

## Pershing State Park Accessibility Information

The symbol  indicates that the specified area is fully compliant with Americans with Disabilities Act Accessibility Guidelines (ADAAG).

### **Park Office**

The park office is located at the south end of the park. One handicap parking space is provided adjacent to the entrance.

### **Locust Creek Wetland Boardwalk**

The boardwalk's parking area provides one handicap space and is mostly level to the bridge nearby. The bridge crosses Locust Creek and is planked with some gaps as wide as two inches. The boardwalk, located across the bridge, is four feet wide and constructed to be accessible with benches at intervals for resting. This 1.5-mile long trail is wonderfully interpreted.

### **Campground**

One partly shady basic pull-through site and one mostly sunny electric site are accessible. Each site provides an extended-end table, lantern post and fire ring. Accessible water hydrants are conveniently located nearby, and the dump station has been modified for accessibility.

### **Showerhouse**

The centrally located showerhouse offers mostly level, paved parking with one handicap space. Inside are side-transfer toilets and accessible lavatories. Two roomy showers offer grab bars, and one has a lower showerhead with a seat. The faucet handles are somewhat rounded, which may cause difficulty for some users.

The laundry has a folding table and top-operating machines. Plenty of maneuvering room is provided.

Outside, an accessible information kiosk provides a public telephone and a shady place to sit.

## Pershing State Park Accessibility Information

The amphitheater is located near the showerhouse but access is across natural turf on an average slope of 4.8 percent.

### **Shelters**

The enclosed shelter has one paved, handicap parking space adjacent to a pathway leading to an accessible picnic site, a group grill and the entrance. Inside you'll find an accessible restroom with a side-transfer toilet and lever-handled faucets. The shelter provides electrical outlets, lights, a range, refrigerators and extended-end tables and is heated.

The open shelter also has one handicap parking space. A paved pathway leads past an information kiosk to the shelter, which has electrical outlets, lights, extended-end tables and a group grill. One half of the shelter is screened in. This area also offers a water fountain, a playground and a vault toilet, all of which are accessible and connected to the open shelter by a patio.

### **Day-Use Area**

The day-use area consists of individual picnic sites, a playground and a vault toilet. No modifications have been made at this time, and all access is across natural turf.

### **Special-Use Area**

This area is a primitive camp area with a paved parking lot. A vault toilet, water hydrant, picnic tables, pedestal grill and a fire ring are provided. All access is across natural turf and modifications have not been made.

### **Hwy. 130 Archery Area**

This area is of natural turf and has had no modifications for accessibility at this time.
