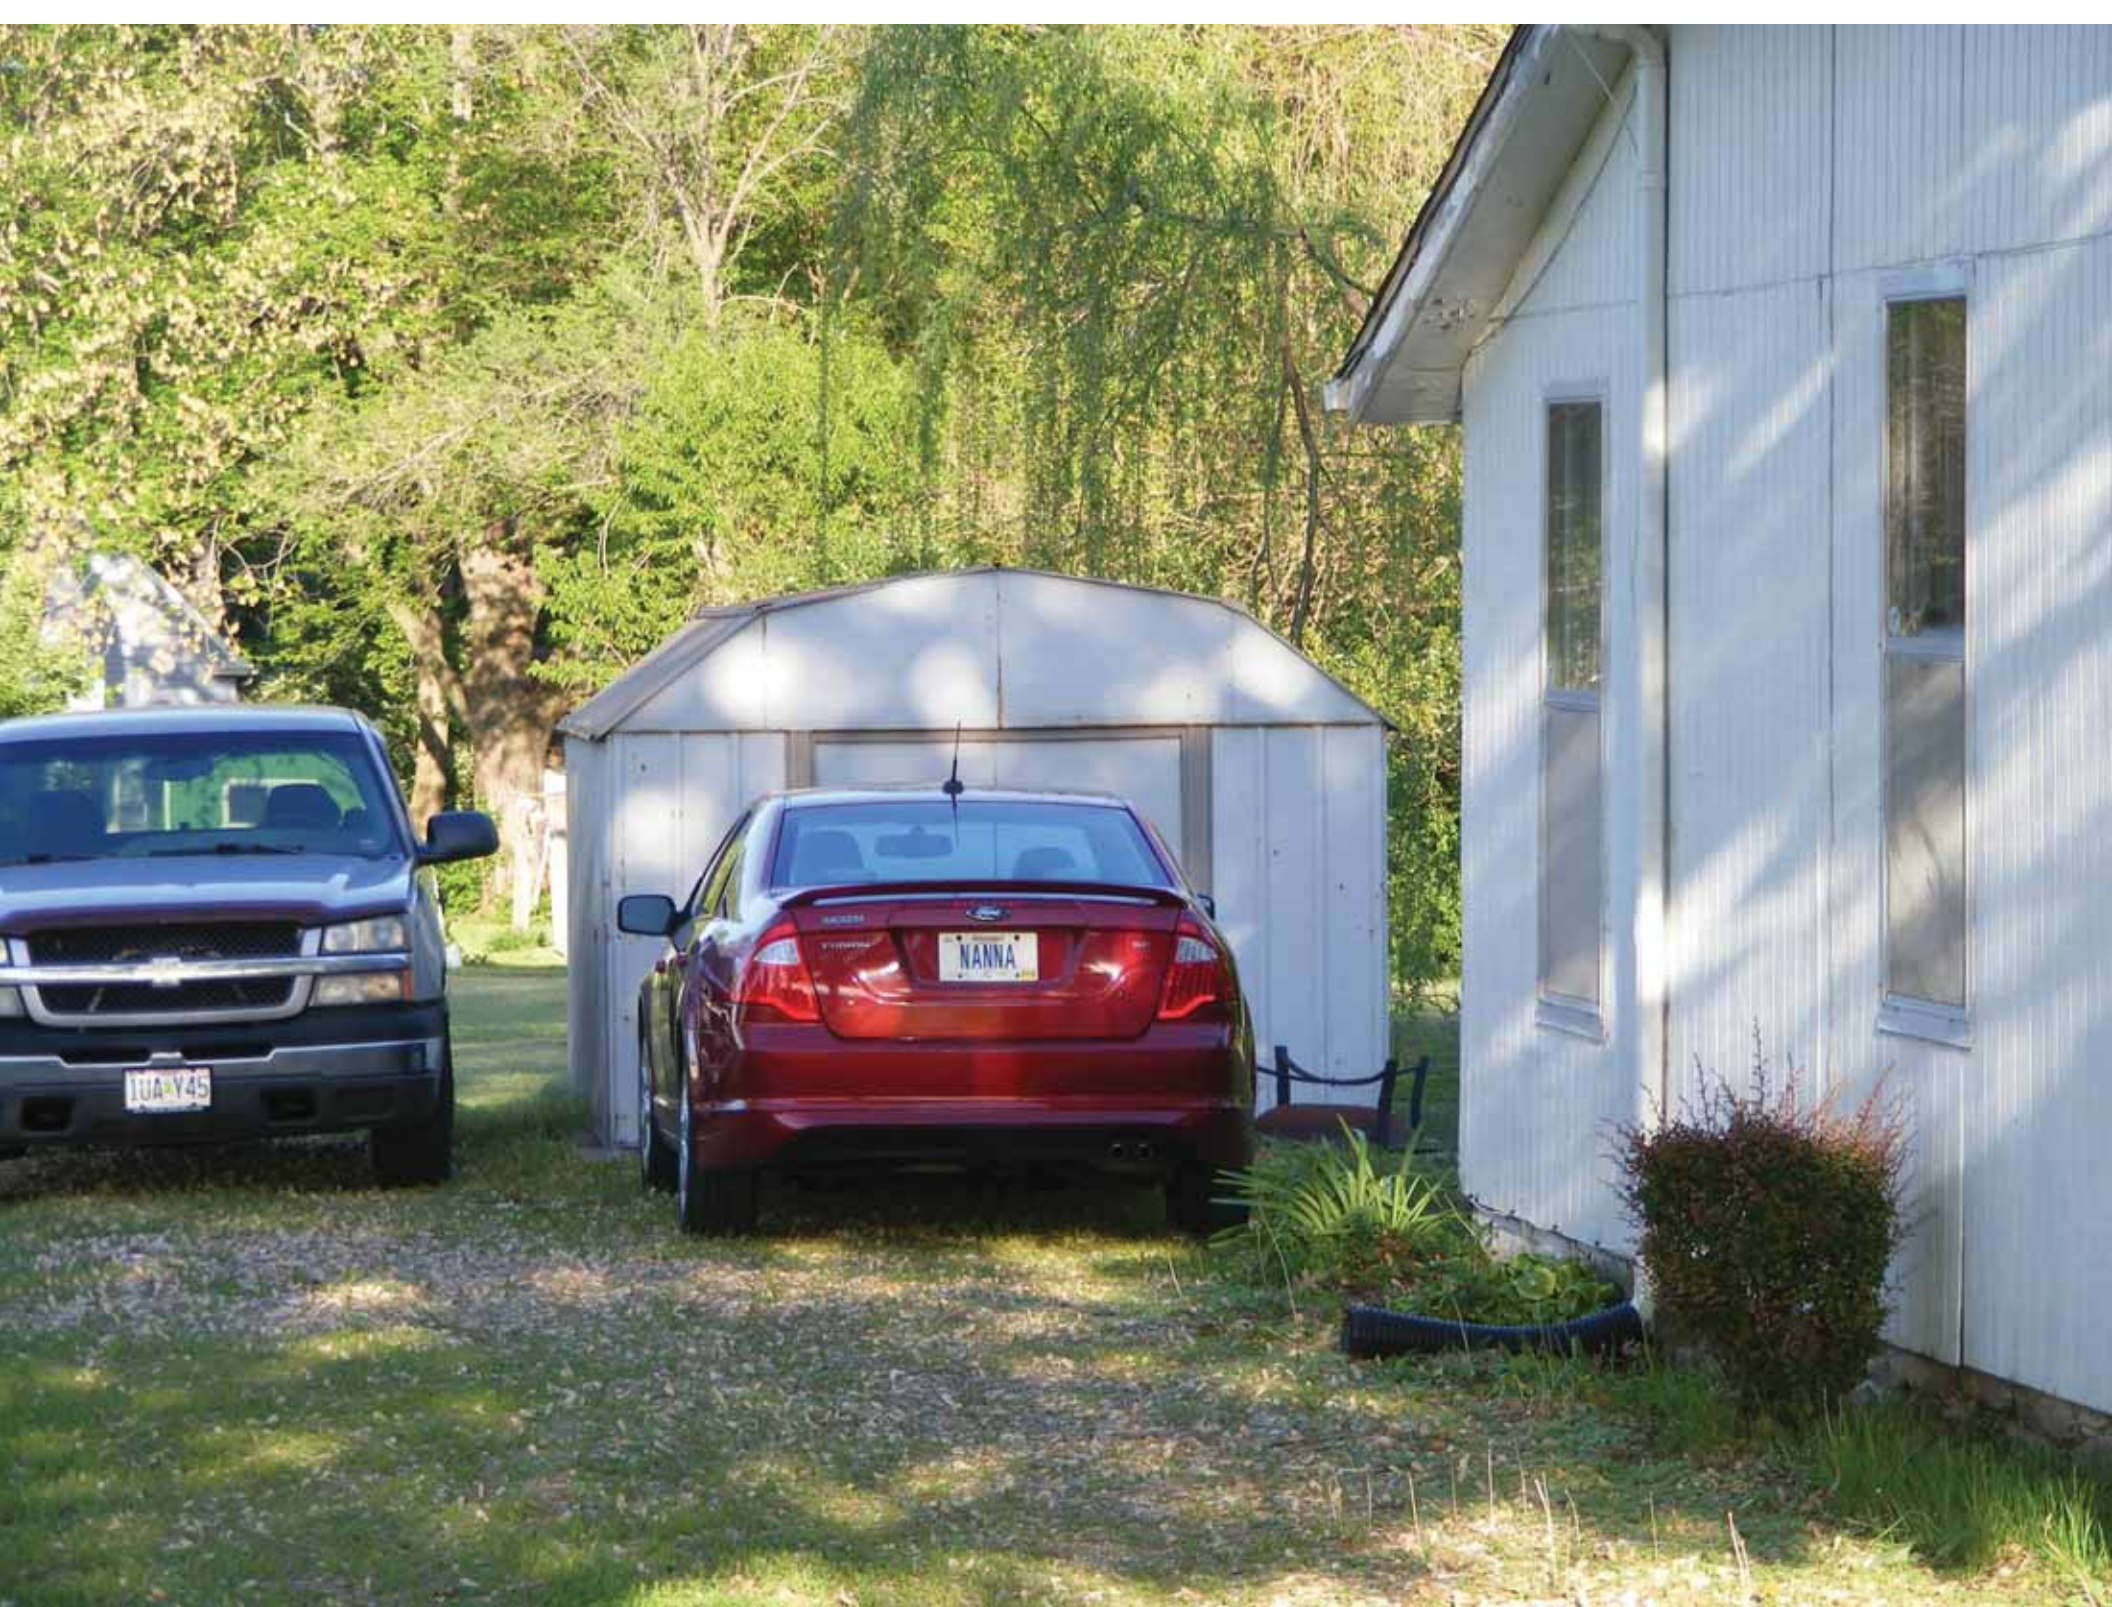

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a hipped and gabled asphalt-shingled roof, exterior vertical board siding and a stone foundation. Gable fields are filled with asbestos shingles. Windows are original one-over-one. A front gabled wing at the north end of the dwelling holds a single one-over-one window. Offsetting the wing on the façade is a shed porch supported by chamfered columns. Within the porch bay is a paneled door offset by a one-over-one window. Façade windows have faux shutters. The dwelling has a rear shed wing and interior brick chimney.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling (which appears to be a parsonage for the adjacent church, Columbia First Assembly of God) is on a grass covered parcel with mature trees in the rear yard. A concrete public sidewalk flanks the west end of the parcel. The south end of the lot is partially flanked by a chain link fence. The center of the front yard has a circular landscaped area with a tree and shrubs. Southeast of the dwelling is a gabled outbuilding (c. 1990) with limited access. The building has synthetic siding and does not appear to be eligible for the National Register.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a low gabled asphalt-shingled roof, exterior blonde brick veneer and a concrete foundation. A low matching brick planter flanks the façade wall (west elevation) at the north end, adjacent to a concrete pad that fronts the primary door on the projecting gable's north wall. The entry bay is filled with an original upper light wood paneled door. The projecting gable's west elevation features a large picture style window consisting of a central fixed light flanked by one-over-one windows. Above the picture style window, the gable holds a large triangular light with four vertical pieces of wood dividing the glass. The south wall of the gabled wing has a one-over-one window. The remaining façade wall has smaller one-over-one windows at the upper wall near the north and south ends of the elevation. Windows have original brick sills. There is a carport extension on the rear elevation.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The building is on a parcel largely paved with asphalt, which is utilized for parking purposes. A band of grass separates the building and asphalt areas from a concrete public sidewalk flanking the west end of the property. The lot is situated just north of an urban residential neighborhood and south of a busy commercial thoroughfare (Business Loop 70) on the east side of N. Seventh Street. Grassy areas flank the church on the north and south.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The building is composed of the sanctuary (north wing) and two flat wing additions attached to the south wall of the sanctuary. The façade of the sanctuary has a central brick projection that serves as a steeple, capped above the roofline with a cross. The projecting brick divides two large nine-light steel sash windows (colored glass) on either side of the upper gable wall. A flat roof portico is centered below the upper façade windows, supported by four square columns. Large aluminum letters on top of the portico indicate the church's name (First Assembly of God). The portico covers two bays, each of which holds paired glass and aluminum doors with a surround of fixed light panels. The north elevation holds a solid door (west) offset by four large four-light (fixed sash) windows. The two wings on the south elevation are staggered – with the southernmost wing set back the furthest. The central wing's west wall holds three large single-sash windows. The exposed south wall of the central wing features a single glass and aluminum door set below a stacked two-light transom. The west wall of the south wing features a central bay composed of paired glass and aluminum doors with a glass and aluminum surround. The south elevation has a central glass door below a single-light transom. The entry bay is flanked by four individual windows on either side. Visible at the roofline is a rear brick chimney (south wing).

The large building is a conglomeration of wings that extend east from N. Seventh Street (west) and wrap a commercial building on U.S. Business Loop 70 U.S. Business Loop 70 (north). The building is situated between a residential urban neighborhood (south) and busy commercial thoroughfare (north). The associated irregular lot is largely paved with asphalt to provide parking and movement of vehicles. Grass areas and plantings are situated between the surrounding streets (N. Seventh and U.S. Business Loop). Concrete sidewalks border the property on the west and north. A free standing wood sign supported by wood posts is situated in the grassy area dividing the west end of the property from N. Seventh Street.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This large complex of connected building wings appears to have been constructed from c. 1990-2010. The older wing faces S. Seventh Street. The building complex is constructed of prefabricated panels. Wings have metal clad gable roofs. The west elevation facing Seventh Street has an incised entry area at the southwest corner. Within the recess is a single door facing south and a window (two-light) facing west. The remaining west wall holds a two-light window. Similar windows span the wing's south elevation. The wing immediately east holds two large multi-light windows on the south elevation. Another wing, further east, appears to serve as lodging, resembling a two-story motel with front (south elevation) gabled portico. Entry faces south and access (for photography purposes) was limited. Attached to the north wall of the lodging wing is a prefabricated wing with large multi-light windows on the east elevation. A gymnasium is attached to the north wall of the connector wing. The gymnasium's north wall faces U.S. Business Loop 70. Windows are on the upper elevation walls, two-light design. Walls are clad with vertical synthetic siding that is cut away to expose decorative painted block walls (north, west and east elevations). A solid door is situated on the east elevation at the north end.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is situated on the west side of N. Eighth Street. The associated dwelling is situated on a grass covered residential lot in an urban setting. The yard has mature trees and shrubs. The parcel is bounded by a chain link fence and concrete public sidewalk (east end of parcel flanking Eighth Street). Situated northwest of the dwelling is a gable-front plan vertical board outbuilding obscured by a van. A gravel drive extends from the street (east end of parcel) to the outbuilding. The outbuilding is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The property is a single-story frame dwelling with a gabled hip roof clad with asphalt shingles, exterior vinyl siding and a covered foundation. The primary facing gable is situated at the north end of the façade and has gable returns. Centered on this portion of the façade is a one-over-one window. The remaining façade is set back, created a shed porch supported by two square columns resting on a frame porch. The entry bay is offset on the right (north). To the south of the door is a one-over-one window. Side elevations hold single and paired one-over-one windows. There is an interior metal flue near the north end of the roofline. Eaves are enclosed.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

In 1961, the building was occupied by Wright's Radio and TV Repair. The property is not identified in 1909 or 1947 directories. The property was altered c. 2010. Alterations include an infilled/remodeled commercial façade and replacement windows that fail to fill the original bay openings. These alterations compromise the building's integrity, rendering it individually ineligible for the National Register of Historic Places. The building is not within an area that appears to support a historic district.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

R.E. Hackman's Columbia City Directory, 1909.

Polk's Columbia City Directories, 1947 and 1961.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The two-story former commercial building is situated along the east side of N. Eighth Street. The property is within an urban setting in a neighborhood that is largely residential in appearance. The building's façade (west elevation) faces a concrete sidewalk. Adjacent to the north elevation is an asphalt paved lot partially surrounded by a wood privacy fence. Landscaping includes low shrubs, rocks and brick pavers at the southwest corner of the parking lot.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The property is a two-story brick building originally used for commercial purposes. The façade (west elevation) has a false front capped with concrete coping. The rear (east elevation) also rises above the roofline. Corners of the façade have a woven brick appearance, which is original. The lower façade holds a central recessed entry bay with a paneled replacement door (c. 2010). The bay is flanked by non-original c. 2010 fluted columns. Flanking the central recess are altered windows composed of lower glass block lights (possibly original) capped by paired c. 2010 one-over-one small windows. The lower façade is clad with synthetic siding (vinyl). The upper façade has original arched window bays with brick sills. These two bays are placed symmetrically and each holds a replacement c. 2010 one-over-one window with vinyl infill. The upper side elevations (north and south walls) have similar window configurations – original bays infilled with replacement windows. The aforementioned privacy fence (see #40, above) obscures a secondary entry on the lower elevation of the north wall. There is no fenestration on the lower level of the south elevation.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is located on the west side of N. Eighth Street within an urban residential neighborhood. The associated lot is covered with grass. Some areas are covered with dirt and gravel. A concrete sidewalk bounds the east end of the lot. A tree line bounds the north end of the lot. A dirt and gravel drive is situated at the south end of the property.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The single-story dwelling has a gable and wing plan. The front facing gable is situated at the north end of the dwelling. The house has an asphalt-shingled roof, exterior vinyl siding and a poured concrete foundation. The porch is off-center, created by the projecting gable wing on the north end. The porch is supported by original wrought iron columns. Within the porch bay is an off-center entry bay (north end) filled with an original door with an upper diamond light. Offsetting the entry on the south is a picture window. The window has original four-light side lights. The central fixed bay has been altered to hold paired one-over-one replacement lights. The front facing gable wall holds paired original two-over-two horizontal sash windows. At the central roofline ridge is an interior metal flue.

The dwelling is situated on a grass covered lot in a residential urban neighborhood. The house faces west, situated on the east side of N. Eighth Street. An outbuilding identified on the city's parcel maps is obscured by the dwelling (in the rear yard) and not accessible. A concrete sidewalk bounds the west end of the lot. A wood privacy fence bounds the south end of the lot. A concrete drive flanks the north end of the dwelling. The yard has mature trees. A concrete walk extending from the public walk along Eighth Street leads to the house. The private walk and concrete steps (west end) are flanked by original rusticated concrete block piers.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The 1.5-story frame dwelling has an asphalt shingled gabled and hipped roof, exterior vinyl siding and a foundation covered by vertical vinyl siding. A projecting gabled wing with an angled three-sided bay is situated at the north end of the façade. The three sided projection has a single window on each wall. Windows are one-over-one, covered with plastic. The bay is hipped and above the hip is a front facing gable with vertical vinyl siding. A small one-over-one window is in the gable field. The gable has returns. Offsetting the projecting bay on the south, the façade holds an original shed porch supported by replacement wood columns. A non-original (c. 2000) frame balustrade surrounds the porch and flanks the steps. Lattice (c. 2000) is set below the porch. The porch bay has an off-center entry bay (north end) filled with a replacement c. 1960 wood door with upper diamond light. The door is offset on the south by a one-over-one window. Above the porch is a hipped dormer with a one-over-one window. The south elevation has a projecting window bay similar to that on the façade. These windows are not covered with plastic. The north elevation has a covered (with plastic) one-over-one window and paired one-over-one windows. A single-story wing is situated on the rear (east) elevation.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The multi-family dwelling is situated on a grass covered lot within a residential urban neighborhood. The property is on the east side of N. Eighth Street. The house faces north. A wide gravel drive extends along the north end of the lot. A concrete public sidewalk flanks the west end of the lot (along Eighth Street). A mature tree is situated in the front (west) yard.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a high hipped asphalt shingled roof, exterior vinyl siding and a poured concrete foundation. The primary (north) elevation has a central wood stoop (c. 2000). Two doors are accessible via the stoop. The entry bays are filled with c. 1980 solid wood doors. Above the doors is a shared c. 1960 metal awning with metal brace supports. The doors are flanked by one-over-one c. 2000 replacement windows. Above the entries, the roofline supports a hipped dormer with a one-over-one replacement window. The east elevation has a shed one-story wing with no fenestration on the north elevation. The west elevation (facing N. Eighth Street) holds a single-story gabled original wing. The wing has angled corner walls, creating a five-sided projecting wing. The shorter beveled walls (two) each hold a small one-over-one replacement window. The west elevation has no other fenestration.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is situated on the west side of N. Eighth Street on a grass-covered lot. The setting is urban/residential. The lot includes a concrete and gravel drive that extends south of the dwelling. Concrete steps lead from the public sidewalk that spans the west side of Eighth Street. A concrete walk leads from the steps to the dwelling's façade. The rear lot supports mature trees.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling, constructed as a single-family property is currently a two-family residence. The dwelling has an asphalt-shingled front-gabled roof, exterior synthetic siding, enclosed eaves and a concrete foundation. Gables are pedimented and have upper triangular vents. A central brick chimney rises above the roofline. Centered between front and side gabled wings is a central tower with a belcast hipped roof. The primary elevation has a hipped single-story half-width porch supported by scored columns resting on brick piers. The porch has a c. 1990 frame balustrade. The primary entry is filled with a replacement c. 1990 replacement door with an upper fanlight. Windows are double-hung with faux shutters. The porch appears to have originally wrapped the façade but has been enclosed on the south end. The rear elevation supports frame steps leading to a second-floor entry.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is situated along the west side of N. Eighth Street in an urban/residential neighborhood. The lot is covered with grass and supports mature trees in the rear yard. A concrete public walk flanks the east end of the lot. Concrete steps and a walk lead to the central steps of the porch. A frame privacy fence surrounds part of the rear yard. An asphalt and gravel drive is situated north of the dwelling. Northwest of the dwelling is a frame shed with an attached carport. The carport has a low gable roof. The outbuilding/carport is not individually eligible for the National Register of Historic Places.

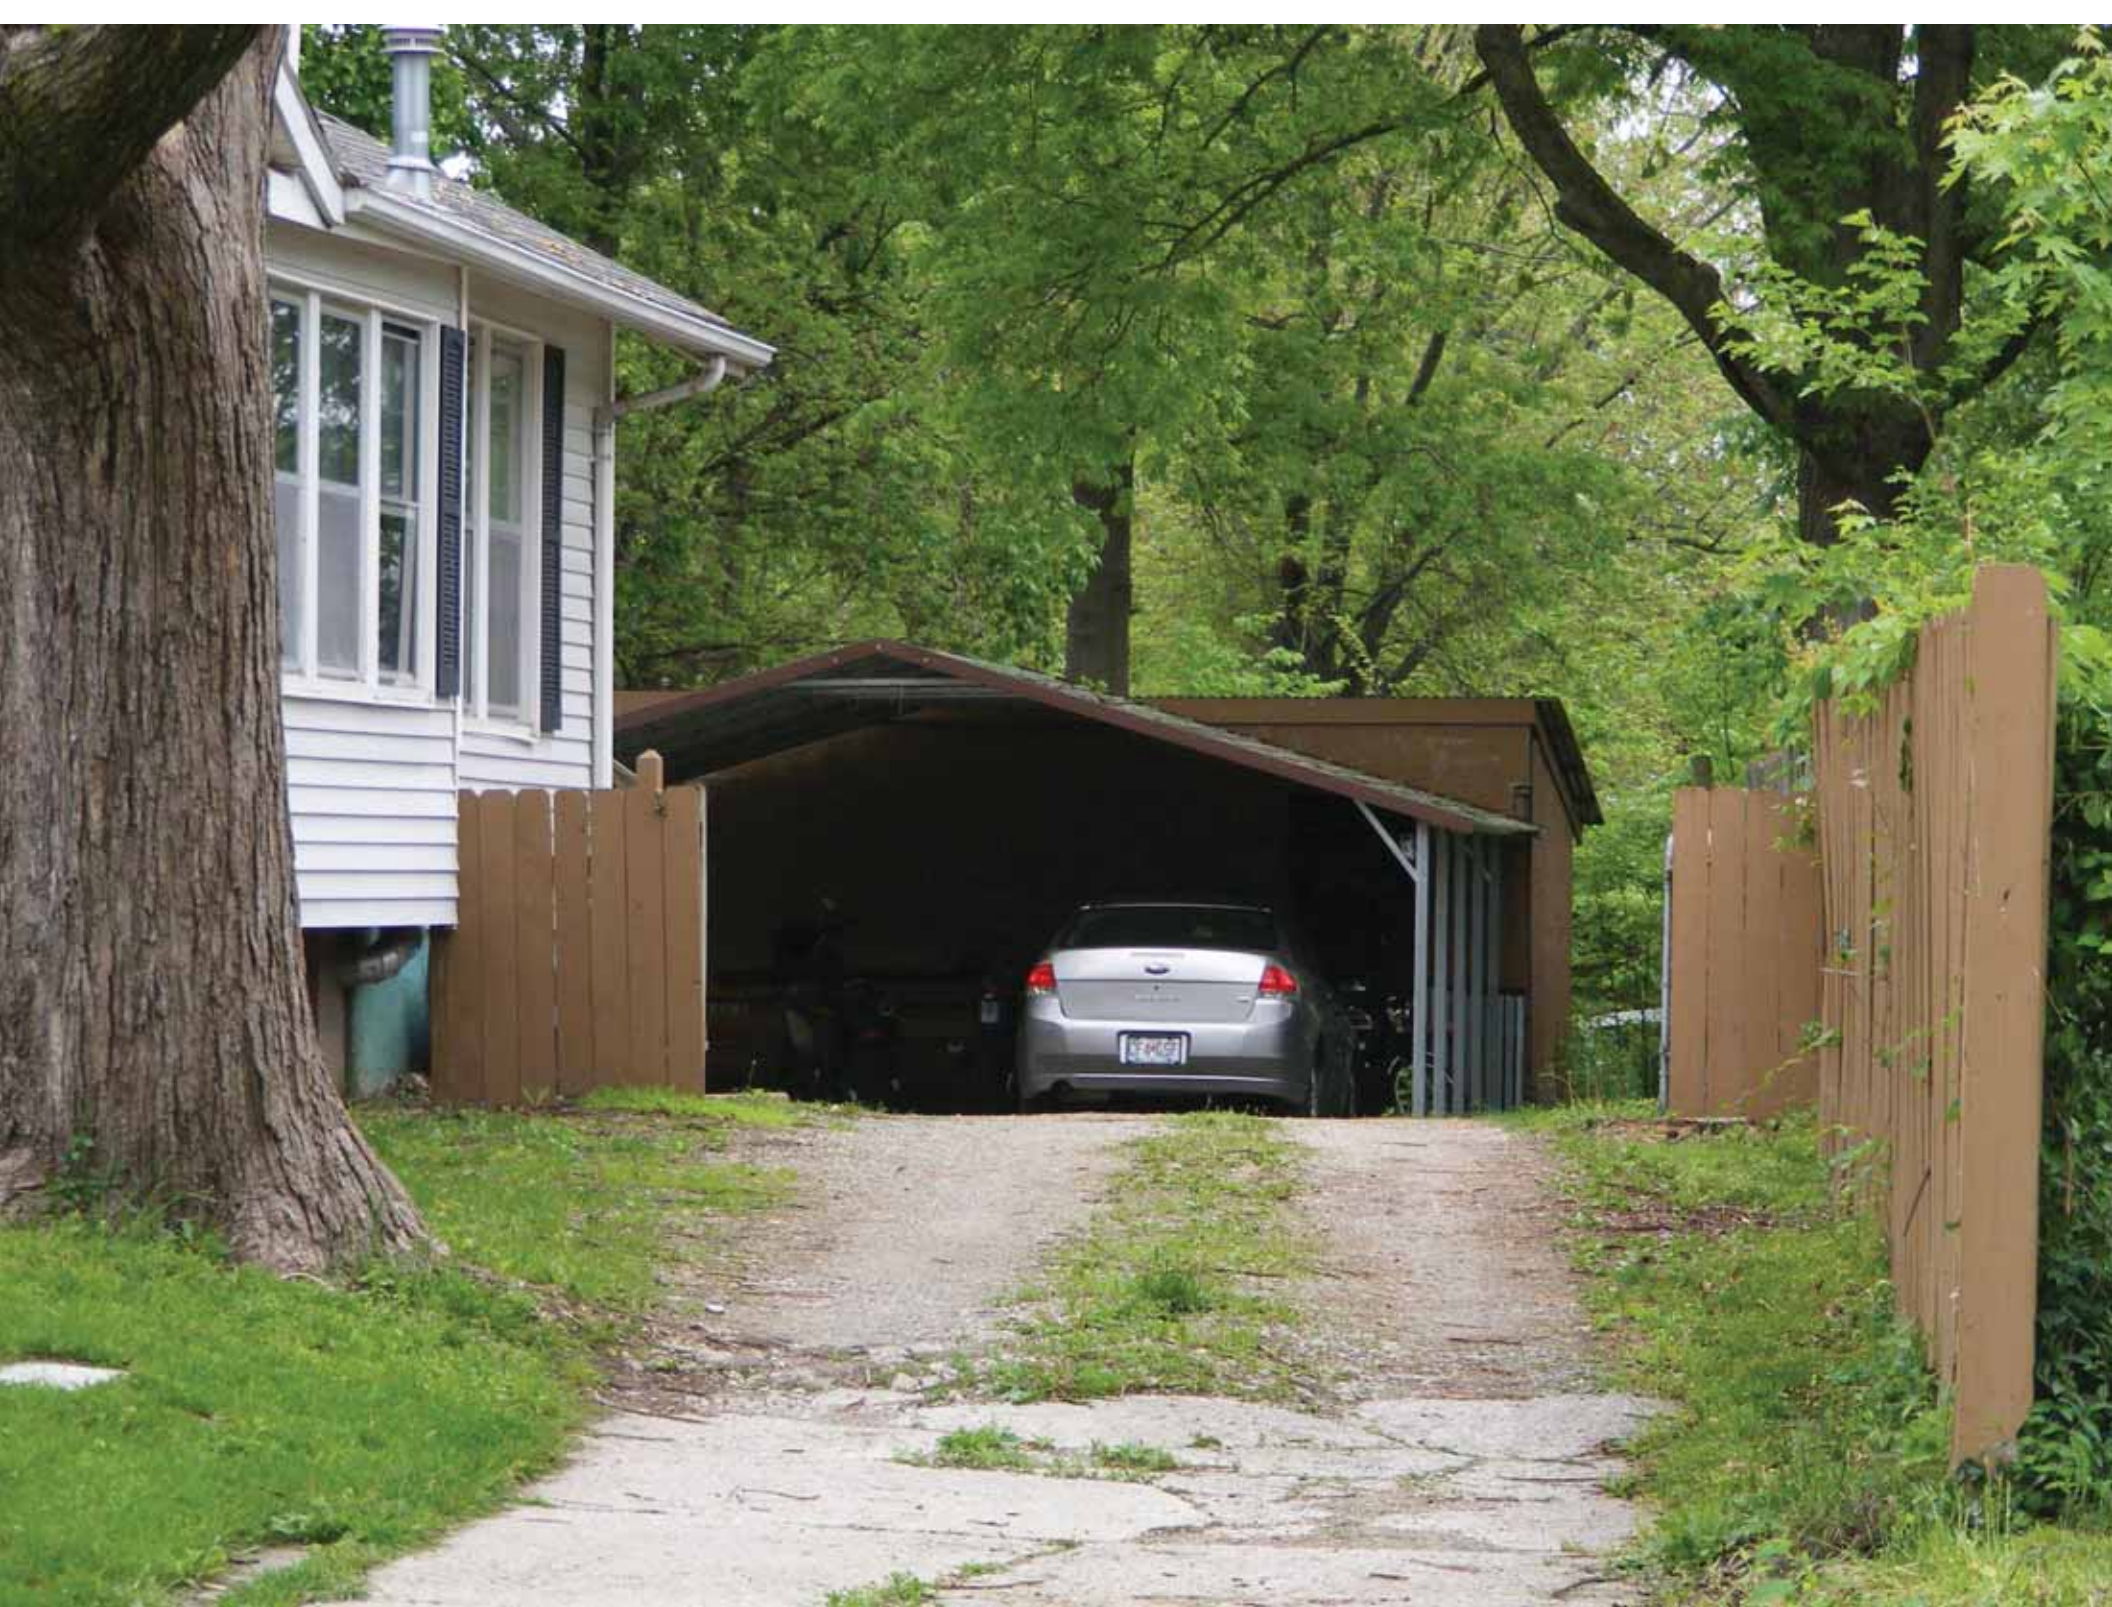

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The single-family dwelling at 903 N. Eighth Street has an asphalt-shingled end-gable roof, rear gabled wing (with small front hip) and full-width façade porch supported by tapered columns on brick piers. The porch is surrounded by an original concrete low wall that extends between the brick piers. The dwelling has exterior vinyl siding on all elevations except the façade which is covered with stucco. The entry is centered in the porch bay and holds an original Craftsman style six-light door. The entry bay is flanked by paired original six-over-one windows. Eaves are enclosed. At the north end of the dwelling is an exterior brick chimney. The dwelling appears to be identical in plan to 917 N. Eighth Street.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is situated in an urban residential neighborhood, along the east side of N. Eighth Street. The lot is covered with grass. Centered in front of the house on the lot is a wide gravel drive. A concrete public walk extends on either side of the drive along the east side of the street. The lot is otherwise grass covered and supports mature trees. A gambrel roof outbuilding (of recent construction) is situated at the rear of the dwelling. This outbuilding is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling is a two-story dwelling with an asphalt-shingled gable roof, exterior vinyl siding and a covered foundation. The dwelling has a single-story hipped wrap-around porch supported by square wood columns. The elevation facing Eighth Street (west) holds a single door with an upper light offset by a small one-over-one window. Remaining windows are of similar configuration. There is a second entry on the south elevation, within the wrap-around porch.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is situated on the west side of N. Eighth Street in an urban residential neighborhood. The lot is covered with grass and partially surrounded by a low retaining limestone wall (south end). A concrete sidewalk flanks the east end of the lot. Concrete steps lead to the lot from the walk but there is no walk leading from the steps to the front porch. Fairview Avenue and a public sidewalk bound the lot on the north end. Situated in the rear yard is a c. 2000 prefabricated wood outbuilding with a metal gambrel roof. The outbuilding is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The single-family dwelling at 903 N. Eighth Street has an asphalt-shingled end-gable roof, rear gabled wing (with front small hip) and full-width façade porch supported by tapered columns on stucco clad piers. The porch is also supported on the north end by frame square wood columns. The porch is surrounded by an original concrete low wall that extends between the piers. The dwelling has exterior stucco on all elevations. The entry is centered in the porch bay and holds an original Craftsman style three-light door. The entry bay is flanked by paired original three-over-one windows. Other windows are of three- and four-over-one configuration. Eaves have knee brace brackets below the roofline overhang. At the north end of the dwelling is an exterior brick chimney. There is a second interior brick chimney in the rear gabled wing. The dwelling appears to be identical in plan to 913 N. Eighth Street.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is situated on the east side of N. Eighth Street in an urban residential neighborhood. The associated lot is grass covered and supports mature large trees. A public concrete sidewalk bounds the west end of the lot. A secondary sidewalk extends from the street/public walk to the front porch. Shrubs line the north and south ends of the lot. A gravel driveway extends from the street along the south end of the house. Based on city mapping, the parcel has a rear outbuilding, which was not accessible during the survey. This outbuilding is unlikely to be individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front single-family dwelling has an asphalt-shingled roof, exterior asbestos shingle siding and a concrete foundation. The primary (east) elevation has been altered with enclosure of the south end of the primary open porch, which is supported by two square wood columns. A two-light sliding window is set within the east elevation of the enclosed area and the primary entry is on the north elevation of the enclosed porch. The original elevation within the porch bay holds an original six-over-one window. The porch has a non-original frame balustrade. The front facing gable holds paired one-over-one windows. Most windows are of this configuration. An exterior end brick chimney on the north elevation has been removed above the roofline.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is on a grass covered lot in a residential urban neighborhood. A public concrete walk flanks the west end of the lot. From this walk, in the center of the lot, is a concrete sidewalk that leads toward the house and splits at the east end, leading to open porches on the north and south ends of the façade. Trees in the front yard have been cut and stumps remain on either side of the central walk. Small shrubs flank the private walk on the west end. A gravel drive extends from the street along the north end of the dwelling. The rear yard supports mature trees.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a steeply pitched hipped roof clad with asphalt shingles, exterior asbestos siding (lower floor) and vinyl clad hipped dormers. The foundation is stone. At the center of the façade is an original projecting one-story gabled wing with gable returns. The gable field holds a louvered vent. The three walls of the projecting wing each hold a single double-hung (one-over-one) window. Flanking the central projecting bay, the façade features small shed porches on either side (north and south). Each small porch is supported by a single wrought iron replacement column. Within the porch bays are single-light original (north) and six-light (replacement) doors. The doors are each offset by a single window (1/1). Hipped dormers are situated on all elevations. Each dormer holds a one-over-one window. Two interior chimneys on the rear roofline are sheathed with concrete. The rear roofline is shed.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is situated on a corner lot at the northwest intersection of Fairview Avenue and N. Eighth Street. The dwelling faces east toward N. Eighth Street and is sited on a grass-covered lot in an urban residential neighborhood. The rear lot supports mature trees. Low foliage flanks the south elevation facing Fairview Avenue. Two small trees are in the front yard, as is a shrub. Public sidewalks flank the east and south ends of the lot. A private walk extends from the public sidewalk to the porch steps. Southwest of the dwelling (access via Fairview Avenue) is a concrete parking pad.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The two-story dwelling has a steeply pitched front gable roof clad with asphalt shingles. The dwelling has exterior vinyl siding and a concrete foundation. The primary (east) elevation has a single-story hipped three-quarters width porch supported by wood columns. A high enclosed balustrade clad with vinyl siding surrounds the porch. Porch steps are off center on the north end and have frame handrails. Within the porch bay is a single door offset by a tripartite window. The bay has a central wide two-light window flanked by slender two-sash lights that appear to be double-hung. Some windows are original one-over-one; others are replacement such as an upper story sliding window on the south elevation and upper Palladian window above the porch. Fenestration bays are original. Shed dormers are situated on the roofline slopes of the north and south elevations. The dwelling has a rear deck (contemporary) and central interior brick chimney. This dwelling appears identical in plan to the house at 1003 N. Eighth Street.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is within an urban residential neighborhood on a grass covered lot along the west side of N. Eighth Street. Flanking the east end of the lot is a concrete public sidewalk. A gravel drive extends from the street to the property on the south end of the dwelling. A secondary concrete walk leads from the public walk to the house. The lot has mature trees in the rear yard. A frame fence partially surrounds the rear yard. In the rear yard is a small gable-front plan outbuilding. The outbuilding is partially obscured. The building is clad with weatherboard or vinyl siding and is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The property is a two-story dwelling with a steeply pitched front gable roof clad with asphalt shingles. The dwelling has exterior vinyl siding and a concrete foundation. The primary (east) elevation has a single-story hipped three-quarters width porch supported by original tapered Tuscan columns resting on a solid balustrade clad with vinyl siding. Concrete porch steps are off center on the north end. Within the porch bay is a single replacement door with an upper fanlight. The door is offset by a tripartite window. The bay has a central original wide two-light window flanked by slender fixed single-light replacement windows. Most windows are original, including the large Palladian style window above the porch. Fenestration bays are original. Shed dormers are situated on the roofline slopes of the north and south elevations. The dwelling appears identical in plan to the house at 1001 N. Eighth Street.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is a vacant lot situated in an urban residential neighborhood. The lot is covered with grass. At the rear southeast corner of the lot is a mature tree. A frame privacy fence bounds the east end of the lot. The remaining lot is partially surrounded by a makeshift fence composed of wood posts and plastic. A public concrete sidewalk flanks the west end of the lot. The property is located on the east side of N. Eighth Street.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This 0.2-acre vacant lot held a single-family dwelling previously (per Sanborn Fire Insurance Maps, 1925 and 1948). The lot is as above, covered with grass and partially surrounded by a temporary wood and plastic fence. There are no buildings on the lot.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

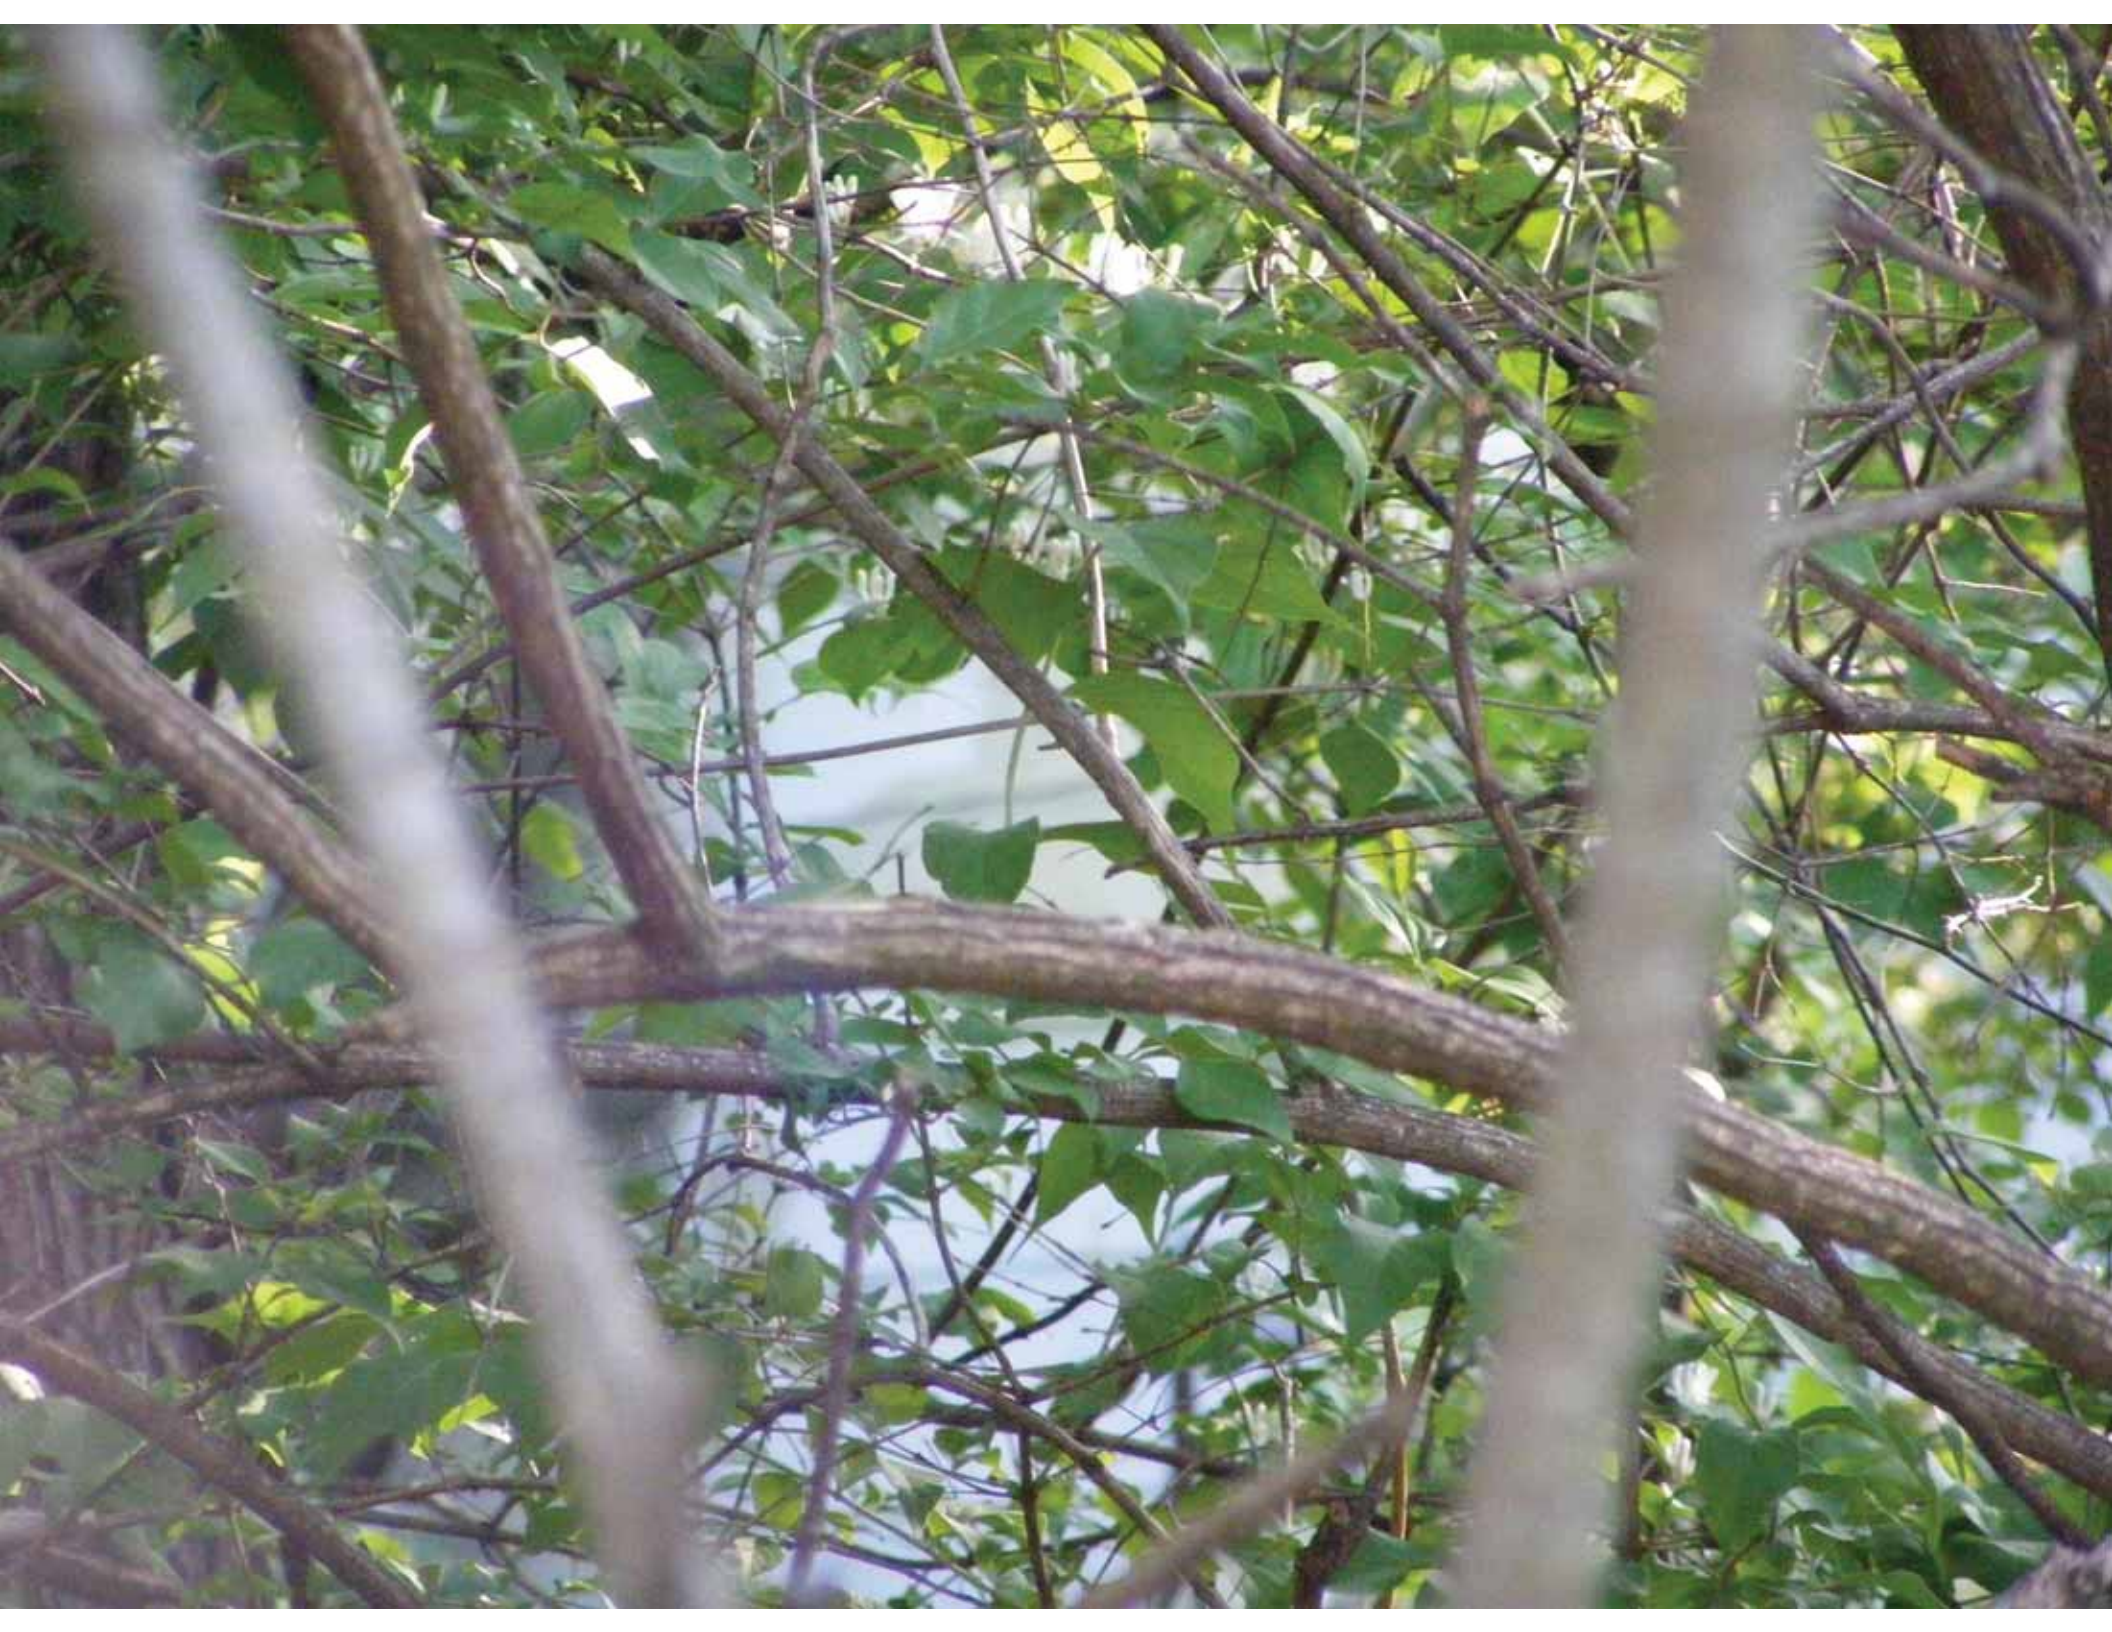

The property is located on the west side of N. Eighth Street in an urban residential neighborhood. The lot is surrounded by a chain link fence and inaccessible. The lot is obscured by heavy foliage. The yard is covered with grass and supports mature trees. A central private sidewalk leads west to the house from the public walk flanking the east end of the lot. A gravel drive extends west from the street and flanks the south end of the property.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

Information is limited due to the fact that the property is obscured by heavy foliage. The dwelling has an asphalt-shingled cross-gable plan roof, exterior asbestos shingle siding and what appear to be original one-over-one windows. The single-story hipped porch is half-width on the façade, extending from the south elevation of the projecting gabled wing. Windows are situated on the front facing gable wing (1) and offsetting the primary entry bay within the porch (1).

