

Johnson's Shut-Ins State Park

BLACK RIVER TRAIL SYSTEM

The best way to access the shut-ins valley is on Black River Trail. This trail system was developed to connect people with the different features of the park, including the campground, the day-use area, the interpretive center and the trail leading to the shut-ins. Beginning at the park's campground, the trail provides a convenient way for campers to access the valley. From the campground, the trail crosses Highway MM then traverses an open area before crossing under Highway N and over a bridge at Cope Hollow. Once inside the main day-use area of the park, the trail provides easy access to the main features of the park. The trail section between the campground and the day-use area is made of concrete and the trail surface inside the valley is crushed limestone. Open to hikers and bicyclists, the trail offers benches along the way for convenient resting places.

For visitors wanting to access the main day-use area of the park from the campground, the distance is 1.35 miles one way. For visitors wanting to access the shut-ins area from the campground, the distance is 2.5 miles one way. To use the trail to visit all the features of the park, the distance is 3.15 miles.

Distance from Trailhead 1: 3.1 Miles

Uses:

Hiking 

Hardened Surface Biking 

Blazes:

Brown 

Class: System

Surface Type: Gravel, Paved/Concrete

Trail Rating: Easy

Trailhead & GPS Location:

- 1) 37.54756, -90.84675
- 2) 37.54088, -90.84365
- 3) 37.56036, -90.85211

Elevation profile is not available

You may experience:

- 1) Slippery conditions and/or downed vegetation
- 2) Natural Surface-dirt/mud/gravel, shifting rock, slippery surface, etc.
- 3) Rocks, roots and/or downed vegetation on trail
- 9) Bridges and/or structural crossings
- 12) Road/highway crossing

TRAIL BLAZE COLORS & SURFACE TYPES

The maps on this website indicate the blaze colors for each trail. If more than one trail shares tread, that portion of the trail is identified by more than one color. The surface type of a trail is indicated on the maps generated by this website by a pattern overlapping the blaze color of the trail.

TRAIL TYPE – Loop, Multi-loop, One Way, System or Multi-section

A **loop** trail is one that will return you to the trailhead. **Multi-loop** trails offer two or more separate loops, ex. a trail having a north and south loop. A **one-way** trail takes you from the trailhead to the farthest point on the trail and you will have to retrace your steps to return to the trailhead. If you plan to return to your starting point on a one-way trail, you will have to double the distance to calculate your estimated mileage and/or hiking time.

A **trail system** is a series of interconnected trails that allow you to choose your own route.

A **Multi-section** trail offers two or more separate sections, ex. Katy Trail State Park, and distances are shown both for the entire trail and the sections.

- 1 Slippery conditions and/or downed vegetation
- 2 Natural surface: dirt, mud, gravel, shifting rocks, slippery surface, etc.
- 3 Rocks, roots and/or downed vegetation on trail
- 4 Low-hanging vegetation
- 5 Physically challenging obstacles
- 6 Wood or stone steps
- 7 Steep grades and inclines over 10%
- 8 Bluffs or drop-offs next to trail
- 9 Bridges and/or structural crossings
- 10 Water/stream crossings without bridges
- 11 Occasional water over trail
- 12 Road/Highway crossing
- 13 Emergency response signs
- 14 Narrow passages
- 15 Raised or protruding obstacles
- 16 Electric fence crossings
- 17 Bison/elk
- 18 Rapidly changing weather conditions
- 19 Motorized boat traffic
- 20 Unexpected waves
- 21 Changing water levels
- 22 Surface or submerged objects

YOU MAY EXPERIENCE

These conditions are all things you may encounter while on a Missouri state parks trail. Trailhead signs at the start of each trail also indicate which conditions exist on that trail.

ESTIMATED HIKING TIME

The estimated hiking time was determined by considering the average user's speed and the conditions that might be experienced on a specific trail. Your speed may be slower or faster than the time listed.

GPS COORDINATES

There are several methods of communicating GPS coordinates. Most GPS units will convert from one coordinate system to another. If you require a different coordinate system for your unit, visit dnr.mo.gov/gisutils/ to convert the coordinates shown on this map to another version.

NATURAL AREAS / WILD AREAS

Natural areas are identified in pink. Natural areas are recognized as the best remaining examples known of Missouri's original natural environments. These natural areas are managed and protected for their scientific, educational and historical values. Missouri state parks have 38 designated natural areas, encompassing almost 22,000 acres.

Wild areas are identified in brown. The Missouri Wild Area System is made up of large tracts of land set aside as wilderness, which make the perfect setting for hiking and backpacking. A wild area must be 1,000 or more acres in size, show little impact from humans, and possess outstanding opportunities for solitude. They are strictly protected for their wilderness benefits as well as for their use for environmental education and scientific study.
