

Graham Cave State Park

GRAHAM CAVE TRAIL

Graham Cave Trail's natural surface section leads to Graham Cave, passing by an interpretive shelter with wayside exhibits and an overlook at a wet-weather waterfall. The paved section has a high degree of incline and leads directly to Graham Cave with an open front and wayside exhibits that define the history and natural communities surrounding the cave. Here, Indian Glade Trail ascends the sandstone outcroppings above the cave to the left, turning westbound toward the campground.

A historic treasure, Graham Cave contained significant archaeological evidence to date its use as a shelter up to 10,000 years ago. The cave was designated a National Historic Landmark in 1961 and listed in the National Register of Historic Places in 1966. Visitors can learn about the archaeological research that revealed the early American Indian presence.

As hikers follow the natural surface trail to Graham Cave, they will be hiking along the edge of the Graham Cave Glades Natural Area. The trail intersects with Fern Ridge Trail on the upper bend. As part of the Missouri Natural Area System, this area still possesses much of the same character experienced by American Indians when they inhabited the region. Ascending from the valley, there will be views of sandstone ledges, often covered with lichens, mosses and ferns. Above the ledges are open, rocky glades. Plants such as prickly pear cactus, rushfoil, pinweed, rose verbena, prairie fame flower, Missouri brown-eyed Susan, hairy lip fern and adder's tongue fern are well adapted to life in the extremely hot and dry glade environment. It's a hike back through time to see the natural environment and the cave that helped man survive here for thousands of years.

Distance from Trailhead 1: 0.3 Mile

Uses:

Hiking 

Blazes:

Yellow 

Class: Loop

Surface Type: Natural, Paved/Concrete

Trail Rating: Moderate

Estimated Hiking Time: 13 Minutes

Trailhead & GPS Location:

1) 38.90412, -91.57499

2) 38.90382, -91.57557

Elevation profile is not available

You may experience:

- 2) Natural Surface-dirt/mud/gravel, shifting rock, slippery surface, etc.
- 3) Rocks, roots and/or downed vegetation on trail
- 6) Wood or stone steps
- 9) Bridges and/or structural crossings

- BOARDWALK

TRAIL BLAZE COLORS & SURFACE TYPES

The maps on this website indicate the blaze colors for each trail. If more than one trail shares tread, that portion of the trail is identified by more than one color. The surface type of a trail is indicated on the maps generated by this website by a pattern overlapping the blaze color of the trail.

TRAIL TYPE – Loop, Multi-loop, One Way, System or Multi-section

A **loop** trail is one that will return you to the trailhead. **Multi-loop** trails offer two or more separate loops, ex. a trail having a north and south loop. A **one-way** trail takes you from the trailhead to the farthest point on the trail and you will have to retrace your steps to return to the trailhead. If you plan to return to your starting point on a one-way trail, you will have to double the distance to calculate your estimated mileage and/or hiking time.

A **trail system** is a series of interconnected trails that allow you to choose your own route.

A **Multi-section** trail offers two or more separate sections, ex. Katy Trail State Park, and distances are shown both for the entire trail and the sections.

- 1 Slippery conditions and/or downed vegetation
- 2 Natural surface: dirt, mud, gravel, shifting rocks, slippery surface, etc.
- 3 Rocks, roots and/or downed vegetation on trail
- 4 Low-hanging vegetation
- 5 Physically challenging obstacles
- 6 Wood or stone steps
- 7 Steep grades and inclines over 10%
- 8 Bluffs or drop-offs next to trail
- 9 Bridges and/or structural crossings
- 10 Water/stream crossings without bridges
- 11 Occasional water over trail
- 12 Road/Highway crossing
- 13 Emergency response signs
- 14 Narrow passages
- 15 Raised or protruding obstacles
- 16 Electric fence crossings
- 17 Bison/elk
- 18 Rapidly changing weather conditions
- 19 Motorized boat traffic
- 20 Unexpected waves
- 21 Changing water levels
- 22 Surface or submerged objects

YOU MAY EXPERIENCE

These conditions are all things you may encounter while on a Missouri state parks trail. Trailhead signs at the start of each trail also indicate which conditions exist on that trail.

ESTIMATED HIKING TIME

The estimated hiking time was determined by considering the average user's speed and the conditions that might be experienced on a specific trail. Your speed may be slower or faster than the time listed.

GPS COORDINATES

There are several methods of communicating GPS coordinates. Most GPS units will convert from one coordinate system to another. If you require a different coordinate system for your unit, visit dnr.mo.gov/gisutils/ to convert the coordinates shown on this map to another version.

NATURAL AREAS / WILD AREAS

Natural areas are identified in pink. Natural areas are recognized as the best remaining examples known of Missouri's original natural environments. These natural areas are managed and protected for their scientific, educational and historical values. Missouri state parks have 38 designated natural areas, encompassing almost 22,000 acres.

Wild areas are identified in brown. The Missouri Wild Area System is made up of large tracts of land set aside as wilderness, which make the perfect setting for hiking and backpacking. A wild area must be 1,000 or more acres in size, show little impact from humans, and possess outstanding opportunities for solitude. They are strictly protected for their wilderness benefits as well as for their use for environmental education and scientific study.

TRAIL USE

-  Hiking Trail
-  Backpacking Trail
-  Mountain Biking Trail
-  Equestrian Trail
-  Accessible
-  Hardened-Surface Bicycling Trail
-  Paddling Trail
-  Off-Road Vehicle (ORV) Trail
-  Motorized Boating Trail
-  Wagon Suitable Trail
-  Interpretive Trail
-  Fitness Trail
-  Interpretive Water Trail
-  Wildlife Viewing Trail
