Friedman House #43 Appendix

In 1886, he entered the mercantile business as a partner of Brumfield and Dawson in Denver, MO and the following year moved to Grant City. In 1871, he was elected County Clerk of Worth County and held the position for over 12 years. In 1881, the same year. he built this house, he with William D. Winslow and others organized the Citizen's Bank, which is the single bank now in existence in Grant.City.

There are palladian windows on the north and south facades. There is a bunglow porch on the east with shingle balustrade.

43. History and Significance

1. No.

10.

This house was built for Ralph Dawson, the son of Jesse, who was in business with his father on the south side of the Courthouse Square. Dawson died of TB about 1906, and his widow lived in the house until she married Dr. Clark Whilhite, a Worth County native who was an ŝ Army Doctor, following World War I, when he retired and moved back to Grant City.

#### 44. Description of Environment and Outbuildings

This house is located in the residential area of a small town.

said, really had a bad name. If someone asked for directions to the Nation, (see appendix)

The Nation School #43 Appendix

no one would admit they knew where it was. The district became known as the Nation as the result of the resolution of a 20-year long controversy over the location of the school. When District #20 was formed in 1868, the school was built on one acre of swampland north of Lotts Creek, which flowed diagonally through the district.

According to Mrs. Wilkinson, Lotts Creek was prone to flooding and did not spare the school the first year it opened. That flood began the 20 year debate about moving the school to a bluff on the south side of the creek. When the 16 men residing on the swampland side of the creek met the 50 men from the bluff side for a vote in 1887, a man from the swampland is reported as saying, "everyone in the whole damn nation is here." After that vote, the district was called the Nation and the school was moved to the bluffs.

The thickly wooded bluffs bordering the creek were an excellent hideout for fur and horse thieves. The first white settler, Henry Lott was a horse thief = Lott who was Mrs. Wilkinson's great-great-grandfather, came to the area in the 1840's. Lotts Grove was the site of the last stand of the Musquaque Indians in 1853 before they were pushed onto a reservation.

When the Redding Bank was robbed in the 1930's, law enforcement officials believed the thieves were hiding in the bluffs. They searched the hills and to their surprise flushed out Bonnie and Clyde instead of the Redding gang. Mrs. Wilkinson, who has lived in the family home near the school all her life, said, "I remember that well. They chased them (Bonnie and Clyde) but didn't catch'em." She said ruffians often came up to their house at night to steal chickens, hams or canned goods stored in the cellar. "If we heard the chickens at night we didn't go out to investigate it. We knew it was someone taking a few."

To survive in school, Mrs. Wilkinson said, "You had to know how to swing a dinner pail and run fast." When she won the prettiest Valentines Day box one year, a schoolmate initiated a scrimmage after school. "She wore long braids, I had curls. But we both got hair pulls." "The boys had fights every noon in the hickory grove behind the school. 'My dad's horse can run father than yours' was a reason enough for a fight," she remembers. "We only had one teacher and sometimes they didn't last near the term." Perhaps the instructors left because they had to teach grades one through eight to 60 students or because of the unruliness of the group. "We'd go skating on the river at noon and sometimes we wouldn't come back to school in the afternoon."

From information she has collected from oldtimers, Mrs. Wilkinson learned that during church there was usually a fist fight going on in the hickory grove. And the Saturday night dances usually ended up being drunken brawls. However, by the time she was born in 1911, the dances had been moved to the Allendale, MO dance hall which had a nickelodeon and waxed floors. The Nation School #43 Appendix Cont.

According to notes made in 1966 by A.E. Baker, then 92-years-old, there were 27 log cabins on the bluffs by the turn of the century. The district was selfsustaining with a saw and sorghum mill, broommaker, blacksmith, brick layer, auctioneer, preacher, teacher, horse traders, carpenters and mortician. The women were involved with baking bread, curing meat, making soap, drying fruit spinning wool, weaving cloth and making clothes. Mr. Wilkinson has a hand woven shawl made by his mother. They had everything but a sheriff, but they practiced their own self-government, Mrs. Wilkinson commented.

From other oldtimers such as Flossie Miller, Patsy Long and Elva Roach, she learned about the family trees. They told her who married who, and in some instances why. The couples usually lived with their parents until the baby came. Whole families married other families. One record shows eight in one family married eight in another.

Mrs. Wilkinson began recording these oral histories after the first Nation reunion was held at the school in 1966. "I brainwashed everyone there and began collecting information," she said. From abstracts, an 1878 County Atlas, and a History of the county, she culled other information. But for the history of the past 66 years, she stated, it's up to me. In the 1900's, frame houses were built to replace the log cabins. The sheriff raided stills in the hills during prohibition. Mrs. Wilkinson became a professional seamstress to pay her way through the depression.