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property features a dwelling on a grass covered residential lot in an urban area. The lot supports mature trees in the front, side and rear yards. A gravel drive bounds the south end of the parcel. The property is on the east side of N. Eighth Street. A concrete public sidewalk bounds the west end of the lot. Remnants of a concrete private walk remain at the west end of the lot near the public sidewalk. Situated at the east end of the gravel drive is a gable-front plan garage with an overhead track (c. 2000) door. The garage is clad with asbestos shingles and not individually eligible for the National Register of Historic Places.

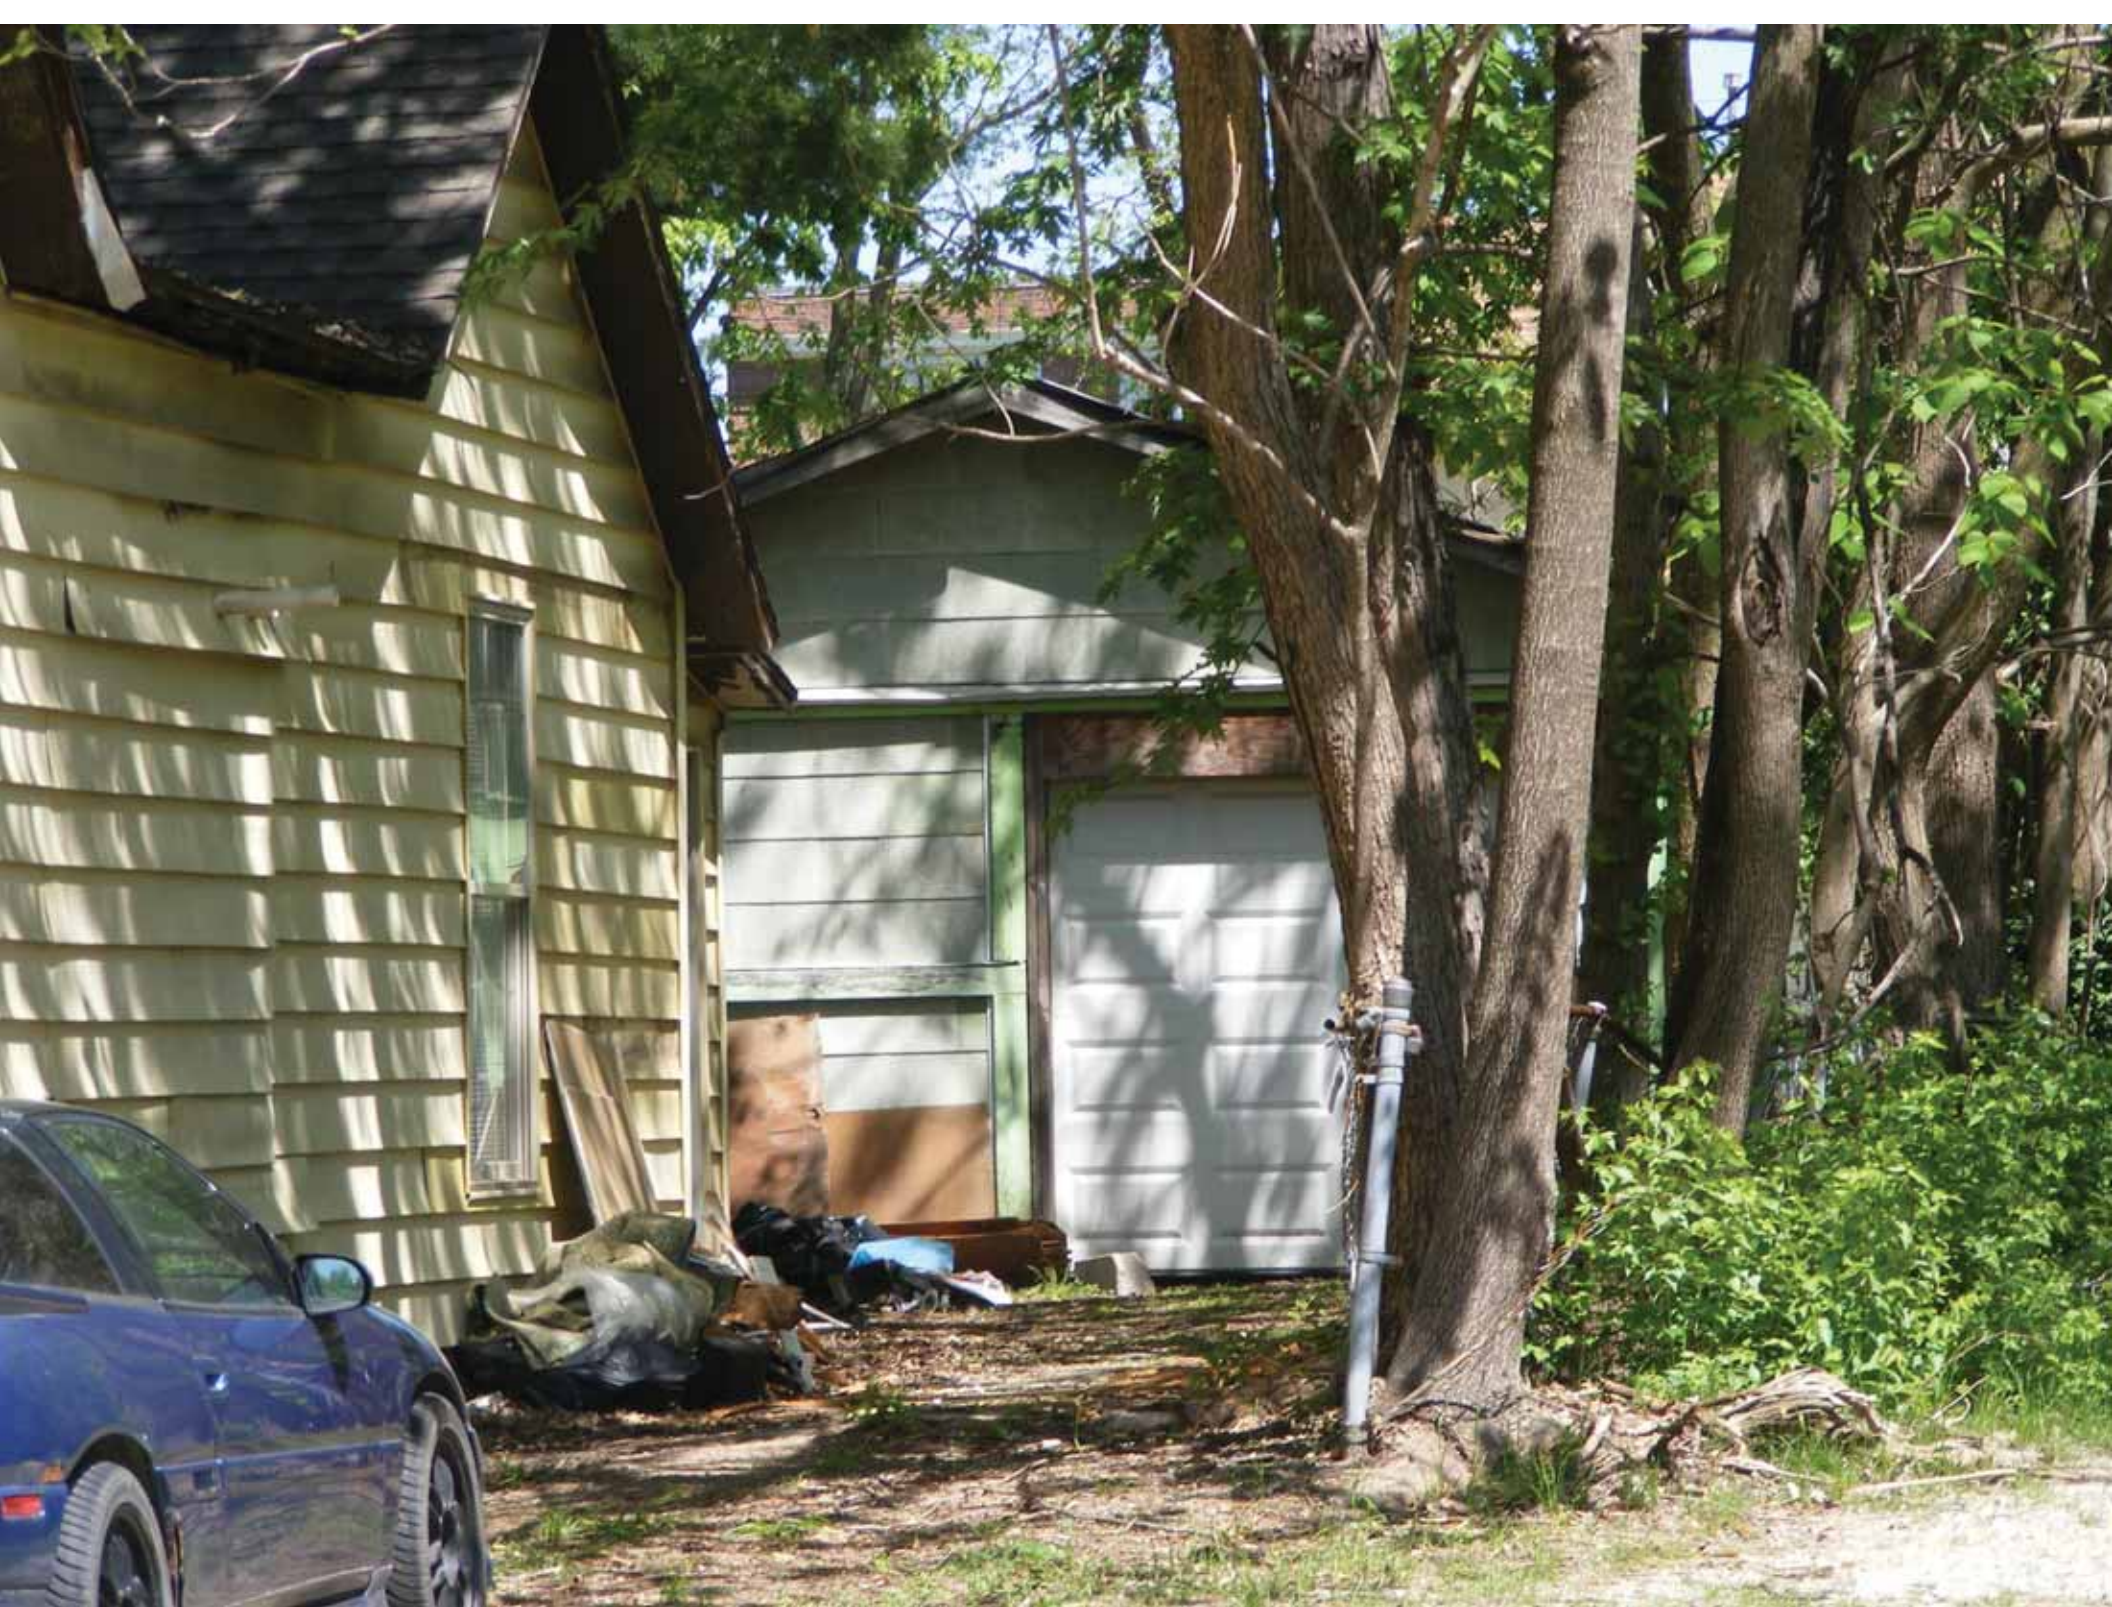

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The single-story dwelling has an asphalt-shingled gable roof, exterior synthetic siding and a concrete foundation. The dwelling is composed of a front facing gable wing and two rear cross gable wings. The primary (west) elevation supports a half-width shed porch created by the cross-gabled plan. The porch is supported by square wood columns and has concrete steps with wrought iron handrails. Within the porch bay are two single doors – one facing south and one facing west. Windows are one-over-one on the façade. Some side elevation windows retain original two-light upper and/or lower sashes. One side elevation window (south) retains a nine-over-nine window that appears original.

The property is situated on a grass covered lot on the east side of N. Eighth Street. The lot has no trees in the front yard but supports mature foliage in the rear yard. A concrete public walk flanks the west end of the parcel. The property has a concrete drive extending from the street on the south end of the parcel. A gable-front outbuilding is situated east of the dwelling. The c. 1996 outbuilding has vinyl siding and is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling is a gable-front plan with an asphalt-shingled roof, exterior vinyl siding and a concrete foundation. The front gable is filled with scalloped siding. This latter feature is also within the gable field of the portico, which is supported by slender wood columns. The portico is slightly off-center and has a frame balustrade. Within the bay of the small porch is a solid paneled door. Flanking the door are paired and single six-over-six windows.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

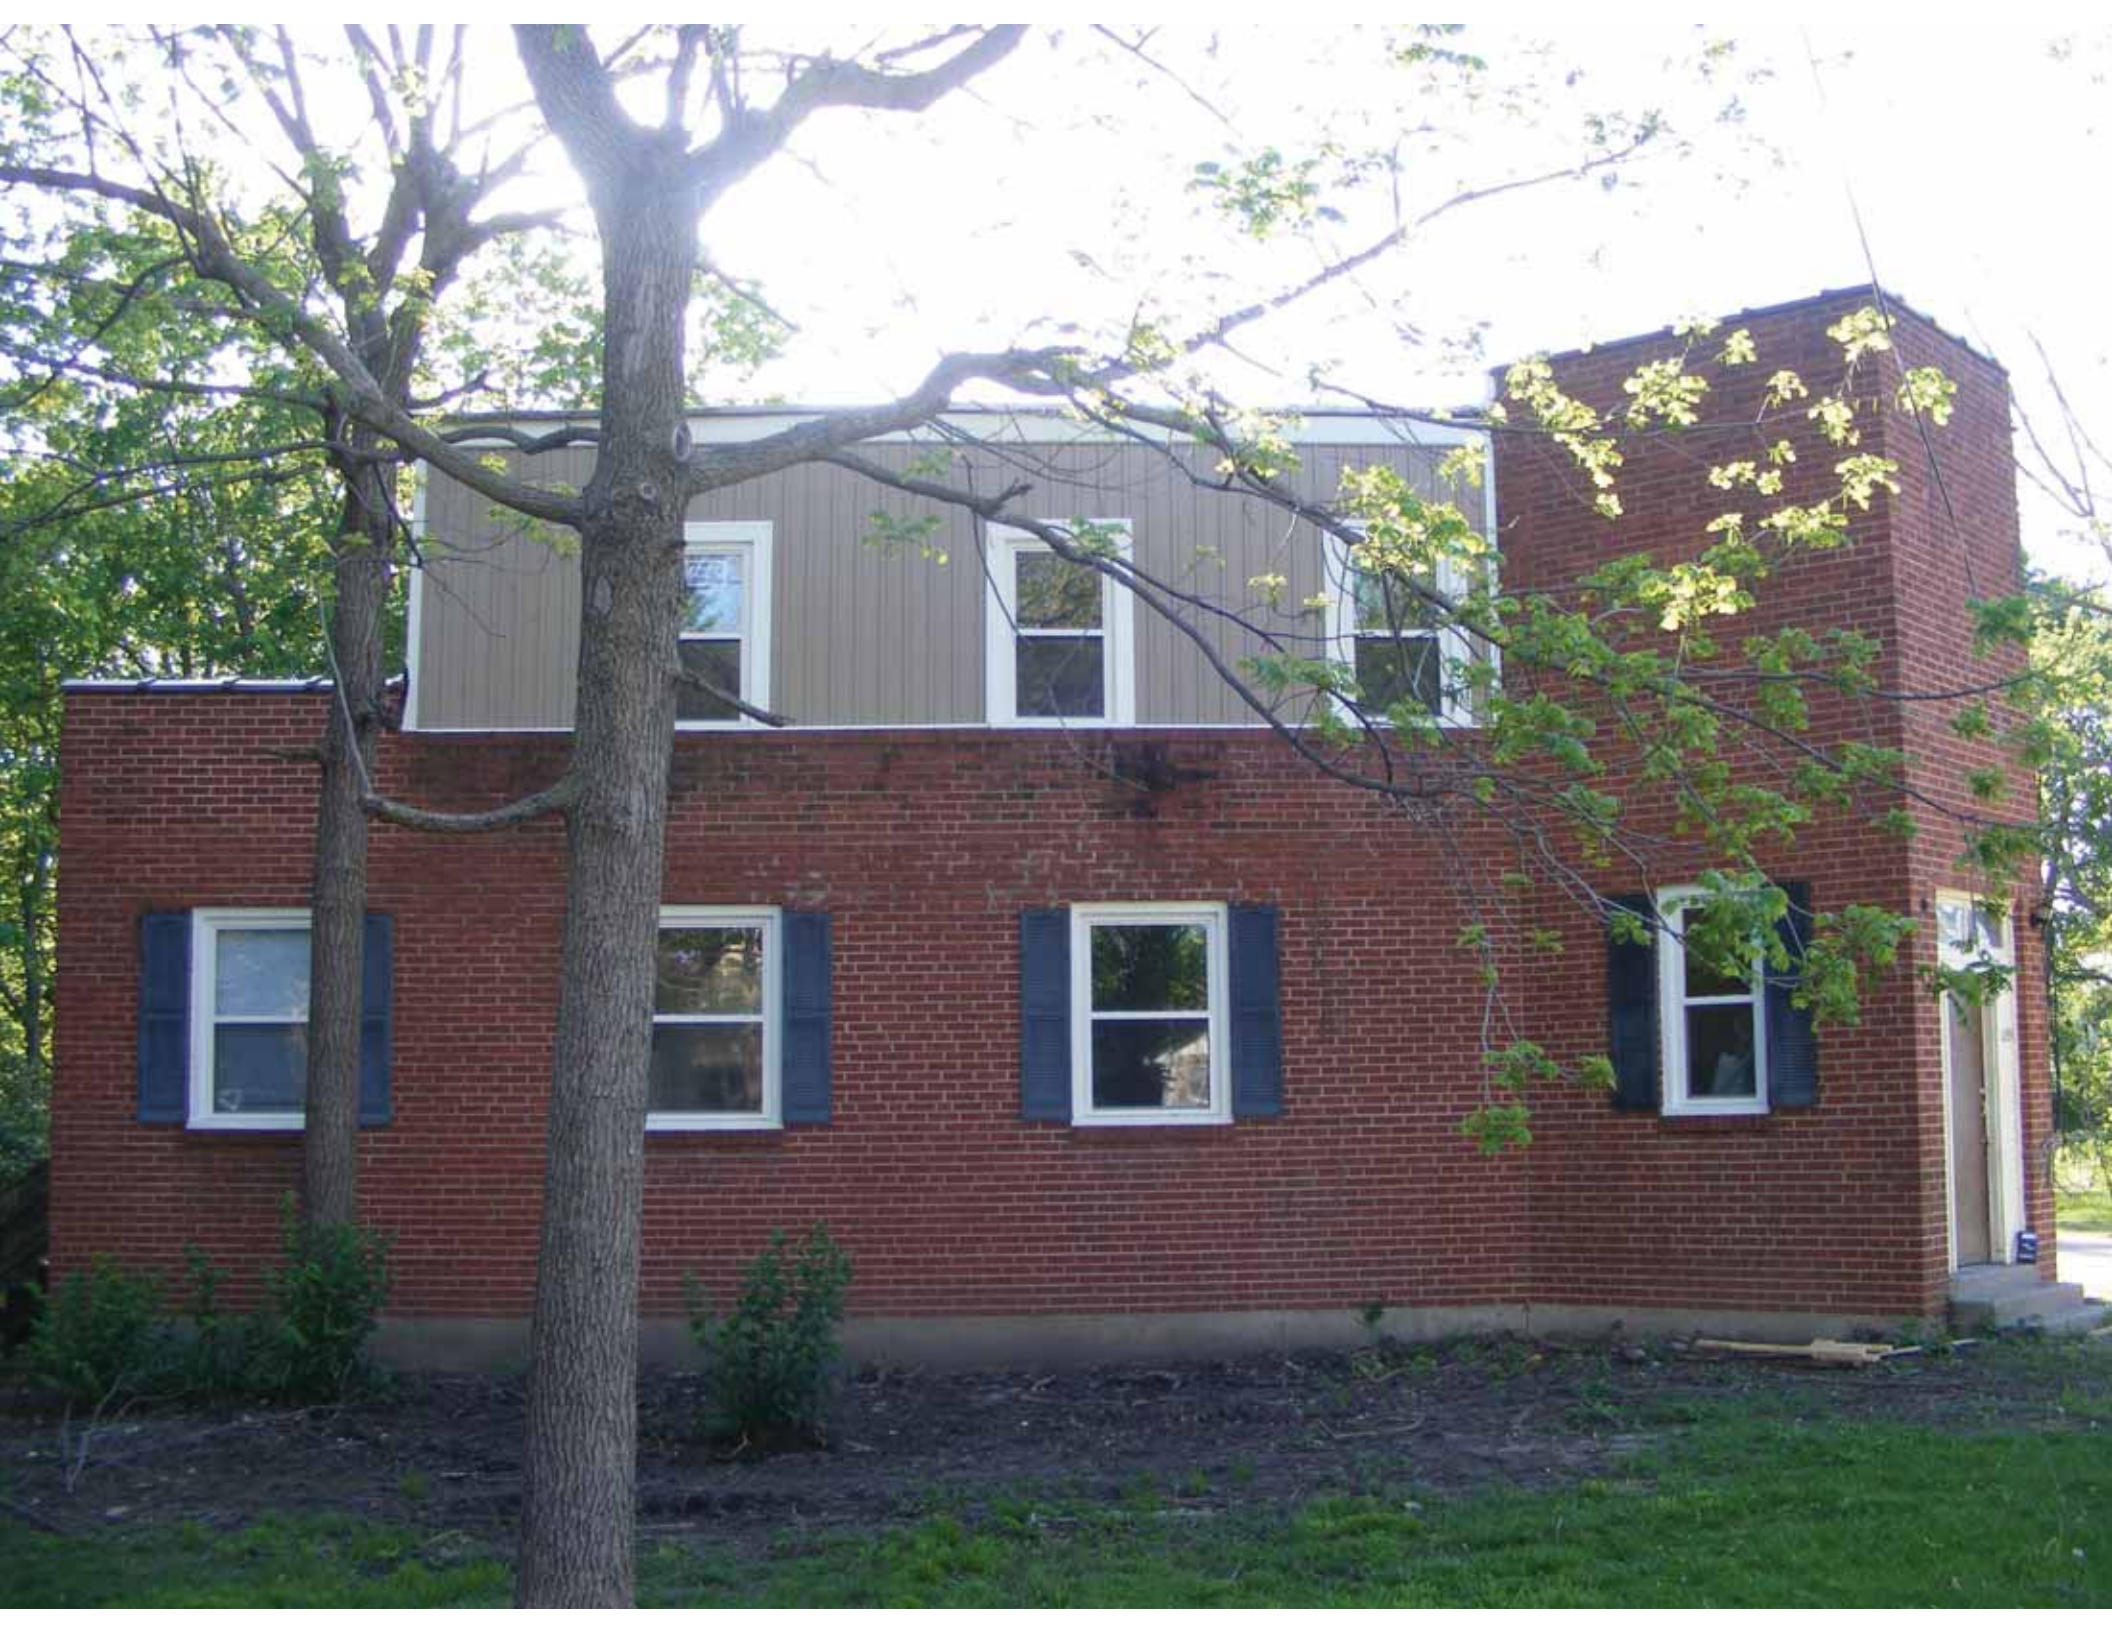

The property is situated on the west side of N. Eighth Street within a residential neighborhood. The lot is covered with grass. The rear yard supports mature trees. A wide gravel drive flanks the north side of the building, leading to a rear gravel parking lot. A public concrete walk flanks the east end of the lot. A partial concrete private walk remains, leading from the drive to the concrete steps at the building's northeast corner entry bay.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This multi-family building has been extensively altered since construction c. 1920. Sanborn maps show a single-family dwelling (1925, 1931, and 1948). The rear (west) end of the building (based on realtor's records) supports a wing that illustrates a single-family c. 1920 dwelling with a high hipped roof and rear shed porch (see image below). The bulk of the building is two stories in height with a flat roof. Most of the two-story elevations are clad with vinyl with exception of the façade, which has brick surrounding the corner entry (northeast bay) and first-story east elevation. Windows are replacement one-over-one. The entry bay is angled and holds a contemporary solid paneled door. Above the door is a two-light transom. The brick portions of the east elevation have terra cotta coping.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

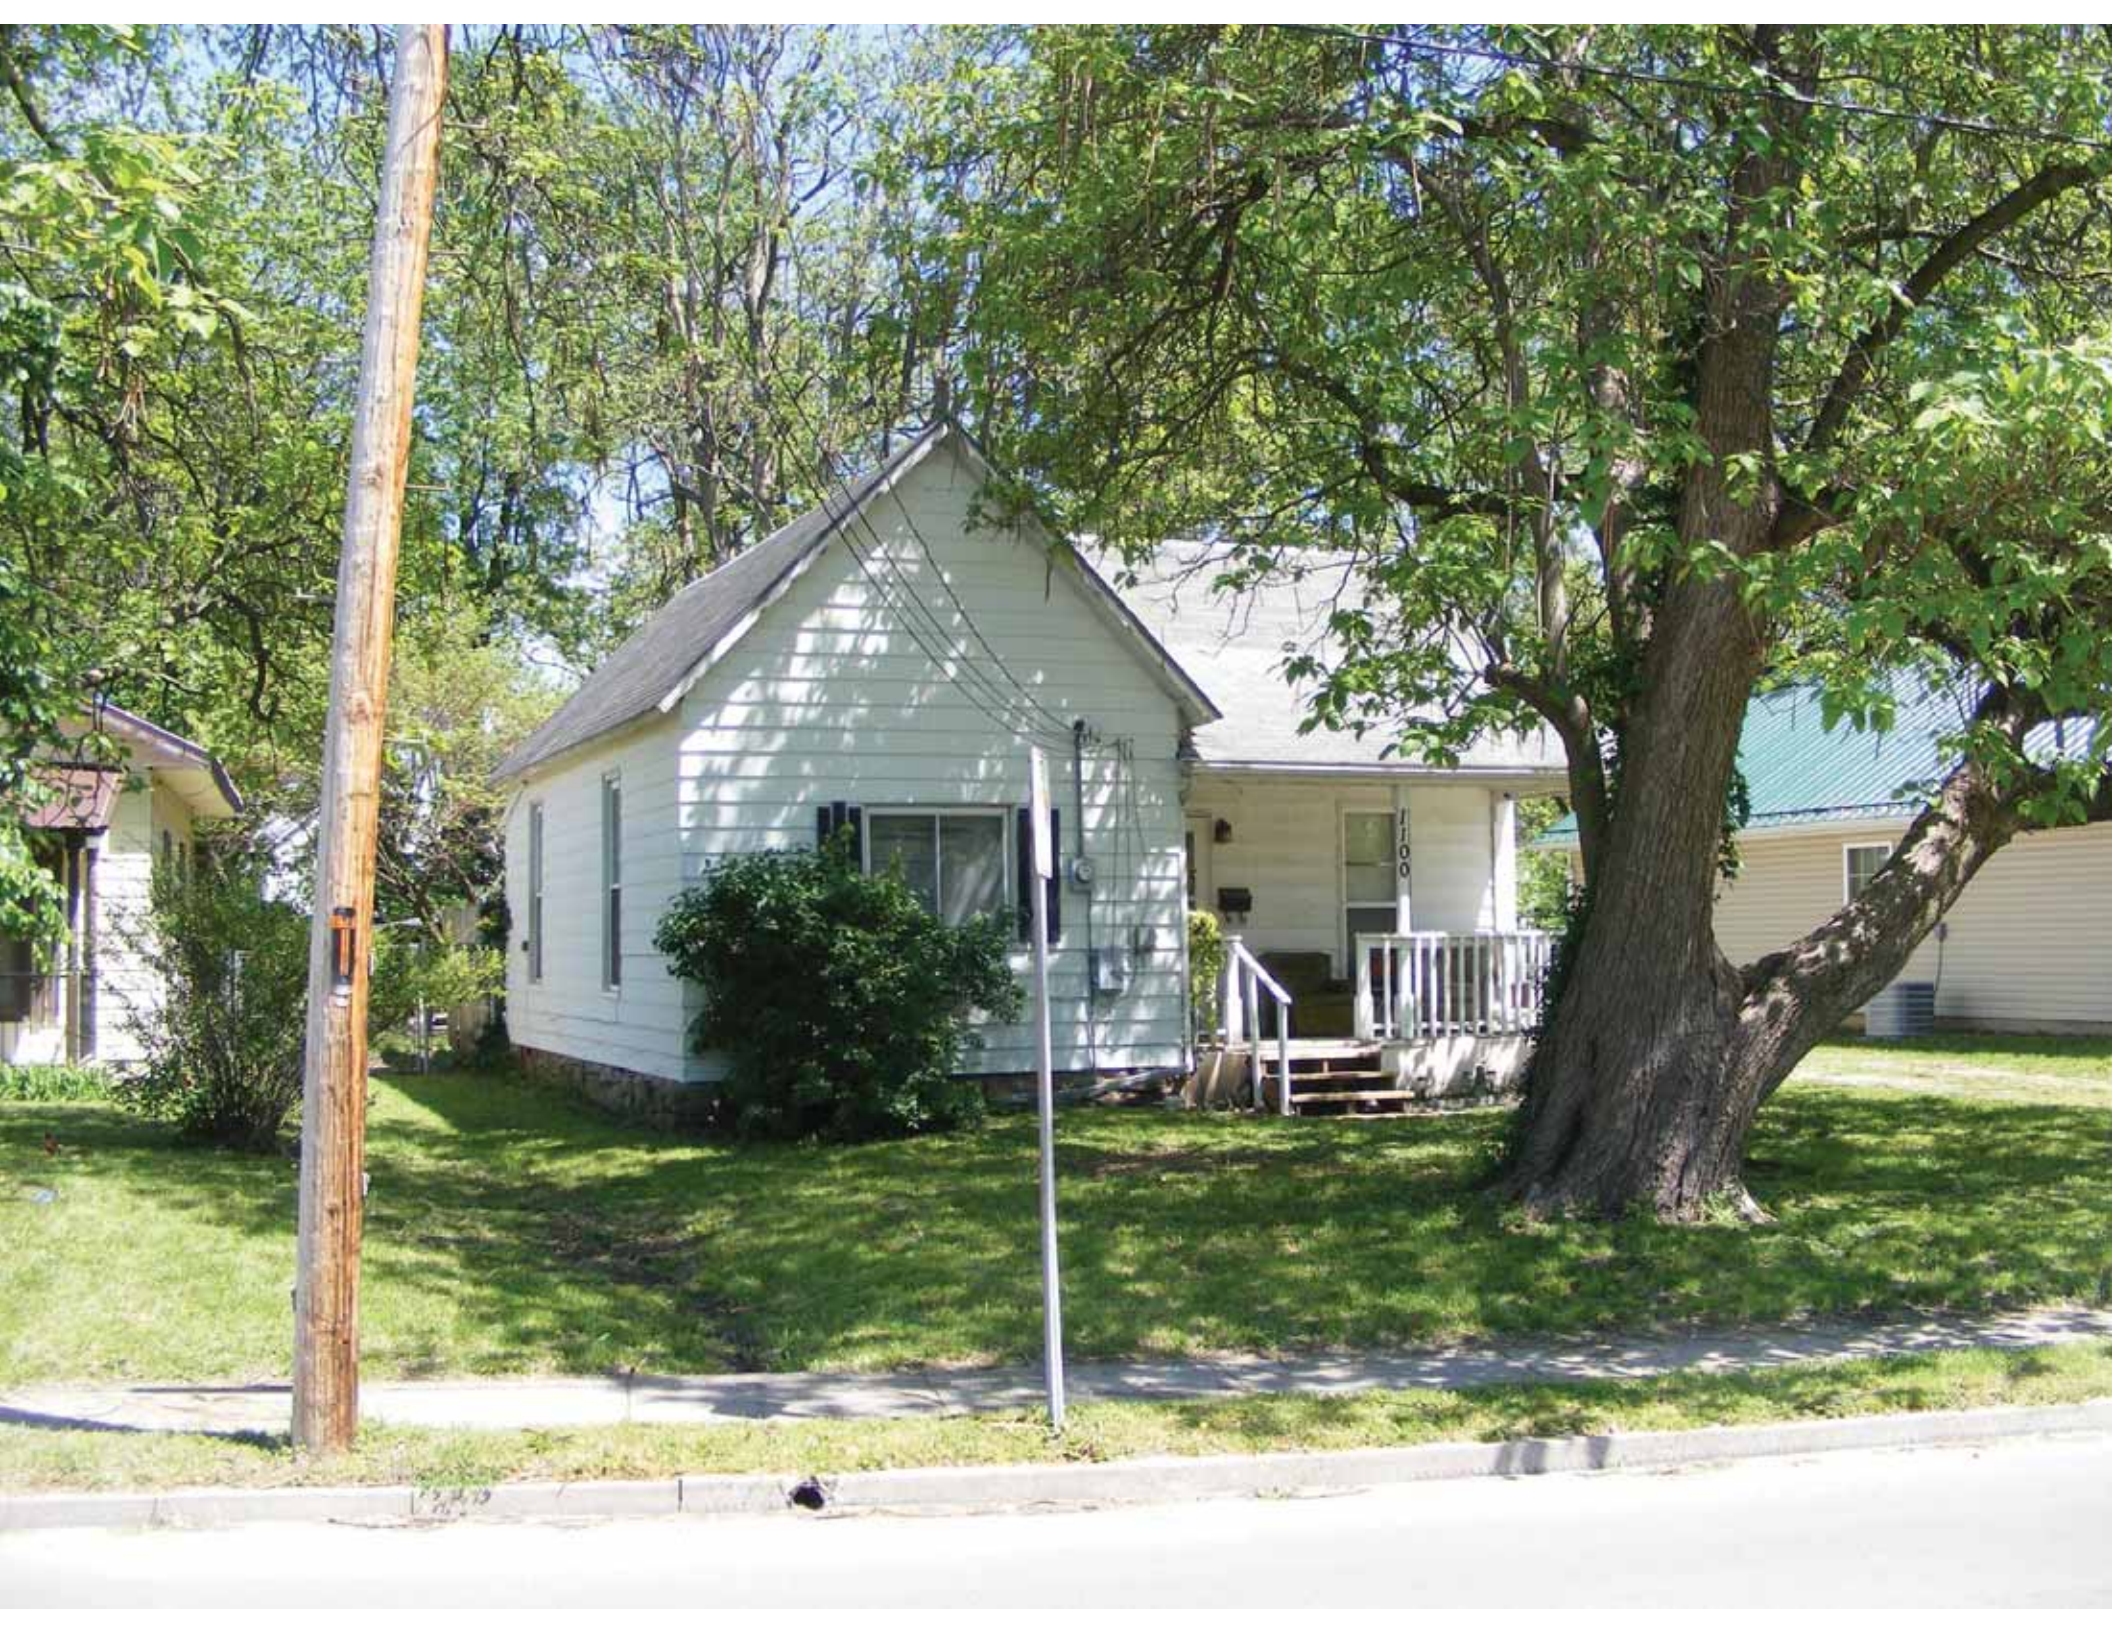

The property is situated in an urban residential neighborhood. The parcel is on the east side of N. Eighth Street. The yard is covered with grass and supports mature trees in the front and rear yards. A gravel drive extends from the street, flanking the south end of the dwelling. A public concrete sidewalk extends along the west end of the lot. Southeast of the dwelling is a gable-front plan garage with an overhead track door and exterior vinyl siding. The recently altered outbuilding does not appear individually eligible for the National Register of Historic Places.

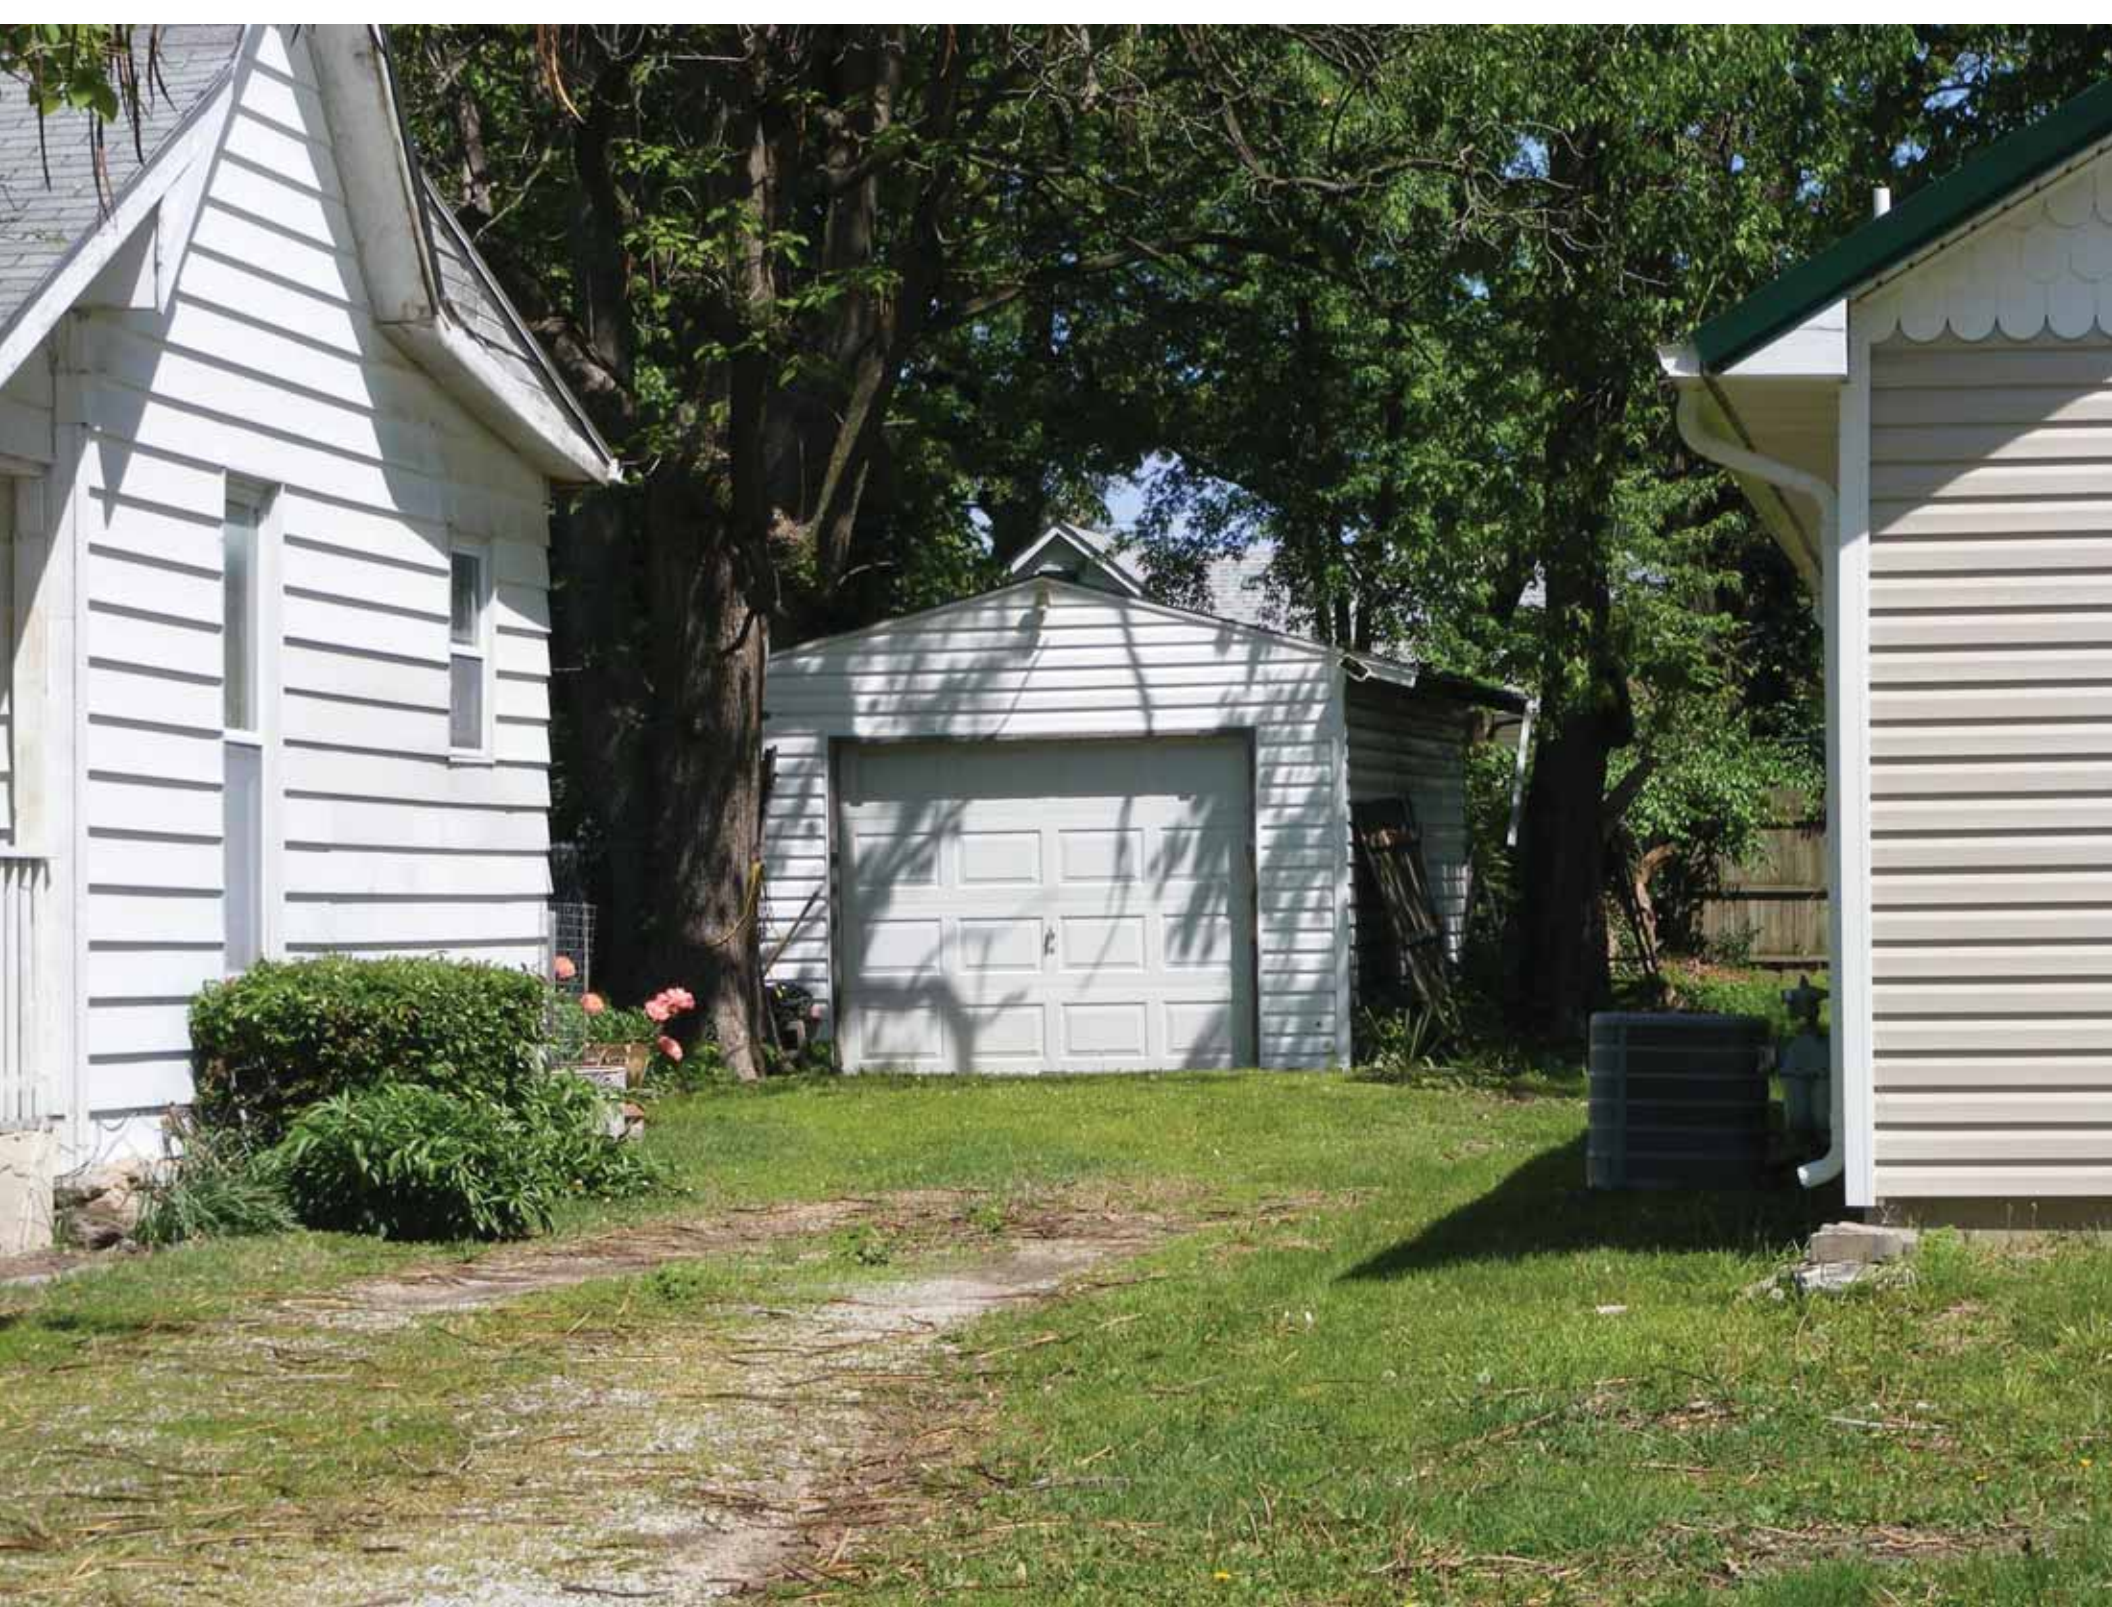

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The single-story dwelling has an asphalt-shingled gable roof, exterior synthetic siding and a concrete foundation. The primary (west) elevation has a shed porch supported by chamfered columns. The porch is surrounded by a frame balustrade. Wood non-original steps lead to the porch from the yard. The front elevation (north of the porch) holds a replacement two-by-two sliding window with faux shutters. Remaining windows appear to be original one-over-one and are void of shutters. The primary entry is within the porch bay, filled with a paneled door with two upper lights. The door is offset by a one-over-one window.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is situated on the east side of N. Eighth Street in an urban residential neighborhood. The lot is covered with grass. The front yard features mature shrubs and a tree. The rear yard has mature trees. A concrete walk leads to the front porch from the public sidewalk flanking the west end of the parcel. A chain link gate and fence are noted in the rear yard at the south end of the dwelling. Situated northeast of the dwelling is a gable-front plan board garage. The garage has paired off-center original hinged doors with bracing. The garage is not individually eligible for the National Register of Historic Places.

