

Arrow Rock State Historic Site

RIVER LANDING TRAIL

River Landing Trail was constructed in 2007 as a joint project of the United States Fish and Wildlife Service, the Department of Natural Resources and the village of Arrow Rock, with grants from the National Park Service. Ongoing maintenance is carried out by the Manitou Bluffs Chapter of the National Lewis and Clark Trail Association and the Friends of Big Muddy. The trail links the historic site to the 1.6-mile linear Lewis and Clark Trail of Discovery on the Jameson Island Unit of the Big Muddy National Fish and Wildlife Refuge.

River Landing Trail follows an old road bed and enters the refuge slightly about halfway down its length. A bridge constructed by volunteers crosses the remnant of the old river channel near the junction with Lewis and Clark Trail of Discovery. The Missouri River can be reached by following the Trail of Discovery south for .5 mile. White connector 1, with a distance of 0.1 mile, connects River Landing Trail with Pierre a Fleche Trail.

The river landing was the hub of Arrow Rock commercial activity and the site of several warehouses. By 1860, the Arrow Rock landing was one of the busiest river ports between St. Louis and Kansas City. Remnants of an old wagon road are visible adjacent to the trail. The decline of steamboat commerce after the Civil War and the shifting of the Missouri River away from the site resulted in abandonment of the area and closing the river ferry by 1927.

Following the record floods of 1993 and 1995, the area began reverting to bottomland forest and wetlands. Interpretive signs explain the history of the landing, cultural features such as the former warehouse sites and boat building yard, and the natural processes now occurring in the area. The trail passes a portion of the bluff from which Native Americans extracted flint to make their tools and points giving Arrow Rock its name. Beaver, otters and wading birds or signs of their activity are frequently visible in the old channel.

Distance: 0.1 Mile

TRAIL BLAZE COLORS & SURFACE TYPES

The maps on this website indicate the blaze colors for each trail. If more than one trail shares tread, that portion of the trail is identified by more than one color. The surface type of a trail is indicated on the maps generated by this website by a pattern overlapping the blaze color of the trail.

TRAIL TYPE – Loop, Multi-loop, One Way, System or Multi-section

A **loop** trail is one that will return you to the trailhead. **Multi-loop** trails offer two or more separate loops, ex. a trail having a north and south loop. A **one-way** trail takes you from the trailhead to the farthest point on the trail and you will have to retrace your steps to return to the trailhead. If you plan to return to your starting point on a one-way trail, you will have to double the distance to calculate your estimated mileage and/or hiking time.

A **trail system** is a series of interconnected trails that allow you to choose your own route.

A **Multi-section** trail offers two or more separate sections, ex. Katy Trail State Park, and distances are shown both for the entire trail and the sections.

YOU MAY EXPERIENCE

These conditions are all things you may encounter while on a Missouri state parks trail. Trailhead signs at the start of each trail also indicate which conditions exist on that trail.

- 1 Slippery conditions and/or downed vegetation
- 2 Natural surface: dirt, mud, gravel, shifting rocks, slippery surface, etc.
- 3 Rocks, roots and/or downed vegetation on trail
- 4 Low-hanging vegetation
- 5 Physically challenging obstacles
- 6 Wood or stone steps
- 7 Steep grades and inclines over 10%
- 8 Bluffs or drop-offs next to trail
- 9 Bridges and/or structural crossings
- 10 Water/stream crossings without bridges
- 11 Occasional water over trail
- 12 Road/Highway crossing
- 13 Emergency response signs
- 14 Narrow passages
- 15 Raised or protruding obstacles
- 16 Electric fence crossings
- 17 Bison/elk
- 18 Rapidly changing weather conditions
- 19 Motorized boat traffic
- 20 Unexpected waves
- 21 Changing water levels
- 22 Surface or submerged objects

ESTIMATED HIKING TIME

The estimated hiking time was determined by considering the average user's speed and the conditions that might be experienced on a specific trail. Your speed may be slower or faster than the time listed.

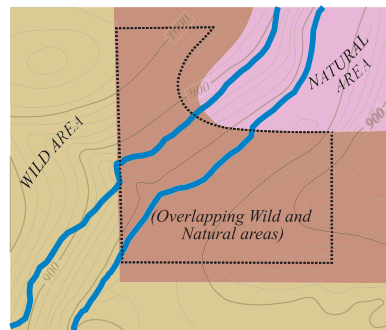

GPS COORDINATES

There are several methods of communicating GPS coordinates. Most GPS units will convert from one coordinate system to another. If you require a different coordinate system for your unit, visit dnr.mo.gov/gisutils/ to convert the coordinates shown on this map to another version.

NATURAL AREAS / WILD AREAS

Natural areas are identified in pink. Natural areas are recognized as the best remaining examples known of Missouri's original natural environments. These natural areas are managed and protected for their scientific, educational and historical values. Missouri state parks have 38 designated natural areas, encompassing almost 22,000 acres.

Wild areas are identified in brown. The Missouri Wild Area System is made up of large tracts of land set aside as wilderness, which make the perfect setting for hiking and backpacking. A wild area must be 1,000 or more acres in size, show little impact from humans, and possess outstanding opportunities for solitude. They are strictly protected for their wilderness benefits as well as for their use for environmental education and scientific study.

TRAIL USE

-  Hiking Trail
-  Backpacking Trail
-  Mountain Biking Trail
-  Equestrian Trail
-  Accessible
-  Hardened-Surface Bicycling Trail
-  Paddling Trail
-  Off-Road Vehicle (ORV) Trail
-  Motorized Boating Trail
-  Wagon Suitable Trail
-  Interpretive Trail
-  Fitness Trail
-  Interpretive Water Trail
-  Wildlife Viewing Trail