In the 1940's, when electrity became available, Mr. Wilkinson said the community signed up the school so they could meet their quota and qualify for a rural electrification line. The government also stepped in and made the district patrons install windows on the west side of the building so the students' desks could be placed facing the east with the light shining in over their shoulders.

But by 1950, Mrs. Wilkinson said that modern civilization had taken its toll. The carpenters and skilled laborers had moved away seeking higher paying jobs. And that year, Worth County schools were consolidated and the Adams school was closed. The desks and everything were auctioned off. They stopped having church there. "It all stopped then, " she said.

Her husband bought the 20 acres of land on which the school sits and converted the building into a house for his hired hand. When his hired hand died he intended to store hay in the school, but Mrs. Wilkinson protested. "I wouldn't let him. I went to school there and all five of our children went there." Although their family used the grounds for Easter egg hunts each year, the building sat empty until 1974, when Mrs. Wilkinson's doll collection outgrew her home. She moved some dolls there, then a wood cook stove like the one she and her husband settled with , then a pie cabinet. Now in the red schoolhouse, they have on display many of the furnishings used by their ancestors who settled the area.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This object is a cast iron pillar, four feet six inches long and squaring twelve inches at its base, and eight inches at its top. "Missouri" is imprinted in the south side of the marker; "Iowa" on the north side of the marker; and "State Line" is imprinted on the east side of this marker. This marker is the western-most boundary marker between the States of Iowa and Missouri.

#### SPECIFIC DATES 1851

BUILDER/ARCHITECTU. S. Government Survey Teams

#### STATEMENT OF SIGNIFICANCE

The Territory of Iowa was part of the Territory of Michigan from 1834 until 1836 when it was made part of the Territory of Wisconsin. (1) In 1838 the new Territory of Iowa was formed. The United States Government wanted the boundaries of Iowa clearly defined, so Major Albert Miller Lea was sent to survey and map the boundaries. Lea laid out four different lines, any one of which could be considered the southern boundary.(2) This discrepancy led the officials of both Missouri and Iowa to contest the survey. Iowa claimed that the "rapids of the river Des Moines" referred to a rapids in the Mississippi River which was commonly known by that name, rather than a rapids in the Des Moines River itself, as Missouri claimed. They laid out their own boundary which was considerably south of the Indian boundary line.

A rough map might present a more clear picture of what was developing.

The area in dispute spanned some 10 or 15 miles and was sparse-A major issue was the ownership and right to tax the ly settled. numerous honey trees in the area. Trouble began to boil in the late summer of 1839. Governor Lilburn Boggs of Missouri and Governor Robert Lucas of the Territory of Iowa both issued proclamations, warning the officials of the other government not to extend their jurisdiction into this territory which was claimed by both. A Missouri farmer cut down three bee trees in the disputed strip and escaped to the safety of Missouri. He was not caught but an Iowa court ruled a \$1.50 judgement against him. (3) In the meantime, Sheriff Uriah Gregory of Clark County, Missouri, felt obligated to collect taxes in the area. His first attempt met hostile reaction from the settlers in the Farmington (Iowa) area and he retreated. He returned some time later and was promptly arrested .and taken to jail for "usurpation of authority". (4) Sheriff Gregory was quickly released but tempers were already rising and calls for military reaction were heard.

Governor Boggs in Missouri called upon the State Militia. About 600 Missourians went into camp on the Fox River near what is now Waterloo, Iowa. It was extremely cold and the snow was deep. The state had issued no supplies and the only blankets, food, and other provisions which the Militia had were those that had been stolen from a store in LaGrange. The outraged merchant was later partially reimbursed. (5)

Governor Lucas requested that Congress be allowed to draw a line, but this offer was rejected by the enraged Governor Boggs. (6) Lucas mobilized his own militia and war seemed imminent. About 300 Iowa militiamen camped on the other side of the Fox River. This group was headed by Lucas himself and one of his captains was James W. Grimes who later served as a senator from the state of Iowa. (7)

It was proposed that Sheriff Gregory, accompanied by the militia, should again attempt to collect the taxes, thus bringing about a battle. Cooler thinking prevented this drastic action and a peaceful settlement was accomplished. A truce was declared and the militias held the two governments responsible for this near tragedy.

The dispute over the boundary location was not fully settled until the United States Supreme Court ruled on the case in 1849. The opinion of the court in the case of Missouri vs. Iowa and Iowa vs. Missouri, was read by Justice Catron in that year. (8)