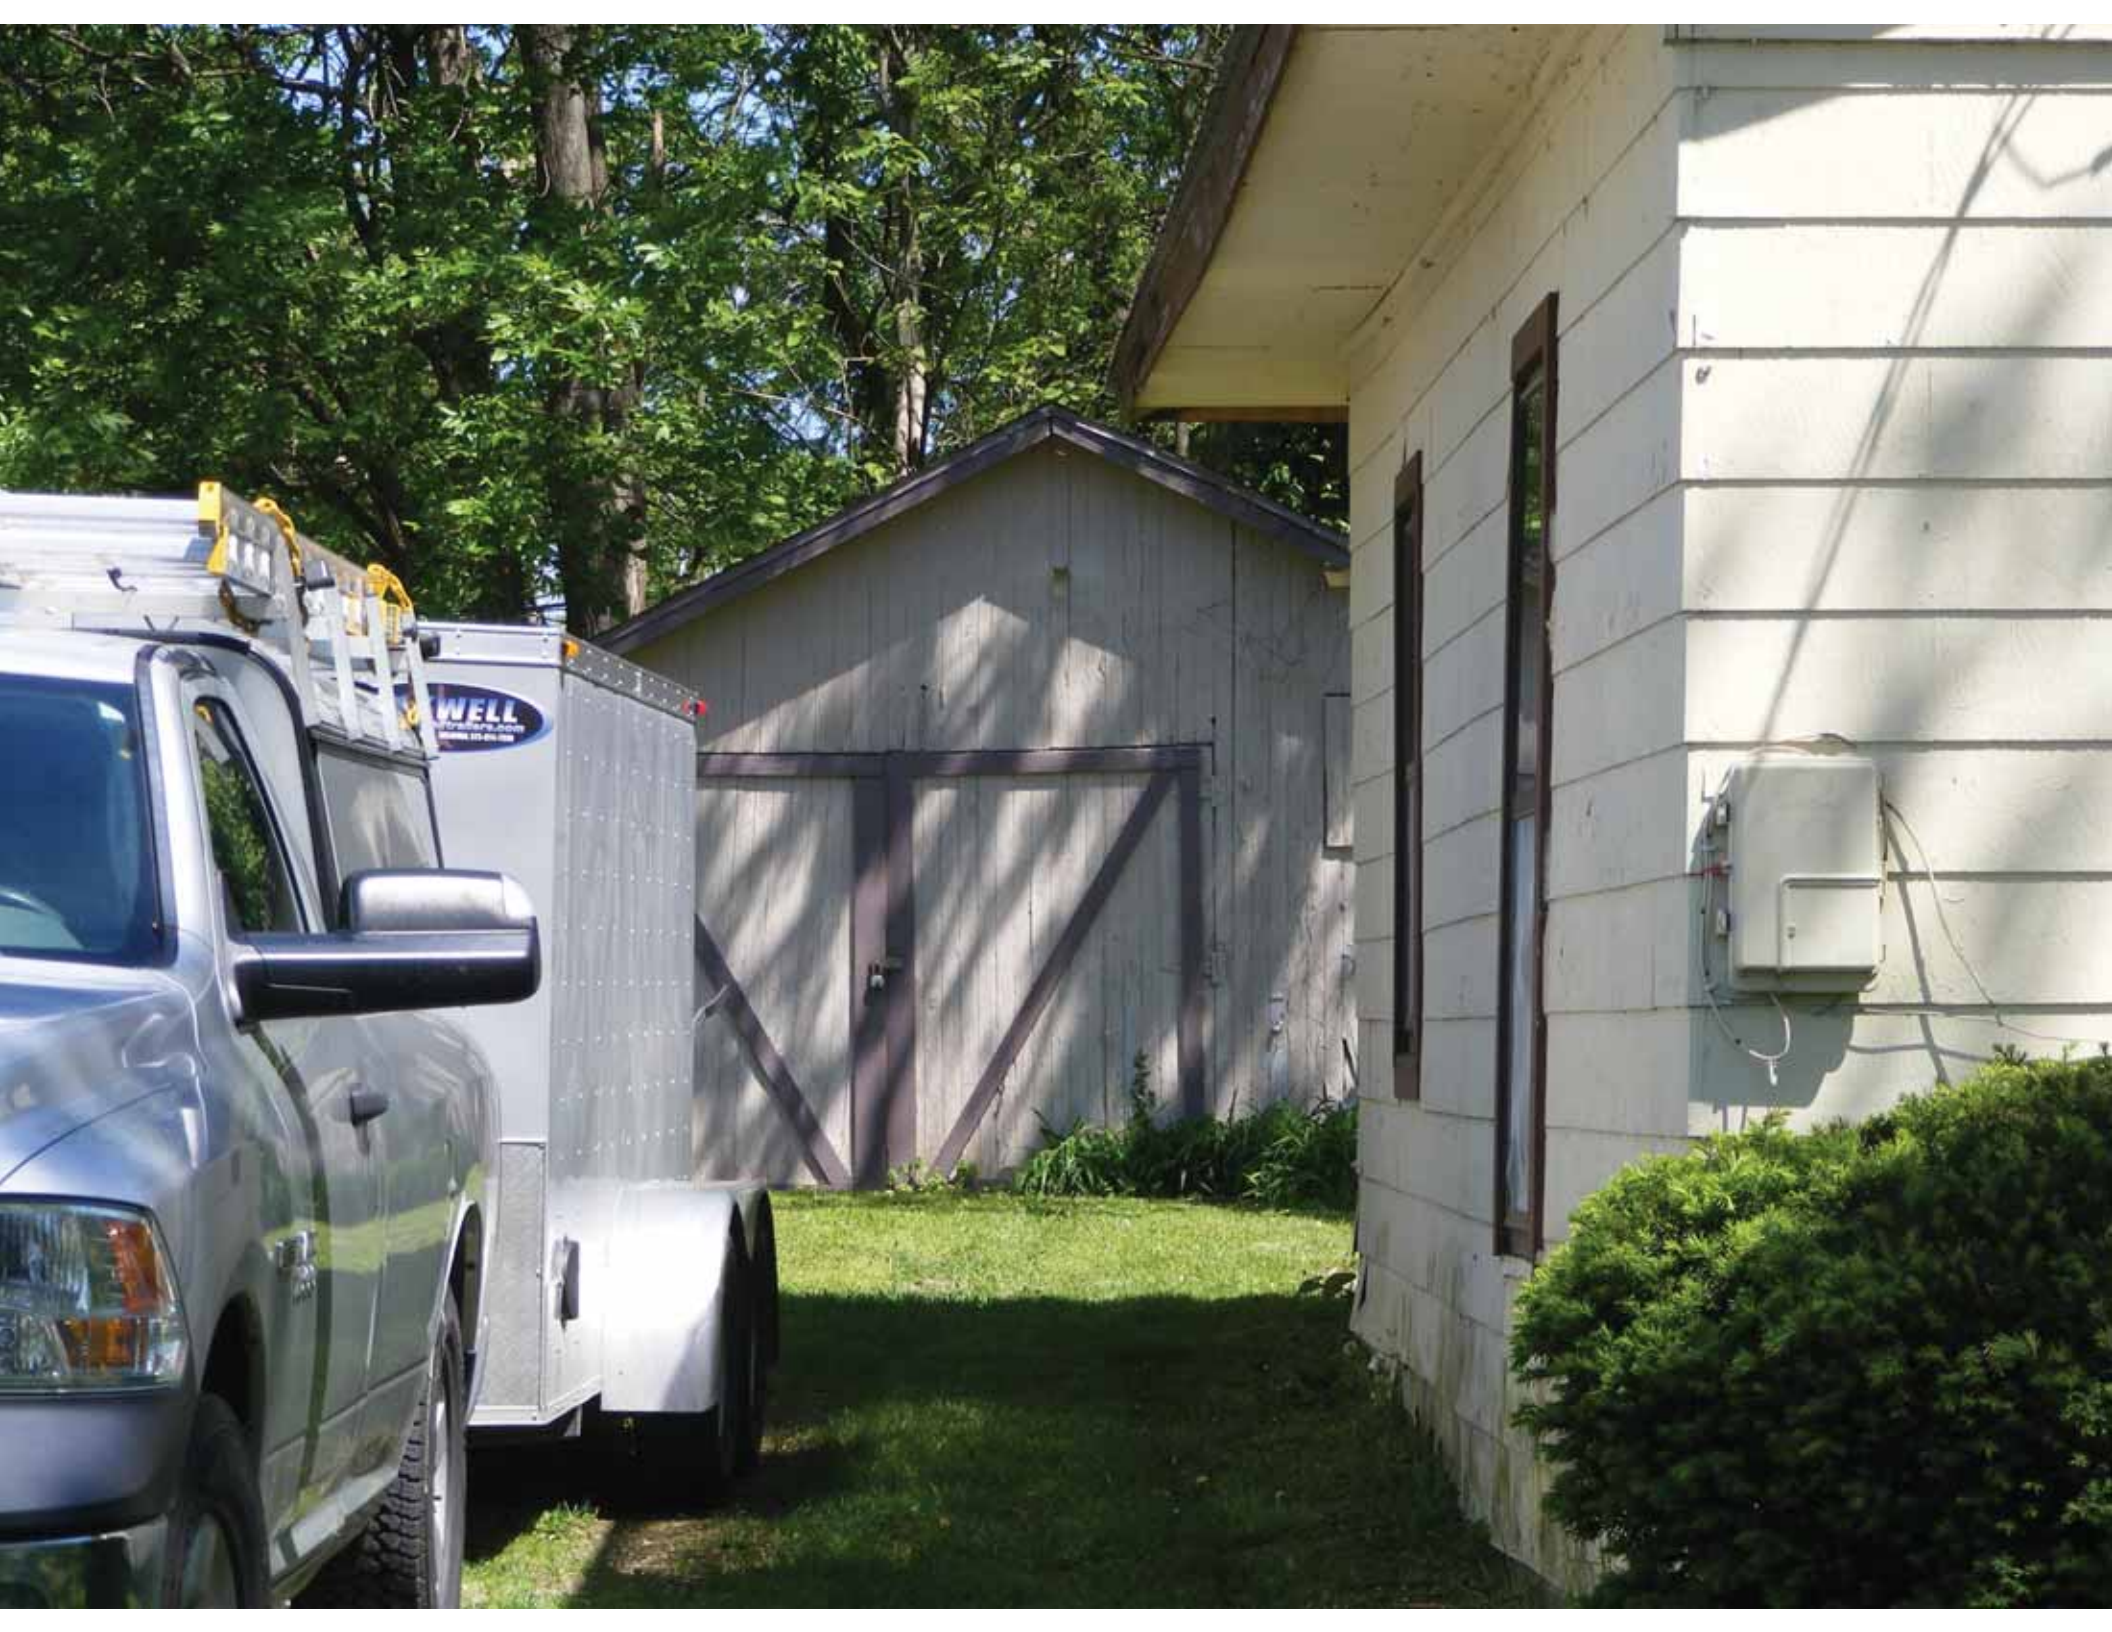

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front plan dwelling has a metal clad roof, exterior replacement siding (which appears to be asbestos) and a concrete foundation. At the north end of the façade is a shorter gable-front wing that extends west, toward the street. The remaining façade supports a half-width porch. The porch has a shed seamed metal roof supported by spindled contemporary columns. The porch has a contemporary balustrade. Within the porch is a single entry bay filled with a c.2000 paneled door featuring an upper fan shaped window. The window on the façade that offsets the entrance – as well as the single window on the front projecting gabled wing – appears original, one-over-one design. Both windows have original faux shutters. The upper gable field of the taller gabled wing has a louvered vent. The rear elevation supports a small gabled wing.

The property is situated on the west side of N. Eighth Street within an urban residential neighborhood. The lot is covered with grass. There is no foliage in the front yard. The rear yard supports mature trees. At the south end of the lot is a gravel drive that extends along the south end of the dwelling. A public concrete sidewalk flanks the west end of the lot.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This irregular plan dwelling, which appears to be originally designed in the Folk Victorian style (similar in plan to 1112 N. Eighth Street), is undergoing major renovation with replacement of original doors, windows and siding. Windows are replacement one-over-one vinyl and original weatherboard siding was being removed when this dwelling was surveyed. The primary (west) elevation has a recessed off-center shed porch with replacement wood columns and a new balustrade. Original steps have been removed. The entry bay within the small porch holds a 2019 door with upper fan shaped window.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is situated on the east side of N. Eighth Street in an urban residential neighborhood. The front yard is partially covered with grass (northern half) and gravel (southern half). A public concrete sidewalk extends along the west end of the lot. A perpendicular concrete walk extends from the public sidewalk to the porch. A wood privacy fence bounds the south end of the parcel. The rear yard supports mature trees.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a high hipped roof and front facing gable wing. The roof is clad with asphalt shingles and the front gable has original returns. The dwelling's exterior is clad with asbestos siding and the foundation is concrete. On the façade (west elevation), the front gabled wing likely had an original window that has been covered by the non-historic siding. Offsetting the wing on the south is a half-width shed porch. The porch is supported by milled replacement columns and has a frame balustrade. The columns and balustrade appear to be recent additions (c. 2010). Within the porch bay are a single entry and single window. The entry bay holds a c. 1960 door with upper diamond shaped light. The window is one-over-one and appears original.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is a vacant lot situated in an urban residential neighborhood. The lot is covered with grass and situated on the east side of N. Eighth Street. At the rear (east) and north ends of the parcel, the lot is lined by mature trees. A public concrete sidewalk flanks the west end of the lot. The lot holds a prefabricated c. 1990 outbuilding with a gambrel roof. The outbuilding has paired doors. The outbuilding is not individually eligible for the National Register of Historic Places. A chain link fence with central gate surrounds the outbuilding, indicating its current association with the dwelling on the adjacent parcel to the north, addressed as 1110 N. Eighth Street. A gravel drive extends from the street to the gate on the chain link fence.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This 0.15-acre vacant lot held a single-family dwelling previously (per Sanborn Fire Insurance Maps, 1925 and 1948). The lot is as above, covered with grass and bounded by the public sidewalk at the west end of the parcel. There lot supports the outbuilding described above. A chain link fence surrounds the outbuilding, indicating its current association with the dwelling/parcel at 1110 N. Eighth Street.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is situated on the east side of N. Eighth Street within an urban residential neighborhood. The lot has a grass covered yard with one mature tree in the front yard. The rear yard has mature trees and foliage. At the north end of the parcel, a gravel drive leads from the street to a detached garage. The c. 1930 garage has a gable-front plan, exterior stucco clad walls and paired vertical board doors. A chain link fence separates the garage from the rear yard. A second outbuilding (c. 1940) is situated southeast of the dwelling. This small gable-front plan building has a central paneled replacement door and fixed single-sash windows on either side of the entry bay. The outbuilding has dropped siding. Neither the garage, nor the small outbuilding, is eligible for the National Register of Historic Places. Also in the rear yard is an above-ground swimming pool. The lot is bounded on the west end by a public concrete sidewalk. A perpendicular walk extends from the public sidewalk to the front porch of the dwelling.

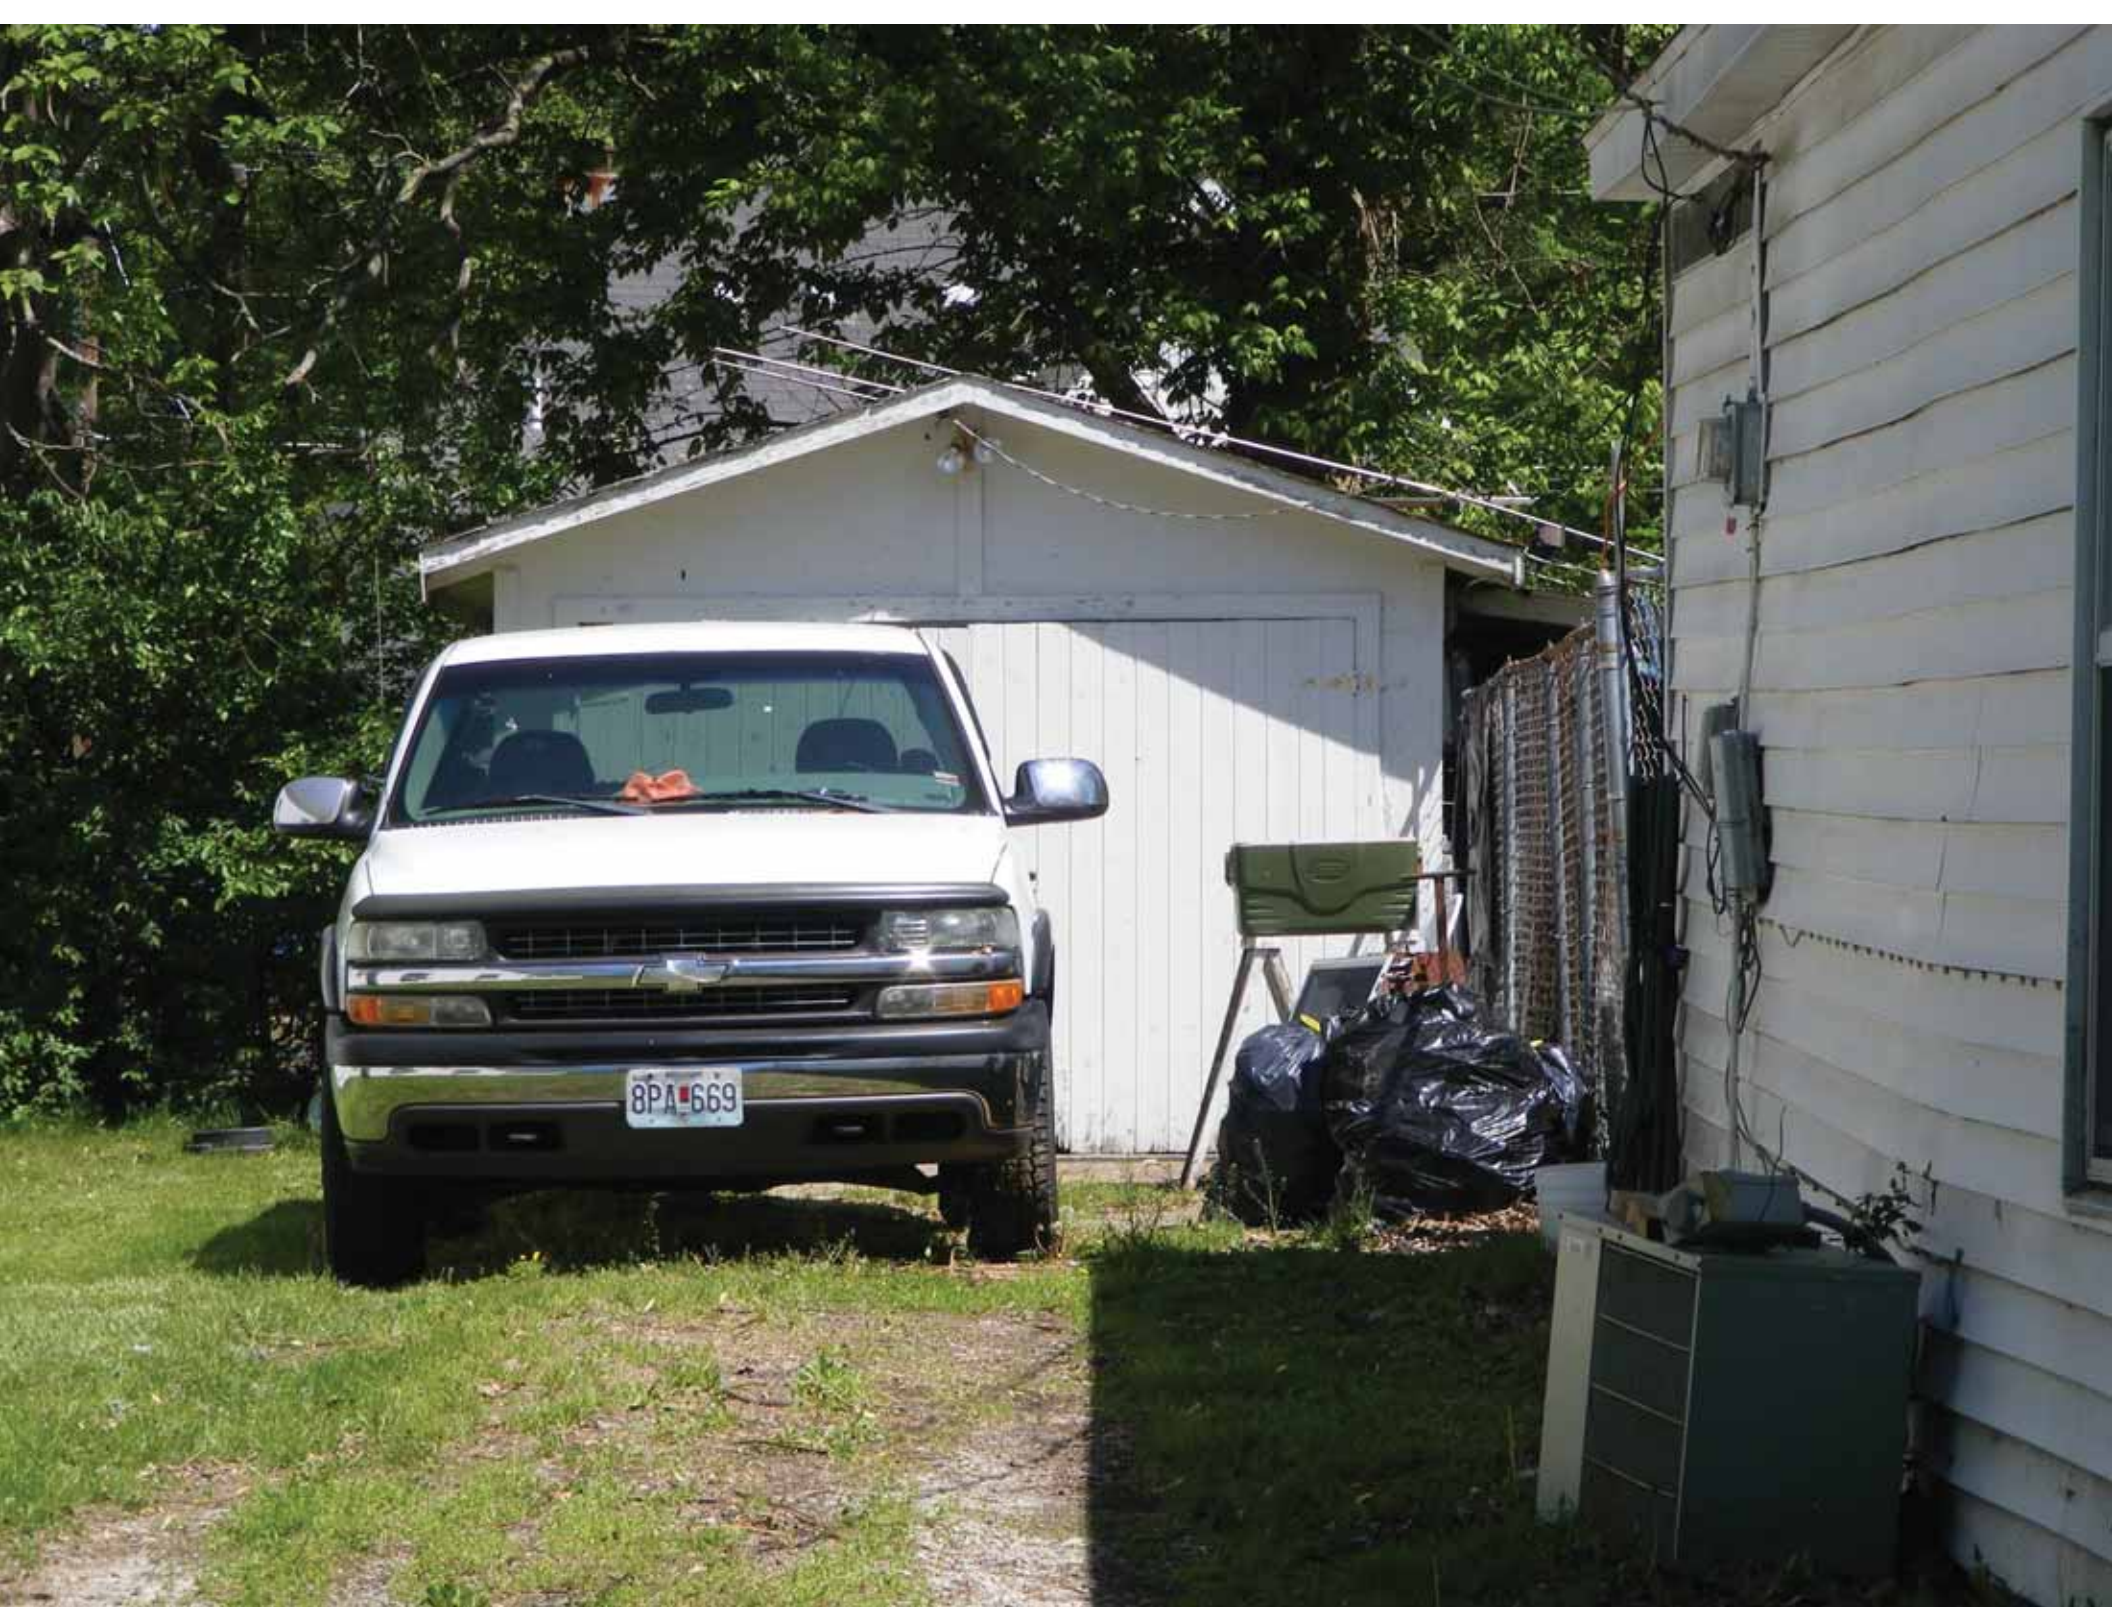

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling is a single-story Folk Victorian style house with a steeply pitched asphalt clad hipped roof, cross gables on the primary (west) and south roofline, exterior synthetic siding and a concrete foundation. On the façade and south elevations, the dwelling supports a hipped wrap-around single-story porch. The porch is supported by wood columns resting on painted wood piers. Within the porch bay on the façade (west elevation) is a central entry. The door is obscured by a contemporary screen door. Flanking the entry are original windows. The windows have multi-light patterned upper sashes. Remaining windows are one-over-one. A rear shed wing, south elevation, holds a one-by-one sliding window. Lattice frames the southwest corner of the porch. There is no fenestration on the south wall facing the porch.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is situated on the east side of N. Eighth Street within an urban residential neighborhood. The lot is grass-covered. Mature trees are noted in the front and rear yards. The west end of the lot is bounded by a public concrete sidewalk. A second concrete walk extends from the public sidewalk to the enclosed façade porch of the dwelling on the parcel. A gravel drive extends along the north end of the dwelling, accessible via the street.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

Similar in plan/design to 1104 and 1114 N. Eighth Street, this dwelling has a hipped and gabled roof illustrating its original Folk Victorian design. The dwelling's roof is clad with asphalt shingles and the exterior is clad with vinyl siding. The dwelling has a concrete foundation and enclosed façade porch. The façade features a front facing gabled wing on the north end. Below the gable returns, the elevation (west) holds a one-over-one window. A hipped porch offsetting the wing to the south has been enclosed. Square column supports are visible. A contemporary door is situated on the west elevation of the enclosed area, offset by a one-over-one window. As the porch wraps to the south side, the south elevation is likewise covered with vinyl siding and supports a band of four one-over-one windows. At the rear (east) elevation is a single-story shed wing, also clad with vinyl siding.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is located on the east side of N. Eighth Street within an urban residential neighborhood. The lot is covered with grass, flanked on the east end by a concrete public sidewalk. At the north end of the lot is a gravel drive. A concrete walk extends from the public sidewalk to the porch steps (also concrete). Offsetting the private walk to the south is a flower bed surrounded by brick pavers. Similar pavers partially surround a shrub near the southwest corner of the porch. The rear yard supports mature trees and shrubs. Two wood posts flank the neighboring drive on the south end of the parcel.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling is similar in plan to the houses at 1112 and 1104 N. Eighth Street. The dwelling has a hipped and gabled roof clad with asphalt shingles. Exterior walls are clad with vinyl and the gables retain original returns. The foundation is concrete. On the façade (west elevation), the front facing gabled elevation (north end) holds a replacement window of one-over-one design. The window has an upper fixed sash transom (replacement, c. 2015). Offsetting the projecting wing on the south is an original hipped porch supported by square wood columns. Within the porch bay is a replacement paneled door (c. 2015). The porch wall is angled with windows (one on each wall) facing south and west. All windows appear to be c. 2015 one-over-one replacement design. The dwelling has a rear single-story shed wing.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is a vacant lot situated in an urban residential neighborhood. The lot is covered with grass and situated on the west side of N. Eighth Street. At the rear (west) boundary, the lot is lined by mature trees. Remnants of a wire fence with metal posts bound the north and south ends of the lot. A public concrete sidewalk flanks the east end of the lot.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This 0.43-acre vacant lot held a single-family dwelling previously (per Sanborn Fire Insurance Maps, 1925 and 1948). The lot is as above, covered with grass and bounded by the public sidewalk at the east end of the lot. There are no buildings on the lot.

The parcel is located on the east side of N. Eighth Street within an urban residential neighborhood. The lot is covered with grass and bounded on the west by a public concrete sidewalk. A gravel drive extends from the street, flanking the south end of the dwelling. The front and rear yards support mature trees.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This gable-front plan dwelling has an asphalt-shingled roof and exterior pressed wood siding that appears to have been recently added (c. 2015). The front gable field has c. 2015 shaped wood shingles. The porch has an enclosed (with wide wood siding) balustrade and non-original wood handrails that flank concrete steps leading to the porch. The foundation is concrete – the central and rear portion of the foundation is poured concrete; the west end of the dwelling is supported by concrete block piers. The porch is supported by original tapered wood piers resting on the balustrade. Within the porch bay (façade) is a centered entry filled with a replacement c. 2015 paneled door. Flanking the door are individual one-over-one windows. The dwelling has a rear shed one-story wing.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is located on the east side of N. Eighth Street within an urban residential neighborhood. The lot is covered with grass. A gravel drive on the north end of the lot extends to create a gravel covered parking area just north of the concrete walk that leads from the public sidewalk (flanking the west end of the lot) to the porch steps. Shrubs and trees are noted in the front and rear yards.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt-shingled gabled and hipped roof, exterior synthetic siding, gable returns and a concrete foundation. The dwelling is similar in plan to other dwellings on the block, including 1104, 1112, 1114 and 1202 N. Eighth Street. The primary elevation (west) features a north end gabled projecting wing offset by a half-width shed porch on the south. The gabled wing has a one-over-one window with enclosed upper transom. The gable field holds a louvered vent. The porch is supported by original milled columns. The balustrade is likewise original with lattice infill between the columns. The porch bay features individual doors on the primary and recessed west walls (the porch wall is angled south of the primary door). The primary entry bay holds a paneled door. The remaining entry bay accessible via the porch has an enclosed transom. A similar transom enclosure is noted on the porch's south wall, above a window. The dwelling has a rear shed single-story wing.

The dwelling is on a grass covered lot in an urban residential neighborhood. The property is situated on the east side of N. Eighth Street in an urban residential neighborhood. The property includes an outbuilding east of the dwelling that is in use residentially. The building has an asphalt-shingled gabled roof, exterior vinyl siding and a concrete foundation. Paired wood doors (plywood) are situated on the east end of the façade. The doors are offset by a solid door flanked by single and paired one-over-one replacement windows. The building is not eligible for the National Register.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a gable-front plan asphalt-shingled roof, exterior synthetic siding and a concrete foundation. The primary (west) elevation has an off-center gabled porch supported by wood columns. A frame balustrade surrounds the porch. Within the porch bay, the entry is centered on the façade, flanked by six-over-six replacement windows. Remaining windows are of similar configuration. The upper gable field holds an original louvered vent.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is situated on a commercial thoroughfare in an urban area, just north of a residential neighborhood. The lot is paved with asphalt, providing parking on the western half of the parcel, as well as a drive-thru area (east of the restaurant) for automobiles. The lot is bounded by adjacent commercial businesses (south and east), Business Loop 70 (north) and N. Seventh Street (west). Trees line the pedestrian use areas on the east and west ends of the lot. A central green landscaped area with trees, a concrete picnic table/benches, and shrubs is centered north of the building. Concrete public walks extend along the sides of the parking lot, surrounding the building at the north and west. Another public sidewalk extends at the west end of the lot along N. Seventh Street. Situated north of the building along Business Loop 70 is a free-standing sign (not individually eligible for the National Register of Historic Places) bearing the Dairy Queen logo and advertising space. A rear shed outbuilding (not individually eligible) is situated south of the restaurant, obscured by a wood privacy fence.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This single-story commercial building is a standard plan Dairy Queen with a built-up metal ridge roofline, exterior brick walls and a brick covered (likely concrete slab) foundation. The primary (north) elevation facing Business Loop 70 has a continuous garden-style angled window bay comprised of seven continuous fixed sash commercial lights. The primary entry is situated on the west elevation (near the façade), filled with a paired single-light metal framed commercial doors. This portion of the elevation projects slightly. The recessed area (north end, west elevation) holds two fixed single-sash commercial windows. The remaining west elevation has no additional fenestration. The rear (south) elevation has a solid pedestrian door and is partially obscured by a frame privacy fence. The east elevation has a drive-through portico with a flat roof and square brick columns. The building's east wall supports a drive-through style sliding window. The north end of the east elevation holds a single-light commercial style door offset by a single-sash commercial window.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is paved with asphalt to provide parking for the building on the lot. Paved areas with painted parking spaces flank the east and north sides of the building. Grassy areas with concrete curbs, small trees and shrubs are situated north of the building and flank the west end of the business. A standalone sign (not individually eligible for the National Register of Historic Places) is situated northwest of the building near Business Loop 70. The sign bears the business name. Public sidewalks along Business Loop 70 (north) and Coats Street (west) bound the parcel. A wood privacy fence bounds the south end of the lot.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The commercial building has a flat roof with metal roofline coping. Walls are smooth concrete on the east, north and west elevations. The rear (south) elevation is concrete block. An oversized triangular portico bearing the business name extends toward the parking area on the building's northeast corner. The sign is supported by a large metal pole and shelters paired glass and metal commercial doors at the northeast corner. The doors have a large single-light transom and are offset on the west by a band of six fixed sash two-light commercial windows. The elevation also features a pedestrian door with upper single light west of the commercial entry. This door is set below a fixed awning. The east elevation has a pedestrian solid door and loading bay near the south end of the elevation. The east elevation is partially obscured but appears to have no fenestration.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is situated on a triangular projection that divides E. Business Loop 70 (north) and North Boulevard (south). The building is bounded by a concrete walk (public) on the north end. A concrete area fronts the east end of the building and a grassy area flanks the west end. The surrounding area is urban/commercial in appearance.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The small building, currently in use as a thrift store, has single solid doors on the east and rear (south) elevations. The north elevation (facing E. Business Loop 70) six window bays, all of which are covered with wood. A single window on the west elevation is also covered with wood. The building has a flat roof supporting a sign that bears the name of the business. The exterior is clad with aluminum siding.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is part of a conjoined set of commercial buildings on a triangular larger parcel centered between E. Business Loop 70 (north) and North Boulevard (south). The parcel associated with 802 E. Business Loop 70 is bounded by a concrete public walk on the north. The south side of the narrow parcel is flanked by grass. A concrete slab with steps leading to North Boulevard separates this parcel from the building addressed as 800 E. Business Loop 70 (on the west). The setting is urban/commercial.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The single-story brick warehouse has a flat built-up roof, exterior Dryvit on the west, north and east elevations and a rear brick (south) wall. The north elevation holds eight window bays. Four of the windows are filled with single-sash commercial style windows. The remaining windows are covered with vertical siding. An angled primary entry bay is situated at the west end of the elevation, filled with a single-light commercial door. The west elevation holds a single-sash commercial window. The south elevation has a solid pedestrian door with a replacement paneled door and a filled window bay. The east elevation is attached to 806 E. Business Loop, another commercial building.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

Based on city directories and Sanborn maps, this large warehouse was constructed as a warehouse prior to 1931. Based on Sanborn maps, the building is brick faced (below the siding), tile-core construction. By the 1940s, the building held two businesses – the west end housed an electrical service and the east end housed a machine shop.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is situated on a triangular projection facing E. Business Loop 70 (north) and North Boulevard (south). The building is conjoined with 802 E. Business Loop 70 (west) and 810 E. Business Loop 70 (east). The north end of the property supports a concrete public sidewalk offset by a graveled area dividing the curb from Loop 70. The south elevation is flanked by a narrow grassy strip and asphalt. The setting is urban/commercial.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This large warehouse has a flat built-up roof, exterior metal siding and a concrete foundation covered by the siding. The south elevation siding is ribbed (c. 1980) and features a ribbed projection rising above the roofline that is capped by metal coping. The north elevation has more contemporary siding (c. 1990) that is similar (but not identical) in appearance. The north elevation holds (from east to west) an overhead track door with upper windows, a central solid pedestrian door and at the east end of the elevation, a two-by-two fixed sash window, fixed four-light window and single-light commercial window. The rear (south) elevation supports (from east to west) an overhead track three-light door, single-light commercial window, solid metal pedestrian door, two-by-two window, solid metal pedestrian door, fixed-light commercial window, solid door with upper fanlight (with concrete steps and a metal handrail) and three windows of single-sash design. Separating two of the west end single-sash windows is a small one-over-one window.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-part commercial building was constructed prior to 1931 and originally supported two businesses. In 1931, the east half of the building held a poultry shop. In 1947, this space and the western half both supported a potato chip factory. Current use is unknown. The building bears no business signs, but is zoned commercially. The layout of the primary and rear elevations suggests that the building may be in use as a multi-family residential property.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is situated on a triangular projection facing E. Business Loop 70 (north) and North Boulevard (south). The building is conjoined with 806 E. Business Loop 70 (west) and 904 E. Business Loop 70 (east). The north end of the property supports a concrete public sidewalk offset by a graveled area dividing the curb from Loop 70. The south elevation is flanked by a gravel strip. The setting is urban/commercial.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This two-story building has a flat roof, exterior brick walls and a concrete/brick foundation. On the primary (north) elevation are two first-floor commercial bays. The east commercial bay has a solid pedestrian door offset by three multi-sash windows. The west commercial bay has a central single-light original commercial door flanked by tripartite windows, each consisting of a six-over-six replacement window flanked by single-sash sidelights. The west window bay has only one sidelight (east); the west sidelight has been eliminated due to the addition of a contemporary solid door. Synthetic siding surrounds the commercial bay. Above the west commercial bay are two six-over-six replacement windows. The rear (south) elevation has two doors on the first floor – each is a c. 2015 paneled door with an upper fanlight. The doors are offset by one-over-one windows. The upper story has single doors offset by windows, leading to a frame balcony (c. 2015). The balconies join in the center and provide frame steps leading to the first-floor level. The rear (south) entries are addressed as 815 (west) and 817 (east) E. Business Loop 70.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

Based on Sanborn maps and city directories, the building was constructed after 1931. In the 1940s, the property supported three businesses: Whitesides Bottling Co., McGee Pharmacy and the Wigwam Café. The east end of the building was originally set back from the street and supported a dwelling.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is situated on a triangular projection facing E. Business Loop 70 (north) and North Boulevard (south). The building is conjoined with 810 E. Business Loop 70 (west) and 912 E. Business Loop 70 (east). The north end of the property supports a concrete public sidewalk offset by a graveled area dividing the curb from Loop 70. The south elevation is flanked by North Boulevard.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This commercial property is composed of two construction phases. The center of the building, which is the earliest section and likely the former residence, has a gable-front roof that rises above the business façade (north elevation) facing the business loop. The gabled portion of the building is clad with vinyl siding and features paired louvered vents on the façade; a single louvered vent on the rear (south elevation). Fronting the property on the business loop is a wide single-story one-part commercial building (c. 1950). The front wall rising above the wing's flat roof is capped with terra cotta coping. The east end retains an original brick wall. This area holds an overhead track door that is not original. The remaining north elevation is clad with Dryvit panels. The storefront consists of three commercial style doors flanked by fixed commercial windows (remodeled c. 2015). Two fixed commercial style windows (c. 2015) separate these entries from the garage bay on the east end. The rear (south) elevation has three shed wings. Two of the wings support rear pedestrian doors. The central (smallest of the three) supports a two-by-two sliding window. A frame ramp with a balustrade flanks the smallest wing and shed wing on the east end.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is situated on a triangular projection facing E. Business Loop 70 (north) and North Boulevard (south). The building is conjoined with 904 E. Business Loop 70 (west) and 916 E. Business Loop 70 (east). The north end of the property supports a concrete public sidewalk offset by a graveled area dividing the curb from Loop 70. The south elevation is flanked by a concrete walk.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

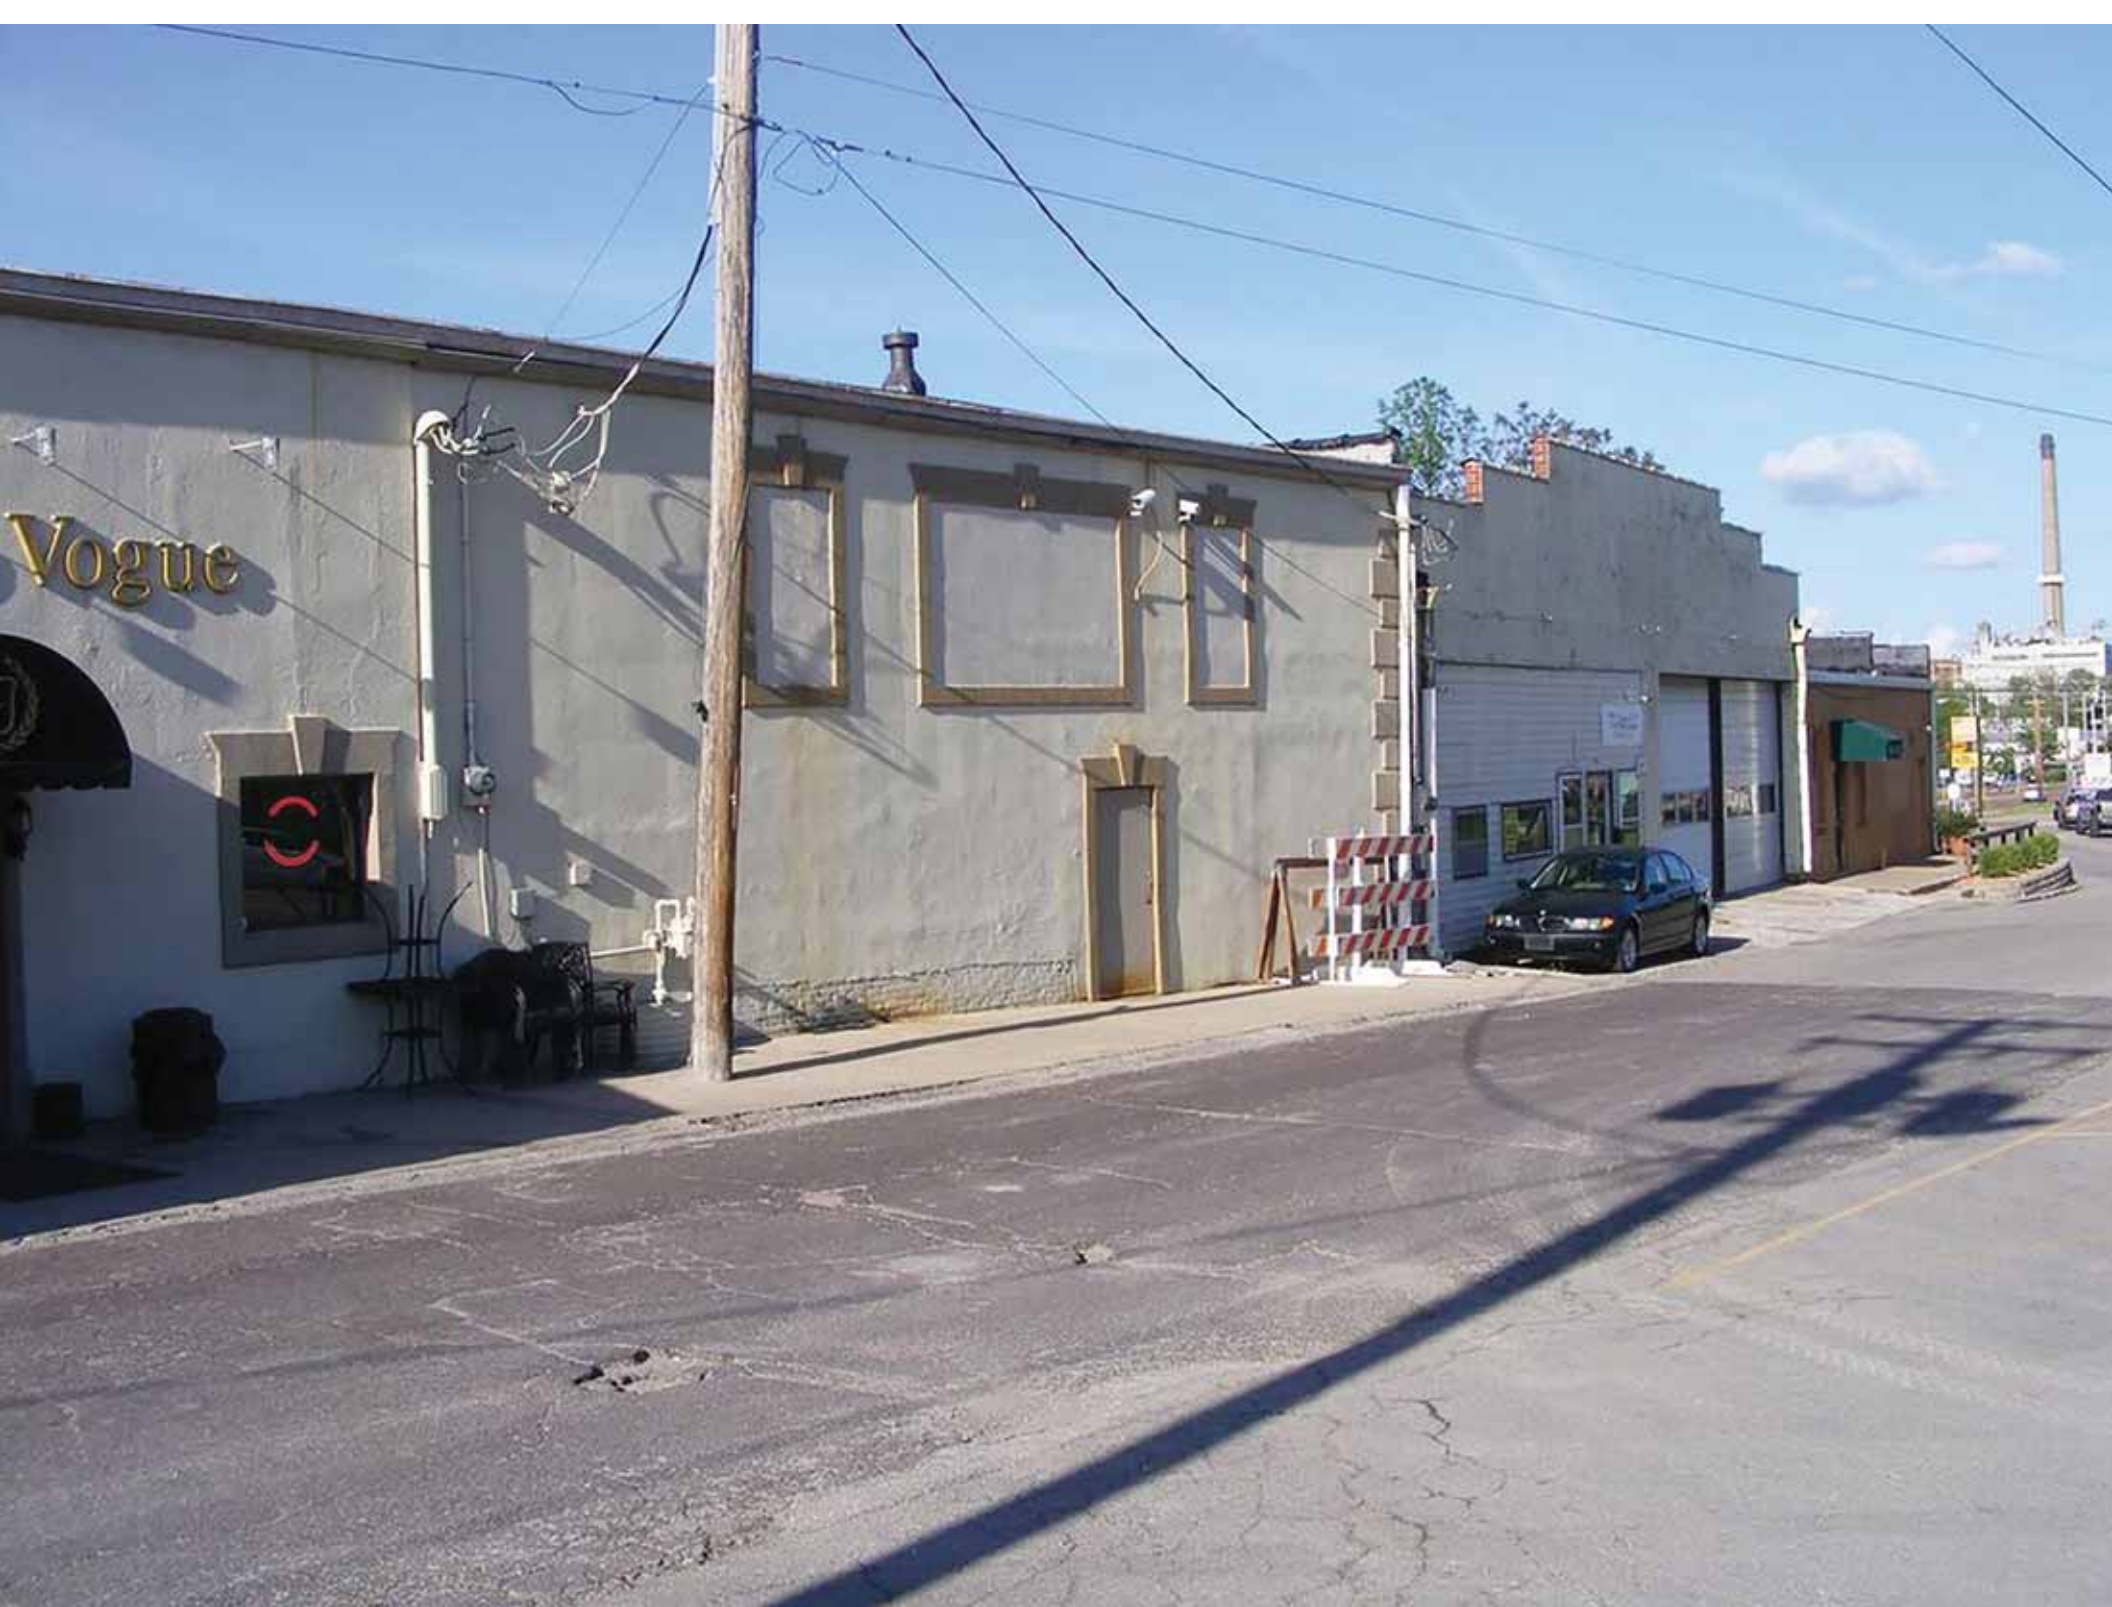

This extensively altered building appears to have been designed as a Spanish Revival commercial property. The roofline supports a central towered bay with a pyramidal roof and shed awning on the east end that were likely clad with clay tile originally. The remaining façade bears no evidence of the original design, covered with Dryvit. On the façade are a solid pedestrian door (east end) and three fixed windows obscured by dark/patterned glass. Two vents are situated near the west end of the elevation. The rear (south) elevation retains some original details such as corner quoins and original bay hoods (with a central keystone), sills and framing. All window bays are filled with Dryvit. The pedestrian entries (two) hold solid replacement doors. A tent wing is attached at the west end of the rear elevation near the club's primary entry. Above the primary door is a rounded canvas awning. The name of the business is attached to the rear wall above the awning.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is situated on a triangular projection facing E. Business Loop 70 (north) and North Boulevard (south). The building is conjoined with 912 E. Business Loop 70 (west) and 916 E. Business Loop 70 (east). The north end of the property supports a concrete public sidewalk offset by a graveled area dividing the curb from Loop 70. The south elevation is flanked by asphalt and concrete.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The building's primary (north) elevation has a stepped parapet capped with terra cotta coping. At each end of the stepped areas are decorative brick posts capped with concrete. The storefront on the façade consists of (east to west), a large commercial window that has been enclosed, a central entry/commercial bay filled with a single-light glass and aluminum door offset by four fixed light c. 2015 windows. Above the entry/windows is a transom largely infilled. The east end of the transom is open and supports ten original steel sash lights. East of this area the elevation holds a filled entry bay and transom. The east end of the elevation holds two filled window bays. The brick surrounding the two east windows appears as though this end of the façade originally supported an automobile garage bay. The rear (south) elevation has a built-up stepped parapet capped with terra cotta coping. On the west end, the bay is filled with horizontal siding that surrounds an off-center glass and aluminum commercial door flanked by one-over-one windows. Offsetting the door and windows on the west are two fixed horizontal sash windows. The east end of the elevation holds two overhead track c. 2000 doors with centered lights.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

Sanborn maps and city directories indicate that this building existed by 1931, originally utilized as a service station. The attached building on the west (914 E. Business Loop 70) appears to have been an automobile dealership/service establishment and is identical in building materials and style. For this reason, it is assumed that both buildings were constructed at the same time and originally associated with one business. The setback area on the east end, currently used as an outdoor dining area, likely held gas pumps originally. By 1961, Ruggles Café utilized the building.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is situated at the east end of a triangular projection facing E. Business Loop 70 (north) and North Boulevard (south). The building is attached on the west by 914 E. Business Loop. The north end of the property supports a concrete public sidewalk offset by a graveled area dividing the curb from Loop 70. The south elevation is flanked by concrete separated from North Boulevard (on the south) by a narrow landscaped area with shrubs and a frame fence.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The one-story building has a built-up façade wall capped with terra cotta coping. Ends of the coping support original brick piers with concrete caps. The façade is filled by a commercial bay consisting of a central solid door flanked by fixed commercial style windows (c. 2000). Above the door and windows is vertical synthetic siding. The business sign is centered above the sided portion of the façade. A frame privacy fence extends east, attached to the east exterior wall. The fence obscures an outdoor dining area. The rear (south) elevation has a solid door on the east end and a single-light commercial door flanked by infilled windows on the west end. A canvas awning bearing the business name extends above the glass door.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

Based on Sanborn maps, the parcel held a gasoline station as early as 1930, bearing the same footprint in 1948. The current building appears to have been constructed after 1948. In the late 1940s, the business was noted in city directories as Potters Service Station. In 1961 the business was listed as Potter's Cities Service gas station. Cities Service was a corporate oil company that eventually became Citgo. The illustration below is of a Cities Service Station in Somonauk, Illinois, constructed c. 1947. This building is similar in plan to the property at 922 E. Business Loop 70. 922 E. Business Loop 70 is likely a standard plan gas station for Cities Service Company. The building appears to have been altered minimally since its construction and appears potentially eligible for the National Register under Criterion C: architecture and possibly Criterion A for its relationship to the business loop, which served as one of the state's primary highways before the Interstate was constructed.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is situated at the east end of a triangular projection facing E. Business Loop 70 (north) and North Boulevard (south). The building is on an asphalt paved lot. East of the parcel is a triangular grassy area with a concrete curb. The building is flanked on the north by a concrete public sidewalk. A standalone business sign is situated on a metal pole at the east end of the parcel. The parcel is in an urban commercial area at the intersection of three roads: E. Business Loop 70, Rangeline Street and North Boulevard.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The former gas station, currently used as a used auto sales lot, has a flat roof with an asphalt shingled canopy. Exterior walls are clad with stucco and the foundation is a concrete slab. At the roofline is a central projecting wall that divides the customer/service areas of the building. This projection rises well above the roofline and may have originally illustrated the business name. The projection is clad with c. 2000 dropped synthetic siding and capped with metal. The façade (east elevation) has two original overhead track multi-light doors (south) and an original office area with a glass and aluminum commercial door flanked by a band of aluminum sash commercial windows that wrap to the side (north) elevation. West of the north elevation windows is a solid door (likely providing access to the restroom). The south elevation has two multi-light original steel sash hopper windows.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The building is located on the northwestern corner of Business Loop 70 and Range Line Street in an urban setting. The property lot is completely covered in asphalt. A large two paneled sign is located on the north side of the property which reads "Cash Loans". An outbuilding is located on the south side with a gambrel roof and wood siding. The outbuilding is not eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

A one story brick commercial building with a flat roof on a concrete slab foundation. The façade (west) features a centered entrance (glass/metal) flanked by paired display windows; windows and entrance are tinted. A projecting shed awning shelters the storefront. The building is painted white with a yellow and red horizontal stripe at the top section. The north elevation features an entrance at the back corner.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel is situated on the south side of E. Business Loop 70 within a busy urban sector of the city. The lot has a central asphalt-paved parking lot situated east of the building. Grass areas flank the northwest and south ends of the lot. A frame privacy fence bounds the south end of the parcel. A concrete walk flanks the east end of the façade (east elevation). Situated north of the building is a free standing marquee sign with the business name.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The box-style contemporary commercial building has a flat roof, exterior concrete and a slab concrete foundation. The primary (east) elevation has an off-center recess near the north end of the elevation. This area features paired single-light commercial doors. Glass panels surround the doors within the recessed area. Flanking the entry bay are upper horizontal sash windows. At the south end of the elevation is a solid pedestrian door. The north elevation has a central bay filled with a large four-panel commercial style window. Flanking the window bay are upper horizontal sash windows. The south elevation has no fenestration and is clad with ribbed synthetic siding.

