

Lake of the Ozarks State Park

Accessibility Information

The symbol  indicates that the specified area is fully compliant with Americans with Disabilities Act Accessibility Guidelines (ADAAG).

Park Office

The park office is an example of the 1930s Civilian Conservation Corps (CCC) craftsmanship seen throughout this park. The handicap parking and paved pathway is connected to the entrance by a boardwalk, with a wood deck covering the original flagstone porch for its protection and to provide a smooth transition between levels.

Inside, you will find an abundance of park information and helpful park staff. A telephone with volume control is located on the porch for your convenience.

Horse Stable/Concession

Although parking is available, this area has not been modified except for an accessible vault toilet.

Hwy. 134 Picnic Area

This lightly wooded picnic area has a 1930s restroom that has been modified for the use of all visitors.

Just down the concrete pathway, past the accessible drinking fountain, playground and horseshoe pit, is a historic rock shelter with a flagstone floor. The shelter accommodates 100 people and has electricity, extended-end tables, a group grill and a fireplace. The group grill and electrical outlet may not be accessible to some users. Two picnic sites in this area are available with concrete pathways, pedestal grills and extended-end tables.

Handicap parking is provided. The closest telephone is at the campground entrance.

Campgrounds

As you enter the campground, you'll see a woodlot/laundry on your right. Handicap parking spaces are offered; however, some visitors may need assistance. Telephones are located here for your convenience; but are not equipped with volume control. The checkstation has car-side convenience or you can pull in to a handicap space to access the information kiosk located here. Just beyond the kiosk is the accessible dumpstation. Ten updated campsites are scattered through this wooded area with accessible showerhouses within driving distance. Water hydrants with concrete pathways have been provided in convenient locations. Two vault toilets, one in Campground 1 and one in Campground 4, are also available for all users and are open year-round. Both playgrounds in the campground have been updated to provide greater access to all users.

The amphitheater is located midway through the campground and offers a handicap parking space and an accessible trail to the seating area.

Lake of the Ozarks State Park Accessibility Information

Public Boat Launch-Main Park Side

Boat launch area amenities include a courtesy dock, a concession operation offering boat fuel, rentals, snacks and bait, and an accessible vault toilet. Handicap parking is available for the concession and the toilet. The launch itself is at a 9.5 percent slope and the trailer parking is located on a hillside with an average 4 percent slope.

Two accessible shaded picnic sites with paved pathways overlook the lake and beach. The closest accessible phone is in the campground.

Public Beach #1

The CCC originally built this beach area back in the 1930s, as can be seen in the architecture of the changehouse and the old boathouse. Although updates have been done to the changehouse, some users may need assistance as the original stone floors and steps still exist. The picnic sites are located on a lightly wooded hillside overlooking the beach and lake. The playground in this area has not been modified.

Accessible entry to picnic sites and the beach is from the vault toilet parking area at the boat launch along a paved pathway. Entry is to the sand area only.

The Outpost Camper Cabins

This unique approach to rental cabins has become quite popular, and we invite you to see why. In a clearing of the woods is a modern central showerhouse. Pathways lead off into the woods to rustic, yet modern cabins that sleep six. These cabins have no electricity or water, but do have a small wood stove, futon bed, sleeping loft and a porch overlooking the serenity of the woods. Outside each cabin is a picnic table and fire grill. One cabin has level parking, an accessible pathway and entry ramp for those with mobility impairments. A public telephone is located near the showerhouse.

Group Camps

Lake Ozark State Park has four group camps.

Camp Rising Sun is being modified to have accessible restrooms and showers in each cabin. The dining hall, recreation hall and amphitheater are connected to the cabins and playcourt by paved pathways. Parking is gravel. Users may drive to the beach, which is mixed gravel. The vault toilet at the beach is up a rise and some users may need assistance.

Camp Clover Point has been modified to provide access to all users. Paved pathways allow for circulation between all buildings and amenities. The dining hall and recreation hall have boardwalk entrances to achieve a smooth transition between levels. Two barracks have modified bathrooms. Other accessible restrooms can be found in the recreation hall and the craft hall. Some visitors may need assistance when using the beach area, which has not been modified.

Lake of the Ozarks State Park Accessibility Information

Camp Pin Oak is located on a narrow ridge and has not been modified except for access to the dining hall.

Camp Red Bud has not been modified.

Grand Glaize Area

Beach Area

The beach house, with accessible change rooms and restrooms, is served by an asphalt parking lot with four handicap spaces. Paved pathways lead from the parking, through the beach house and down to the sand. A shady sitting area is provided. Scenic paved pathways branch out from this area, leading to a picnic area and the marina area.

Marina Area

The marina store provides such amenities as handicap parking, paved pathways, accessible restrooms, groceries, supplies, gas and rentals. Five boat slips outfitted with handholds are offered for those with mobility impairments. A public telephone is located on their waterside deck, where you can enjoy lunch overlooking the lake.

Boat Launch

The paved boat launch has an average 7.7 percent slope with an adjacent courtesy dock. Pathways to the courtesy dock have not been modified. The launch is served by four handicap trailer parking spaces. An accessible vault toilet nearby has handicap parking spaces, a water fountain and paved pathways for your convenience.

Lower Day-Use Area

This lightly wooded picnic area has a view of the beach and is connected to the beach area by a picturesque bridge and pathway. All picnic sites have paved pathways, hard surfaces and pedestal grills. Three sites have extended-end tables. Further amenities in this area are an accessible playground, vault toilet and a water fountain. Three asphalt handicap parking spaces are offered. The closest public telephone is at the marina store.

Upper Day-Use Area

A 1930s shelter peers out over the lake from its woodsy hilltop location above the lower day-use area. The shelter is equipped with paved pathways, extended-end tables, a group grill and a water fountain. It can accommodate 100 people. Two paved handicap parking spaces are offered. An accessible vault toilet and two picnic sites are nearby. The closest public telephone is at the marina store.

Lake of the Ozarks State Park Accessibility Information

Pa He Tsi Boat Ramp

The ramp is paved and has a slope of 8.3 percent. The courtesy dock has not been modified. All parking in this sunny area is level and of compacted gravel. Three handicap spaces adjacent to the accessible vault toilet are offered for your convenience.

Ozark Caverns

Visitor Center

This rustic, yet modern building is the center for cave tours, audio/visual presentations, interpretive programs and park literature. A paved pathway runs from the level parking lot with a handicap space to the entrance. Inside, you'll find helpful staff, exhibits of local wildlife, an accessible water fountain and restroom and a waiting room for the cave tours.

An accessible picnic table is located just outside the visitor center. A boardwalk extends across the fen from the visitor center to the cave opening. The regular tour is one-half mile long on mostly hard-packed substrate. Travel is mostly level with the exception of two 10-12 foot sections with an 8 percent slope. Periodically, heavy rains will cause gravel to wash across the trail. Some visitors may need assistance.
