Knob Noster State Park

CLEARFORK WOODLAND TRAIL

Clearfork Woodland Trail shares a section of trail with Hawk Nest Trail. It allows access to a small interior section of a large open woodland management area known as Clearfork Woodland. This woodland has been managed for more than 20 years and shows a distinct contrast from the density of the woodland management area along Opossum Hollow that has had limited management application. This trail may occasionally be closed for prescribed burns. Please call the park for details.

Clearfork Woodland Trail is available for adoption; ask at the park office for details.

Distance: 0.6 Mile
Uses: Hiking
Blazes: Blue
Class: Loop
Surface Type: Natural
Trail Rating: Moderate
Estimated Hiking Time: 25 Minutes
Trailhead & GPS Location: 38.74378, -93.58155

Elevation profile is not available

You may experience:
2) Natural Surface-dirt/mud/gravel, shifting rock, slippery surface, etc.
3) Rocks, roots and/or downed vegetation on trail
11) Occasional water over trail
TRAIL BLAZE COLORS & SURFACE TYPES
The maps on this website indicate the blaze colors for each trail. If more
than one trail shares tread, that portion of the trail is identified by more
than one color. The surface type of a trail is indicated on the maps
generated by this website by a pattern overlapping the blaze color of the
trail.

TRAIL TYPE — Loop, Multi-loop, One Way, System or Multi-section
A loop trail is one that will return you to the trailhead. Multi-loop trails
offer two or more separate loops, ex. a trail having a north and south loop.
A one-way trail takes you from the trailhead to the farthest point on the
trail and you will have to retrace your steps to return to the trailhead. If
you plan to return to your starting point on a one-way trail, you will have
to double the distance to calculate your estimated mileage and/or hiking
time.
A trail system is a series of interconnected trails that allow you to chose
your own route.
A Multi-section trail offers two or more separate sections, ex. Katy Trail
State Park, and distances are shown both for the entire trail and the
sections.

YOU MAY EXPERIENCE
These conditions are all things you may encounter while on a Missouri
state parks trail. Trailhead signs at the start of each trail also indicate
which conditions exist on that trail.

ESTIMATED HIKING TIME
The estimated hiking time was determined by considering the average
user’s speed and the conditions that might be experienced on a specific
trail. Your speed may be slower or faster than the time listed.

GPS COORDINATES
There are several methods of communicating GPS coordinates. Most GPS
units will convert from one coordinate system to another. If you require a
different coordinate system for your unit, visit dnr.mo.gov/gisutils/ to
convert the coordinates shown on this map to another version.

NATURAL AREAS / WILD AREAS
Natural areas are identified in pink. Natural areas are recognized as the
best remaining examples known of Missouri's original natural
environments. These natural areas are managed and protected for their
scientific, educational and historical values. Missouri state parks have 38
designated natural areas, encompassing almost 22,000 acres.
Wild areas are identified in brown. The Missouri Wild Area System is made
up of large tracts of land set aside as wilderness, which make the perfect
setting for hiking and backpacking. A wild area must be 1,000 or more acres in size, show little
impact from humans, and possess outstanding opportunities for solitude.
They are strictly protected for their wilderness benefits as well as for their
use for environmental education and scientific study.