Polk's Columbia City Directories, 1947 and 1961.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.
The building occupies the northeast portion of the property with driveways and asphalt parking lots along the northern and western edges. The property has some grass on the south and west sides with some small trees.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This is a one story metal seamed low-pitched front gable building with a concrete slab foundation. The front section of the building is clad in brick and the back half is clad in vertical metal seam. The façade features an offset storefront that holds three bays. The center bay holds a glass/metal door with transom flanked by glass/metal display windows. The left end bay holds a glass/metal door with transom offset to left by a glass/metal display with transom; door is offset to the right by a glass/metal sidelight. The right end bay holds a glass/metal door with transom and sidelight to left; offset to the right by paired glass/metal display windows. Storefront is sheltered by a projecting shed awning supported by metal posts. Above the awning is a full-width banner sign that says "TitleMax Title Loans: Introducing Personal Loans – No Title Needed –." The right elevation holds three display windows at the façade corner followed by a wall surface of brick with a cutout that holds a square framed window. A metal seamed clad wall abuts the brick wall surface and holds two garage bays and a metal door with a square light. The left elevation is clad in metal. It appears the metal wall cladding on the side elevations covered the original brick wall surface.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This large commercial complex was previously an ice cream company. Due to the property's intact appearance it may be individually eligible under Criterion C (architecture), as well as for its commercial importance to the City of Columbia (Criterion A).

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

Polk's Columbia City Directories, 1947 and 1961.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The building is centered on the property lot in an urban setting with driveways and asphalt parking lots all along the western edge and eastern edges. The property has some grass on the north side.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This is a one story commercial building of painted concrete block, flat roof with a concrete slab foundation. The façade holds 10 bays. The right end of the façade has a projecting stepped parapet centered over the stoop entrance that holds a glass/wood door with sidelights offset to the right by two display windows and to the left by one display window. The left section of the façade holds a raised concrete stoop entrance with iron railings with a glass/metal door and transom and glass/metal display window with transom; flanked to left by paired metal /glass display with transoms. A cloth dome awning shelters the two bays. To the right of these two bays are four multiple light industrial type windows. The N. College Ave. elevation holds a glass/metal storefront at the façade corner; entrance offset to left by tripled paired display windows – door and display windows feature transoms. A matching awning to the façade is over the storefront. A concrete decking sloped from right to left with steps provide access to the side storefront. Three garage bays with metal and multiple light doors and a solid metal single entrance door complete the side elevation. The rear elevation holds a setback area sheltered by a shed roof and holds garage bays.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is situated on the west side of Coats Street in an urban residential neighborhood. The lot is grass covered with shrubs and a mature tree in the front yard. A concrete public sidewalk flanks the east (Coats Street) and south (Fairview Avenue) ends of the lot. Extending west from the sidewalk along Coats Street is a private walk that leads to the porch. At the north end of the lot is a gravel drive leading to a rear outbuilding. The outbuilding, though not individually eligible for the National Register of Historic Places, is original to the property with vertical board walls and a shed roof. The south end of the outbuilding's façade (east elevation) has an original hinged pedestrian door offset by a filled (with vertical boards) bay. Above the filled bay is a metal shed awning. The north end of the elevation retains an original vertical board hinged door. The south end of the lot is bounded by a vertical board privacy fence. Southwest of the dwelling is a frame open shelter (obscured by the privacy fence).

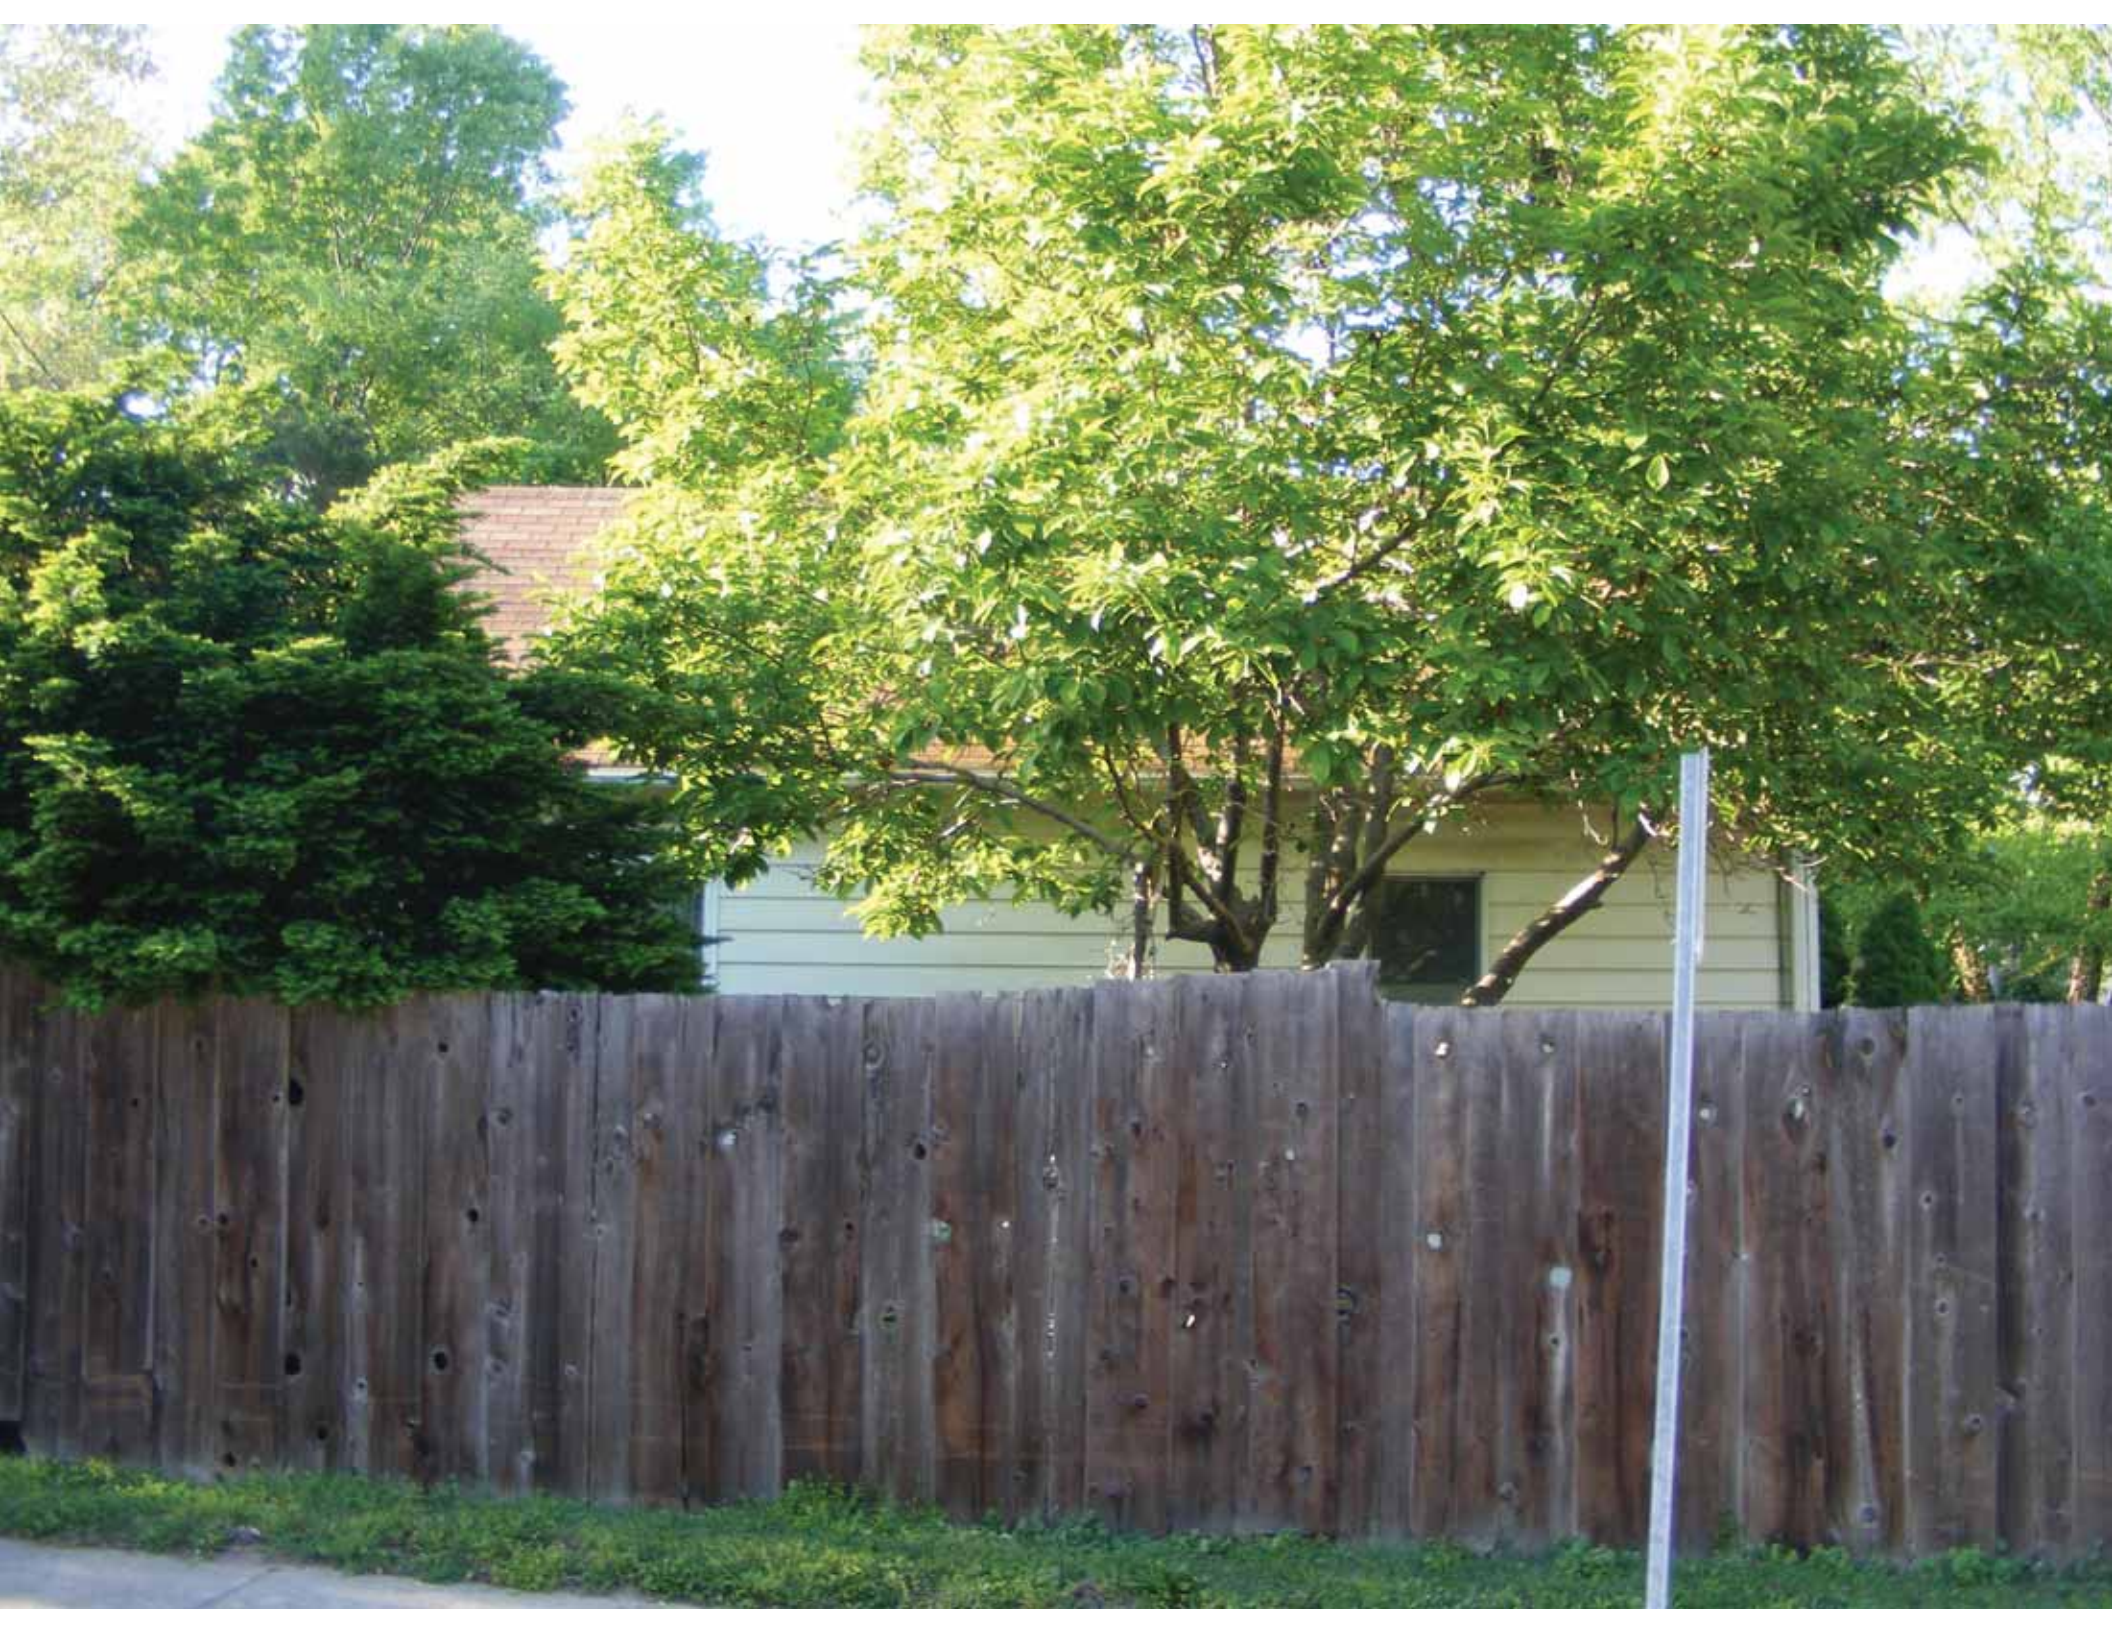

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This single-story dwelling has a cross-gabled roof clad with asphalt shingles. The dwelling has a vinyl clad exterior. The foundation is stone and concrete. On the façade (east elevation) is a half-width porch. The porch has a shed roof supported by original milled columns with decorative bargeboard. Within the porch bay is a single door offset by a one-over-one window. At the south end of the porch is the front facing gabled wing, which holds a single one-over-one window (east elevation). Above the window, the gable field is filled with fish scale shingles. The gable field peak features original bargeboard. The rear elevation supports a single-story shed wing. Attached to the west elevation of the shed wing is a second cross-gabled wing.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is situated on a grass covered lot on the east side of Coats Street. The property is situated in an urban residential neighborhood. A concrete public sidewalk flanks the west end of the lot, which is intersected by a private walk that leads from the public walk to the porch. On the south side of the dwelling is a gravel drive that leads to a shed roof carport. The carport is supported by wood columns. A wood privacy fence, east of the carport, prevents access to the rear yard that – according to property records, supports two outbuildings. The outbuildings are unlikely to be eligible for the National Register of Historic Places. The rear yard supports mature trees.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a hip on cross-gable metal clad roof, exterior synthetic siding, enclosed eaves and gable returns. The exterior is clad with vinyl siding that covers the foundation. The front gabled elevation holds a replacement one-over-one window with faux shutters. Remaining windows are of similar configuration. South of the projecting gabled wing is a half-width shed porch supported by square wood columns. The porch has an entry facing south that holds a multi-light original door. The west elevation of the porch holds a single one-over-one window with faux shutters. At the central hipped roofline ridge is an interior metal flue.

The dwelling is situated on a grass covered lot in an urban residential neighborhood. The property is on the west side of Coats Street. A concrete public sidewalk flanks the east end of the parcel. A gravel drive extends along the south elevation of the dwelling. The rear yard supports mature trees.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The single-story dwelling has an asphalt-shingled cross-gabled roof, exterior vinyl siding and a covered foundation. Eaves are enclosed. The front facing gable elevation holds a replacement one-over-one window. Offsetting the wing on the south is a half-width shed porch supported by replacement square columns. A non-original balustrade surrounds the porch. Within the porch bay is an entry filled with a c. 2010 paneled door. The door is offset by a replacement six-over-six window. The dwelling has a rear low gable-to-shed wing.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is on the west side of Coates Street in an urban residential neighborhood. The dwelling is on a grass covered lot with mature trees. A concrete public sidewalk flanks the east end of the lot. An asphalt drive flanks the south end of the dwelling. A private walk leads from the porch to the public sidewalk. Windows are one-over-one. The façade (east elevation) has a half-width shed porch supported by wood columns. A wood balustrade surrounds the porch. Within the porch bay is a door (obscured by a single-light storm door) offset by a double-hung window. The front facing gable has a one-over-one window. The dwelling has a rear shed wing.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt shingled hip-on-gable roof, exterior vinyl siding and a concrete foundation (pier foundation below the porch floor, covered by lattice). The primary (east) elevation features a front-gabled wing with a single one-over-one window. Offsetting the wing's south elevation is a half-width porch supported by milled and chamfered columns. The milled columns have upper decorative bargeboard. Within the porch bay are two entries – one facing south and one facing east. The south entry holds a horizontal-light paneled storm door (c. 1945) and original single-light door. The remaining entry door is obscured by the contemporary storm door but appears solid. The east facing door is offset by a single one-over-one window. Remaining windows are of similar configuration.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

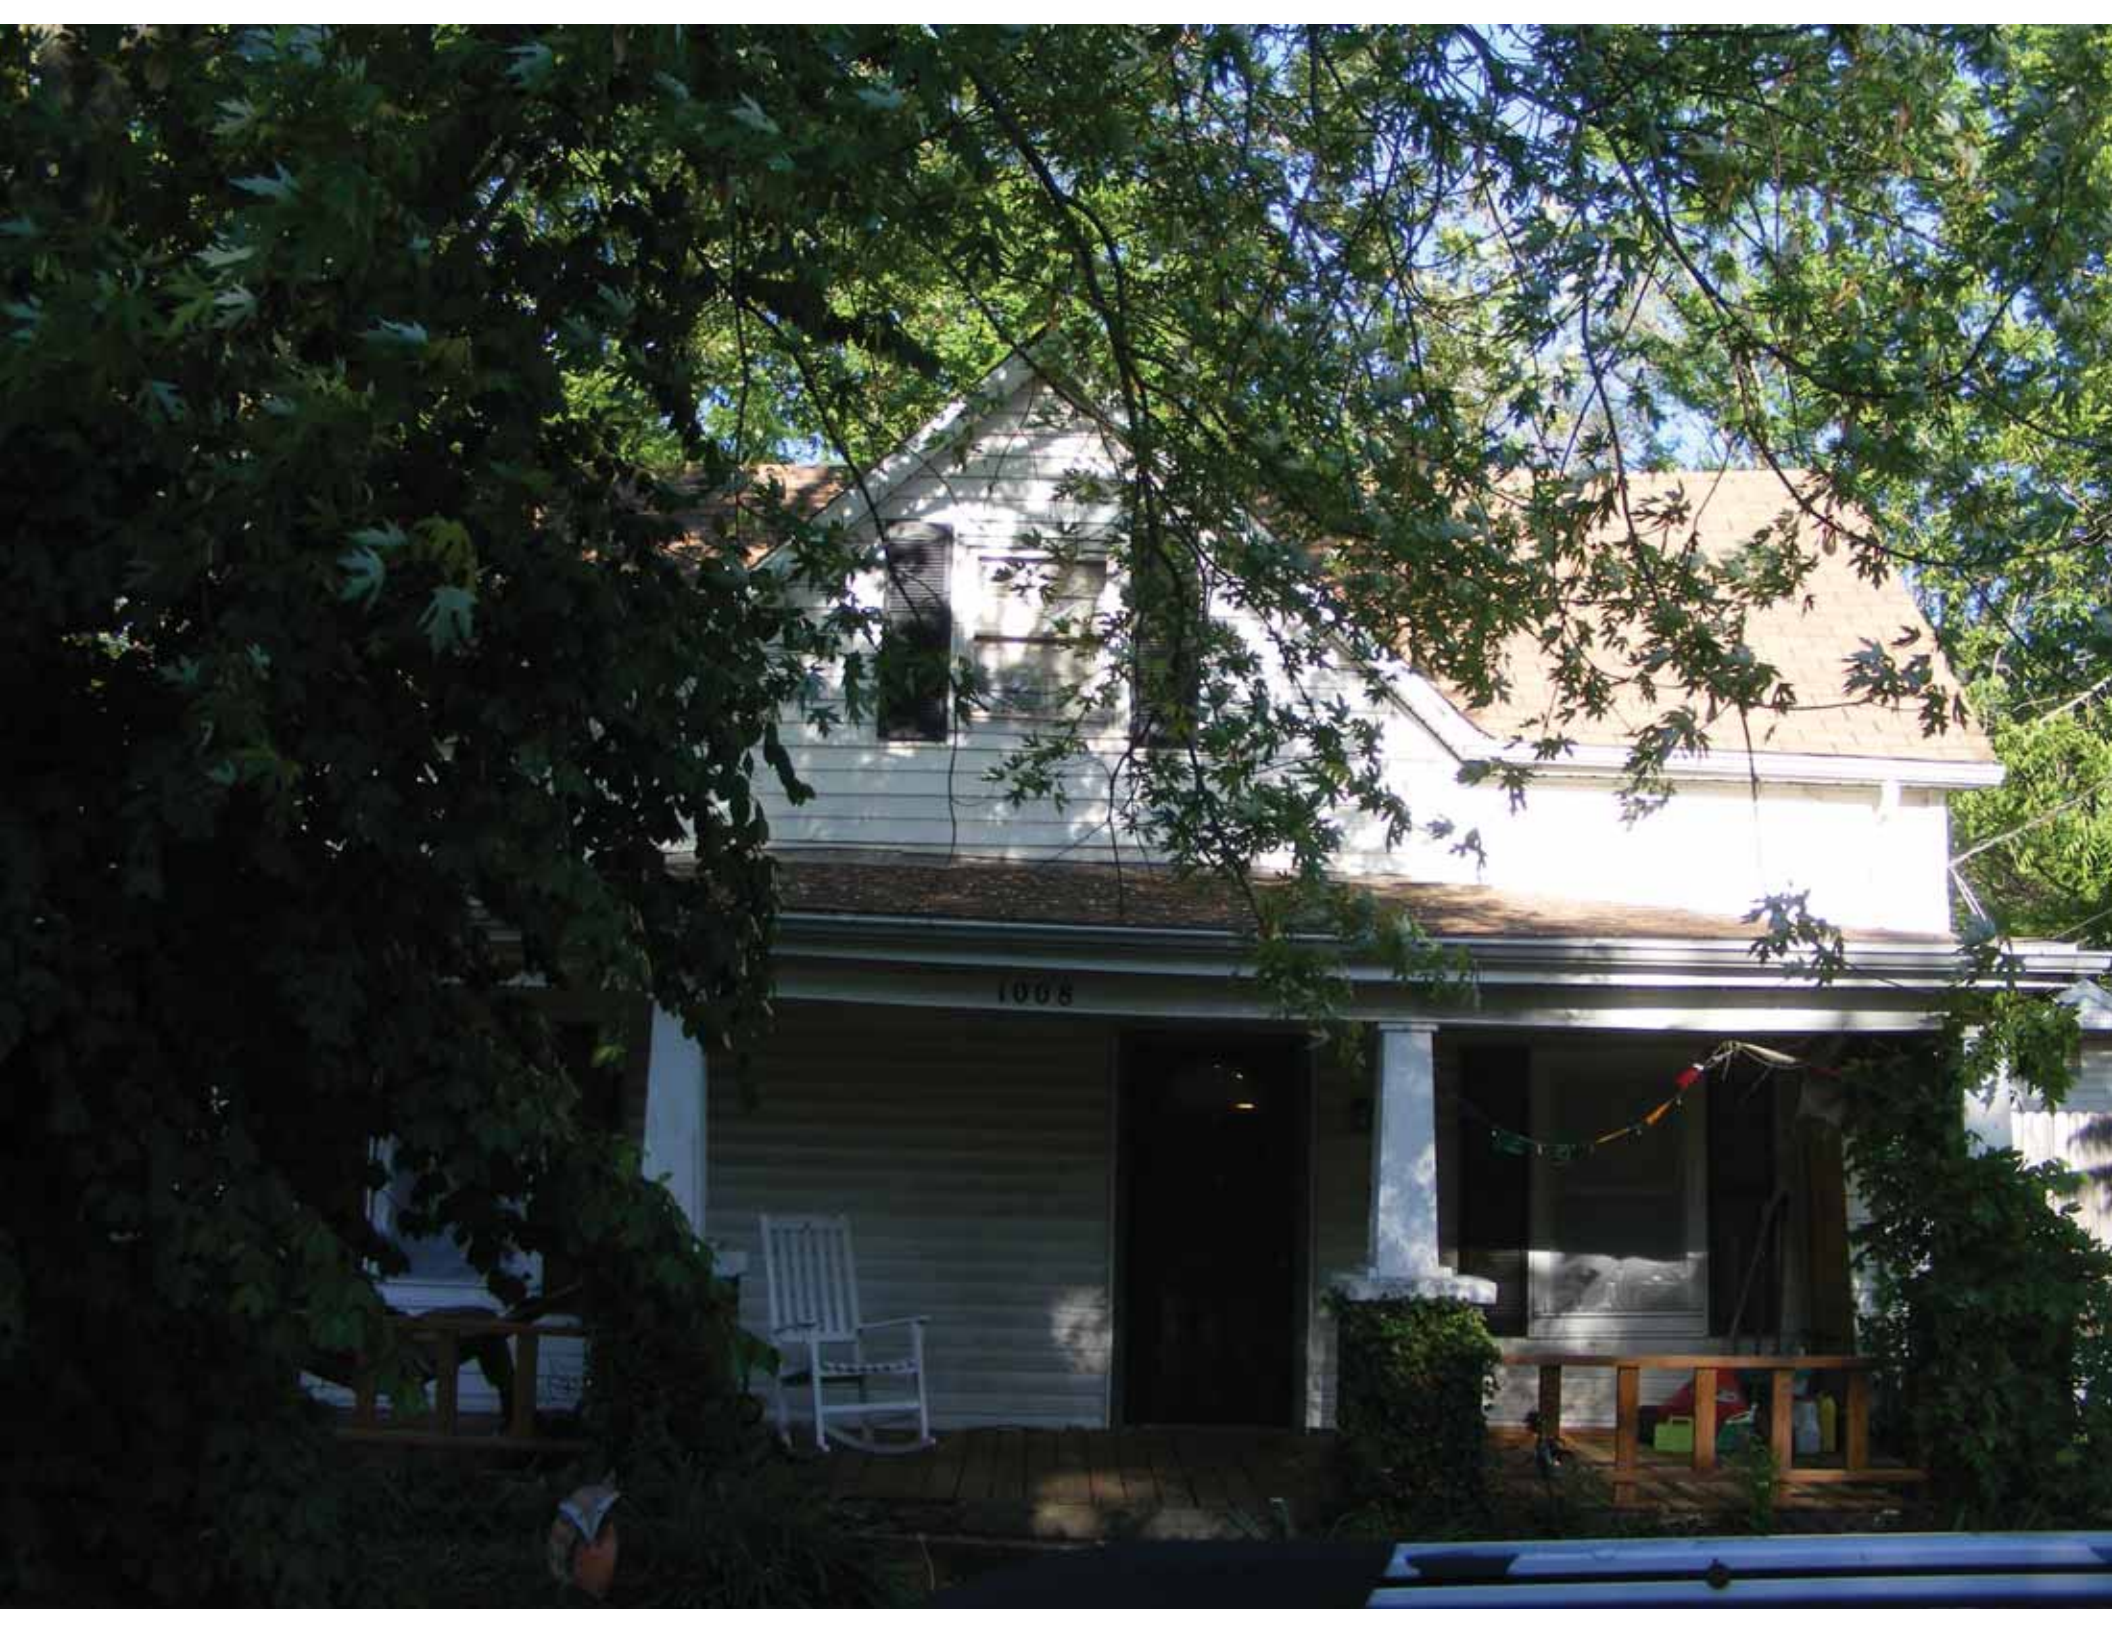

The parcel is situated on the east side of Coats Street in an urban residential area. The lot is covered with grass and supports heavy foliage and mature trees in the front and rear yards. A concrete public sidewalk extends along the west side of the lot. A perpendicular private walk extends from the public sidewalk to the porch. A second walk extends from the porch to the south end of the lot, which supports a concrete drive. The drive is crossed by a privacy fence that extends from the dwelling's south elevation, obscuring views of the rear yard. The rear yard has two gable-front plan outbuildings obscured by the fence. Neither building appears eligible for the National Register of historic places. Both outbuildings are clad with dropped siding.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an end-gable plan asphalt shingled roof, exterior vinyl siding and a covered foundation. The façade (west elevation) features a central gabled wall dormer with a one-over-one window. The window has faux shutters. Below the wall dormer is a three-quarters width hipped Craftsman style porch supported by tapered piers on brick columns. A contemporary balustrade spans much of the porch. Within the porch bay is a slightly off-center door flanked by one-over-one windows with faux shutters.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is situated on a grass covered lot with mature trees in the front and rear yards. The property is situated in an urban residential neighborhood along the west side of a narrow road void of sidewalks (Rear Coats Street). A concrete walk extends from the porch to a gravel drive at the north end of the lot. The walk also partially extends east from the porch toward the road. Northwest of the dwelling is a small outbuilding with a steeply pitched gable roof, weatherboard siding and a vertical board door. The outbuilding is not individually eligible for the National Register of Historic Places. A wood privacy fence bounds the west end of the parcel.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

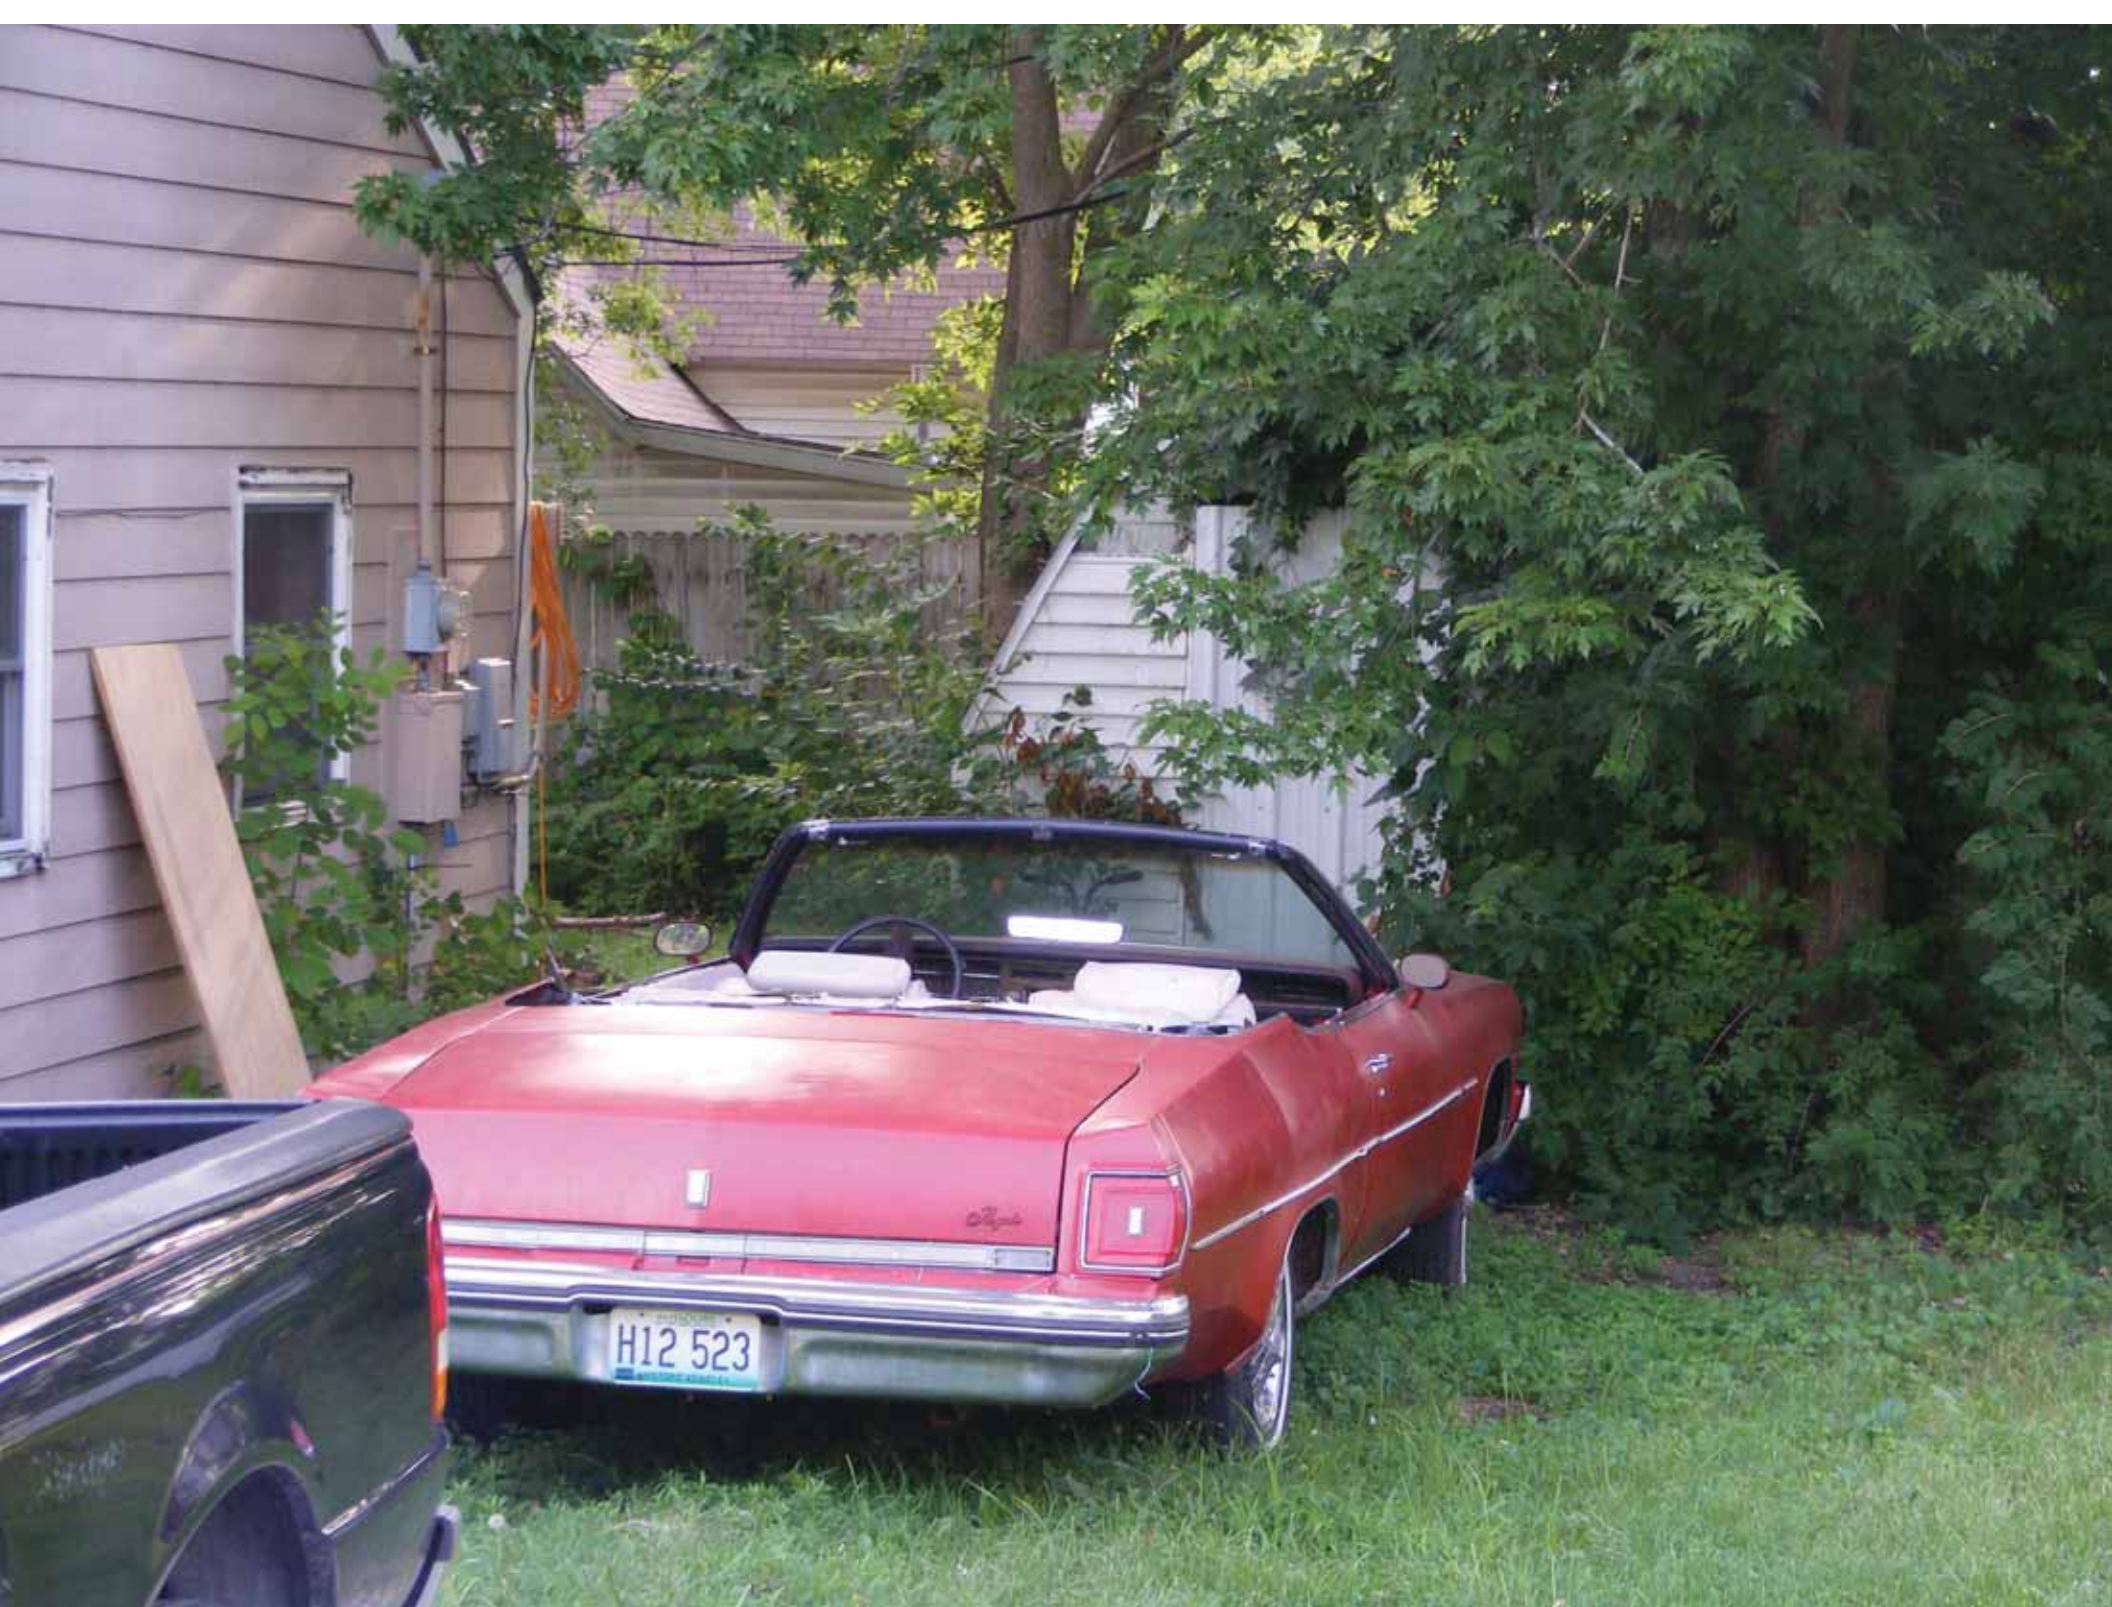

The dwelling has an asphalt-shingled gabled roof, what appears to be replacement wide board (possibly pressed wood) siding and a concrete foundation. The primary wing (south end) features a small central porch with original metal scallops below the sides of the gabled porch roof. The porch has a concrete stoop base, surrounded by a non-original wood balustrade. Replacement wood columns support the porch roof. Within the porch bay is a replacement paneled door. The porch is offset by single (south) and paired (north) six-over-six replacement windows. Remaining windows are of similar configuration. A set back linear wing at the north end of the dwelling features single and paired windows on the façade (east elevation). The wing's north elevation has a secondary entry bay filled with a solid door, offset by two one-over-one windows. Gable fields are filled with original louvered vents.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The grass covered lot is situated on the west side of Coats Street in an urban residential neighborhood. The rear yard has mature trees. The east end of the lot is bounded by a concrete public sidewalk. An intersecting private walk leads from the public sidewalk to the porch. The front yard features plants and shrubs. A gravel drive bounds the north end of the lot. The rear yard supports a gable-front plan outbuilding with a two-light window on the east elevation. This outbuilding does not appear eligible for the National Register of Historic Places. Access was limited to the rear yard.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The 1.5-story dwelling has a hip on gable asphalt shingled roof, exterior vinyl siding and a concrete foundation. The primary (east) elevation has a beveled front facing gabled wing with a single one-over-one window on each of the three projecting walls. Above the central window is a fixed sash light. Gable returns frame the upper half-story bay. The southern half of the façade (east elevation) supports a shed single-story porch with milled columns and decorative bargeboard. Above the porch is a gabled dormer with returns. The dormer holds a one-over-one window. Within the porch bay, the primary entry faces south, filled with a 9-light paneled door. The east wall of the porch holds two one-over-one windows.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

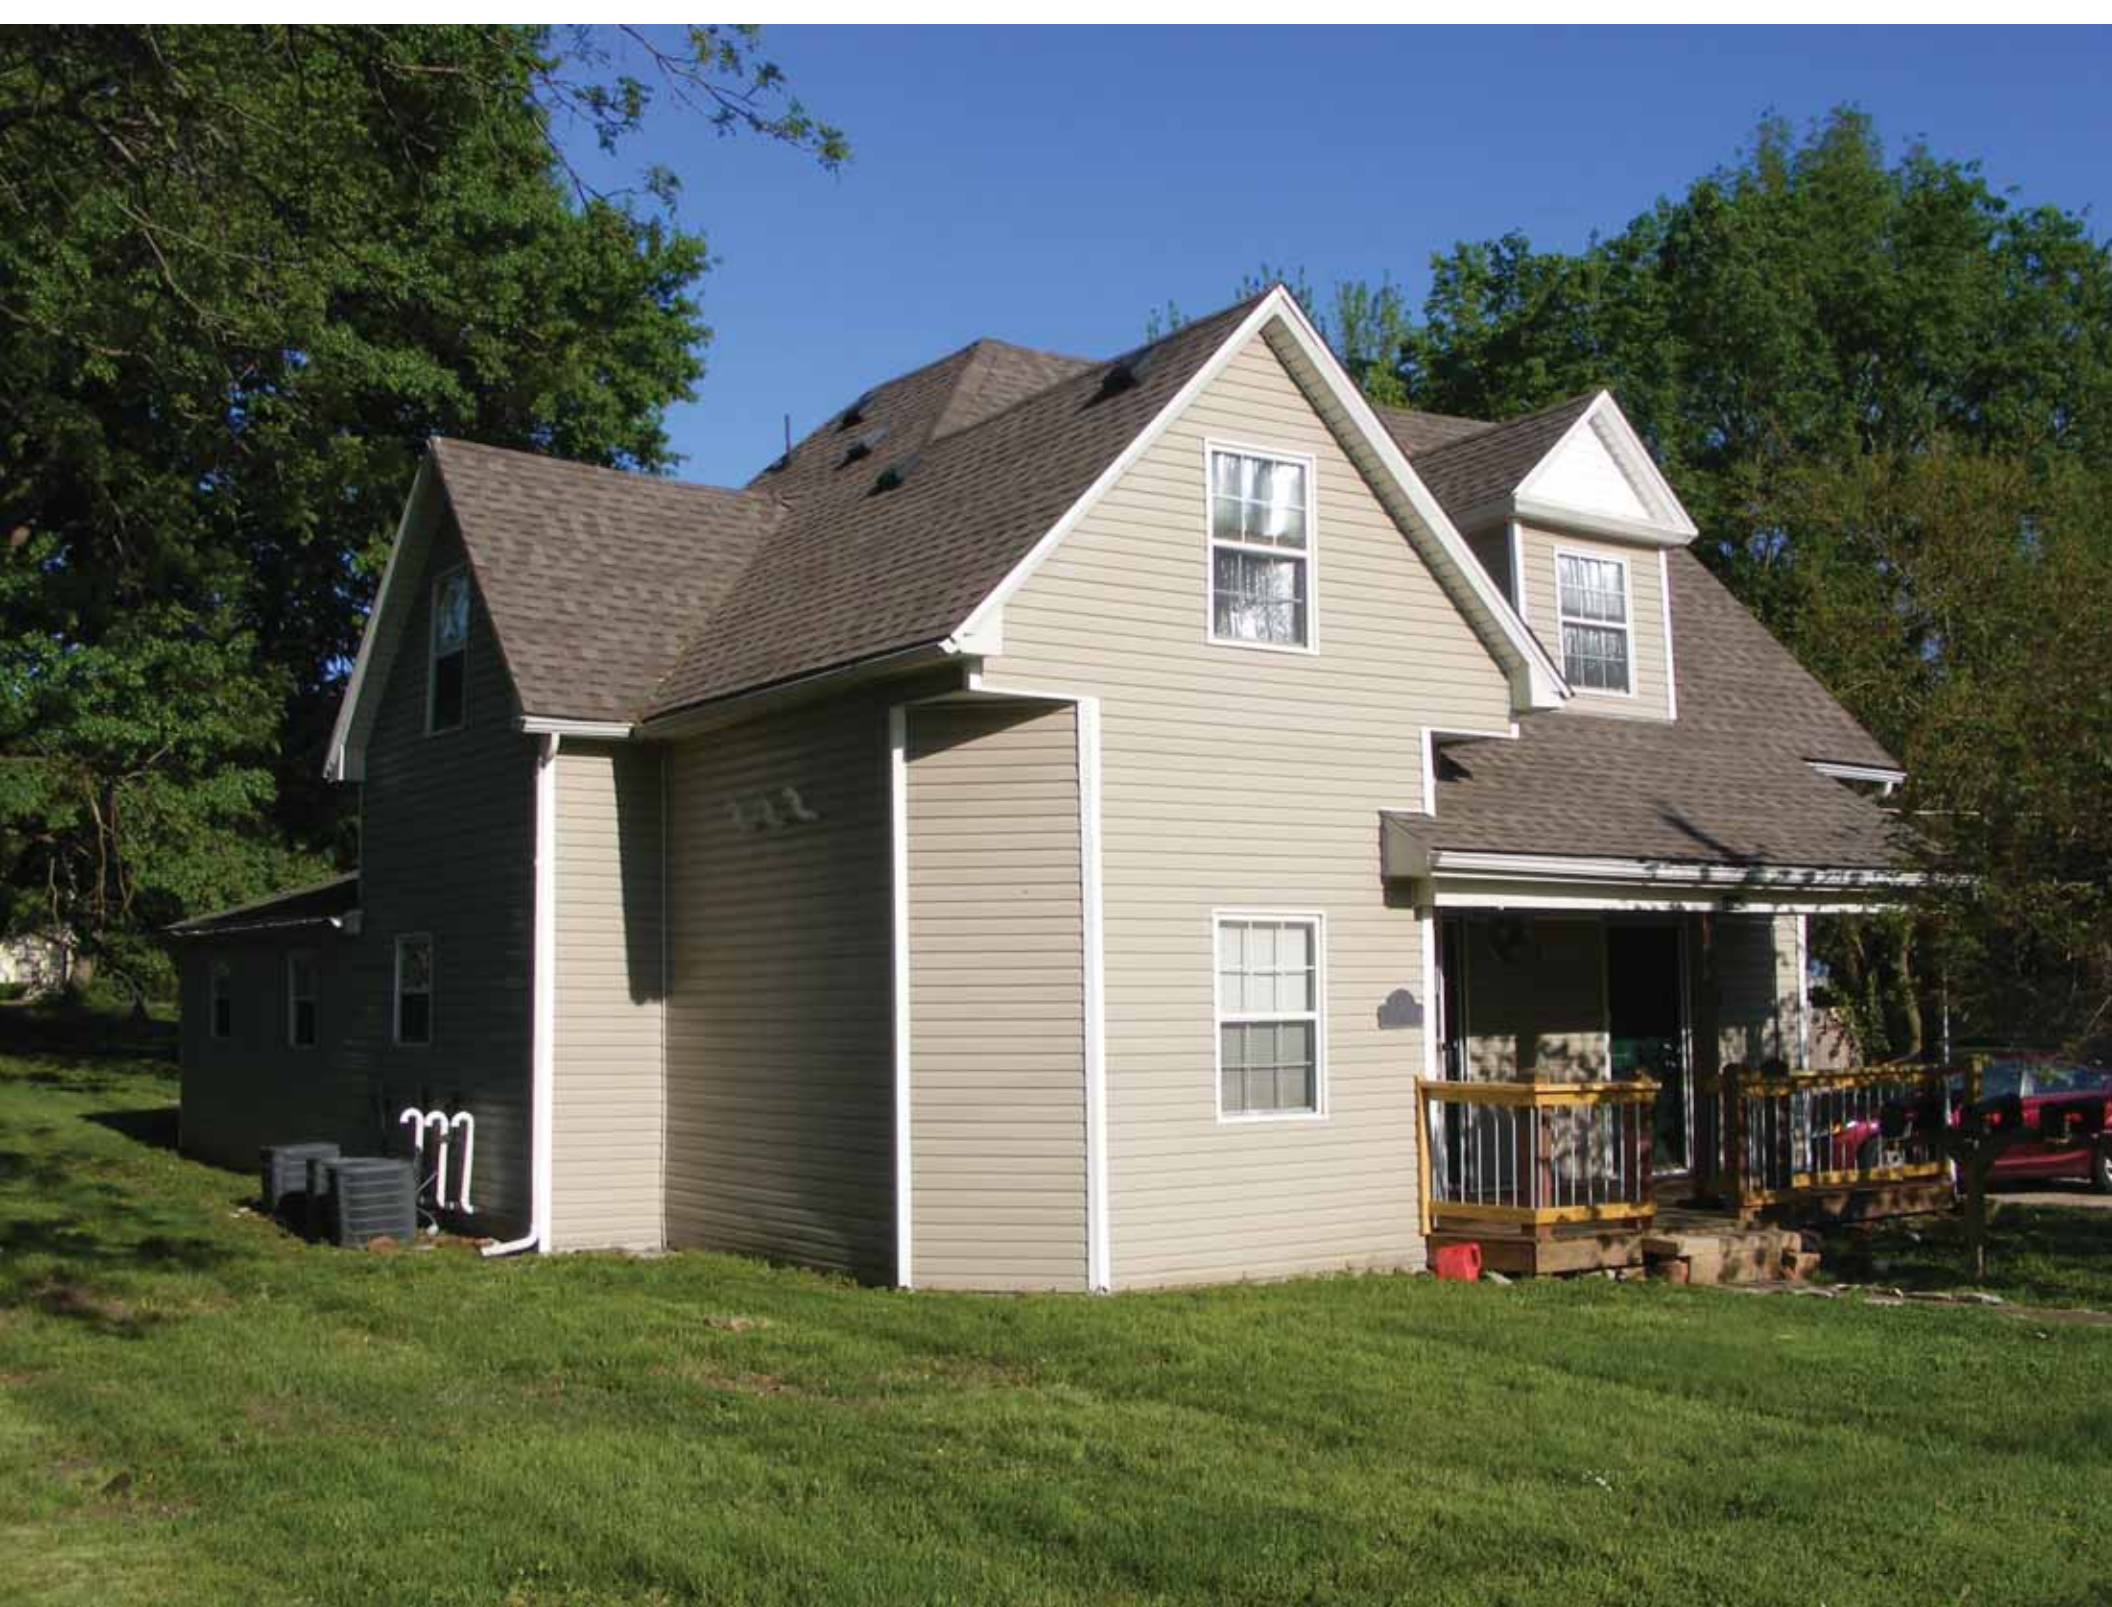

The dwelling is located on the east side of Coats Street on a grass covered lot in an urban residential neighborhood. The front yard supports a mature tree. The rear yard supports multiple trees. A concrete public sidewalk bounds the west end of the lot, intersected by a central private concrete walk leading to the porch. At the south end of the lot is a wide concrete drive. The drive leads to an outbuilding converted to residential space. The building has a low gabled roof, exterior synthetic siding, a solid off-center door below a fixed metal awning and a six-over-six widow on the façade (west elevation). The outbuilding is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has been modified from a single to multiple family residential property. The roof is steeply pitched, clad with asphalt shingles. The exterior is clad with synthetic siding that covers the foundation. Eaves are enclosed. On the façade (west) elevation is a central shed porch supported by replacement wood columns and surrounded by a non-original frame balustrade. Within the porch bay are two entries with c. 2010 paneled doors. Above the porch is a pedimented gabled dormer with a six-over-six window. Flanking the porch on the façade at the north end is a beveled front gable wing with upper and lower (on the west elevation) six-over-six windows. The dwelling has a rear shed wing and projecting gabled wing on the north elevation – both appear original.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is situated on a grass covered lot on the east side of Coats Street in an urban residential neighborhood. The property is bounded on the west end by a concrete public sidewalk. A private concrete walk intersects the public walk, providing access to the front porch. On the north end of the lot is a wide gravel drive. The front yard is void of foliage. The rear yard supports mature trees. Extending from the south end of the dwelling is a chain link fence. Immediately northeast of the dwelling is a gable-front garage with synthetic siding and an overhead track door. The garage is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

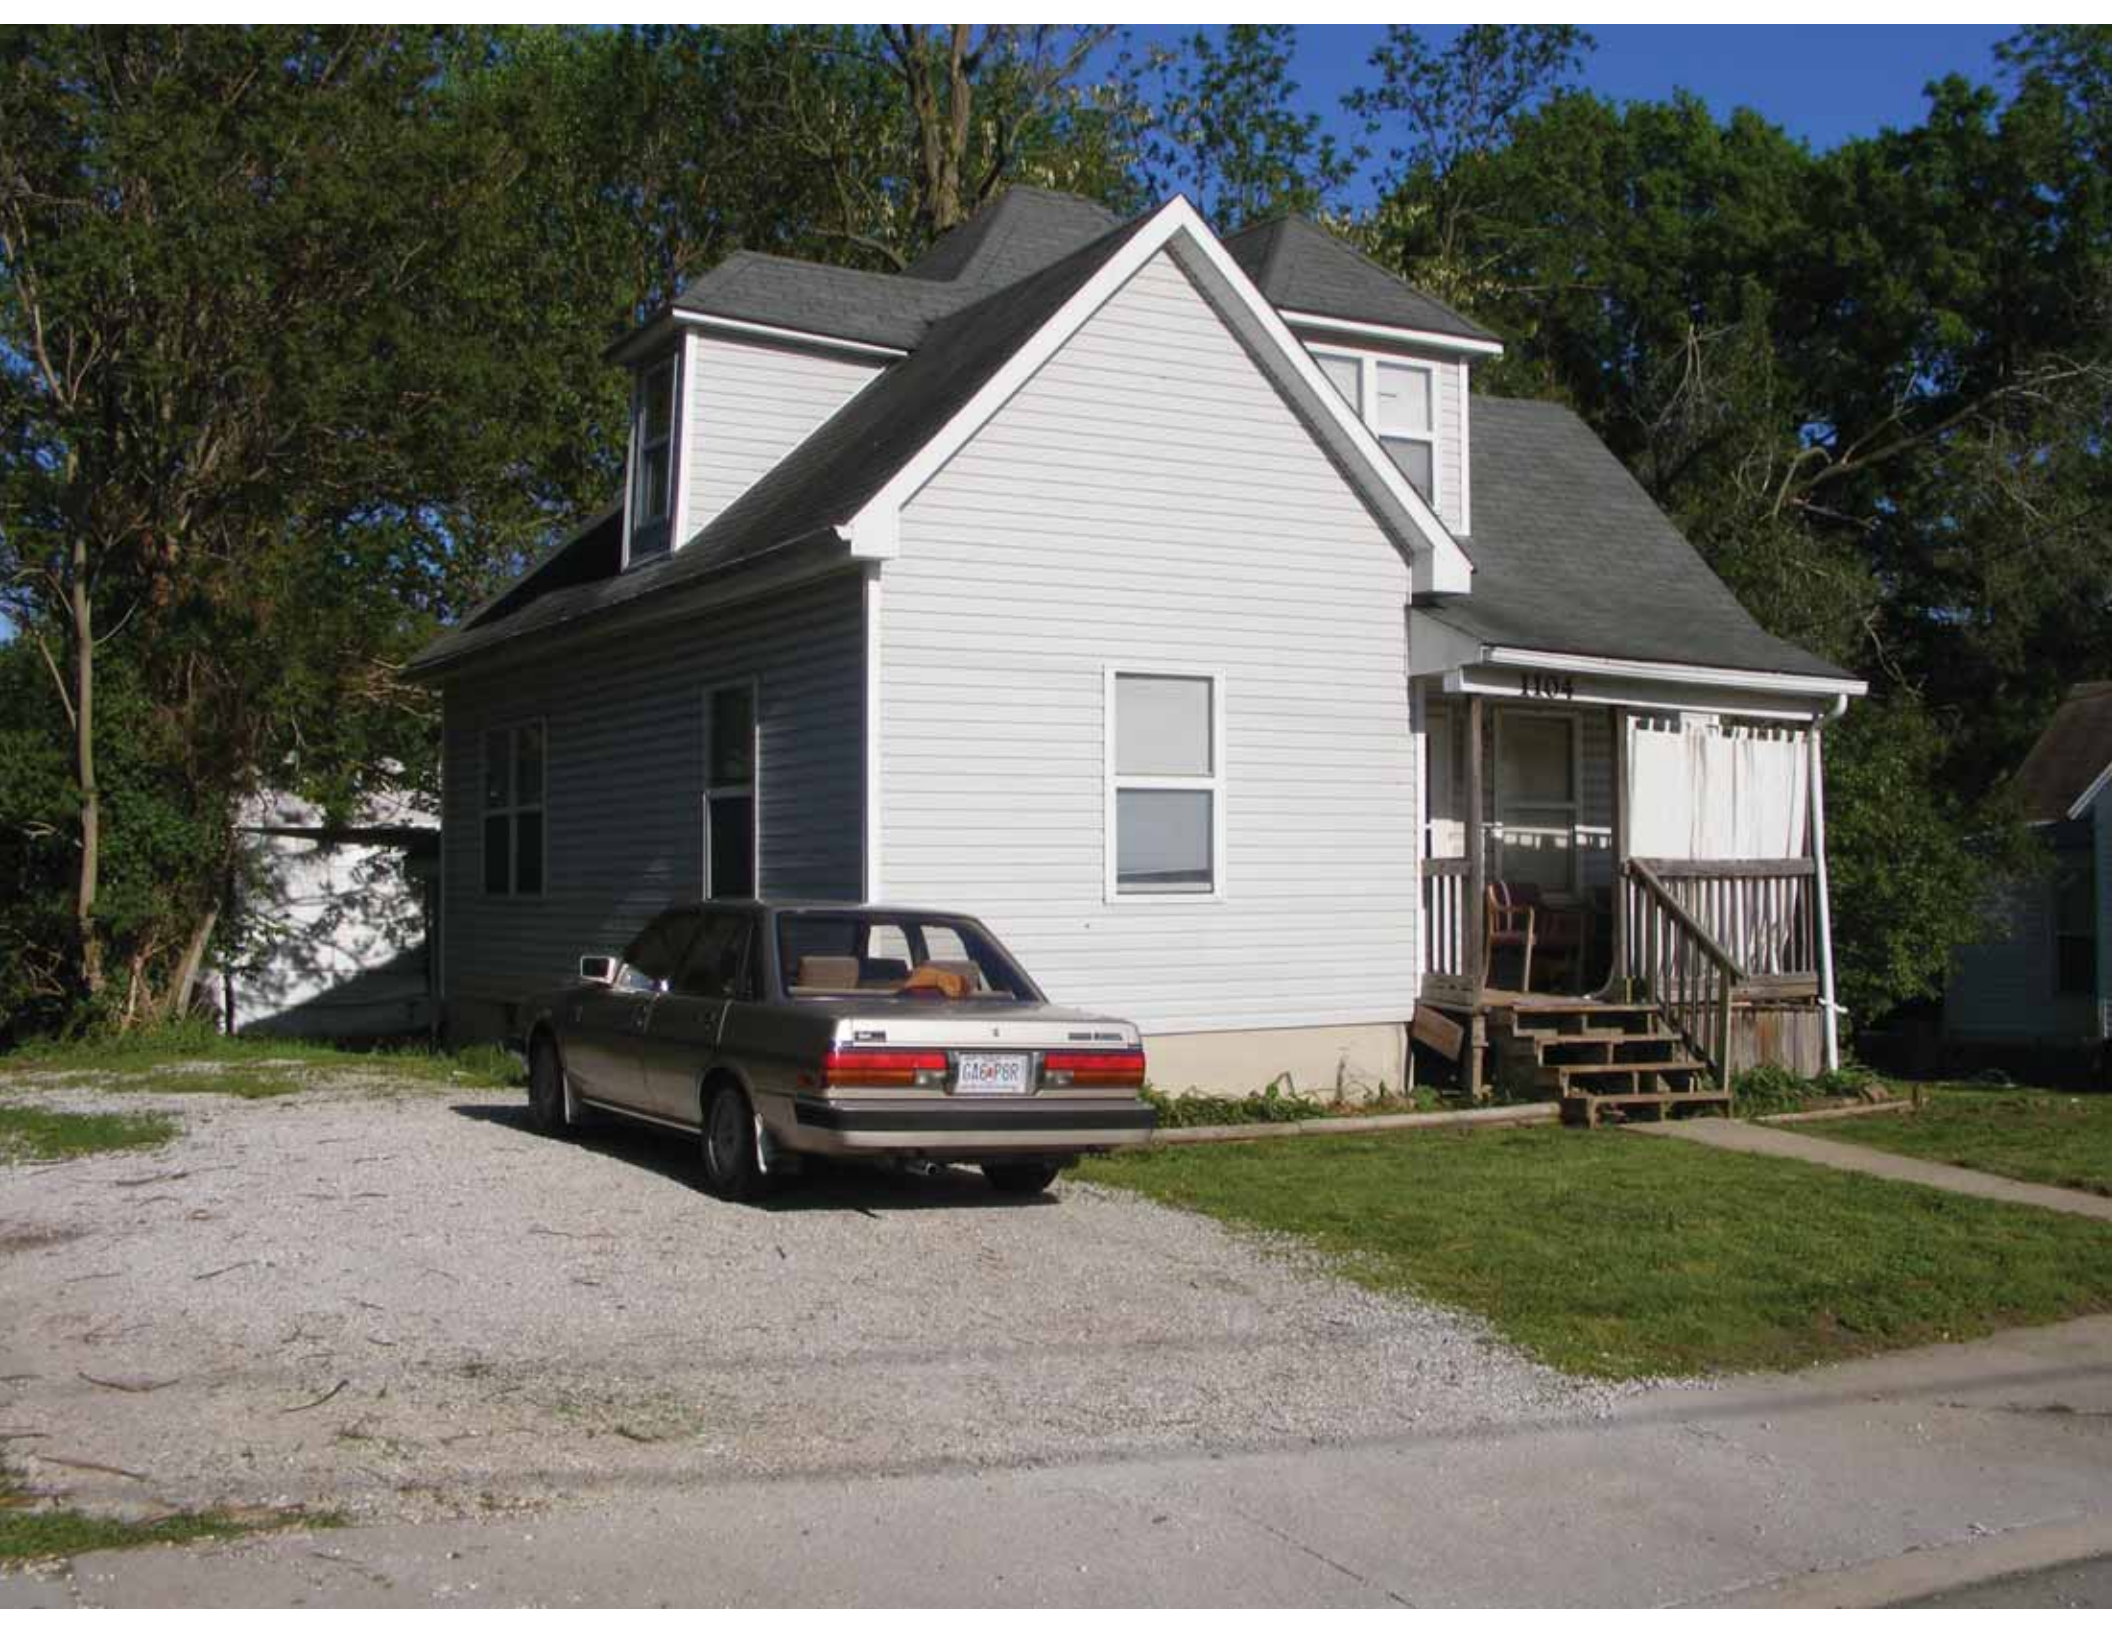

The dwelling has an asphalt-shingled roof, exterior vinyl siding and a concrete foundation. The porch foundation is pier, covered with vertical boards below the porch floor. The roof is gabled with a central high hip. Dormers have pyramidal roofs. The primary (west) elevation has a front facing gabled wing (north end) that holds a one-over-one window with a c. 2015 vinyl storm window. Remaining windows are of similar configuration. Offsetting the gabled wing is a half-width shed porch supported by slender wood replacement columns. The dwelling has a frame balustrade. Within the porch bay is a single door offset by a one-over-one window. Above the porch is a dormer with paired one-over-one windows.

The dwelling is on a grass-covered lot on the east side of Coats Street in an urban residential neighborhood. The west end of the parcel is bounded by a concrete public sidewalk. On the south end of the lot is a gravel drive. A private concrete walk extends partially from the public sidewalk toward the house. The yard supports mature trees and foliage – in front and back of the house. A chain link fence surrounds the front yard.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front plan Bungalow has an asphalt shingled roof, original weatherboard and wood shingle siding and a concrete foundation. The chimney at the center of the roofline is sheathed with concrete. On the façade (east elevation) is a hipped full-width porch supported by tapered wood columns on brick piers. The porch has a frame balustrade. Within the porch bay are two entries filled with c. 2010 paneled doors. Offsetting the doors on the north end is a one-over-one window. The gable field above the porch is clad with asphalt shingles and supports a one-over-one window. There is a louvered vent above the window.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass-covered lot thick with mature trees and foliage. The property is located on the east side of Coats Street in an urban residential neighborhood. Flanking the west end of the parcel is a concrete public sidewalk. A private walk leading from the porch intersects the public sidewalk. A curved gravel drive is situated at the north end of the lot. North of the drive is a gable-front plan outbuilding with asbestos shingle siding and a multi-light door. The outbuilding is not individually eligible for the National Register of Historic Places. Another outbuilding in the rear yard (per city maps) is obscured by foliage and a wood privacy fence. The building is unlikely to be eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt shingled gabled roof, exterior asbestos shingle siding and a concrete foundation. The primary (west) elevation has a central enclosed portico with an east elevation nine-light contemporary door. Flanking the projecting entry bay are single one-over-one windows. Above each of the first-floor windows are shed dormers with replacement one-by-one windows. Gable fields (north and south elevations) have paired one-over-one windows.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The building is on an asphalt-paved lot at the southeast intersection of Coats Street and North Boulevard. The paved area on the lot serves as a parking lot with marked spaces for automobiles. A concrete public sidewalk bounds the west end of the property along Coats Street. The sidewalk is separated from the parking area by a grassy strip. The grassy area has small shrubs and a small tree, as well as two free standing signs near the north and south ends of the property. The signs are supported by metal poles and bear the business name. The north end of the parcel is flanked by a grassy area with concrete posts that divides the parcel from North Boulevard. A small gable-front outbuilding south of the commercial building is obscured by a wood privacy fence. This small outbuilding is unlikely to be eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The building has a metal seamed low-gable roof, exterior seamed metal walls and a slab concrete foundation. The roofline extends slightly above the elevation wall and a concrete walk bounding the façade. The primary (east) elevation is composed of nine bays as follows – north to south – paired glass and aluminum doors, four fixed sash commercial windows, an overhead track door with three lights, a solid pedestrian door, a second overhead track door with three lights, paired glass and aluminum doors, a third overhead track door with three lights and a solid pedestrian door. The north elevation, which faces North Boulevard, features a solid pedestrian door and overhead track three-light door (east end). The remaining elevation holds four fixed sash commercial windows (center and west end). The building's business name is secured on a sign attached to the wall above the windows.

The one story commercial building's façade fronts east toward an asphalt paved parking lot and N. College Ave. The property is within an urban setting in a neighborhood that is mix of residential and commercial. The rear elevation faces west toward a second asphalt paved parking lot. Landscaping includes shrubs, trees, and grass around the parking lots. Sidewalks wrap around the property on all three of its street facing sides.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This is a single story EIFS clad commercial building with a flat roof with an attached single story commercial metal and EIFS sided building on the rear elevation. The single story EIFS clad building features a centered projecting bay entrance with three metal/glass doors each side of the bay. Centered on the façade is a band of metal/glass windows that wraps the building. Side elevations feature two projecting perpendicular narrow columns diving the band of windows. The single story metal building attached at the rear elevation features an EIFS clad façade, low-pitched front gable and metal/glass entrance with display windows. The entrance holds a ADA concrete access ramp with iron railings. A shed cloth awning is above the entrance.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.
The property is located on the west side of College Avenue. The dwelling is situated on the east portion of the property on a grass covered residential lot in an urban setting. A public sidewalk runs north-south adjacent to the eastern edge of the property. The property has shrubs and small trees located in the northeast, southeast, and northwest corners of the property. An outbuilding is located on the southwestern portion of the property and has a gable-front plan and clad in asbestos siding. The outbuilding is not eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
The dwelling is a single-story frame with an asphalt-shingled cross gabled roof and concrete foundation. The exterior has a mixture of asbestos, vinyl and wood siding. The primary elevation holds a front gable with returns and is offset at the north end. Gable end holds a louvered vent and the lower level holds one-over-one window. To the left of the front gable section is a projecting vertical wood clad addition with a low-pitched asphalt-shingled roof. The addition holds an off-set entrance with a metal paneled door. Side elevations hold one-over-one windows and some windows are covered over.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.
The property is located on the west side of College Avenue and the dwelling is situated on the east portion of the property on a grass covered residential lot in an urban setting. A public concrete sidewalk runs north-south adjacent to the eastern edge of the property. The property has shrubs and small trees located in the western back portion of the property. An oversized shared gravel driveway is located on the north side of the property.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
The property is a 1.5 story frame dwelling with an asphalt shingled gable on hip, exterior asbestos siding and a concrete foundation. Façade holds a front gable with two-over-two window (vertical) on the lower level and a one-over-one window in the gable end. To the left of the gable is a partial-width porch, asphalt shingled shed roof supported by decorative iron posts (non-original ca. 1960) and iron railings with a wood plank deck. Porch bay area holds an entrance at the "L" offset to left by a two-over-two window (vertical). Side elevation windows are similar to façade windows. Rear elevation holds an addition with a shed roof.

Property has a gravel driveway.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
The property is a single-story frame dwelling with a medium-pitched asphalt shingled hip roof, rectangular plan and concrete foundation. Dwelling features metal siding on façade with wood board and batten siding on side elevations. Primary elevation has a projecting section to the right that holds a one-over-one picture window with two-over-two side windows offset to right by a two-over-two (vertical) window. The inset section on primary elevation holds a single bay garage with a wooden paneled door with a row of three lights. Entrance is at the "L" on the projecting section and holds a wooden panel and glass door with a French style outer door. Inset area is sheltered under the hip roof supported by a single wooden column with wooden railing at the left end. Side elevation windows are two-over-two (vertical). Windows are offset by louvered shutters.

The property is located on the west side of College Avenue and the south side of Smith Street. The building is situated on the southeast portion of the property on a grass covered lot in an urban setting. An L-shaped asphalt parking lot surrounds the building on the west and north side. A public sidewalk runs north-south adjacent to the eastern edge of the property. Two small entry driveways are located on the north end of the property and a wooden fence line is located on the western edge. Mature trees line the south edge of the property and smaller individual trees are located on the east and north sides.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The property is a two-story frame multi-family dwelling with an asphalt shingled side gabled roof, exterior vinyl siding and a concrete foundation. The primary elevation holds sheltered gallery porches (lower and upper level); upper level is sheltered by roofline supported by narrow square wooden posts. At each end of the façade are wooden staircases with wood railings, sheltered by an asphalt shingled sloped awning. Each staircase faces inward toward each other (north-south). The primary elevation on the lower level holds two centered entrances and are flanked by two light slider windows. The upper level holds three entrance and six, two light slider windows. Side elevation hold narrow fixed windows.

The property is located on the west side of College Avenue and the north side of Smith Street. The dwelling is situated on the southeast portion of the property on a grass covered residential lot in an urban setting. A public sidewalk runs north-south adjacent to the eastern edge of the property as well as east-west on the south end of the property. The property has mature trees located on the western and northern edges. A metal outbuilding is located adjacent to the dwelling to the west. The outbuilding is not eligible for listing in the National Register of Historic Places. A tall wooden privacy fence is located on the east portion of the property. An asphalt driveway is located on the southwest portion of the property.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The property is a single-story frame dwelling, asphalt shingled truncated hip, asbestos siding and concrete foundation. Primary elevation holds an off-centered entrance flanked by picture windows and a paired one-over-one window. Side elevations hold fixed windows. Located on the flat section of the roof is small triangle shaped addition (side gable) clad in asphalt shingles. This area may have held a chimney at one time.

The property is a large L-shaped lot that has been combined with other properties along Smith and Fay Streets. The property is a community garden with a variety of small structures, fences, and outbuildings located throughout. There are two outbuildings on this property lot. The first outbuilding is constructed of concrete block with a front gable roof; gable end clad in brick. The primary elevation holds two double doors with double wooden swing type doors. The second building is one-story, clad in wood siding with a metal seam side gable. Elevations hold one-over-one windows; one elevation holds a vertical wood door with a small animal opening at the bottom. These buildings are not eligible for listing in the National Register of Historic Places.

The dwelling is on a grass covered parcel on the north side of Fairview Avenue within an urban residential neighborhood. The south end of the lot is flanked by a concrete public sidewalk. A private sidewalk extends from the public walk to the porch. A gravel drive flanks the east elevation of the dwelling, leading to a detached gable-front plan garage. The garage is clad with stucco and supports an overhead track door. The gable field above the garage door is filled with asphalt shingles. The garage is not individually eligible for the National Register of Historic Places. A wood privacy fence for an adjacent property (on the west) flanks the west end of the parcel.

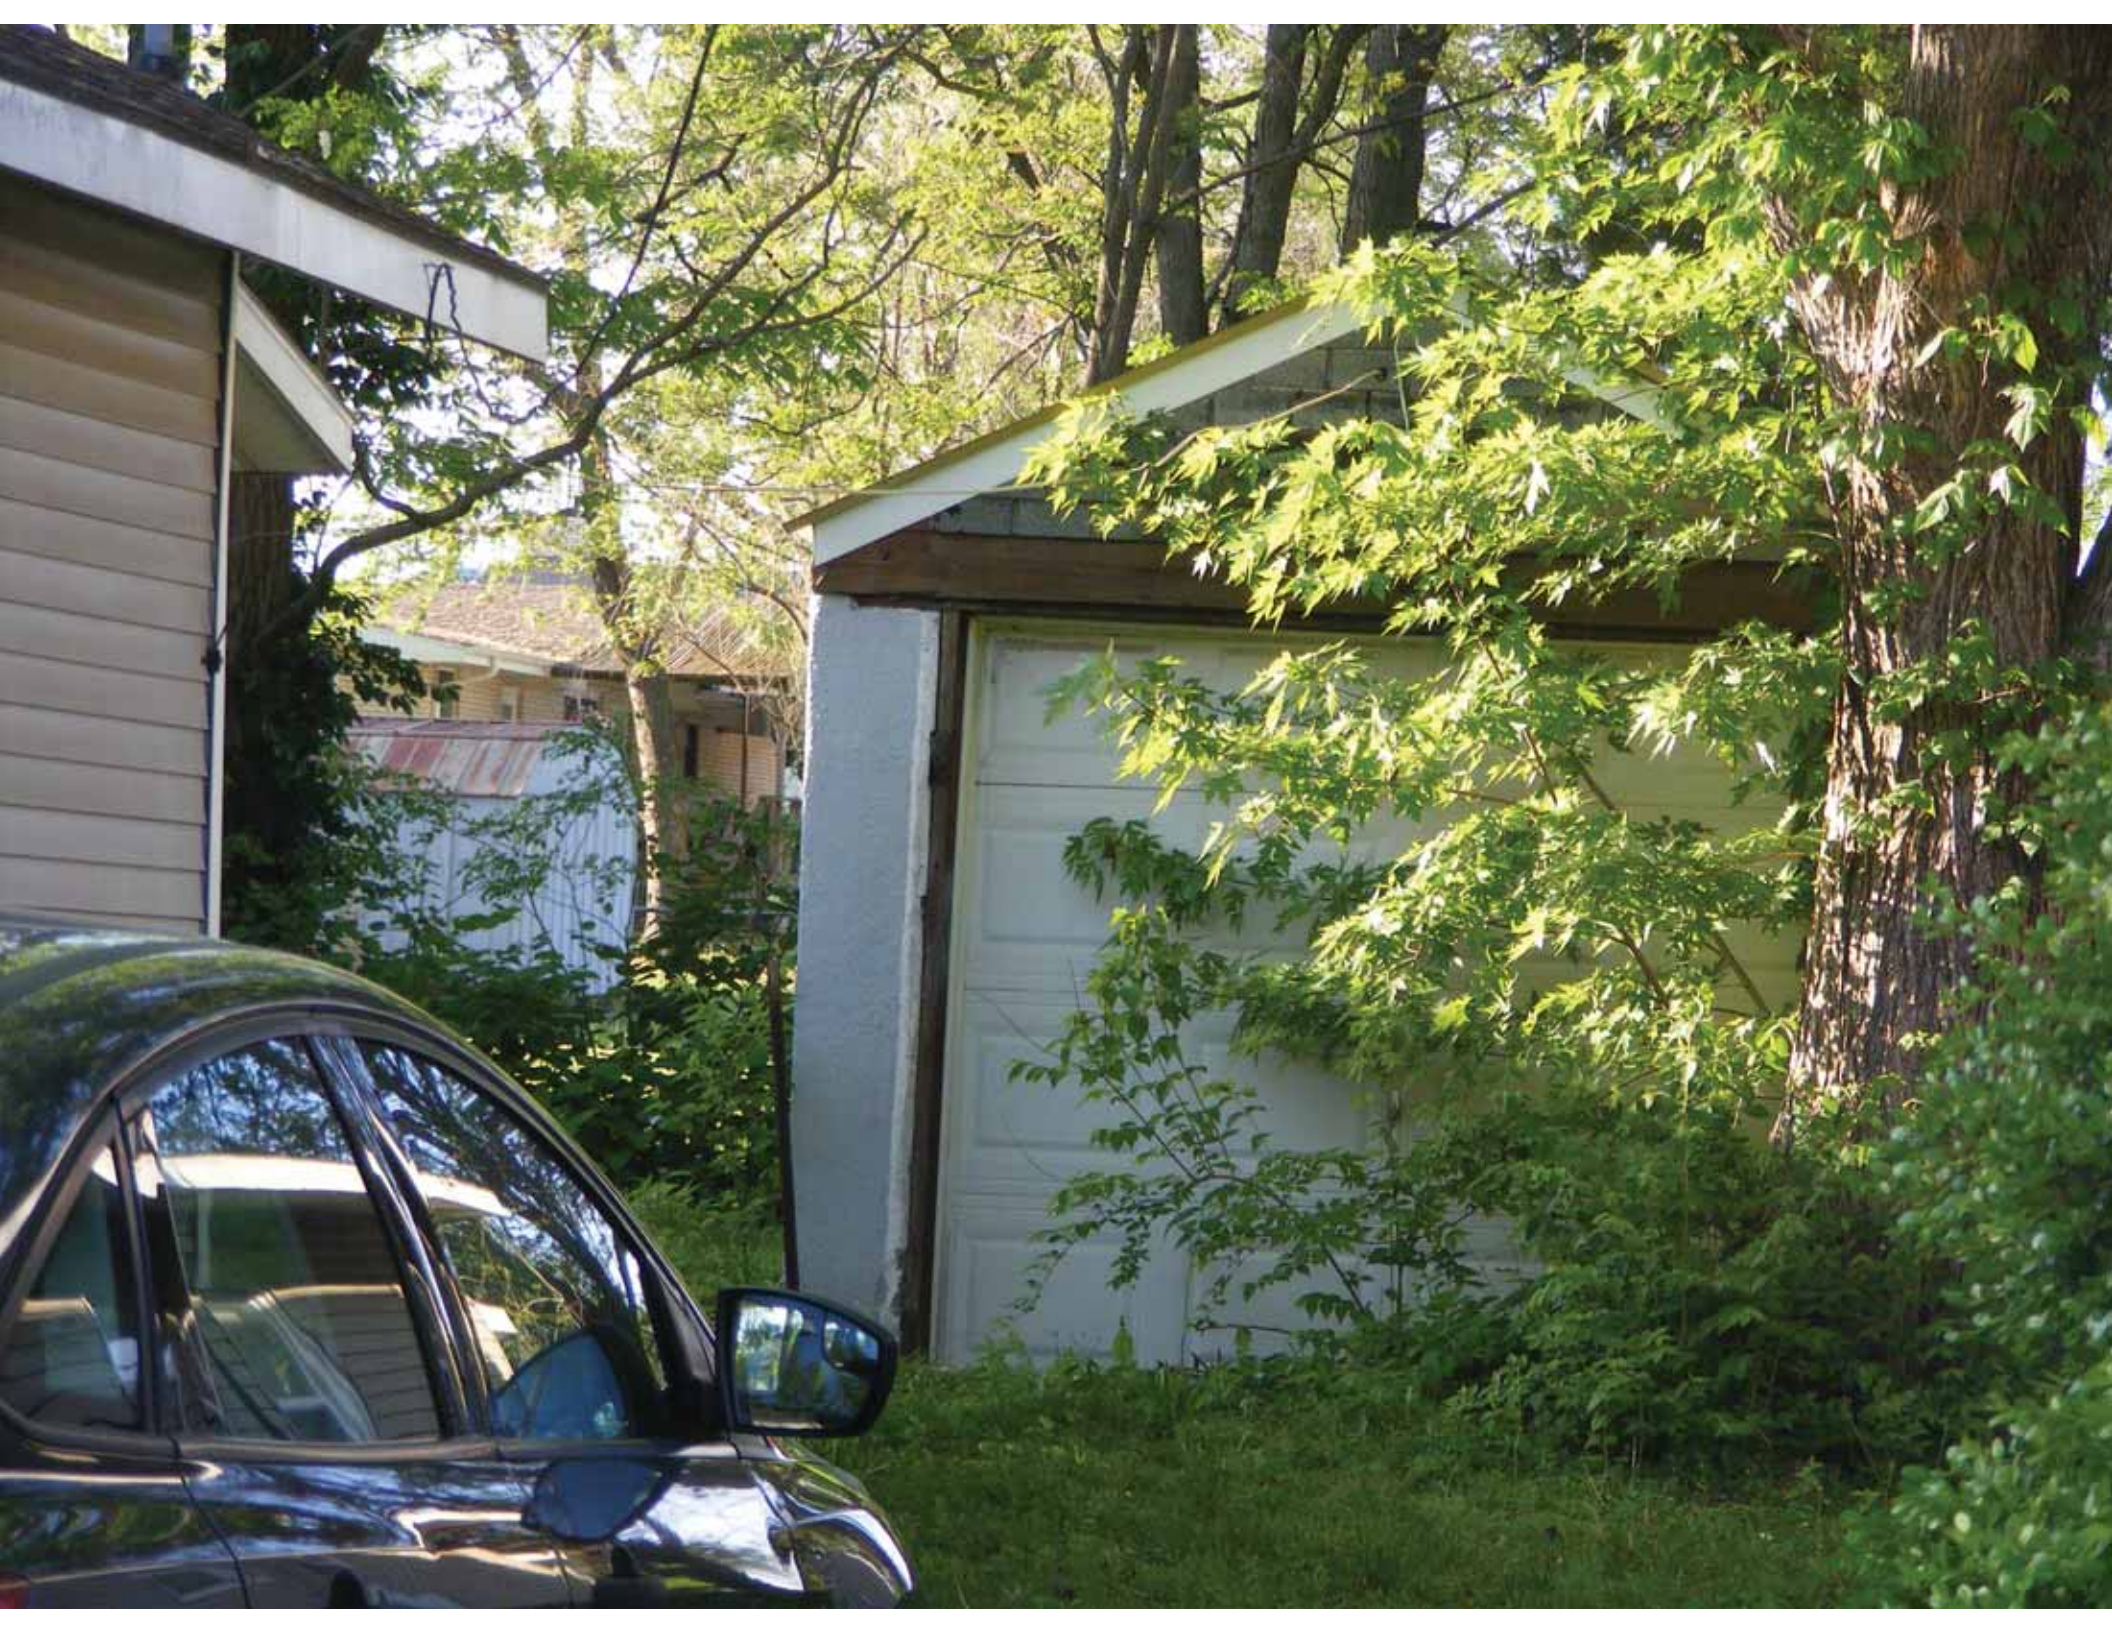

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front plan Bungalow has an asphalt-shingled roof, exterior synthetic siding and a concrete foundation. Windows are c. 2019 one-over-one. The façade (south elevation) supports an off-center half-width gabled porch supported by c. 2019 wood columns. A c. 2019 frame balustrade surrounds the porch. Within the porch bay are a single door offset by a one-over-one window. The door is obscured by a contemporary storm door.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass-covered lot on the south side of Fairview Avenue within an urban residential neighborhood. The front yard supports mature shrubs. The rear yard has mature trees. A concrete public sidewalk flanks the north end of the lot. A private walk extends from the public sidewalk to the porch. A gravel drive bounds the west end of the parcel.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt-shingled pyramidal roof, exterior asbestos shingle siding and a stone (east) and concrete (west) foundation. On the façade (north elevation) is a central hipped porch supported by original milled columns. The porch base is under reconstruction (frame materials). It also appears that the stone foundation is being replaced with concrete. Within the porch bay is a central entry filled with a contemporary door with an upper fanlight. The door is flanked by individual one-over-one windows. Above the porch is a gabled dormer with a one-over-one window. Side (east and west) dormers have hipped roofs/ Side dormer walls are clad with asphalt shingles. The side dormers support one-over-one windows.

The dwelling is on a grass covered lot on the south side of Fairview Avenue within an urban residential neighborhood. The front yard is void of foliage. The rear yard supports mature trees. A concrete public sidewalk flanks the north end of the parcel. A concrete parking pad is situated northwest of the dwelling. A concrete walk leads from the parking area to the porch.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This 2019 dwelling mimics the neighborhood's Craftsman housing stock constructed in the 1920s. The dwelling has a front gable plan with an off-center porch supported by milled columns. The exterior is clad with wide boards – possibly pressed wood. The porch gable field is filled with faux wood shingle siding. The foundation is covered with limestone veneer. Within the porch bay is a solid paneled door. Windows are paired and single six-over-six design.

The dwelling is on a grass covered parcel on the north side of Fairview Avenue within an urban residential neighborhood. A gravel drive bounds the west end of the lot. A concrete public sidewalk extends along the south end of the parcel. A perpendicular private walk leads from the public sidewalk to the porch. A landscaped flower bed surrounds the porch on the primary elevation. The rear yard supports mature trees. North of the dwelling is a small outbuilding with a shed roof and solid door. The outbuilding is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt shingled roof, exterior vinyl siding and a concrete foundation. Windows are replacement one-over-one. The primary (south) elevation supports an off-center gabled porch supported by triple slender columns on brick piers. A contemporary balustrade surrounds the porch. The façade door is centered and flanked by one-over-one windows.

The dwelling is situated on a grass covered lot on the south side of Fairview Avenue within an urban residential neighborhood. The lot has mature trees in the front and rear yards. A concrete public sidewalk flanks the north end of the lot, intersecting with a private concrete walk leading to the porch. A garage, situated southeast of the dwelling is shared with 710 Fairview Avenue. The survey form for 710 Fairview Avenue provides a description of the garage.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt-shingled gable-front roof, exterior synthetic siding and a concrete foundation. The primary (north) elevation has a cross-gabled front porch supported by tapered piers on brick columns. One column is replacement wrought iron on a brick pier. A contemporary balustrade spans the porch. Within the porch bay is a central entry bay flanked by paired one-over-one replacement windows. The entry bay is filled with a c. 2000 paneled door. The front gable field retains a louvered vent. The west elevation supports an exterior end brick chimney.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the north side of Fairview Avenue within an urban residential neighborhood. The front yard supports mature shrubs. A metal mailbox on a wood post offsets a concrete walk leading from the porch to the public concrete sidewalk flanking the south end of the parcel. A gravel drive extends along the east elevation. Situated northeast of the dwelling is a prefabricated outbuilding with a gabled roof. The outbuilding has paired, braced doors below a louvered vent. The outbuilding is not individually eligible for the National Register of Historic Places.

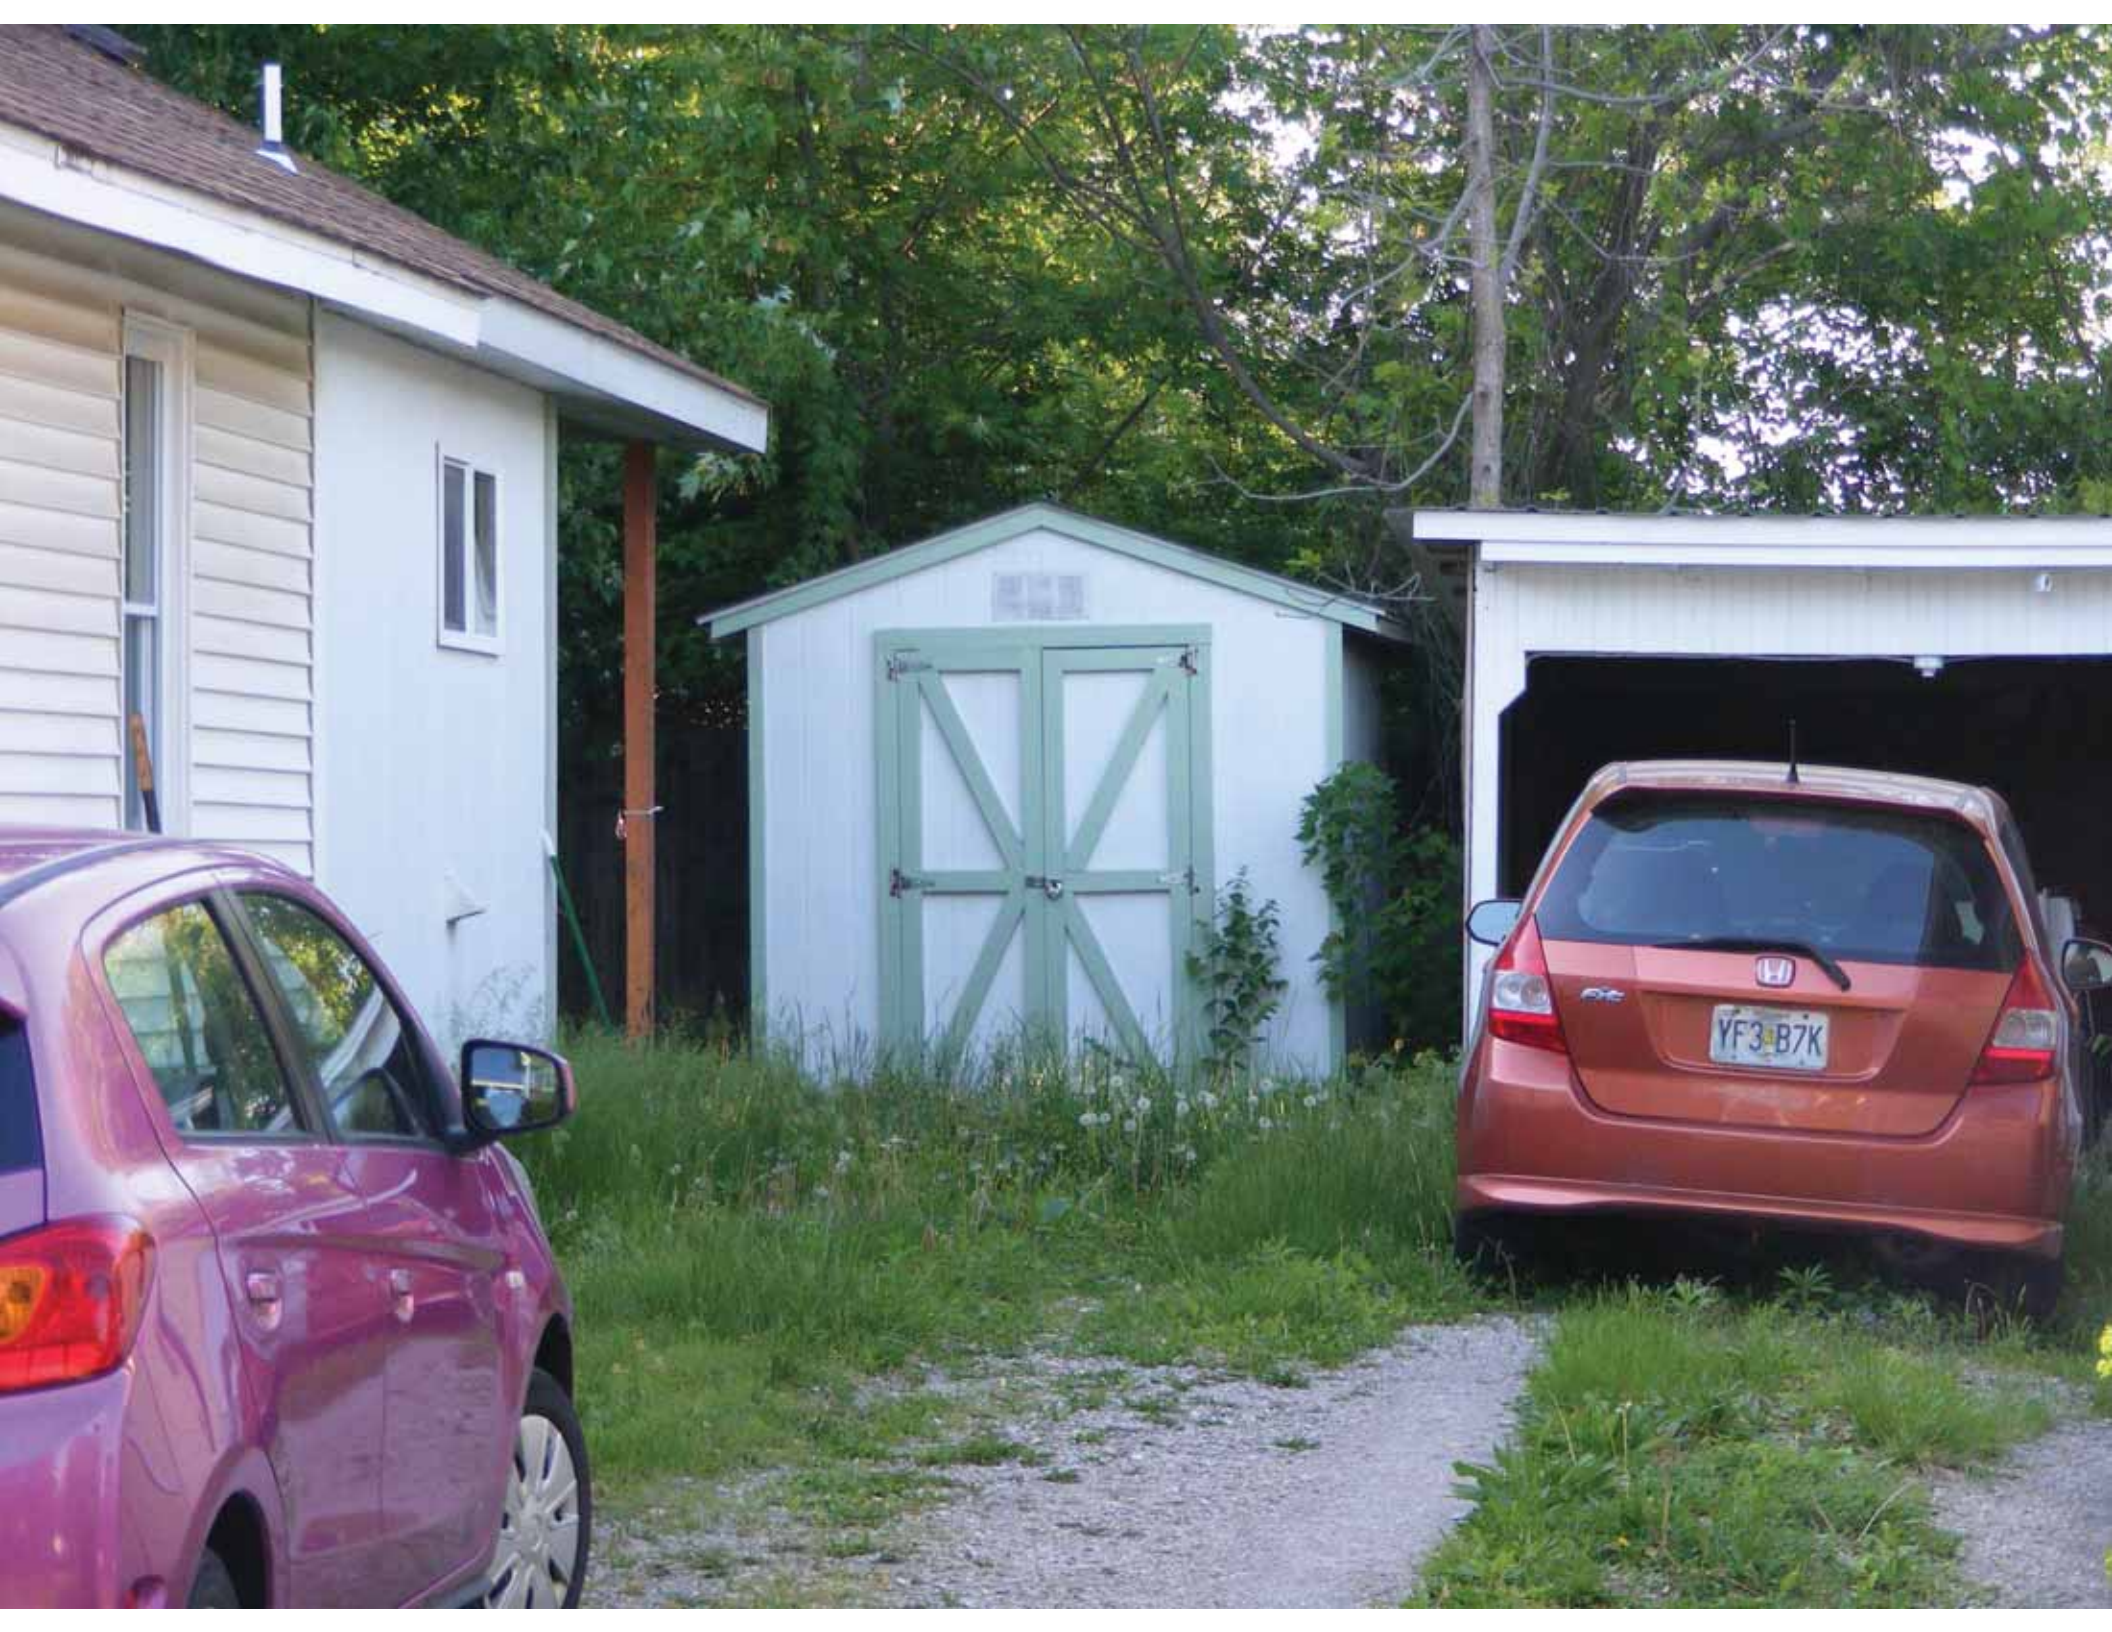

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front plan dwelling has an asphalt-shingled roof, exterior synthetic siding and a concrete foundation. The façade (south elevation) has a full-width integral porch supported by tapered columns on brick piers. Above the porch, the gable field holds an original six-light window flanked by louvered vents. Within the porch bay is a three-light Craftsman style door with contemporary storm door. The entry bay is flanked by one-over-one replacement windows with faux shutters. A rear wing is clad with vertical boards and supports a sliding two-light window on the east elevation. At the roofline ridge is a central brick chimney.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered parcel on the south side of Fairview Avenue within an urban residential neighborhood. The yard supports mature trees. A concrete public sidewalk flanks the north end of the lot. A private concrete walk leads from the porch to the public sidewalk. A wide gravel drive flanks the west end of the dwelling, leading to a rear garage originally shared with the dwelling at 708 Fairview Avenue. The c. 1920 two-car garage has a front gabled roof, exterior original paired vertical board doors and wood shingles in the gable field. The garage is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt-shingled roof and a foundation composed of stone and concrete. The dwelling is largely clad with what appears to be Masonite board siding. Within the porch, the exterior is clad with dropped horizontal wood siding. The porch is shed, supported by tapered piers on brick columns. Within the porch bay is a c. 2000 paneled door offset by a one-over-one window. The east porch wall is composed of the front facing gabled wing which supports a single one-over-one window. End gable fields (east and west) hold louvered vents. Side elevations hold single one-over-one windows. The dwelling has a rear shed wing.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

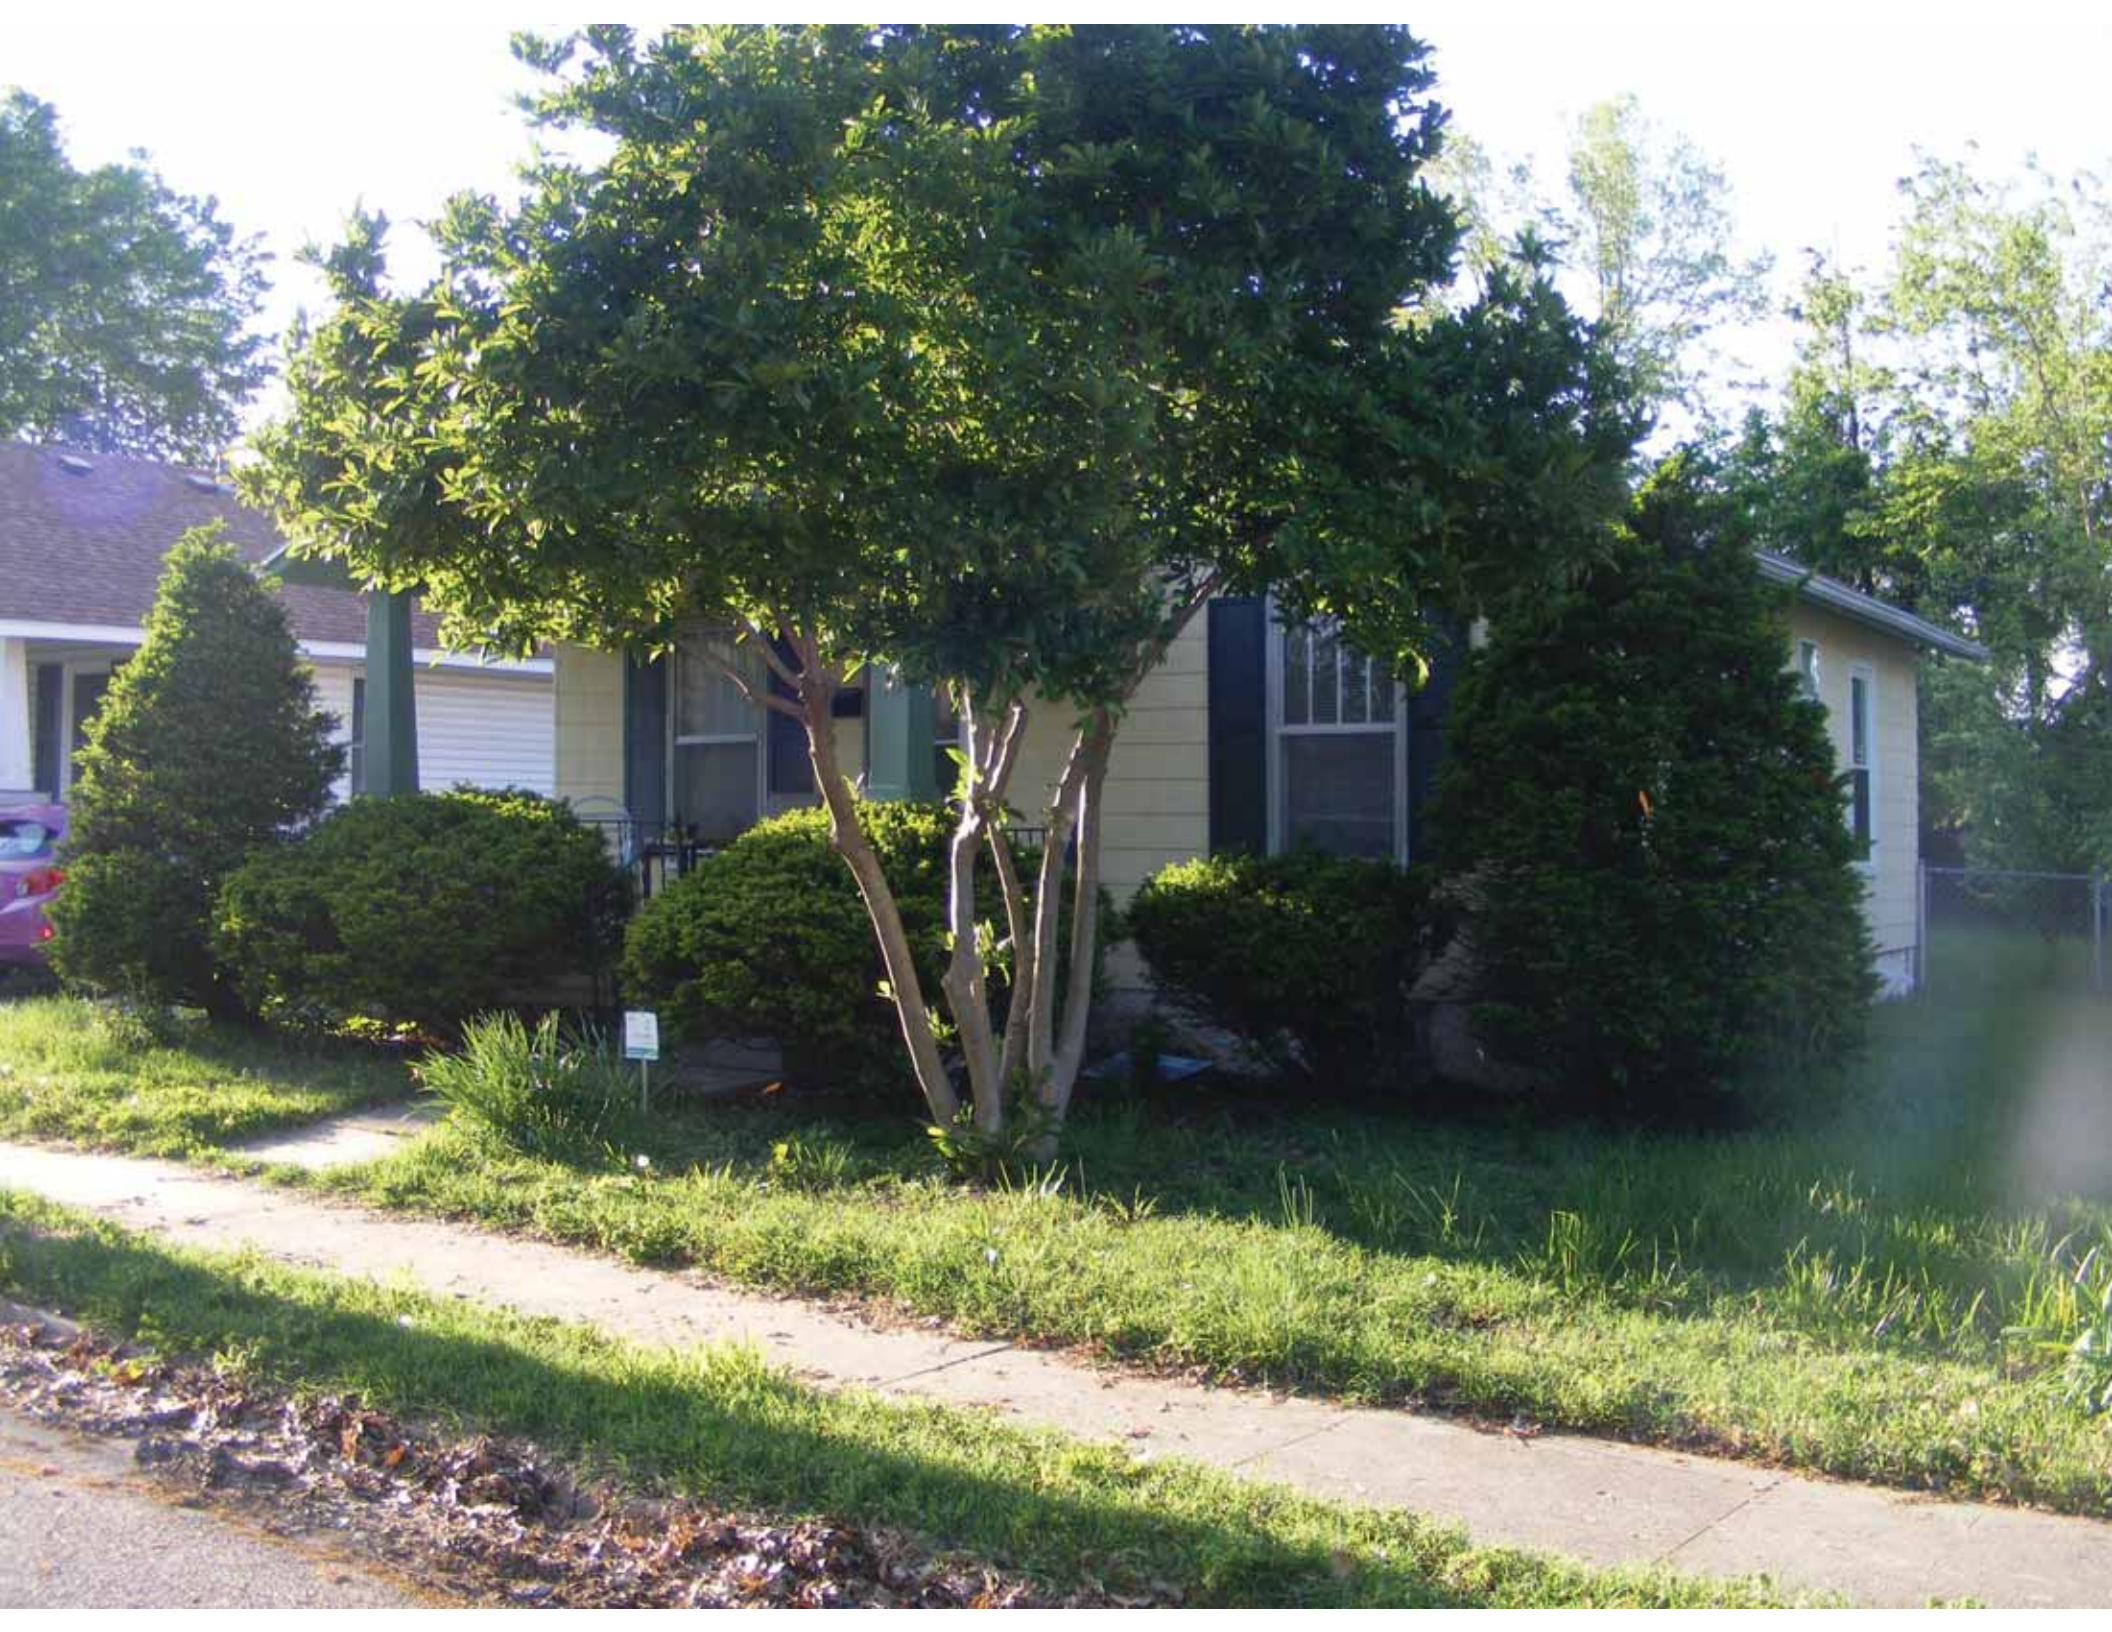

The dwelling is on a grass covered lot on the north side of Fairview Avenue within an urban residential neighborhood. The south end of the parcel is flanked by a concrete public sidewalk. A perpendicular concrete walk leads from the sidewalk to the porch. The front yard has mature shrubs and trees, as does the rear yard. A gravel drive flanking the west end of the dwelling leads to a detached shed roof garage. The garage is vertical board construction with an open garage bay offset by a multi-light original paneled door. The outbuilding is not individually eligible for the National Register of Historic Places. A chain link fence partially surrounds the rear yard.

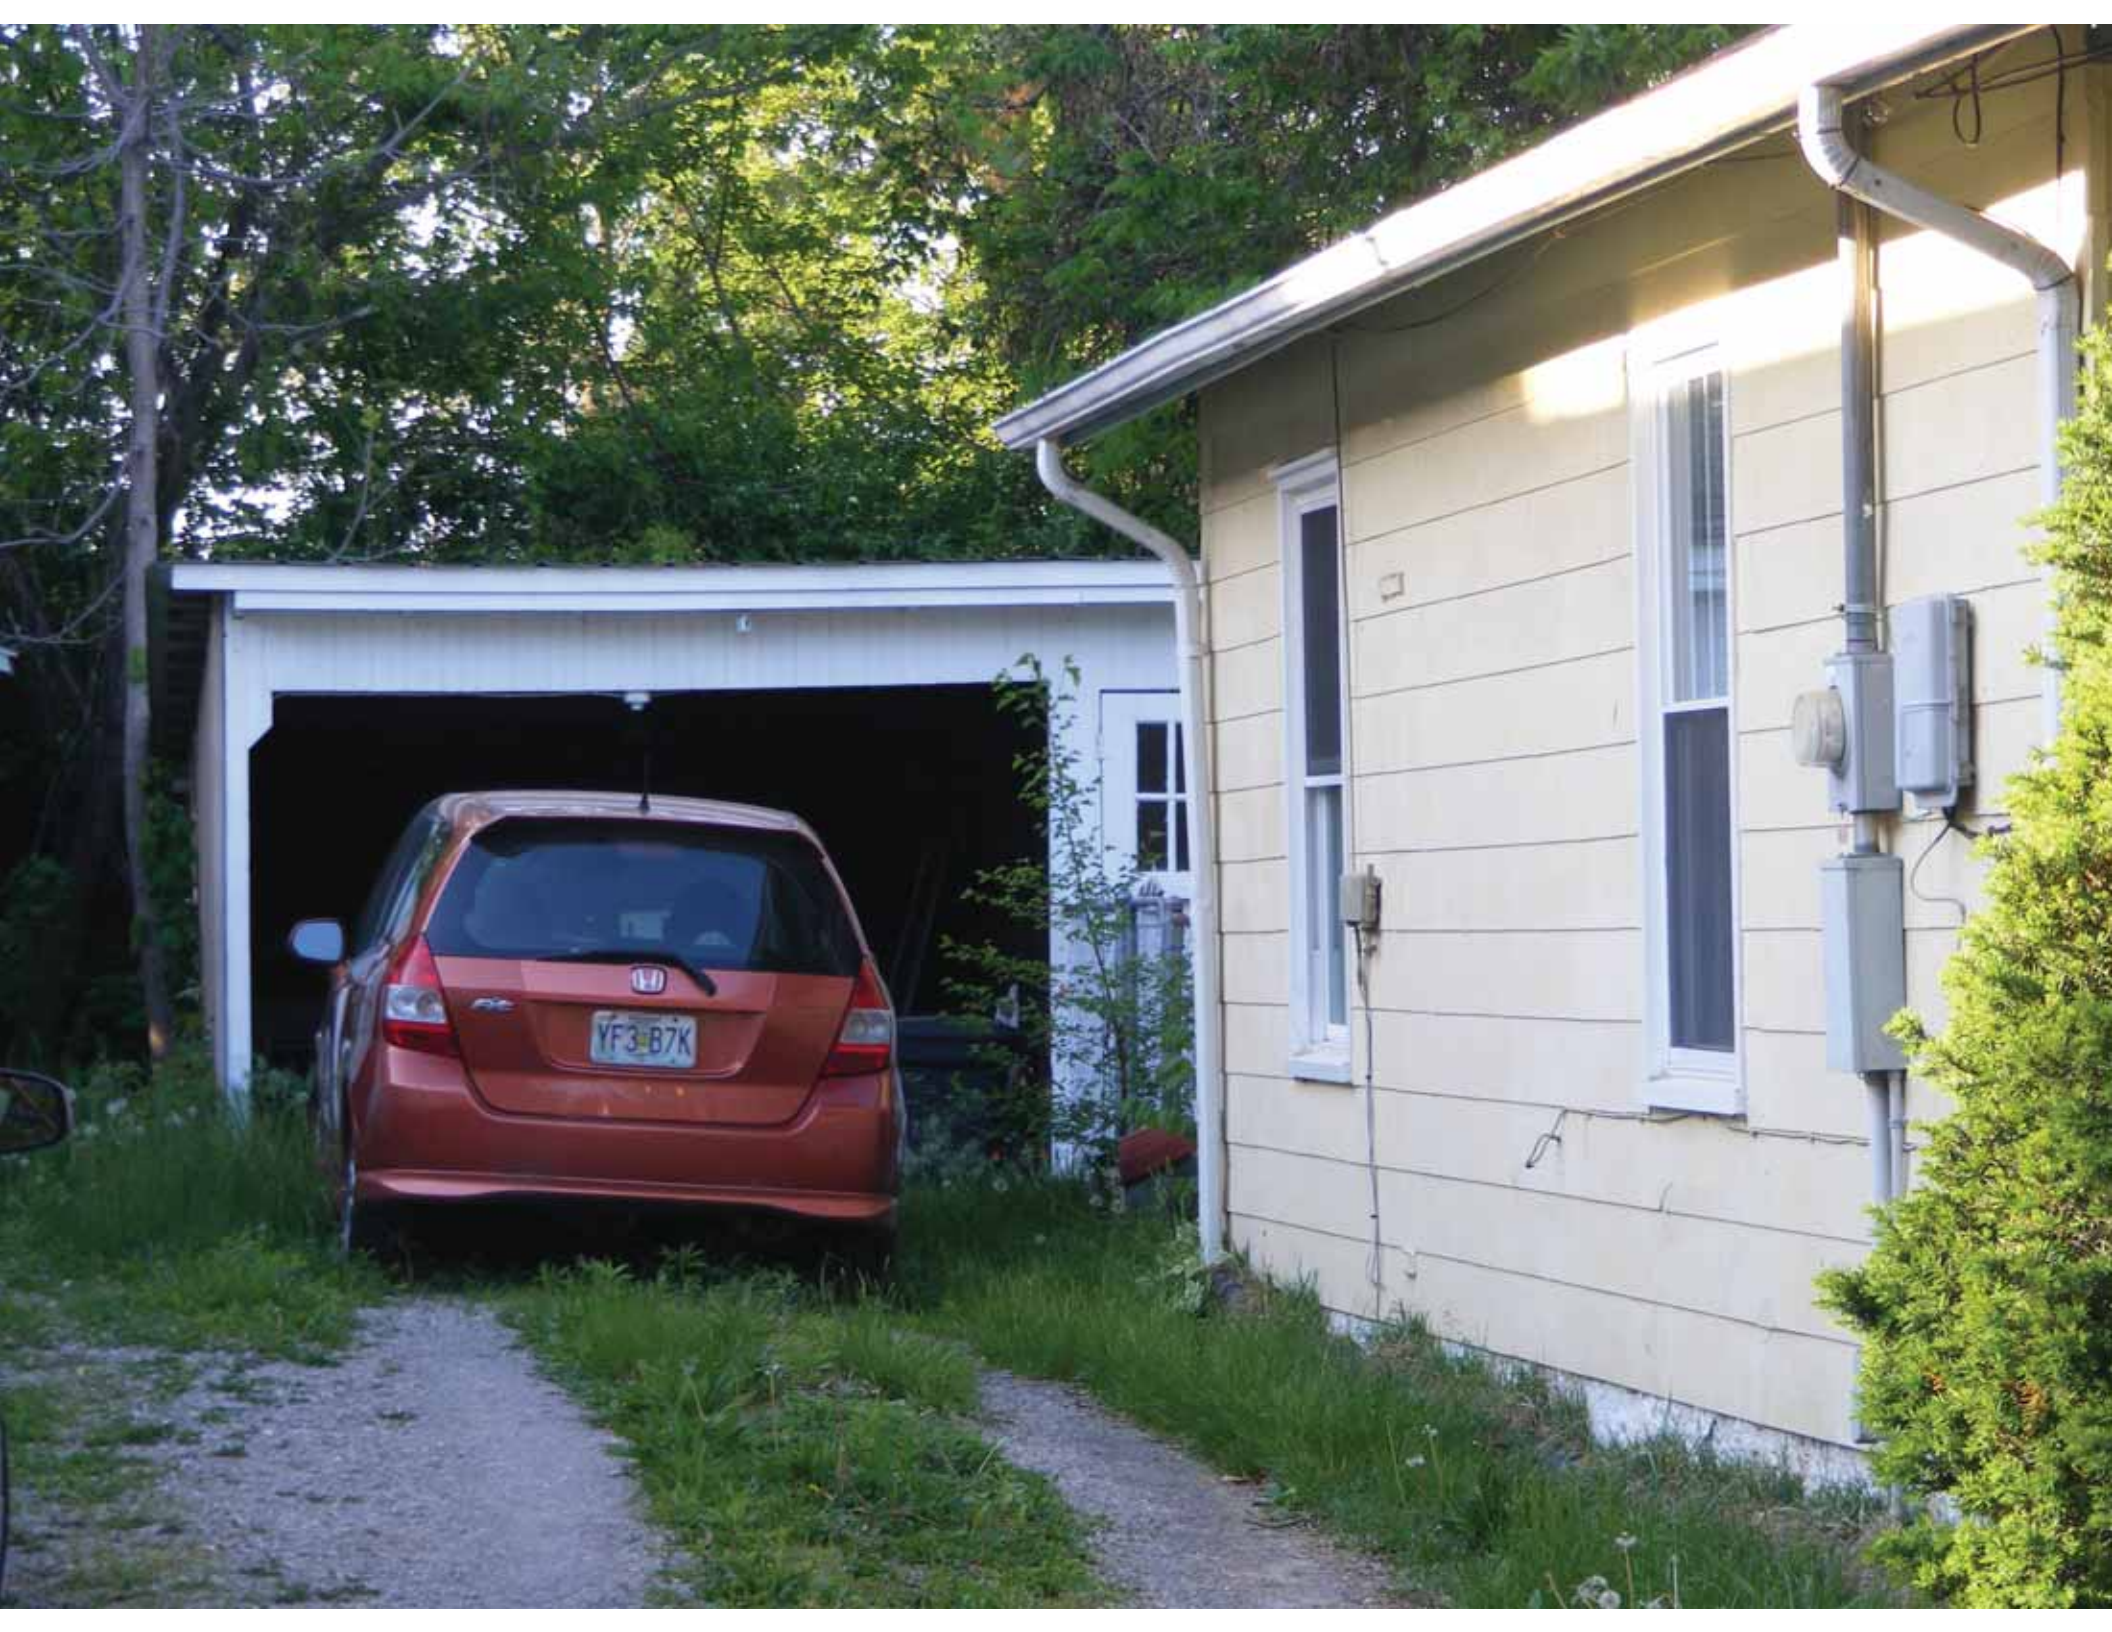

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front plan dwelling has an asphalt shingled roof, exterior asbestos shingle siding and a concrete foundation. The primary (south) elevation has an off-center gabled porch supported by two tapered piers resting on brick piers. Within the porch bay is an original Craftsman style eight-light door. A wrought iron balustrade surrounds the porch. The door is flanked by original four-over-one windows with shutters. Side elevations hold single windows of similar configuration – some windows are one-over-one.

The dwelling is on a grass covered lot on the south side of Fairview Avenue within an urban residential neighborhood. The north end of the property is flanked by a concrete public sidewalk. A private concrete walk leads from the porch to the sidewalk. Mature trees line the west end of the rear yard. A gravel drive is situated on the west side of the lot.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a cross-gable plan asphalt shingled roof, exterior weatherboard siding and a concrete foundation. Windows are one-over-one and appear original. Façade windows have faux shutters. A hipped porch is situated across the eastern half of the façade, supported by one milled and one square column. The façade (south elevation) retains an engaged milled column offset by a one-over-one window within the porch bay. The window is offset by a single-light storm door and paneled contemporary door. The front facing gable has a one-over-one window. Gable fields retain louvered vents. The dwelling has a rear shed wing with exposed rafter tails.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the south side of Fairview Avenue within an urban residential neighborhood. A gravel drive flanks the west end of the lot. A concrete public sidewalk extends along the north end of the lot. A private walk extends from the public sidewalk to the porch. The front yard supports a mature tree. Mature foliage surrounds the back yard. Southwest of the dwelling is a half-story prefabricated shed with a flat roof. The outbuilding is not eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a cross-gabled asphalt shingled roof, exterior synthetic siding and a concrete foundation. The primary (north) elevation supports a half-width shed porch supported by tapered columns on low brick piers. Within the porch bay is a contemporary paneled door offset by a replacement one-over-one window. Remaining windows are of similar configuration. The front gabled wing holds a one-over-one window. Above the window, the gable field has a louvered vent.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the south side of Fairview Avenue in an urban residential neighborhood. The front yard features small trees and shrubs and a built-up planter. A concrete public sidewalk flanks the north end of the parcel. The rear yard supports mature trees around the lot's perimeter. A gravel drive at the east end of the lot leads to a detached garage. The gable-front frame garage has weatherboard siding, a vertical board sliding door and a solid plywood door. The outbuilding is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable and wing plan dwelling has an asphalt-shingled roof, exterior asbestos shingles and a concrete and stone rubble foundation. The primary (north) elevation features a shed half-width porch supported by wrought iron columns. Windows appear to be original, obscured by vinyl storm windows. The windows are one-over-one. The porch bay holds a single window and entry bay filled with a single-light paneled door. The dwelling has a rear wing. At the east elevation near the foundation is what appears to be an entrance to a cellar.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the south side of Fairview Avenue within an urban residential neighborhood. The front yard has a mature shrub. Flanking the north end of the lot is a concrete public sidewalk. A private walk intersects the public sidewalk, leading to the porch steps. The rear yard has mature trees. A frame picket fence encloses the rear yard.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front plan dwelling has an asphalt shingled steeply pitched gable roof, exterior asbestos shingle siding and a poured concrete foundation. Basement windows are visible within the raised foundation. The primary (north elevation) features an off-center porch that appears to have been reconstructed or is entirely new (c. 2000). The portico has a gabled roof with exposed rafter tails, supported by four square wood columns. A frame balustrade surrounds the porch and extends along the steps as handrails. Within the portico is the primary entry filled with an original single-light wood paneled door. Above the porch, the gable field has paired one-over-one windows. The front gable retains original returns. At the roofline ridge is a central brick chimney. Side elevations have gabled wall dormers with one-over-one windows.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass-covered lot that supports mature trees in the front and rear yards. The lot is on the north side of Fairview Avenue in an urban residential neighborhood. The west side of the lot is flanked by Coats Street and a public sidewalk. A concrete public sidewalk also extends along the south side of the parcel (Fairview Avenue), intersected by a private walk leading to the porch steps. A gravel drive flanks the east end of the lot. At the north end of the drive is a prefabricated metal outbuilding with a gambrel roof. The outbuilding is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The cross-gable plan dwelling has an asphalt-shingled roof, exterior asbestos shingle siding and a limestone foundation. The primary (south) elevation features a central hipped porch supported by milled columns with upper decorative bargeboard. Near the porch roofline are decorative spindles. Within the porch bay is an entry with an original single-light paneled door. One-over-one windows flank the portico. The gable wall above the porch holds two individual one-over-one windows framed by a projecting arch below the gable. This pattern is repeated on the side elevations (which are also gabled). The roofline where the gables meet supports an interior central brick chimney. Side elevations (near the south end) support shed dormers with asphalt shingle siding and one-over-one windows. The dwelling has a rear (south) small gabled wing and bump out shed wing on the west elevation.

The dwelling is on a grass covered lot that is well landscaped. The lot is on the south side of Fairview Avenue in an urban residential neighborhood. A concrete public sidewalk flanks the north end of the property, intersected by a private walk leading to the front porch steps. A picket fence extends west from the side (west) elevation; a privacy wood fence partially surrounds the property's rear yard. A gable-front plan outbuilding southeast of the dwelling is obscured by the wood fence. The building is likely ineligible for the National Register of Historic Places. A gravel drive bounds the east end of the lot.

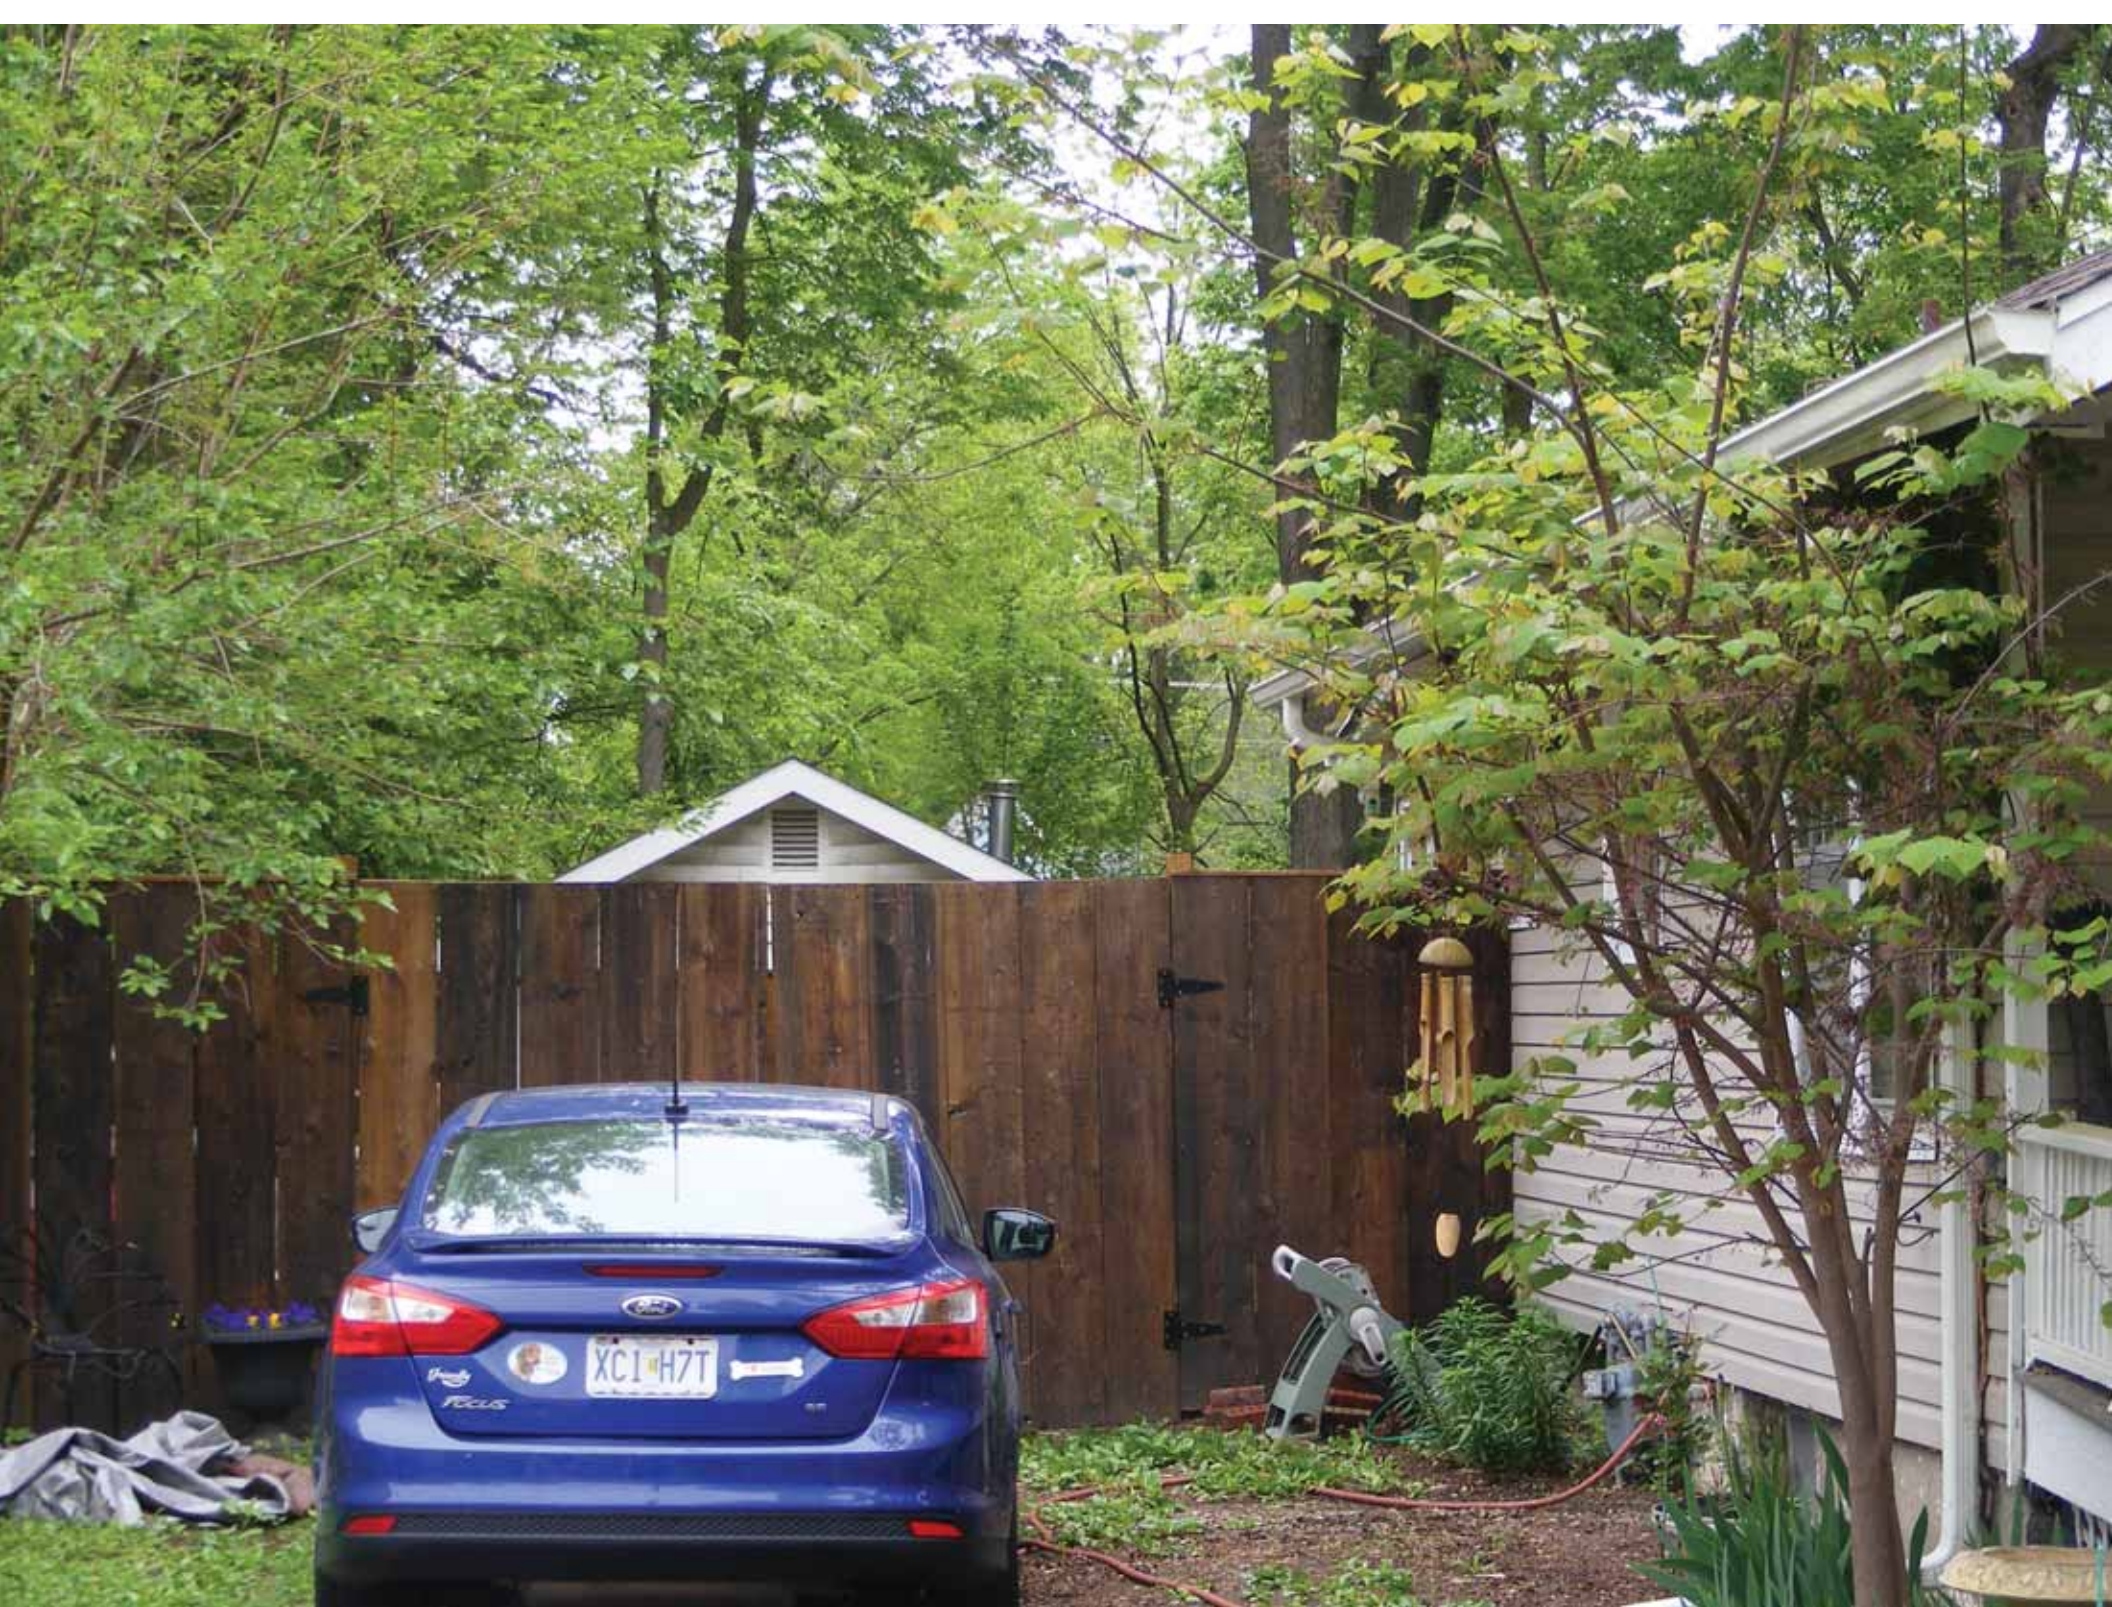

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front plan Bungalow has an asphalt-shingled roof, exterior synthetic siding and a raised concrete foundation. An interior brick flue is visible near the west elevation. The façade (north elevation) supports a full-width gabled porch supported by tapered piers on brick columns. A frame balustrade surrounds the porch and extends as handrails along the steps leading to the porch. Lattice obscures the area below the porch floor. Within the porch bay is a central entry flanked by paired original four-over-one windows. Above the porch, the gable field holds an octagonal vent. Eaves are enclosed. The dwelling has a rear small shed wing.

The dwelling is on grass covered lot that supports mature trees in the rear yard. The parcel is on the south side of Fairview Avenue within an urban residential neighborhood. A concrete sidewalk flanks the north end of the lot. A gravel drive flanks the west end of the lot. A lattice fence extends east from the east elevation, connecting to an adjacent property's privacy fence.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt-shingled cross gable roof, exterior asbestos shingle siding and a concrete foundation. The façade (north elevation) features a half-width shed porch supported by square columns. Within the porch bay is a solid c. 2000 paneled door offset on the east by a one-over-one replacement window with faux shutters. On the east wall of the projecting gabled wing (within the porch bay) is a one-over-one window. The front facing gable wall (north elevation) holds a single one-over-one window with faux shutters. The gable field holds a louvered vent. All windows appear to be replacement. The dwelling has a rear shed wing.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the north side of Fairview Avenue in an urban residential neighborhood. The lot is well landscaped with mature trees in the rear yard. The south end of the lot is flanked by a concrete public sidewalk. A private walk leads to the public sidewalk from the porch steps. A wood privacy fence surrounds the rear yard. Rear Coats Street flanks the east end of the parcel. Situated northeast of the dwelling, behind the privacy fence, is a detached garage. The garage is constructed of concrete block and has a gable-front plan. The front gable field of the garage is filled with painted shingles. The garage does not appear eligible for the National Register of Historic Places.

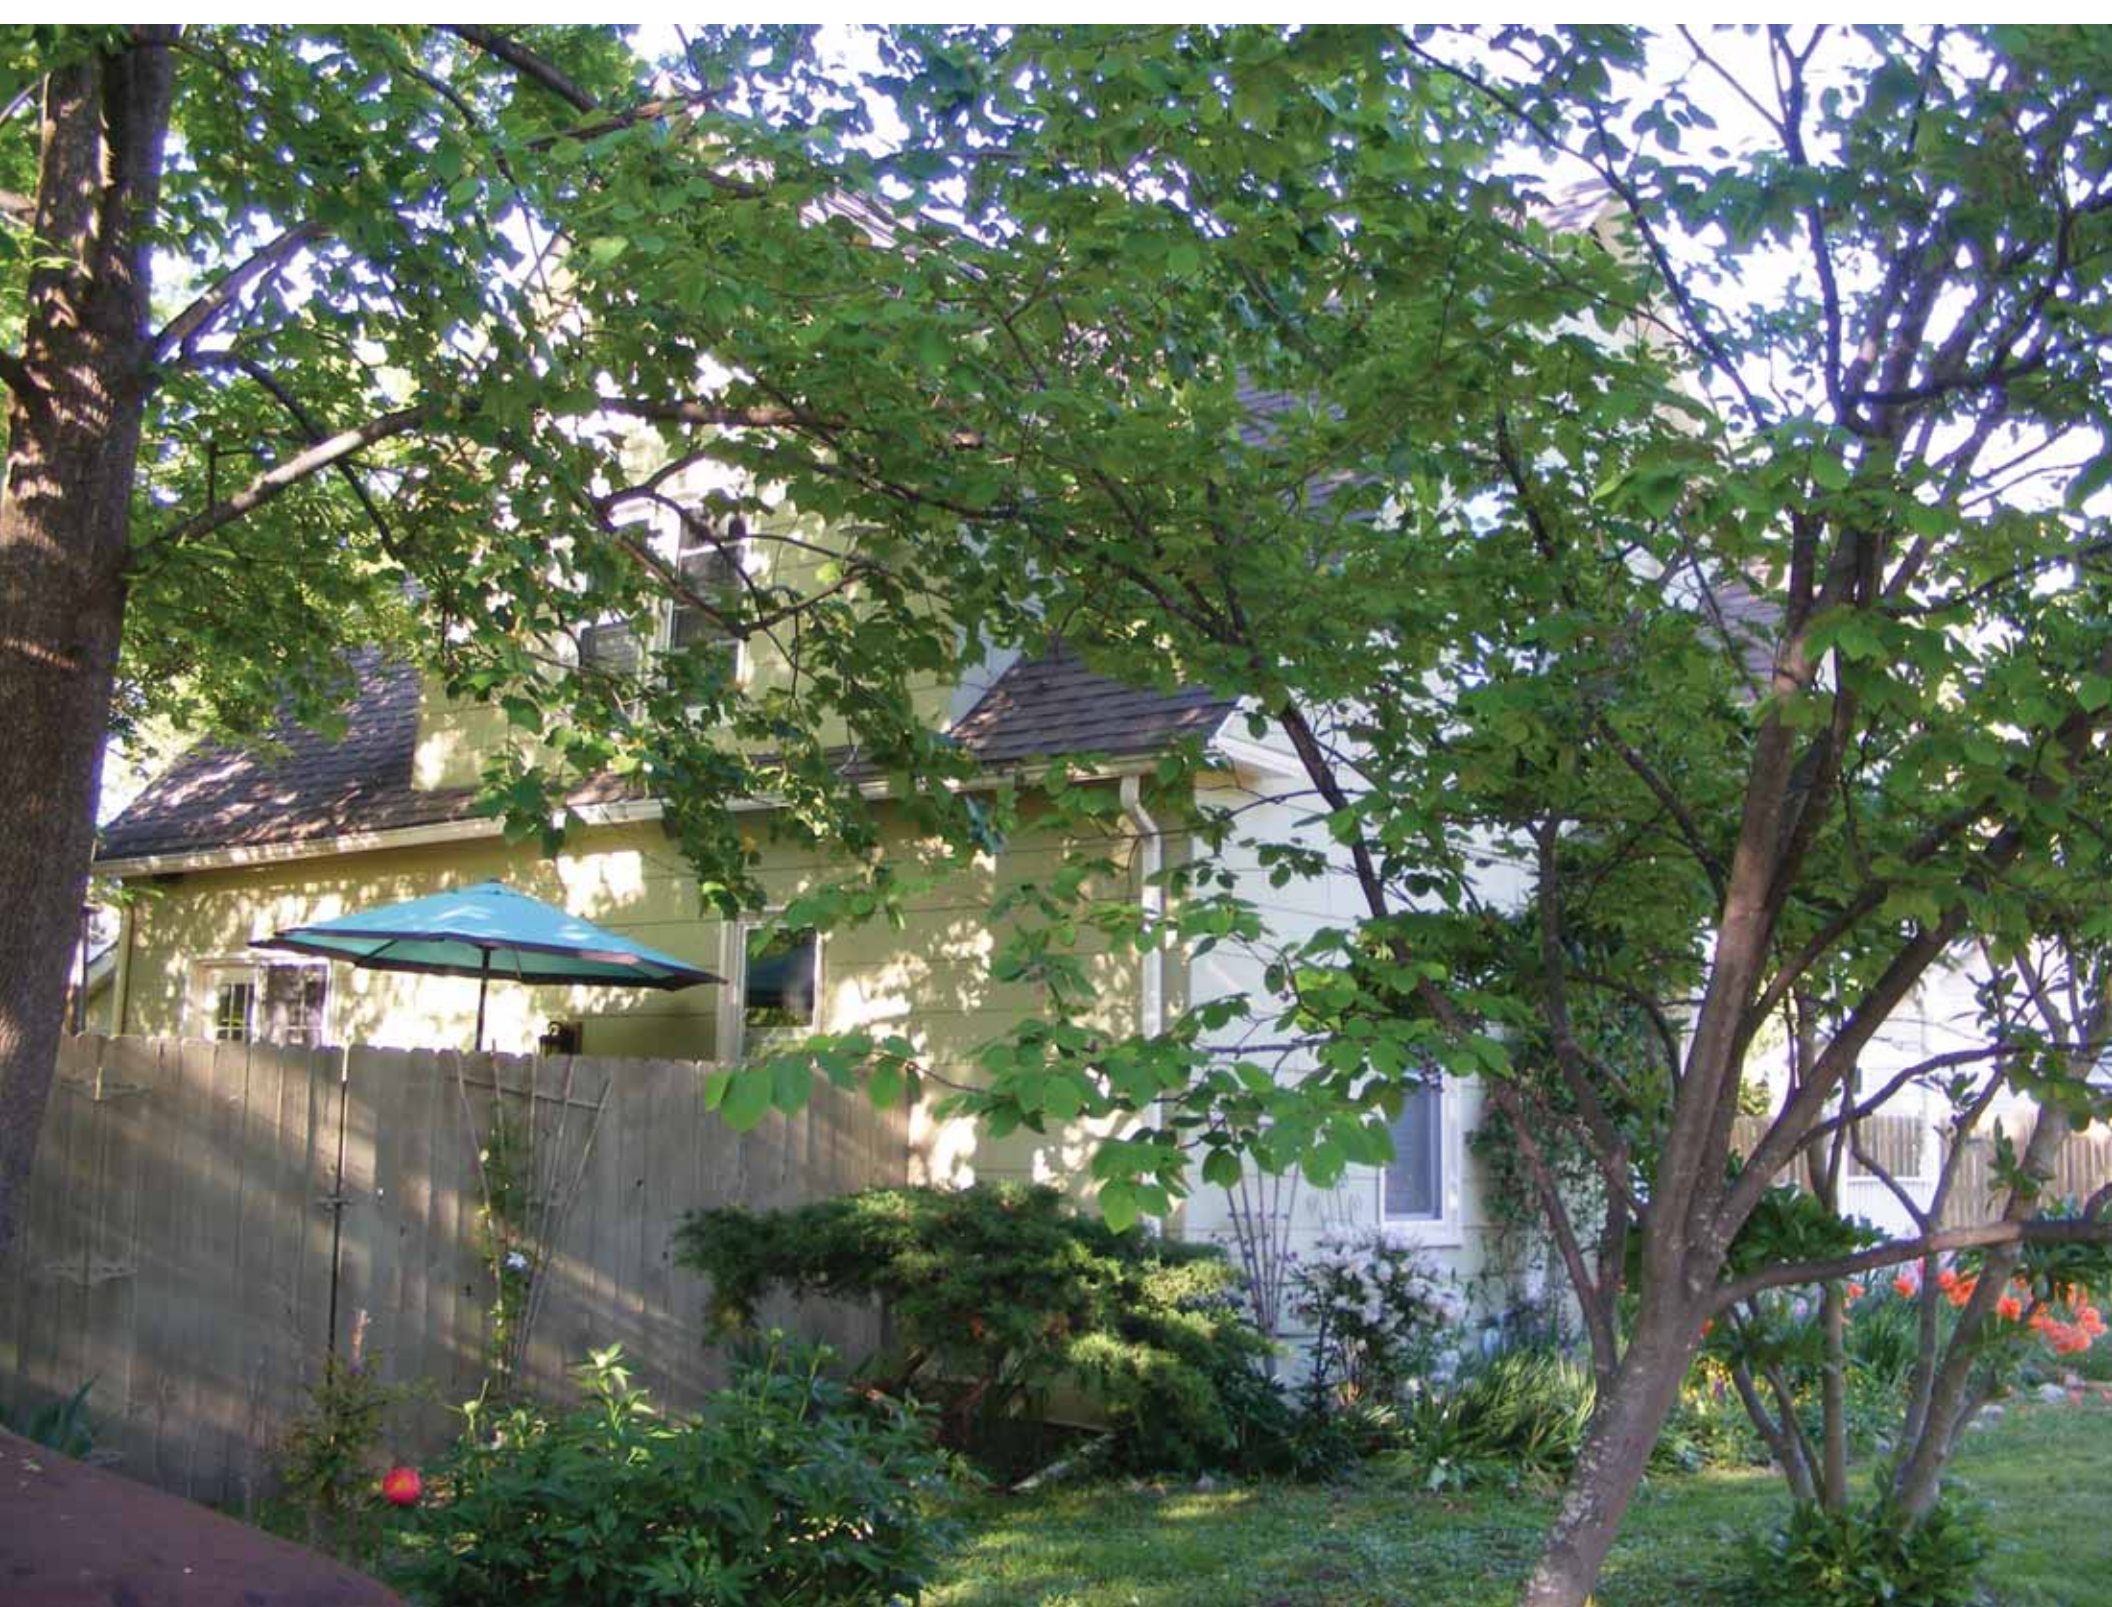

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a cross gabled asphalt shingled roof, exterior asbestos shingle siding and a partially covered concrete foundation. The primary (south) elevation has an off-center gabled porch with gable returns. The porch is supported by milled columns with upper bargeboard. Bargeboard also adorns the porch gable field. A frame balustrade surrounds the porch. Within the porch bay is a nine-light paneled door. Windows are one-over-one and appear original with vinyl sash storm windows. In the primary gable field is a louvered vent. Below the vent are paired off-center one-over-one windows. The west elevation has a projecting two-story bay with angled walls. Each of the walls holds a one-over-one window with exception of the upper west elevation which holds a single-sash replacement window. The gable field has a louvered vent. The roof overhang (above angled upper windows) supports decorative millwork with a central dropped spindle. The rear elevation has a gabled dormer with paired windows.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the south side of Fairview Avenue in an urban residential neighborhood. The lot is bounded on the north by a concrete public sidewalk and on the west by a gravel drive. A privacy fence bounds the east end of the lot and surrounds the rear yard which supports mature trees. The fence obscures two outbuildings, neither of which appears eligible for the National Register of Historic Places. One outbuilding has vertical board siding and a shed roof. The other outbuilding appears contemporary – a prefabricated gable-front building.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This small dwelling has a gable-front asphalt-shingled roof, exterior vinyl siding and a covered foundation. The primary (north elevation) elevation has paired original four-over-four windows with faux shutters. Remaining windows are largely replacement one-over-one. Some have faux shutters. The gable field has an octagonal louvered vent. A shed incised porch on the east end of the dwelling supports the primary entry, which faces east. The entry bay has a c. 2000 nine-light paneled door. Also in the porch bay on the north elevation is a boxed c. 2000 window.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is located on a grass covered lot on the north side of Fairview Avenue in an urban residential neighborhood. The lot is bounded on the south by a public concrete sidewalk and on the east by a gravel drive. A private walk extends from the porch to the public walk. The rear yard supports mature trees and is surrounded by a wood privacy fence.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The irregular plan dwelling has an asphalt-shingled cross gabled roof, exterior vinyl siding and a rubble concrete foundation. The façade (south elevation) has a projecting gabled wing with angled walls, each of which holds a replacement one-over-one window. Remaining windows are of similar configuration. Some have faux shutters. Above the front beveled wing, the gable supports bargeboard. Offsetting the wing on the west is a small shed porch with c. 1925 tapered piers on brick posts. The porch has a contemporary frame balustrade. Within the porch bay on the east wall is a contemporary nine-light paneled door. Side gables are filled with bargeboard. The dwelling has a rear shed wing.

The dwelling is located on the east side of Fay Street and is situated on the west portion of the property on a grass covered residential lot in an urban setting. The property has mature trees located throughout the southern edge of the property. A gravel driveway is present on the north side. At the rear of the property is an outbuilding with a side gabled roof and horizontal siding. The outbuilding is not eligible for the National Register of Historic Places. A wooden fence runs along the north edge of the property.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This is a one story wood sided, asphalt-shingled cross gable dwelling converted to a duplex and has a limestone block foundation. The façade holds an enclosed centered porch under a front gable with a lower asphalt-shingled hip porch supported by square wood post with wood decking and steps. The enclosed area is flanked by one-over-one windows. The south elevation holds a single one-over-one window and at the back corner (northeast) is a projecting wing with a stoop concrete and entry (faces west). The north elevation holds a single one-over-one window and a stoop entrance with wooden steps and railing.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

R.E. Hackman's Columbia City Directory, 1909.
Polk's Columbia City Directories, 1947 and 1961.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is located on the west side of Fay Street and the commercial building was built to fill nearly the entirety of the property in an urban setting with an asphalt parking lot all along the eastern edge. The property has little to no landscaping.

This property is adjoined to 1112 Smith Street (Survey # BO-AS-011-0192) and it carries a different parcel number and ownership. Since 1001 Fay and 1112 Smith Street have different parcel numbers, address and ownership, for this survey will be documented as two different resources.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The property is a one story pre-fabricated metal commercial building with a low-pitched side gabled roof with a wide overhanging eave on the façade and a concrete slab foundation. The main building intersects a setback one story pre-fabricated metal commercial building to the right elevation. The primary elevation of the main building holds a glass/metal door flanked by three tall narrow fixed windows on each side. The setback area holds two garage bays and double glass/metal door with transom offset to right by a paired display window with a transom. The left side elevation is void of openings.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.
The building is located on the east side of Fay Street. The building is situated on the west portion of the property on a grass covered residential lot in an urban setting. A large asphalt driveway is located on the southern edge of the property and runs the length of the property. One mature tree is located on the northwest corner and others are located on the east edge of the property. Some shrubs are located in front of the primary façade. A wooden fence line runs the length of the south edge as well as the east edge.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This is a two-story dwelling has an asphalt-shingled cross gable on hip with a concrete foundation and has been converted to commercial use. The building has extensively altered (Ca. 1980) and is clad in non-original plywood type panels with narrow vertical trim board between each panel. A large addition runs the length of the north elevation. The primary elevation holds an off-centered setback stoop sheltered under an asphalt-shingled shed roof and holds an entrance. The stoop is offset to the right by a tripled paired one-over-one windows (addition). To the right of the stoop, the front gable holds one-over-one windows on both levels with a vent in the gable end. The south elevation holds paired one-over-one windows on both levels and a side entrance. The north elevation holds the addition several single and paired one-over-one windows and two entrances.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.
The building is located on the east side of Fay Street and is situated on the west portion of the property on a grass covered residential lot in an urban setting. The property has mature trees located on the western and northern edge of the property. An asphalt driveway and parking lot is present on the south side. A pre-fabricated metal outbuilding with a front gable metal roof with two garage bays with metal panel doors and a metal side door is located at the back west section of the lot. The outbuilding is not eligible for the National Register of Historic Places. A wooden fence runs along the north and east edges of the property.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
The building is one story vinyl clad, asphalt-shingled side gable with a basement and concrete foundation. The façade holds a projecting enclosed wing under the main roof with two tall narrow fixed windows over paired square fixed windows. The concrete stoop entrance with iron railing is located on the left elevation side of the wing and holds a metal/glass door with a trapezoidal transom. The left elevation holds one-over-one windows and a wall unit air conditioning unit.

The dwelling is located on the west side of Fay Street on the west portion of the property. The lot is located in an urban setting and is covered with grass. A public concrete sidewalk runs north-south adjacent to the eastern edge of the property. The property has mature trees located on the western and northwestern back section of the property. A concrete driveway runs along the north side of the property. A chain link fence enclosed the backyard. A white wooden picket fence runs the width of the concrete sidewalk in the front of the property.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
A 1.5 story vinyl clad dwelling with a steeply pitched asphalt-shingled front gable to centered gable (south elevation) and a limestone block foundation. The façade holds an asphalt-shingled hipped porch (open) supported by square columns and features wood decking. Entrance is off-centered and flanked by one-over-one windows; gable end holds a paired one-over-one window. The north elevation holds a one-over-one window. At the west corner of the north elevation is a projecting wing with an asphalt-shingled shed roof; a stoop entrance fronts Fay Street. A hipped dormer with a one-over-one windows is found on the north elevation sloping roofline. The south elevation holds a side entrance (original wood panel/glass door, no access to door) on the lower section of the centered gable and a one-over-one window in the gable end. The door is flanked by one-over-one windows.

The property is located on the west side of Fay Street. The lot is located in an urban setting and is covered with grass. A chain link fence runs north-south through the middle of the property, as well as west from the fence line to enclose the backyards of the two adjacent houses. A gable front board and batten sided outbuilding with a gabled roof is located in the northwest corner of the property. The building is not eligible for the National Register of Historic Places.

The property is located on the west side of Fay Street. A concrete driveway runs along the south elevation of the dwelling and a concrete parking lot is to the north. The lot has trees to the east, north and west. Backyard is enclosed with a chain link fence. Southwest of the dwelling is a prefabricated small metal outbuilding with a front gable roof.

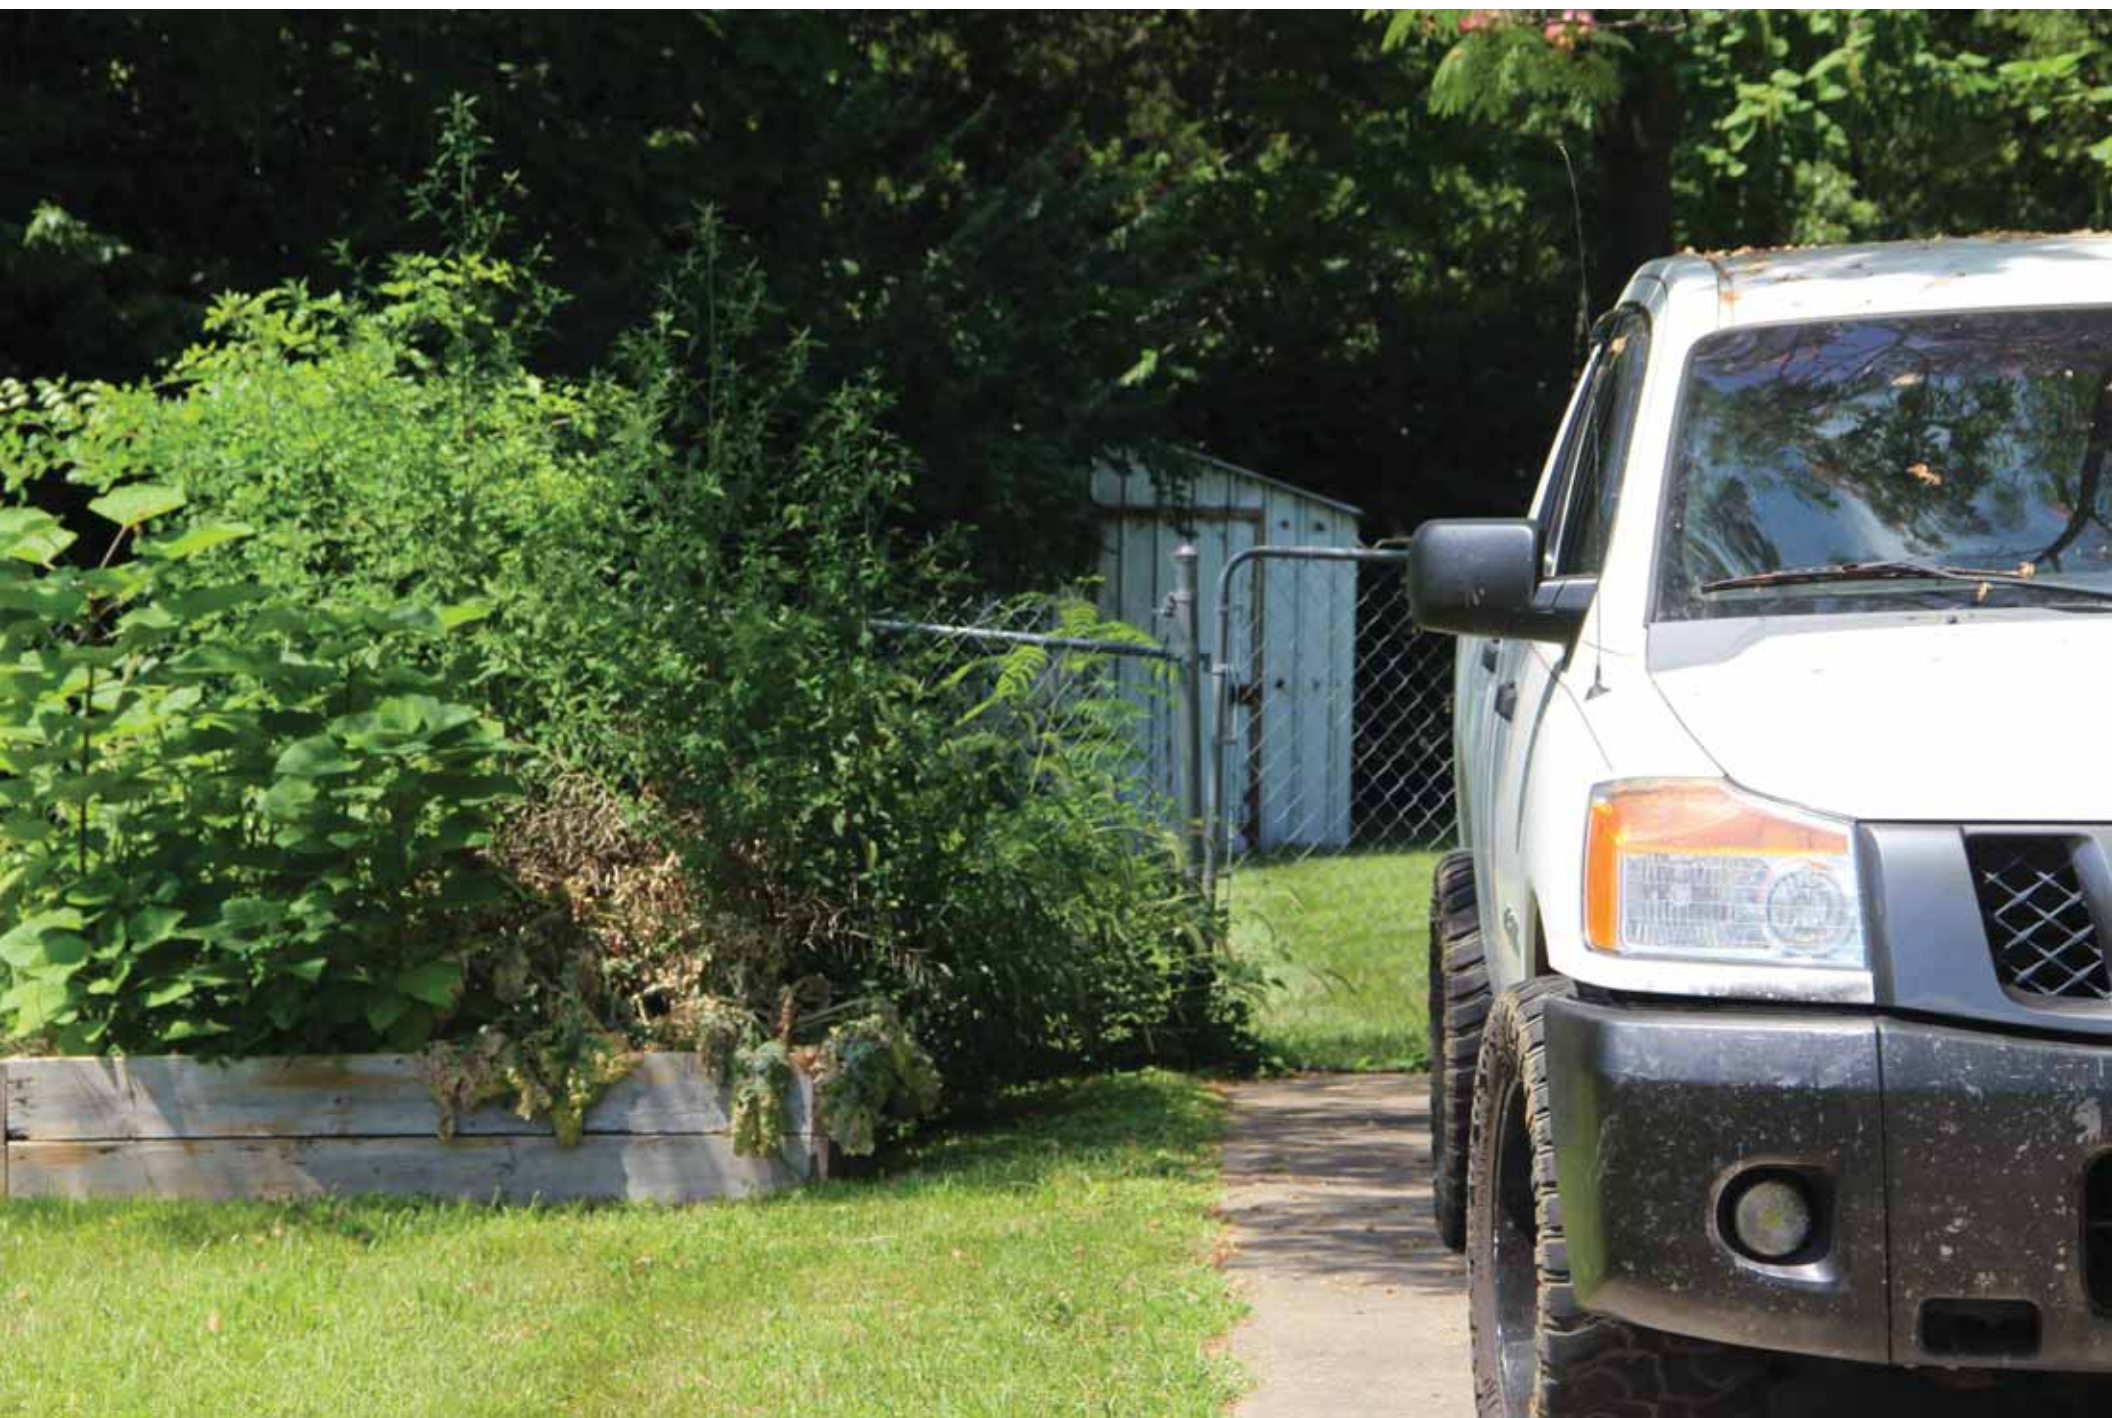

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This is a one story asphalt-shingled cross gable clad in wood siding with a concrete foundation. The façade holds a partial-width porch sheltered under the front gable supported by wooden square columns on brick piers with concrete caps. Porch decking is concrete; a low brick wall with an open basket weave pattern with brick coping infills between the piers. Entrance is off-centered and flanked by one-over-one windows. Side elevations hold single and paired one-over-one windows; gable ends hold one-over-one windows.

The dwelling is located on the east side of Fay Street and is situated on the west portion of the property on a grass covered residential lot in an urban setting. The property has shrubs and small trees located in the north side and eastern portions as well as some mature trees on the north and east edges of the property. An oversized shared gravel driveway is located on the south side of the property. A wooden accessibility ramp is located at the southwest corner and extends out to toward Fay Street with the entrance at the entrance of the gravel driveway. A wooden sign with "1200 Fay St." is located at the edge of the front section of the lot.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This is a 1.5 story brick dwelling with an asphalt-shingled cross gable roof and a concrete foundation. The façade features a projecting front gable to shed. A concrete stoop with iron railings and arched entrance way is found within the shed area and holds a replacement door and covered fan transom. Entrance is offset to the right by a tripled paired one-over-one window with a one-over-one window in the gable end. To the left of the entrance, setback in the side gable is a one-over-one window. The south elevation holds an open concrete porch at the southwest corner with a wooden ADA ramp with wood railings at the corner and concrete steps on the south elevation. A solid metal door is located at the southwest corner followed by an exterior brick chimney and a French door. To the right of the French door is a picture widow and a one-over-one window. The south sloping roofline features a tripled paired one-over-one window in the cross gable; gable is clad in stucco. At the southeast corner is a wood frame addition with and entrance. A skylight is found on the southeast corner of the roofline. The north elevation holds one-over-one windows. The gable end is clad in stucco with half-timbering and holds a one-over-one window.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

The property still supported a dwelling in 1961 per city directories. Based on newspaper advertisements in regional publications during the years 1969-1972, it appears that this building was originally used by an engineering/survey business (Engineering Surveys and Services). Based on the building's architectural integrity (exterior), the property may be eligible for the National Register of Historic Places under Criterion C. The property is a good example of a mid-century modern office building. Interior information is necessary to adequately determine whether the building is potentially eligible.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

"Advertisement for Bids," *Mexico Ledger* (9 June 1972), 12.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The building is on a concrete and asphalt paved lot with a rear (west) parking lot. The building is situated on the west side of Fay Street within a mixed use (residential and commercial) area. Concrete drives on either end of the building (north and south) lead to the street. The front lot is bounded by the street and features a mulched yard. Mature shrubs border the façade of the building.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This two-story building has a flat roof and a concrete foundation. Walls are clad with vertical bands of buff brick and what appear to be original precast concrete panels. The bands of precast concrete hold original aluminum framed one-by-one sliding windows (all elevations). The building is banked on the east and south, providing the façade and south elevations with the appearance of a single-story building. A stepped wide concrete wall spans the primary elevation. Between the low wall and the façade is a concrete walk with steps on the north end. The north wall features the building's two-story appearance. The façade features two commercial entry bays near the north and south ends of the elevation. These entrances hold central single-light glass and aluminum doors flanked by single-sash aluminum frame sidelights. Centered on the façade are three original fixed sash aluminum frame windows. A decorative patterned wall below the windows appears original. Offsetting each entry at the north and south ends of the elevation are original paired windows (single-sash). A c. 2000 awning extends above the doors and central windows, bearing the name of the current occupant.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is situated on the south side of North Boulevard in an urban commercial area just north of a residential neighborhood. The parcel is bounded by trees on the east and south. The property is covered with asphalt, much of which is marked for parking purposes. A chain link fence surrounds the paved area flanking the east side of the building. A wood privacy fence extends from the west wall to the adjoining business addressed as 1206 Coats Street.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gabled prefabricated warehouse has a metal roof, ribbed metal walls and a concrete slab foundation. The north elevation serves as the façade with an off-center nine-light paneled door offset by paired two-light sliding windows. The business sign is attached to the wall above the windows. The east elevation holds four overhead track doors with three-light window bands. Offsetting the service bays on the north is a two-light sliding window. There was no access to the west and south elevations.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.
The dwelling is located on the west side of Pannell Street on the east portion of the property. The lot is located in an urban setting and is covered with grass. The property has one mature tree in the southeast corner and some in the rear. A wooden fence runs perpendicular to the dwelling on the south side of the yard. A gravel driveway is present on the north side of the property. A one story wood sided front gable outbuilding with an asphalt-shingled roof with paired doors is located in the back section of the lot at the end of the gravel driveway. The outbuilding is not eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
The dwelling is a one story asphalt shingled front-gabled roof, exterior wide wood siding, and a concrete foundation. The façade holds a lower front gable open porch with wood decking, railings, tapered columns with brick piers. Porch bay area holds an off-centered entrance offset to the left by paired four-over-one craftsman style window. To the right of the entrance is a window with a metal awning. Gable ends are clad in asphalt shingles. Side elevations feature four-over-one craftsman style windows.

The building is located on the east side of Pannell Street and occupies most of the property. The concrete lot is located in an urban setting. The west side of the lot is grass covered. A concrete driveway and parking lot runs along the western and northern edges of the property. A chain link fence is found on the left side of the property.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This is a one-story prefabricated low-pitched side gable metal building on a concrete foundation. The primary elevation holds nine bays; five doors (metal/glass and four metal paneled with upper section light) and paired and single fixed windows. A narrow concrete deck platform is located on the right and left sections of the building divided by a gravel bed. Access to each platform is provide at the center (two entrances left and right) and at each end. These accesses are a mixture of ADA accessible ramps and steps; iron railings run the length of each platform.

The dwelling is located on the west side of Pannell Street on the corner of Pannell and Smith Street on the east portion of the property. The lot is located in an urban setting and is covered with grass. A public concrete sidewalk runs north-south adjacent to the western edge of the property and east-west on the southern edge of the property. The property has a small tree located in the front northeast portion of the yard mature trees and shrubs located in the rear.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This two story stucco clad dwelling has an asphalt shingled cross gable with multiple front gables and a raised concrete foundation. The façade holds a partial-width porch sheltered by an asphalt shingled roof supported by replacement wooden square post with replacement wooden railings (ca. 1995). Porch bay holds an entrance offset to the left by a six-over-six window. Upper level holds a one-over-one window. A projecting front gable is to the right of the porch and holds a one-over-one window on both levels. Side elevations hold one-over-one windows, paired fixed and basement window wells. Rear elevation holds an enclosed porch addition with a stoop entrance, wood railing and decking. All windows are replacement.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.
The dwelling is located on the east side of Pannell Street on the west portion of the property. The lot is located in an urban setting and is covered with grass. A public concrete sidewalk runs north-south adjacent to the western edge of the property. The property has a mature trees located in the rear. A concrete driveway is present on the north side of the property.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
The wood sided dwelling is a one story with an asphalt shingled cross-gable to shed (façade porch) and concrete foundation. The façade holds a partial-width porch under the shed roof supported by a tapered column and a narrow square post (replacement) on painted brick piers with wood decking and railings. Entrance is at the "L" and offset to right by a paired one-over-one window. The front gable holds a louvered vent in the end; lower section holds a one-over-one window. The window features a wooden lintel and sill and intersect vertical wooden boards (narrow) that extend to the length of the lower section (ends at gable end and foundation); frames the window in an "H" shape. Side elevations hold one-over-one windows and identical wood framing.

The dwelling is on a grass covered lot on the east side of Pannell Street within an urban residential neighborhood. The west end of the lot is flanked by a concrete public sidewalk. Wood bounds the grassy areas on the west and south. A wide gravel drive is situated south of the dwelling, leading to a gable-front frame garage. The garage has paired original vertical board doors, vertical board walls and a shed wing on the north. The garage is not eligible for the National Register. The yard supports mature trees.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front plan Bungalow has an asphalt-shingled roof, exterior synthetic siding and a concrete foundation. The primary (west elevation) supports a gabled porch supported by tapered columns on brick piers. A frame balustrade surrounds the porch and extends as handrails along the steps. Within the porch bay is a central door flanked by replacement windows with faux shutters. Windows are one-by-one sliding design. Remaining windows are of similar design and one-over-one replacement. The front gable field has a louvered vent.

The outbuilding is not eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
The dwelling is a 1.5 story asphalt shingled side gable to shed with a center shed dormer (paired fix 6 light window) and a concrete foundation. Dwelling is clad in wood siding. Façade features a full-width porch under the shed roof with square wooden posts (c. 1990) and concrete decking. The entrance is centered in the porch bay area and flanked by original 6/1 (vertical) windows. Side elevations hold single and paired windows; gable ends hold single windows.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.
The dwelling is located on the east side of Pannell Street on the west portion of the property. The lot is located in an urban setting and is covered with a variety of shrubs and other landscaping. A public concrete sidewalk runs north-south adjacent to the western edge of the property. The property has a mature tree in the front and other mature trees in the rear. A gravel driveway is present in the southwest corner of the property. At the end of the driveway is a one-story vertical metal seamed outbuilding with a front gable roof and double doors. This outbuilding is not eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
The dwelling is one story, asphalt shingled cross-gable to shed (front porch), asbestos siding on the lower section and stucco on the upper section and has a concrete foundation. The façade features a partial-width porch under the shed supported by tapered wood columns on stucco clad piers with a low wood sided wall between the piers. Entrance is at the "L" and offset to the right by a two-over-two window. The gable front holds a matching window flanked by shutters; gable end holds a small one-over-one window. Side elevations hold two-over-two windows flanked by shutters. A thin wooden stringcourse delineates the asbestos siding from the stucco and at the roofline and delineates the lower wall surface from the gable end.

The dwelling is located on the west side of Pannell Street on the east portion of the property. The lot is located in an urban setting and is covered with grass. A public concrete sidewalk runs north-south adjacent to the eastern edge of the property. The property has one mature tree in the northeast corner, some mature trees in the rear, and shrubs in the front of the dwelling. A gravel driveway is present on the north side of the property framed on the south by a low stone block retaining wall. A wooden privacy fence encloses the rear yard.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
The brick one-story dwelling asphalt shingled side to front gable (porch) roof with wide overhanging eaves, exposed rafters and a concrete foundation. The façade features a full-width porch under the front gable with knee brackets at the corner of the eaves, brick piers on concrete bases and wooden railings and posts. The entrance is centered and flanked by paired three-over-one windows and replacement one-over-one. The front gable end holds a fixed square window. Side elevations hold three-over-one windows. A cornice line delineates the lower level from the side gable ends.

The building is located on the east side of Pannell Street on the southwest portion of the property. The lot is located in an urban setting and is covered with asphalt. A public concrete sidewalk runs north-south adjacent to the western edge of the property. A concrete driveway runs along the north side of the property and connects with an asphalt parking lot in the rear.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This is a one-part commercial brick building with a flat roof and a brick foundation. The façade features an off-entrance (glass/metal door) with paired display windows to the right. To the left of the entrance is a tiled wall surface comprised of small square tiles of beige, red, blue, black and white in color. To the left of the tiled wall is another storefront, the door bay has been replaced with a fix display window over a rectangular fixed window and flanked by paired display windows. An asphalt shingled shed awning shelters the storefront. The north and elevation holds paired and single one-over-one windows with continuous concrete sills and header and a stringcourse of alternating header and stretcher course. The north elevation holds a side entrance off-centered and window wells. A concrete coping runs the perimeter of the roofline.

The building is located on the east side of Pannell Street on the west portion of the property. The lot is located in an urban setting and is covered with asphalt. A public concrete sidewalk runs north-south adjacent to the western edge of the property. The property has very little landscaping, aside from a small amount of grass in the east portion. A concrete driveway runs along the north side of the property.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This is a two-part commercial block brick building with a flat roof and metal coping along the roofline and a concrete foundation. The façade holds four bays from left to right; metal entrance door, display window, glass/metal door and display window. Above the storefront is a metal frame for a shed awning. Upper level holds a paired and single one-over-one window. North elevation holds a centered one-over-one window on the second level with an air condition unit toward the front installed in a cut opening in the brick. South elevation on the upper level holds four, one-over-one windows. All windows are replacement and the storefront is ca. 1960.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

Hickman High School was designed by William Butts Ittner. The building was constructed in 1926 and opened in 1927. Ittner was a renowned St. Louis architect who designed school buildings across the country. The City of Columbia hired Ittner in 1925 to design this building as well as Benton School and an addition to Douglass School. The projects were funded by a series of bonds, the first passed in December 1925. The building has numerous additions dating from the mid-1950s (vocational classrooms, laboratories, indoor swimming pool) through c. 1990. Older additions (1950s-1960s) are situated primarily on the east end of the property. More recent additions are south and west of the original school. Although it does not appear that this property is individually eligible for the National Register of Historic Places under Criterion C (architecture) due to the building's numerous additions, further research is recommended to fully assess the property's significance in relation to its history (Criterion A)

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The parcel associated with the school is bounded by E. Business Loop 70 (north), N. Providence Road (west), Wilkes Boulevard (south) and N. Seventh Street (east). The property is situated in a mixed use (residential/commercial) neighborhood. The parcel is surrounded by concrete public sidewalks. Large parking lots are situated at the northwest and central (east and west) areas of the campus. Grassy landscaped areas surround the lots and buildings. A tennis court, baseball field and football stadium are situated on the south side of the campus. Five (5) prefabricated outbuildings are situated near the sports-use areas and adjacent parking lots. A standalone brick sign bearing the name of the school is located at the north end of the campus. Surrounding the sign is a circular drive providing entry/exit to the 1926 building via Business Loop 70. The sign is not original (c. 1990). Detached school buildings include a two-story brick building at the northeast corner of the campus (c. 1960) and what appears to be a facilities building near the campus center (c. 1956). Within the facilities area is a prefabricated gable roof outbuilding (c. 1960). Three small outbuildings – not visible from the street – are situated immediately west of the facilities building (2) and east of the school's westernmost wing (1). The detached buildings on the parcel are not individually eligible for the National Register.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

Hickman High School, constructed in 1926, has been added on to many times, beginning in the mid-1950s and extending through c. 2000. The original school has a clay tile clad gabled roof, exterior brick walls and a limestone foundation. The building is designed in Ittner's classic Jacobethan Revival style (H-plan). The roof of the building has patterned tile that mimics the building's exterior Flemish bond brick walls. At either end of the roofline are wide decorative chimney stacks with Tudor-inspired detailing. Windows are replacement but retain the original fenestration of double-hung below transom lights. A projecting central two-story bay on the façade has ashlar stone detailing with an upper balconette, quoins and a classical entry surround. The entry bay is arched and filled with replacement single-light doors/transom. The name of the school is inscribed above the entrance within the limestone surround. Projecting gabled wings extend north at the east/west ends of the central wing. The roofline has parapet walls dividing each of the wings. Parapet walls are capped with decorative finials and terra cotta tiles. Additions are all similar in appearance with flat roofs, exterior brick patterned walls (in imitation of the original wing), concrete foundations and single-sash windows. The additions constructed in the 1950s-1960s (east end) have aluminum framed windows and doors. Entrances are recessed with single and paired doors below fixed transoms. More recent additions/buildings likewise have brick walls; some have concrete detailing on elevations (below brick). Windows on more recently constructed buildings are fixed sash with metal framing.

The building is located on the corner of Wilkes Street and Range Line Street on the southwest portion of the property. The property surrounding the building has been converted to a community park. The property is within an urban setting in a neighborhood that is largely residential in appearance. A public sidewalk runs along the west and south edge. The lot has a variety of landscaping and hardscaping, including small and mature trees, grass, pebble groundcover, shrubs, flower, planters, curvilinear sidewalks, and retaining walls. A country style fence post runs along the western edge. To the east of the building is a small asphalt parking lot.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This is a one story commercial building with a flat roof and clad in brick. All windows and bays hold modern (ca. 2000) glass and metal doors/window with transoms. The primary elevation holds two bays delineated by brick pilasters. The left bay holds an inset entrance flanked by display windows with multi-light transoms. The second bay holds a tripled paired display window with transoms. Above the storefront near the roofline is two rows of inset brick. A chamfered entrance that holds an entrance door with sidelights and a transom flanked by brick pilasters and connects the Range Line Rd. elevation to the Wilkes Blvd. elevation. Above the chamfered entrance is an inset brick panel with a sign that says "Grove construction General Contracting." The Wilkes Blvd. elevation holds a tripled paired display window with transoms. Above the display window is two rows of inset bricks. The window bay is offset to the right by two small fixed windows. Each bay area has a brick bulkhead. The rear elevation holds a one story concrete block addition that runs the width of the elevation. It holds two single entrances and the electrical meters.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot at the northwest intersection of Wilkes Boulevard (south) and Range Line Street (east). A concrete public sidewalk flanks the east end of the lot. A gravel and asphalt drive and wood privacy fence border the west end of the parcel. The rear yard has mature trees. An outdoor statue (Virgin of Mary), picnic tables and mature trees are situated on the south side of the dwelling. A privacy wood fence flanks the north end of the parcel. A concrete walk extends from the public sidewalk to the porch and encircles the north end of the dwelling. A frame sign set within a flower bed is situated in the front yard south of the private walk.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The two-story brick dwelling has a hipped asphalt shingled roof and a concrete foundation. The primary (east) elevation supports a single-story hipped porch supported by square brick columns. Eaves of the porch and roof are enclosed. Within the porch bay is a replacement paneled door with an upper light. Offsetting the door to the south are three one-over-one replacement windows. Remaining windows are similar in design. Above the porch, the façade wall holds two sets of paired windows. The dwelling has a large two-story rear wing clad with synthetic siding. The wing has a hipped asphalt-shingled roof and rear (northwest corner) first-story incised porch. Windows on the rear wing are six-over-six. A small one-story wing on the north elevation is clad with synthetic siding. The wing has a single door on the east wall.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is a vacant lot that formerly held a dwelling. The lot is largely covered with gravel and partially used for parking truck trailers (access via Range Line Street). A make-shift fence with metal posts and plastic webbed fencing flanks the east end of the parcel. Chain link gates are located at the east end. A public concrete walk also extends along the east end of the parcel. The lot is partially covered with grass and mature trees. A privacy wood fence flanks the west end of the lot.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The irregular shaped vacant lot, largely covered with grass and trees, encompasses 1.48 acres that front Range Line Street (east) and Wilkes Boulevard (south). The lot is as described above.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered parcel on the west side of Range Line Street within an urban residential neighborhood. The rear yard has mature trees. A public concrete sidewalk flanks the east end of the lot. A concrete drive is situated north of the dwelling, leading to an attached single-story garage.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling appears to have been constructed in the Folk Victorian style although decorative features are obscured (or have been removed). The dwelling has a hip on gable asphalt shingled roof, interior brick chimney, exterior synthetic siding and a concrete foundation. The windows are replacement one-over-one. Eaves are enclosed. On the façade is an enclosed shed roof half-story porch. The east elevation of the porch enclosure has a storm door flanked by continuous one-over-one windows. Offsetting the porch on the north is a front gabled wing which has a pedimented gable and one-over-one (lower elevation) window. Above the porch is a hipped dormer with a one-over-one window. The northwest corner of the dwelling features a single-story garage with a flat roof and overhead replacement door. The garage is clad with vinyl siding.

The dwelling is on a grass covered lot on the west side of Range Line Street within an urban residential neighborhood. The yard supports mature and young trees. A concrete public sidewalk flanks the east end of the lot. A concrete drive is situated south of the dwelling, leading to an original attached garage wing. Northwest of the dwelling is a vertical board shed with a hinged door. The outbuilding is not eligible for the National Register of Historic Places

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The end gable plan dwelling has an asphalt-shingled roof, exterior asbestos shingle siding and a concrete foundation. The primary (east) elevation supports an original portico with replacement wood columns and a non-original frame balustrade. Within the porch bay is a centered multi-light wood door. One-over-one replacement windows flank the portico. Remaining windows are of similar configuration. At the south end of the dwelling is an attached end-gable garage with an overhead track replacement door.

The dwelling is on a grass covered lot with mature trees and shrubs. A frame sign bearing the name of the shelter is in the front yard south of a private concrete walk. The walk extends from the porch to a public sidewalk flanking the east end of the lot. A gravel drive bounds the north end of the lot. The property is on the west side of Range Line Street in an urban residential neighborhood.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front plan dwelling has an asphalt shingled roof, exterior weatherboard siding and a raised concrete foundation. The primary (east) elevation supports a hipped enclosed porch with frame handrails flanking the porch steps. The enclosed porch has a central storm door flanked by continuous one-over-one windows. Above the porch are paired one-over-one windows. Original four-light windows flank the paired windows. The gable field holds a louvered vent. An interior brick chimney is situated near the north end of the dwelling. The north elevation supports a secondary original entry bay with a replacement six-light door. The dwelling has a rear shed wing.

The dwelling is on a grass covered parcel on the west side of Range Line Street within an urban residential neighborhood. The east end of the parcel is bounded by a concrete private sidewalk. The south end of the house is flanked by a gravel drive. A concrete walk (partially intact) extends from the public walk to the front porch steps.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a front facing gambrel roof clad with asphalt shingles, exterior synthetic siding and a concrete foundation. The primary (east) elevation has an off-center shed portico supported by wood columns. A frame balustrade (not original) flanks the steps and sides of the portico. Within the entry bay is a c. 2000 single-light door. The portico is offset by a one-over-one replacement window. Remaining windows are of similar configuration. The roofline ridge supports an interior brick chimney. The upper façade holds two double-hung windows. The gable field supports a louvered vent. Side elevations (north and south) have gambrel cross gables supporting single double-hung windows on the upper elevation walls. Below the north cross-gabled gambrel, the first-story has a projecting window bay (original) with three windows. The dwelling has a rear shed wing.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass-covered lot on the west side of Range Line Street within an urban residential neighborhood. A concrete public sidewalk bounds the west end of the lot. A concrete drive flanks the north end of the lot. City maps indicate an outbuilding southwest of the dwelling that is not visible from the street. The outbuilding would not be individually eligible for the National Register due to the associated dwelling, which was recently constructed and is likewise ineligible. A chain link fence partially surrounds the rear yard.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front plan dwelling has an asphalt shingled roof, exterior synthetic siding and a concrete foundation. The primary (east) elevation has an off-center gabled porch supported by two square wood columns. A frame balustrade extends between the columns. Within the porch bay is a paneled door offset by a one-over-one windows. Remaining windows are of similar configuration.

The dwelling is on a grass covered lot on the west side of Range Line Street in an urban residential neighborhood. The east end of the lot is bounded by a concrete public sidewalk, which intersects a private walk leading to the front porch. The walk also extends to the gravel drive, which bounds the south end of the parcel. West of the drive is a small gable-front plan outbuilding with vinyl siding and paired contemporary paneled doors. The outbuilding is not eligible for the National Register of Historic Places. The rear yard has mature trees. The front yard has a young tree.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt-shingled hip on gable roof, exterior synthetic siding (some original weatherboard is visible near the lower south elevation) and a limestone foundation. The primary (east) elevation has a c. 1960 remodeled porch clad with stucco and featuring rounded openings. Within the shed porch, the primary elevation holds a door offset by a one-over-one replacement window. Remaining windows are of similar configuration. The primary entry bay holds a c. 2000 paneled door with upper fanlight. The front gabled wing holds a single window on the east elevation. The gable field has an original arched louvered vent. A gabled dormer is situated above the porch. The dormer has a pyramidal roof and one-over-one window.

The dwelling is on a grass covered lot on the west side of Range Line Street in an urban residential neighborhood. A concrete public sidewalk bounds the east end of the lot. Mature plants and flowers are situated in the front yard. The rear yard, partially surrounded by frame lattice and fencing, has mature trees. A partially paved (with asphalt) and gravel drive bounds the north end of the dwelling and circles to the rear (west) elevation. West of the drive is a wide shed garage with dropped siding (c. 1940). The garage has paired sliding vertical board doors and a hinged vertical board door on the east elevation. The outbuilding is not individually eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a cross-gabled and rear hipped roof clad with asphalt shingles. The exterior is clad with asbestos shingles and the foundation is limestone or textured concrete block, largely obscured by plantings. The primary (east) elevation has a full hipped porch with a central gable. The porch is supported by unique columns with upper ringed detailing and rounded, larger bottoms. The columns rest on brick piers. A balustrade surrounds the porch which wraps the north end of the front wing. Lattice frames the north and south ends of the porch and obscures the foundation below the porch floor. Within the porch bay are two doors. The doors are obscured by storm doors but appear to have multi-light windows in the upper half. Windows flank door near the center of the elevation. The south window is one-over-one replacement. The north window is original four-over-four. The front gabled wing (centered on the façade above the porch) holds a one-over-one window offset by a louvered c. 1940 window. The remainder of the upper façade, which flanks the front gabled wing, has (on either side of the projecting wing) single wall dormers with original one-over-one windows.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

The Eugene Field School was completed in 1917 and construction started in 1916 at a cost of \$22,000 to house first through six grades. W. B. Ittner, architect, designed the building and Davis & Edwards of Columbia were the contractors. The school held six (23' x 30') class rooms, a domestic science room, manual training room and an office. The funding for the building was provided by a bond issue in May 1916, total bond \$90,000 which included the Eugene Field School, the Douglass School, additions to the Lee School and improvements to the Benton and Jefferson buildings. The bond package had a 10 cent increase in property tax. Columbia school district experience an increase in elementary school students and the Eugene Field School was built to help with the overcrowding. In 1962 with the increase in student enrollment, Eugene Field School and Grant Elementary underwent expansion with additions constructed to the buildings.

The school was name for Eugene Field, a St. Louis born writer, mainly known for his children's poems. The decision to name the school after Field was unanimously adopted at a school board meeting in November 1916.

Field School continued to operate as an elementary school until December 2010 when students and staff transferred to the newly constructed Alpha Hart Lewis School.

Further research and evaluation needs to be conducted to determine if the school building is eligible for individual listing in the National Register of Historic Places. The interior of the building needs to be evaluated to determine if it retains integrity. The building if eligible for listing could be significant in the Areas of Criterion A: Education for its role in the statewide trend in the early 20th century to provide schools for elementary students and for it's the role it played in meeting the needs of the ever expanding school district from 1917 until its closure in 2010. The Eugene Field School is significant under Criterion C (Architecture) as an example of Second Renaissance Revival style, as well as for its design by architect W. B. Ittner and local building contractors Davis & Edwards.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is bound by Range Line Street to the west, Smith Street to the North, Pannell Street to the east, and a residential dwelling and a community park to the south, taking up nearly all of the block. The school building is located at the north end of the property. A concrete public sidewalk runs north-south adjacent to the western edge of the property. The property has a number of mature trees throughout, some located in the northwest portions of the grassy area in front of the main school entrance, and others located on the middle and southern west edges dispersed between and around the playground equipment and basketball courts. Chain link fences enclose the playground and asphalt basketball/parking lot areas to the south and line the entire eastern edge along Pannell Street. An asphalt driveway and parking lot is located on the west and middle portions of the property. Additional parking is located along the north edge adjacent to the north building addition.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This is a 2.5 story Second Renaissance Revival style brick building with a raised limestone block foundation (ca. 1917) with a one story wing addition, Modern in design (1962); both have a flat roof. The 1917 building's façade (west facing) holds a full-height projecting center bay with a flat to front gable with end returns. Entrance is centered in the bay with original wood/glass double doors with a two-light transom and a terra cotta door surround. The terra cotta lintel features a projecting header; the area between the transom and header has the school's name engraved "Eugene Field School." Terra Cotta scroll work frames the upper part of the lintel. The entrance is flanked by narrow one-over-one windows. Centered above the entrance is a projecting bay with paired fixed windows with transoms and sides of the bay hold a fixed window and transom. The centered bay is offset with brick pilasters capped with terra cotta scrolls and terra cotta bases. Side elevations of the center bay hold one –over-one windows. A concrete stoop with steps and iron railings provide access to the entrance. Symmetrical fenestration patterns flank the centered bay on each level; first and second level exhibit triple paired one-over-one windows and basement level holds paired one-over-one windows. A projecting cornice line runs the width of the façade and is broken by the center bay. Brick quoins are featured at the corners of the building and a brick stringcourse delineates the basement level from the first level. Rear elevation (east) holds a centered projecting wing with windows matching those on the façade. The 1962 one-story addition adjoins the centered wing (description below); at the southeast corner at the intersecting of the two buildings is a metal two-story fire escape. The south elevation of the centered wing (1917 building) the upper level holds a paired one-over-one window; lower level window has been bricked infilled. Attached at the south elevation is another one-story brick wing. The south elevation of the addition holds a centered entrance under a projecting metal front gable supported by round columns on limestone piers. Entrance is a double glass/metal door with sidelights and transom. At the southwest corner is a chamfered window bay of paired vertical five square lights offset by brick quoins. The lower section of the wing is clad in limestone block and upper section brick.

The north elevation features a double door entry on the basement level. A second entry is found in the setback area where the north and east elevation adjoin and is covered by a flat roof canopy supported by metal posts on a brick wall; entry is double doors with two-light sidelight and transom. Attached to the canopy is the 1962 addition.

The 1962 addition on the north elevation holds paired tall narrow four-light windows; this is adjoined to a setback section and it holds a band of 1960s style vertical four-light hopper style windows; south elevation holds the same windows. The west elevation holds a double glass/metal door with sidelights and transom.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the west side of Range Line Street within an urban residential neighborhood. The lot is bounded by a gravel drive on the south, by a concrete public sidewalk on the east and a gravel drive on the north that circles south to the rear (west) elevation. The rear yard is lined with mature trees. A private walk extends from the porch to the public sidewalk. The front yard holds a large mature tree near the intersecting sidewalks.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt shingled hip on gable roof, exterior vinyl siding and a concrete foundation. The primary (east) elevation has a half-width shed porch supported by wood replacement columns. A non-original balustrade surrounds the porch and extends along the steps as handrails. Within the porch bay (façade, east elevation) is a replacement paneled door with an upper fanlight. Offsetting the entry by on the south is a replacement one-over-one window. Remaining windows are of similar configuration. Above the porch is a hipped dormer with a one-over-one window. Flanking the north end of the porch is the dwelling's front-gabled wing. The east elevation of the wing holds a one-over-one window.

The dwelling is on a grass-covered lot on the west side of Range Line Street within an urban residential neighborhood. The east end of the property is bounded by a concrete public sidewalk that is intersected by a private walk leading to the porch. The south end of the lot is flanked by a gravel drive leading to a concrete pad that formerly held an outbuilding. The perimeter of the yard (north and west) is bounded by mature trees. A wood privacy fence bounds the west end of the lot.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The end gable plan dwelling has a rear intersecting gabled wing and shed wing at the west end of the house. The roof is clad with asphalt shingles. The exterior is clad with synthetic siding. The foundation is limestone partially covered with concrete. The primary (east) elevation supports a three-quarters width gabled porch supported by two large brick columns. A c. 1995 balustrade surrounds the porch. Two square wood columns flank the balustrade at the steps. Within the porch bay, the entry is slightly off center and filled with a c. 1995 paneled door with a fanlight. One-over-one replacement windows are situated on either side of the door. Remaining windows are of similar configuration.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the west side of Range Line Street in an urban residential neighborhood. The lot has a number of mature trees and shrubs. The rear (west) end of the lot is flanked by a wood privacy fence. A concrete public sidewalk spans the east end of the lot. At the north end of the property is an asphalt and concrete drive. A concrete walk leads from the drive to the porch and the north elevation of the house.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a cross-gabled asphalt shingled roof, exterior synthetic siding and a concrete foundation. The porch has a pier foundation. The primary (east) elevation has a front-facing gable with a wide one-over-one window with faux shutters on the first story and a smaller one-over-one window in the gable field. Windows are replacement. Offsetting the gabled wing on the south is a hipped porch supported by tapered columns. Within the porch bay is a single door facing east. The entry bay retains an original single-light wood paneled door. A projecting hipped window bay extends at the south elevation, supporting a one-over-one window with faux shutters. The north elevation has a cross-gabled wing with a one-over-one window on each of the exposed walls (east, north, and west). Gable fields are filled with square butt wood shingle siding.

At the end of the driveway is a front gabled outbuilding with vertical wood siding and double doors. The outbuilding is not eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
The wood sided 1.5 story dwelling has an asphalt-shingled cross gable to a lower hip (façade porch) and a front gable dormer with a paired one-over-one window on the front sloping roofline. The façade features a half-width porch sheltered by the hip supported by square posts with a concrete deck. Entrance is at the "L" and offset to the right by a one-over-one window. The front gable holds a one-over-one window on the lower section and gable end. Side elevations hold one-over-one windows.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the west side of Range Line Street within an urban residential neighborhood. The lot supports a concrete public sidewalk on the east and a gravel drive on the south. A concrete walk with steps leads to the dwelling from the public sidewalk. The rear (west) end of the lot is bounded by a chain link fence. The rear yard supports mature trees.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a cross-gabled roof with a central hip. The roof is covered with asphalt shingles and an interior brick chimney is noted near the north elevation. The exterior is clad with synthetic siding and the foundation is poured concrete and raised, supporting fixed sash basement windows. Windows throughout the dwelling otherwise are one-over-one replacement. The primary (east) elevation supports a shed off-center porch with replacement wood columns and a contemporary balustrade/handrail (also wood). Within the porch bay is a c. 2015 paneled door offset by a one-over-one window. The north end of the façade supports a projecting gabled wing with a projecting window bay below the gable overhang. The gable field holds a louvered vent. The window bay has one window on each exposed wall (southeast, east and northeast). At the base of the south elevation is a cellar entry.

The property is located on the east side of Range Line Street. The dwelling is situated on the west portion of the property on a grass covered residential lot in an urban setting. A concrete public sidewalk runs north-south adjacent to the western edge of the property. The property has mature trees in the eastern portion of the property. An asphalt driveway is located to the north and runs to an asphalt parking lot behind the building. A business sign that reads "Patchwork Family Farms" is centered in the front yard grass.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This is a one-story wood sided, asphalt-shingled front gable dwelling that has been converted to commercial use and has a raised concrete foundation. The façade features a wooden stoop with wooden steps and railings and double glass doors (Craftsman style) offset to the left by three fixed windows (non-original). A wooden cornice delineates the lower section from the gable end. The gable end is clad in wood shingles and holds a vent. Side elevations holds paired and single one-over-one windows.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered lot on the west side of Range Line Street in an urban residential neighborhood. The east end of the lot is flanked by a concrete public sidewalk. Private walks lead from the sidewalk to the center of the porch and (at the south end of the lot) to what was originally a detached garage. The former garage is currently used for residential purposes and (based on city maps) attached to the rear elevation (west) of the once single family dwelling. The garage has synthetic siding and a pyramidal asphalt shingled roof. The outbuilding is not eligible for the National Register. The lot has a tree in the front yard and mature trees in the rear yard. An asphalt and gravel drive at the north end of the parcel curves south, leading to the rear (west) elevation of the house.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The gable-front dwelling has an asphalt shingled roof and interior central brick chimney. The exterior is clad with synthetic siding and the foundation is concrete. The primary (east) elevation has a nearly full gabled porch supported by wood columns. A frame balustrade extends around the porch and along the steps as a single handrail. Within the porch bay is a c. 2015 paneled door that is slightly off center. The door is flanked by replacement windows of six-over-six design. Remaining windows are of similar configuration. The front gable field above the porch holds a louvered vent.

The property is located on the east side of Range Line Street. The dwelling is situated on the west portion of the property on a grass covered residential lot in an urban setting. A concrete public sidewalk runs north-south adjacent to the western edge of the property. The property has mature trees in the western front and eastern rear portions of the property. A gravel driveway is located to the north of the dwelling. An outbuilding with a gabled roof and wood siding is located in the northeast corner of the property. The outbuilding is not eligible for the National Register of Historic Places.

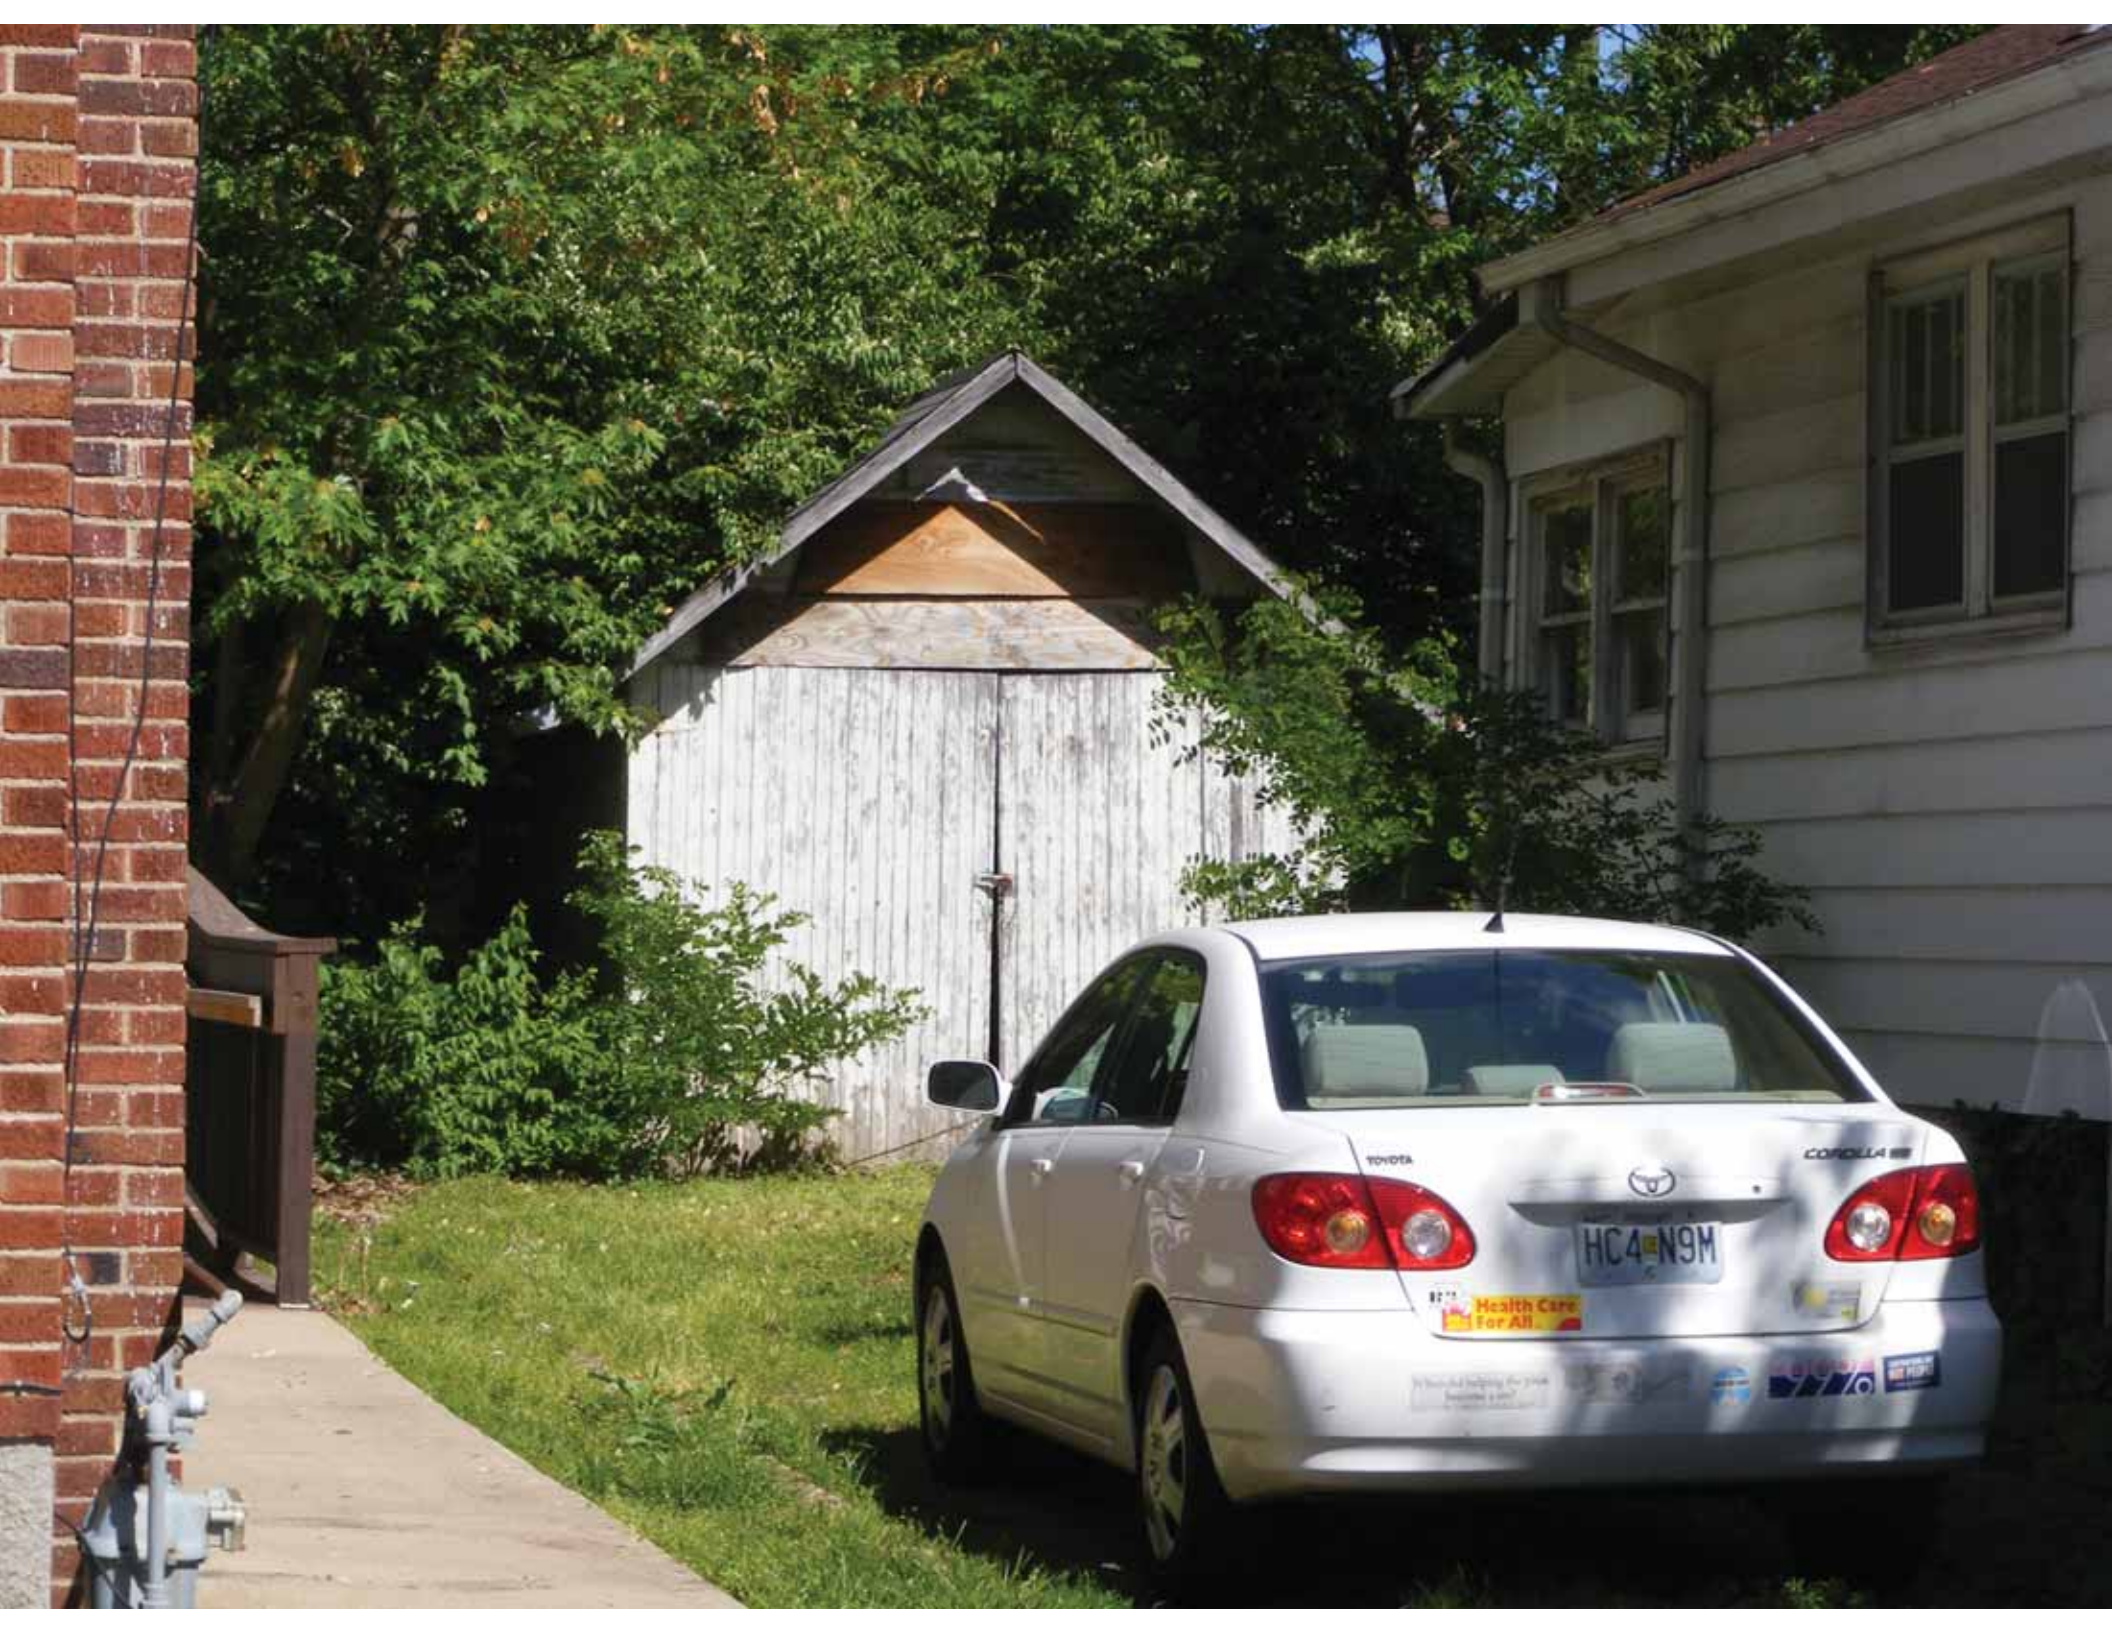

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
A one-story vinyl clad dwelling with an asphalt-shingled front-gable to lower front-gable (façade porch) and a concrete foundation. The façade features a full-width porch sheltered under the gable and supported by square columns. Porch has a low wood-sided wall between columns, wood decking, railing and steps. Entrance is off-centered and flanked by three-over-one windows. Side elevations feature paired and single three-over-one windows. Basement level features window wells.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The former dwelling is on a grass covered parcel on the west side of Range Line Street in an urban residential neighborhood. The rear yard supports mature trees. A concrete public sidewalk flanks the east end of the parcel. An asphalt drive bounds the north end of the lot. A wood privacy fence at the west end of the drive obscures views to the rear yard. An area landscaped for a flower bed fronts the east elevation of the house.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a gable-front asphalt shingled roof, exterior synthetic siding, enclosed eaves and a concrete foundation. The primary (east) elevation supports a hipped porch supported by replacement wood columns. The porch has a frame non-original balustrade. Steps to the porch are frame and situated at the north end. The original concrete porch steps are near the center of the house and lead to a short walk. The concrete steps are flanked by a wrought iron balustrade. Within the porch bay is a central commercial glass and metal door. The door is flanked by replacement windows with faux shutters. Windows are one-over-one.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The building is on an asphalt paved lot that supports parking on the east end of the lot. A concrete public walk spans the east end of the lot. A concrete paved drive extends along the north end of the parcel and to the rear. Not visible from the street but demonstrated on city maps is a rear storage building that would not be individually eligible for the National Register of Historic Places. The outbuilding is west of the main commercial building. A standalone sign on a metal pole is situated at the northeast corner of the building, south of the drive. The parcel is situated on the west side of Range Line Street in an area supporting residential (south) and commercial (north) properties.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This one-story commercial building has a low gabled roof that extends to shed on the north end of the building. Exterior walls are primarily clad with brick veneer. The rear portion of the north wall is painted plywood. The primary (east) elevation has two multi-light window bays with fixed commercial aluminum sash windows. The bay near the south end of the elevation is centered below the roofline peak. This bay is composed of a central glass and aluminum commercial door below a fixed transom. The door is flanked by two commercial lights on either side. The north elevation has a three panel bay of aluminum sash windows. The east end of the three-panel bay on the north elevation is enclosed.

The property is located on the east side of Range Line Street. The building is situated on the west portion of the property on a grass covered residential lot in an urban setting. A concrete public sidewalk runs north-south adjacent to the western edge of the property. The property has shrubs in the west and east portions, a small tree on the southwest corner, and mature trees located in the eastern portion of the property. A shared asphalt driveway is located on the north side of the dwelling and extends down to a shared asphalt parking lot in the rear. A sign that reads "Joining Handz Childcare LLC" is located in the front yard. A wooden fence runs along the southeast edge and eastern edges of the property.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This one-story asphalt-shingled cross-gable on hip dwelling has been converted to commercial use and has a raised concrete foundation. The façade features a replacement partial-width porch (ca. 2000) sheltered by a shed roof and is supported by wood columns. The porch has wood decking, railings and steps; an ADA accessible ramp intersects the porch on the side elevation (right), runs the length of the elevation with access gained at the back elevation parking lot. The porch bay area holds a one-over-one window; entrance is on the side (south) elevation wall. Gable end holds a one-over-one window. Side elevation feature paired and single one-over-one windows.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This is a one-story brick, asphalt-shingle front gable dwelling converted to commercial use on a raised concrete foundation. The partial-width porch has been enclosed and features a low hip to front gable roof (asphalted-shingled). The enclosed porch area features the original brick columns. The entrance is located under the front gable and holds a double glass/metal door; gable end clad in vinyl siding. To the right of the entrance is a tripled paired display window; south elevation of enclosed porch holds paired display windows. A non-original open wooden porch with wood decking railings and steps is sited at the left section providing access to the entrance. The main front gable end is clad in vinyl siding with a vent. Windows are paired and single; south elevation windows are covered over. Above the raised foundation is a roll of brick in the basket weave design. The brick is painted.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.
The property is located on the east side of Range Line Street. The dwelling is situated on the west portion of the property on a grass covered residential lot in an urban setting. A concrete public sidewalk runs north-south adjacent to the western edge of the property. The property has mature trees in the eastern portion of the property. An asphalt driveway is located to the north and runs to an asphalt parking lot behind the dwelling. A business sign that reads "Patchwork Family Farms" is centered in the front yard grass. The north end of the lot is a metal roof carport supported by metal posts and a wooden outbuilding with an asphalt-shingled gambrel roof and double doors. The outbuildings are not eligible for listing in the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
A two-story asphalt-shingled side gable multiple family dwelling clad in brick with vertical wood siding accents. The façade features six bays; each bay is separated by brick pilasters with wall surface area between the pilasters infilled with vertical wood siding. The double paneled wooden door entrance is off-centered in the left section of the façade. The entrance is framed by a wood paneled surround of squares flanked by brick pilasters. There are two bays to the left of the entrance and three to the right; each bay holds slider windows. The upper level features slider windows above the lower windows. South elevation holds a picture window with fixed side lights and a side entrance on the lower level. Rear elevation holds slider windows.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.
The property is located on the east side of Range Line Street in an urban residential neighborhood. The front yard is largely covered with grass. A concrete walk extends from the public walk to the porch at the north end of the façade. An asphalt paved drive on the north end of the parcel leads to an asphalt-paved parking area. An adjacent property's concrete drive bounds the parcel on the south end. A concrete public walk flanks the west end of the lot.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
The dwelling was constructed as a 2.5-story American Foursquare. Contemporary alterations have replaced the original roofline with a third-floor mansard addition. Mansard exterior walls are clad with asphalt shingles. Original rafters are visible below the mansard overhang. The dwelling has a concrete foundation, exterior brick walls and replacement one-over-one windows. The primary (west) elevation features an off-center original porch with wide brick columns and a brick balustrade. The porch has a pyramidal roof and exposed rafter tails. Within the porch bay is an original multi-light Craftsman door with sidelights. Offsetting the entry bay (south of the porch) is a three-window ribbon with a shared brick sill. The second floor has paired windows with shed awnings and brick sills. The mansard façade holds four one-over-one windows. An engaged brick exterior brick chimney is noted at the south end of the dwelling. A rear shed wing is clad with vinyl siding. Alterations to the dwelling indicate that the property was modified to serve as a multi-family residence.

The property is located on the west side of Fay Street and the commercial building was built to fill nearly the entirety of the property in an urban setting with an asphalt parking lot all along the northern edge. The property has little to no landscaping. Property has a chain link fence surround it.

This property is adjoined to 1001 Fay Street (Survey # BO-AS-011-0075) and it carries a different parcel number and ownership. Since 1001 Fay and 1112 Smith Street have different parcel numbers, address and ownership, for this survey will be documented as two different resources.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This one story commercial building is a prefabricated metal with a side gabled roof and has a concrete slab foundation. The primary elevation fronts north and has seven bays; three loading bays with metal doors, three single entrance doors (glass/metal, solid metal and metal with square window) and two fixed windows. At the west end of the building, is a setback section from the primary elevation. This setback area fronts north and holds two loading bays, the roofline projects out over the bays. The west elevation holds a bay opening with a concrete dock area. Attached to the rear elevation at the east corner is another pre-fabricated building with several loading bays.

The property is located on the northeast corner of Fay Street and Smith Street. The lot is located in an urban setting and is being used as a community garden. A public concrete sidewalk runs east-west along the south edge. A barbed wire fence with metal fence posts lines the west and south perimeters. There are three outbuildings and a carport located on the property lot. The first outbuilding is wood sided with a metal seamed side gable and holds an entrance on one elevation with a solid paneled door. Building two is to the right of building one and it is clad in wood siding, features a front gable front, the left side has extended slant covered with plastic. The gable end holds two one-over-one window; entrance is located on the opposite gable end. Building three is setback to the right of the other buildings. It features a metal seamed front gable roof to shed and is clad in wood siding. The gable end holds a six-over-six window. The left elevation holds a four light and paneled door and the right elevation holds vertical three light and paneled door sheltered under the shed roof. To the rear of this outbuilding is a carport with a metal front gable roof supported by metal posts. Picnic tables are located under the carport. The outbuildings and carport are not eligible for the National Register of Historic Places. A wooden fence lines the south perimeter edge. There are various wooden work tables on the property. At the corner of Smith and Fay Streets is a sign that reads "The Urban Farm."

The property is located on the south side of Smith Street. The dwelling is situated within the center of the property on a grass covered residential lot in an urban setting. A concrete public sidewalk runs east-west adjacent to the north edge of the property. The property has shrubs and small trees located throughout. A gravel driveway is present to the west of the dwelling.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
A 1.5 story asbestos clad dwelling with an asphalt-shingled cross gable and concrete foundation. The primary elevation holds a front asymmetrical gable (low-pitched to steeply pitched). The gable end holds paired one-over-one windows and lower section holds a single one-over-one window. The partial-width hipped porch supported by tapered columns on wooden piers is to the right of the gable front. The porch features wood decking, steps and a low solid panel wood wall between piers. The entrance is at the "L" and offset to the right by a one-over-one window. A hipped dormer with a one-over-one window is sited on the front sloping roofline. The west elevation holds paired and single one-over-one windows. The lower level features a stoop entrance sheltered by a shed awning with exposed rafters and brackets; wood decking, steps and railing.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The building is on a grass covered parcel at the northeast intersection of N. Seventh Street (west) and Wilkes Boulevard (south). The building is within an urban residential neighborhood. The lot is flanked on the west and south by a concrete public sidewalk. A wood privacy fence bounds the north end of the lot. The east side of the lot is covered with grass and lined with mature trees on the west end. A semi-circular gravel drive extends through the grassy area.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The single-story commercial building has stepped side elevations and a built-up roof with terra cotta coping. The primary (south) elevation is faced in brick. The elevation supports concrete steps that front the central entry bay. The entry is filled with a c. 2000 paneled door. The door is flanked by original window bays with replacement glass. The windows retain their original single sash commercial configuration. Above the door and windows, the elevation is filled with synthetic siding – this area likely featured transoms that may be beneath the siding. The upper façade has basket weave brick patterning. Side elevations are clad with synthetic siding (which appears to be metal). The rear (north) elevation supports a shed wing. There is no fenestration on the west and north elevations. The east elevation holds two entry bays (one appears to be an original loading bay). Both bays are covered with plywood. The elevation has a wrapped chimney cut off at the roofline.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on a grass covered parcel on the north side of Wilkes Boulevard. A gravel drive extends toward a prefabricated outbuilding (c. 1980) at the west end of the parcel. The outbuilding has a gambrel roof and is not eligible for the National Register of Historic Places. A planter surrounded by brick pavers is situated at the center of the front yard. The rear and front yards support mature trees. A chain link fence surrounds the rear yard.

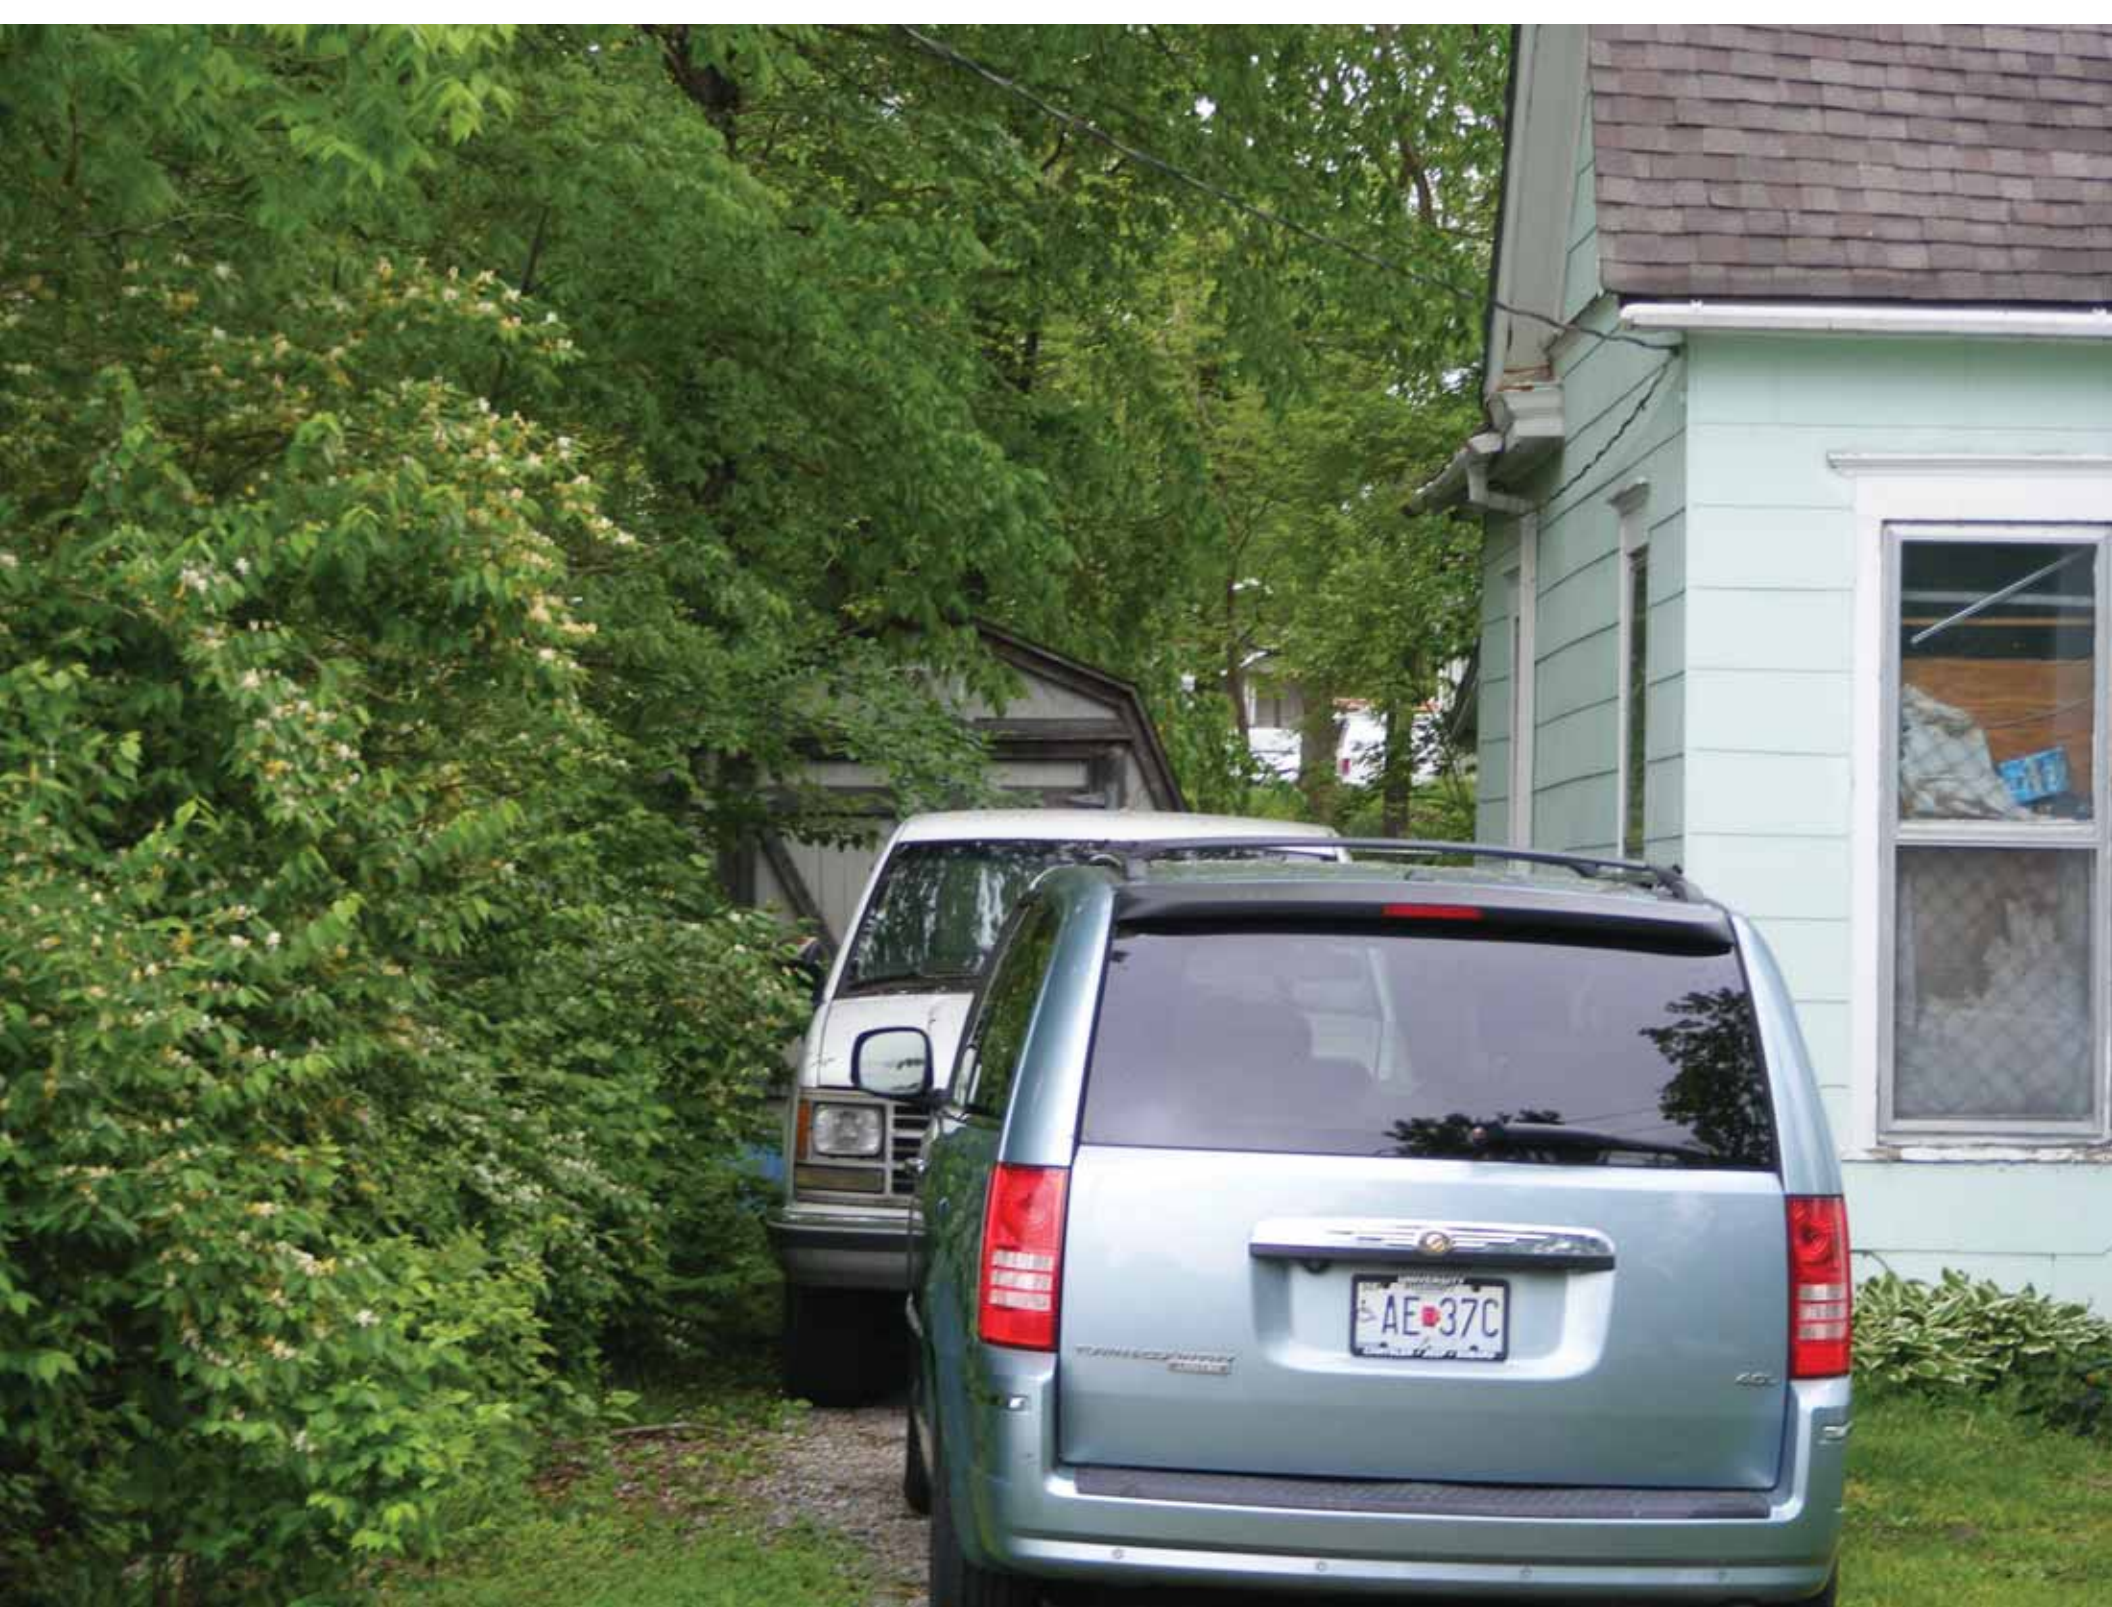

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

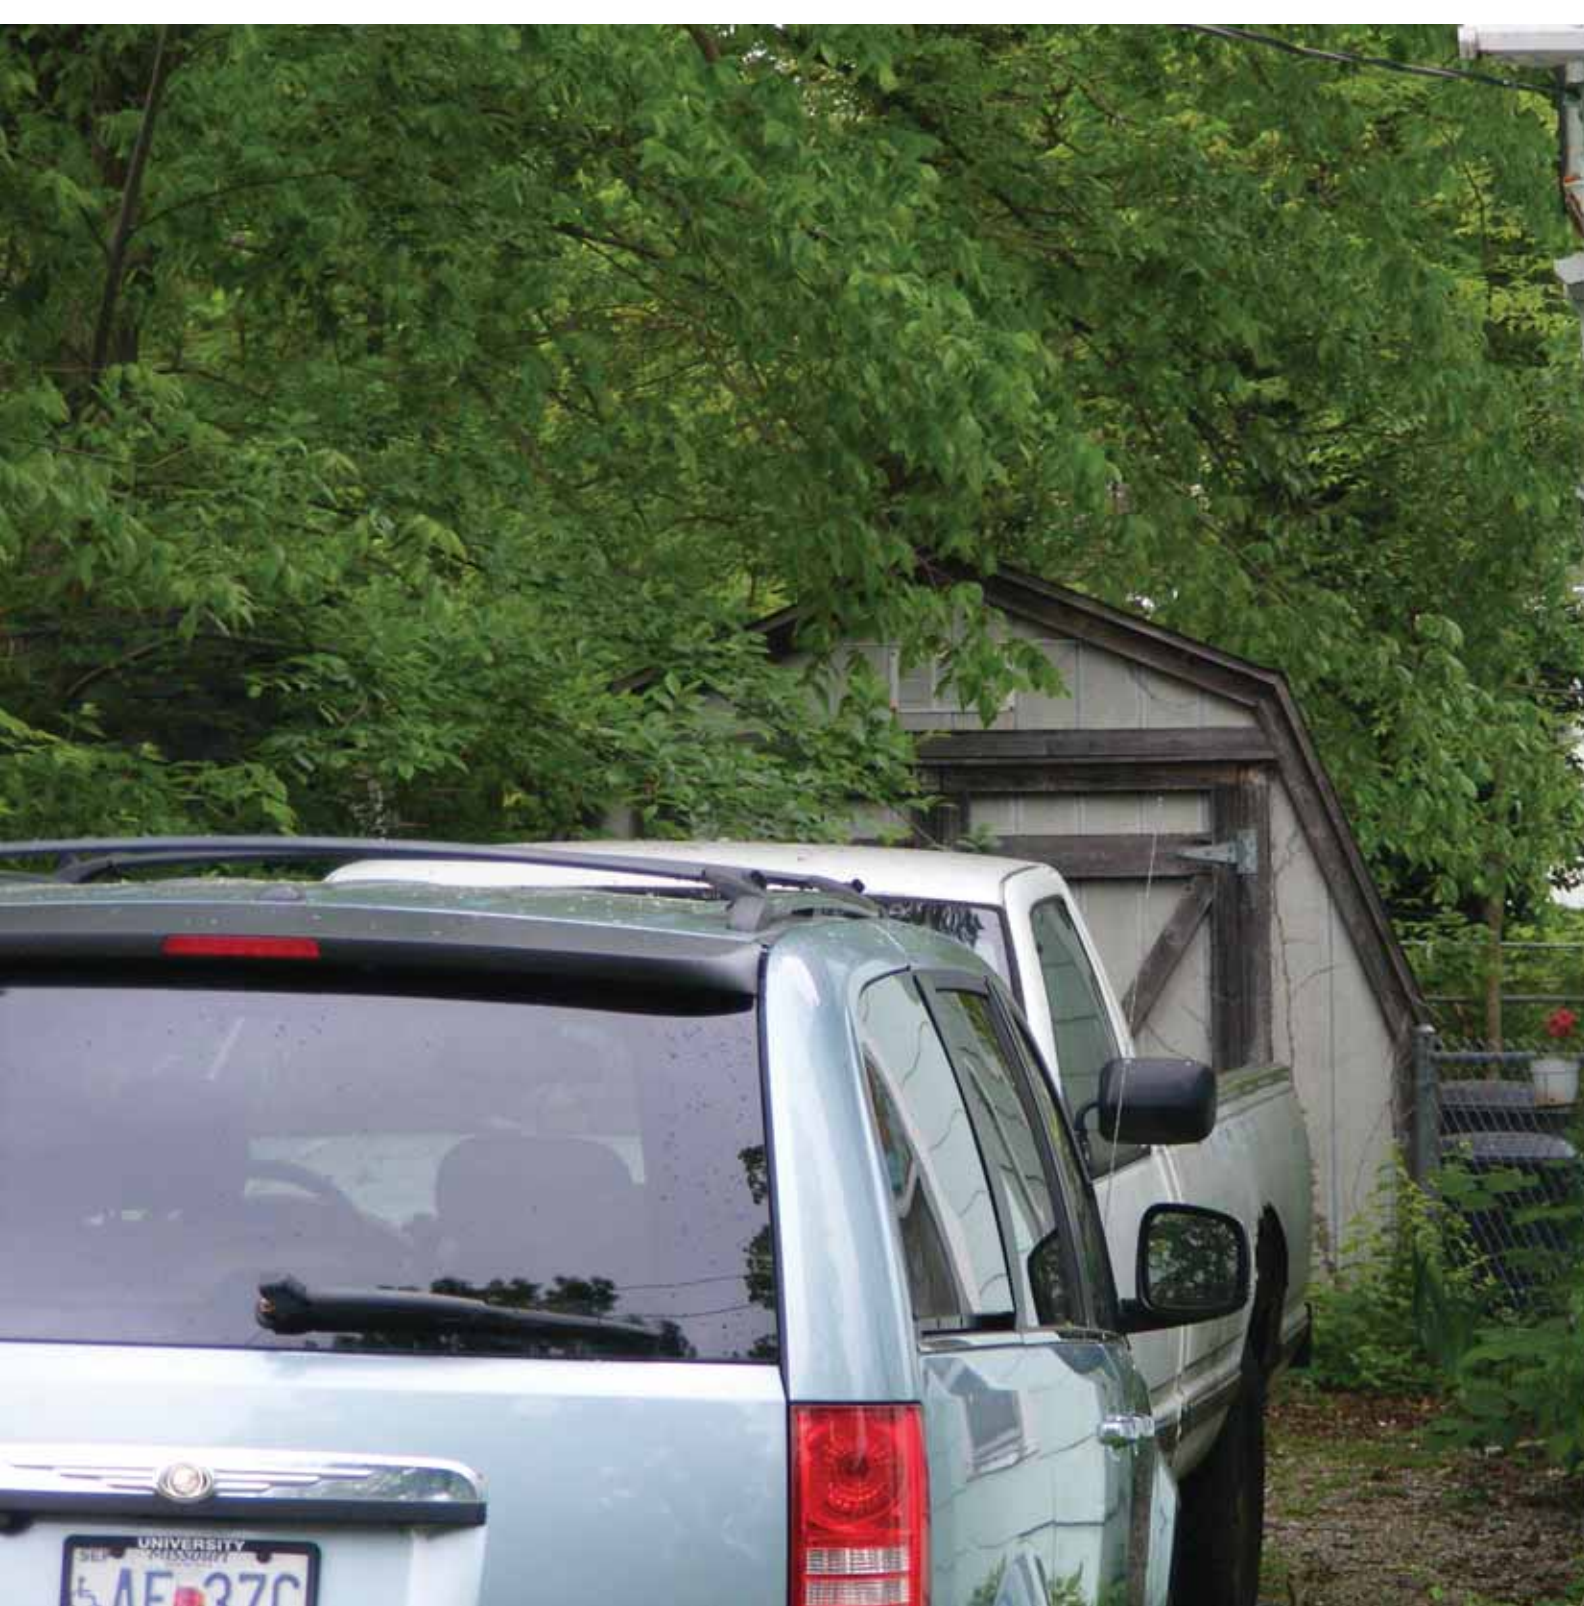

The dwelling has a cross gabled roof with a central pyramidal hip. The roof is clad with asphalt shingles and retains original gable returns. The dwelling has asbestos shingle siding and a concrete foundation. The primary (south) elevation has a shed porch extending from the east wall of the front gabled wing. The porch has milled columns resting on a concrete base. Within the porch bay is a single entry filled with a c. 1980 single-light storm door. The gabled wing façade holds an original two-over-two window. Most windows are one-over-one and appear original. The front gable has a louvered vent in the gable field.

The dwelling is on a grass covered lot on the north side of Wilkes Boulevard in an urban residential neighborhood. The west end of the lot is bounded by a gravel drive. The yard supports mature trees and shrubs in the front and rear yards.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a hip on gable asphalt shingled roof and exterior wide board horizontal siding. The siding condition is much better than the wood on the eaves/soffits, which indicates that the siding may not be original. The front dormer is clad with stucco. The roof has asphalt shingles and the foundation is concrete, largely covered by foliage. The primary (south) elevation has a front facing gabled wing with gable returns. The façade of the wing has upper and lower single windows of original one-over-one. Remaining windows are of similar configuration. East of the gabled wing is a façade shed porch supported by wood columns. Within the porch bay is a replacement paneled door offset by a one-over-one window. Above the porch is a hipped dormer with a one over-one window.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The dwelling is on grass covered lot with a gravel drive west of the house. The front and rear yards support mature trees. An adjacent lot on the west is also addressed as 709 Wilkes Boulevard and supports a secondary small building (residential use) set back from the street. This building appears to date to c. 1945 and has exterior synthetic siding and one-over-one windows. A solid door entry is on the building's west elevation below a shed portico. The building does not appear eligible for the National Register of Historic Places.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a cross-gabled roof with central pyramidal roofline. The roof is clad with asphalt shingles. The dwelling has a concrete foundation and is clad with sawtooth pattern asbestos (east) and vinyl (west) siding. On the primary (south) elevation is an off-center hipped Craftsman style porch with tapered piers resting on brick columns. Within the porch bay is a single door offset by a double-hung window. Windows are c. 1945 two-over-two horizontal sash. The front gabled wing (east end of the façade) is clad with asbestos siding and holds a single double-hung window. The dwelling has a rear shed wing clad with vinyl. Hipped dormers are situated on the south and west elevations. Each dormer holds a single double-hung window.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is on the north side of Wilkes Boulevard within an urban residential neighborhood. The parcel is covered with grass. A concrete walk and steps lead from the street to the porch. Flanking the east end of the house is a gravel drive. A wood privacy fence is situated at the north end of the drive, obscuring the rear yard which holds two outbuildings. One outbuilding has a gabled asphalt shingled roof; the other outbuilding has a shed roof and horizontal board siding. Both buildings are unlikely to be individually eligible for the National Register of Historic Places. The rear yard supports mature trees.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has an asphalt shingled roof, exterior synthetic siding and a concrete foundation. The primary (south) elevation has a front facing gabled wing at the east end. The wing has a one-over-one window and gable field louvered vent. All windows are replacement, one-over-one with faux shutters. The west wall of the front gabled wing supports a shed awning supported by a single column resting on a concrete base. The portico is above a single door (south elevation) with upper multi-light window. Offsetting the entry to the east are two sets of paired windows.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The property is on the north side of Wilkes Boulevard within an urban residential neighborhood. The parcel is covered with grass and surrounded by a chain link fence. At the east end of the lot is a concrete drive partially flanked by a wood privacy fence. The rear yard supports mature trees. Situated north of the dwelling is a gable-front plan garage with vinyl siding and vertical board doors. The garage appears to predate the dwelling (c. 1930) but is not individually eligible for the National Register of Historic Places.

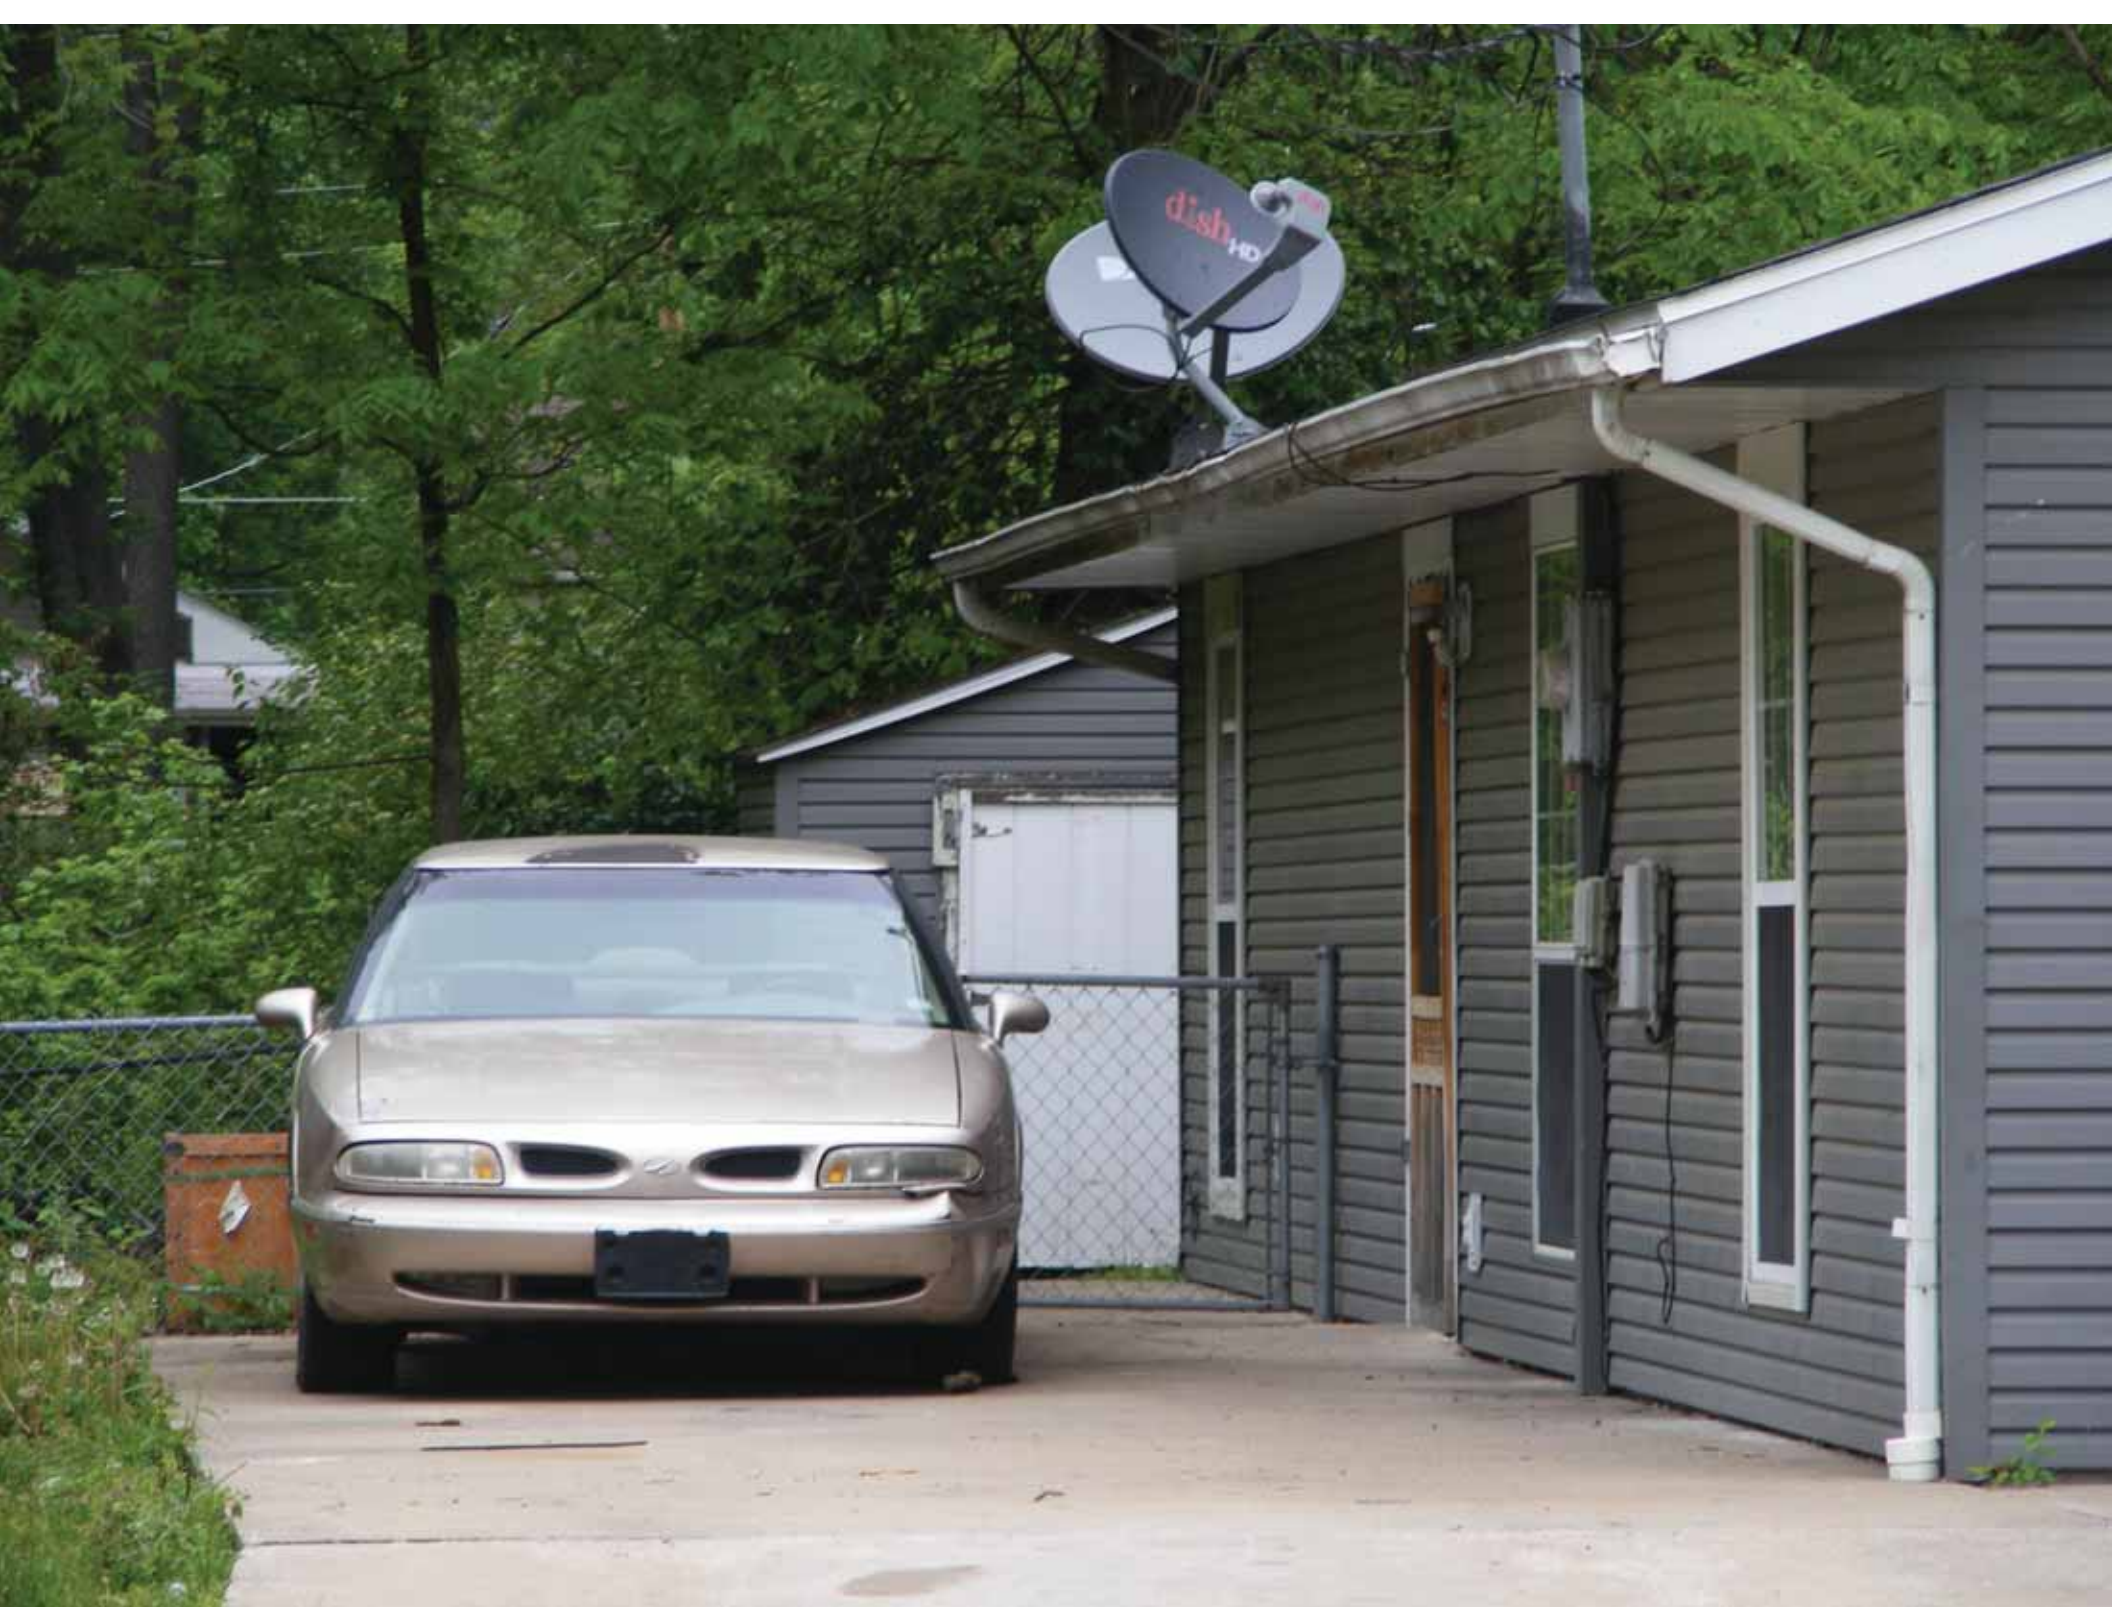

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The dwelling has a low gabled asphalt-shingled roof, exterior synthetic siding and a concrete slab foundation. The primary (south) elevation has a central gabled portico supported by square wood columns. Below the porch roof, the façade wall holds a multi-light door. The portico is flanked by eight-over-six and six-over-six windows. The west elevation holds three windows and a secondary entry. The west elevation holds two windows.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

The property was constructed prior to 1925, supporting two stores at that time. In 1961, the businesses that occupied the building were Obermiller Coin Machine and Hulen's Barber Shop.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The building is located at the northeast intersection of Wilkes Boulevard (south) and N. Eighth Street (west) in an urban residential neighborhood. The building is on a grass covered lot. A concrete public sidewalk bounds the west (N. Eighth Street) end of the lot and south elevation (facing Wilkes Boulevard). Trees are situated in grassy areas surrounding the building.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

The two-story commercial building has a flat roof, exterior brick walls, and a concrete and limestone foundation. The lower façade (south) elevation is clad with synthetic siding. On the façade, lower level, is a central paneled contemporary door flanked by single-light sidelights. Flanking the entry bay are paired one-over-one windows (replacement). A concrete stoop with a metal handrail/balustrade fronts the entry bay. The second story façade holds two original one-over-one windows with brick sills and arches. The east elevation holds a secondary entry filled with a paneled contemporary door. The upper elevation has one-over-one windows. The west elevation is similar with a lower level entry bay and upper elevation windows.

Polk's Columbia City Directories, 1947 and 1961.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.
The property is located on the north side of Wilkes Blvd. The property is located on the corner of Wilkes Blvd. and Pannell Street. The property has little to no landscaping. A concrete parking area is located on the Pannell Ave. and Wilkes Blvd. elevation. The lot is enclosed by a chain linked fence. There is a propane tank on the Wilkes Blvd. elevation near the sidewalk area.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.
This is a one story pre-fabricated metal seamed building with a side gable to shed and has a concrete foundation. The Wilkes Blvd. primary elevation holds three slider windows. The Pannell St. elevation holds three garage bays with metal paneled doors and two singles entry doors and a slider window in the upper section, at the right section near Wilkes Blvd. This section is sheltered by the overhanging roofline. At the left corner of this building, it intersects with the side gable section of the building. This elevation fronts Wilkes Blvd. and holds two garage bays with metal paneled doors. The side gable building elevation that fronts Wilkes Blvd. is void of openings.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This building was listed in the National Register of Historic Places on July 19, 2002. At the time of the listing, the property carried the address of 1115 Wilkes Blvd and it now carries the address of 1123 Wilkes Blvd. For more information on the history and significance please refer to the nomination available at this website: <https://dnr.mo.gov/shpo/boone.htm>.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

Debbie Sheals, *Hamilton-Brown Shoe Factory*, National Register of Historic Places Registration Form United States Department of the Interior, National Park Service, 2002.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The Hamilton-Brown factory sits on the northwest corner of the intersection of Wilkes Boulevard and Fay Street. The factory occupies a relatively small lot; the building measures roughly 50 feet by 285 feet, and the lot is 105 feet by 400 feet. The areas near the streets are used for parking, and the back part of the lot serves as a drive between the factory and the neighboring warehouses. The lot is fairly level, with a slight slope to the south. Two trees are located at the main entrance on the west side.

41. (cont.) Description of primary resource. Expand box as necessary, or add continuation pages.

This is a brick 3.5 story building with a flat roof. The building has three levels (clad in tan brick) with a raised basement level clad in red brick. Each elevations features rows of six-over-six windows with segmental arches designed in double rows of sailor bricks. The primary elevation fronts Fay Street and holds an off-centered entrance of modern type single doors (two) with transoms sheltered by metal shed canopy. A secondary entrance is located on Wilkes Blvd elevation and is a modern type of glass/metal. The north elevation has a one story addition that holds boarded up openings on the Fay Street side and on the north elevation. For a more detailed architectural description please see the link provided in section 21 above.
